U.T.S. Plays Host To Chisholm on Friday

Brigadier G. Brock Chisholm, Di-ector General of Medical Services, Canadian Army, will be the guest speaker at the annual meeting of the Welfare Council of Toronto and District at the U.T.S. Auditorium on Friday, Feb. 11, at 8:15 p.m. The topic of his address will be "Wartime Research Sharpens Perspectives for Community Service."

Brig. Chisholm has a background of

military service in the Great War, during which he won the Military Cross and Bar. He took a medical course at the University of Toronto and did had been on excursions of her own, of lat the University of Toronto and did a slightly different sort. She extripost-graduate work in psychiatry at cated herself from this new dilemma Yale University and in Great Britain, by slipping, with guileful laughter, a polisoned aprice in her lord's wine bowl.

We judged that the worthy prince must be on the point of expiring, from the dignified contortions he went through at the banquet table in the closing scene. Feeling of the same closing scene. Feeling of the same Canadian National Committee for Mendisposition, we wended our way oxygenwards, buying a tangerine and tipping the towel merchant to keep his distance. Board.

This meeting will be open to the

Brain Food Required By Athletic Knights

There is another Athletic Night this Saturday. Everyone knows that. But do you know that you are supposed to bring at least one book or magazing besides your ideal?

A letter from a prisoner of war in West Africa who was released after the British took over, expresses deep ap-preciation for the books that were sent preciation for the books that were sent by the Imperial Order of the Daughters of the Empire. "You can't imagine," he writes, "just what it means to us to be able to read, while we're so far from civilization (in our sense of the word). It's such a change to see honest-to-goodness. Furtile, write from the to-goodness English print from the eternal sun and sand and sand and sun." He furthermore states that the only English books available were sent by the I.O.D.E. That does not mean, however, that only English books are wanted; French, Spanish, Italian and German books are in great demand for educational purposes. Eight thousand books have been sent out on the average. VIC V.C.F.
A Skating Party for all V.C.F.ers
will be held tonight at the Stadium. We
will meet at the North end of the
covered Stadium at 7:30. At 9:30 there
will be refreshments and a sing-song at
Wymilwood. Everybody is welcome.

CHRISTIAN SCIENCE ooks have been sent out on the average benevolent donors begging them to send some books instead of the food. The poor fellow was by this time suffering from gastric indigestion and intellectual

> Love stories are in great demand Please don't bring Pansy & Bessy books is you can help it. After all the minimum "chronological" age is 18. The soldiers and girls in uniform have The solders and girls in uniform have the same interests as we at home have— they haven't changed completely. A sailor, after dubiously scrutinizing the title "Lady Rose's Daughter," shook his head, scratched his ear and sighed, "What would I do with her?"

> "What would I do with her?"
>
> The books collected on Saturday night will be distributed all over Canada. Some will go to Canadian personnel in internment camps. If there is any shipping space, they will go to Italy, Africa and England. The Students' Council has agreed to help the LO.D.E. to raise "brim-food" for the armed forces. The Naval Service in Ottawa alone has requested 25,000 volumes for the libraries of the elight volumes for the libraries of the eight bases in the East and at least 10,000 for

O.C.E. Dean Resigns Post Rev. Bodger To Accept New Position As Director Of Education

Six Prominent Educationalists Will Assist in Solving Prob-lems Facing New Government Department

NEW SCHOOL PLAN

Dr. J. G. Althouse, newly appointed Director of Education for the Province of Ontario, told The Varsity yesterday that he had submitted his resignation to the Board of Governors as Dean of the College of Education, a position which he had side position

which he has held since 1934.

As Director of Education Dr. Althouse is responsible only to the Minister of Education. Six other prominent educationists have been appointed to work under him in carrying out the

Minister's decisions.

Dr. Althouse defined his new duties as, to advise the Minister of Education and to put his decisions into effect. Mr. Drew has declared that "the government is determined to give the

people of Ontario vigorous and con-structive leadership in education."

Premier Drew, as Minister of Educa-tion, stated that many problems face the department, especially that of text-books. "The aims of education must emphasize the development of personal the community," he said. As a step towards fulfilling this purpose the soundness of all texts must be secured, interand S. D. Holmes, Science master at Jarvis Collegiate, has been named editor-in-chief of text books, a posiwhich has been vacant for some

The improvement of teachers' salaries and the provision for equal educational opportunity are among some of the other problems which will face the reorganized department, the Premier

Dr. V. K. Greer will take over the position of superintendent of elementary education and A. G. Hooper has been named superintendent of secondary education. Three assistant superintendeducation. Three assistant supermensions, Dr. J. D. Campbell, C. F. Cannon and F. S. Rivers have been appointed to help Dr. Greer. Major J. P. Cowles will continue as acting Deputy Minister in the absence of Dr. G. F. Rogers, due to illness.

VARSITY STAFF

Members of The Varsity copydesk and senior reporters are asked to see Monday's Varsity for announcement of a brief but important meeting for certain members of the staff to be held on Monday afternoon at 4:30.

Gauge Blocks

Steel gauge blocks accurate to ten millionths of an inch and permitting measurements at increments of a tenth of a thousandth were described by Mr.

of a thousandth were described by Mr. J. A. Harrington yesterday afternoon at a meeting of the American Society of Mechanical Engineers, Student Branch. Mr. Harrington, who is Chief Engineer of Continental Machines, Inc., Minneapolis, and president of The Sawage Tool Company, Sawage, Minnestota, had come to Toronto to address the Senior Branch that evening. "The last war was fought on a thousandth of an tinch, this one is being fought on ten thousandths of an inch, this one is being fought on ten thousandths of an inch, thousandth of a sound-slide-film lecture on this sub-

a sound-slide-film lecture on this suba sound-slike-him lecture on this sub-ject. Although Eli Whitmey presented mass production as early as 1789, his interchangeable gun parts could not be interchanged with those from other plants, simply because there was no way of interpreting the standard inch ac-

of interpreting the standard inch accurately. Each plant had its own
standards.

Mass production as we know it began
about 1913, with industry's adoption of
measurement accuracy produced by
optical means. Gauge or "Joe" blocks
produced by a lapping process and tested
in this way are so accurate that when
moistened with oil and "wrung" together they will stick and resist a
direct tension load 50 pounds. The
standard set comorises 83 parts and its standard set comprises 83 parts and its various combinations will give 100,000 different measurements.

different measurements.

The application of a set is increased greatly with the addition of some accessories. Two "verniter" blocks decrease the measuring increment to ten millionths of an inch. These are essentially mating wedges which are moved laterally according to a scale on their sides. A five-inch sine bar enlabes one to measure angles less than 60 degrees in increments of one minure. Serthers and trammel points can be 60 degrees in increments of one infinite. Scribers and trammel points can be used to describe accurate ares and check the pitch of a lead screw. A company possessing this equipment can not only use the gauge blocks to check its snap gauges, but in five minutes can even compose new ones.

Official Will Describe WartimeBritain, Monday

Mr. J. W. Kelly, National Publicity Director for the Canadian Red Cross, will give an address on "Britain at War," Monday, Feb. 14, at 230 pm. in Room 117 of the Household Science Building.

In his speech, Mr. Kelly will be concerned with the work of the Red Cross and he will discuss the use which is made of all articles produced by the various groups of this organization.

To Be Feted At Luncheon

The Rev. J. D. Bodger, member of the Legislative Council of New Guines and adviser to Lieut.-Gen. Douglas MacArthur, who will speak in Hart House Theatre tomorrow at 1 p.m. will be the guest of honor at a luncheon in Hart House before the speech.

J. R. Gilley, Acting Warden of Hart House, will be the host on behalf of Hart House. Dr. J. H. Cody, President of the University, the secretary Are Vital in War acting comptroller and members of the Board of Stewards of Hart House, as well as Dr. W. T. Brown, Chancello of Victoria University, the Rev. F. H. Cosgrave, Provost of Trinity College and other distinguished churchmen wil be present.

For 16 years a missionary in New Guinea, Mr. Bodger is an Englishman who has studied medicine, surgery, printing, pedagogy and many other things before taking up his work for the Anglican church. His position in the church in New Guinea has given him the opportunity to be of great technical assistance to the allied forces fighting there under Gen. MacArthur.

Law Club Wins Court Decision In Notorious Defamatory Libel Case Against The Varsity, Sports Editor

Editor Explains Moot Court Hoax

Publicity given the recent Libel case of the Law Club and J. H. A. McGuinness versus The Varsity and P. Shackleton has resulted in an unintended hoax. The Varsity first heard of this soon after the suit was announced, but the Editor thought it best, in the interest of the Law Club's carefully simulated plans for the trial, to keep up the not-too-illusive illusion.

For those who harbor indignation

over the hoax the Editor points out that references were made to the Moot Court on all occasions on which the case was mentioned in The Varsity's news columns, and for those who did not know what that institu-tion was an obvious hint on the seriousness of the case was contained in the reference in the first story to the damages awarded in the 1939 case.

The Varsity Ordered to Suspend Publication, Pay Fine and Issue Tickets to Jurymen for Two Future Events; Jury Announced the Verdict in Hushed Courtroom After Ten Minutes' Deliberation

250 STUDENTS AT HEARING

The Varsity has been ordered to suspend publication from May 1, 1944 until September 1, 1944 by an injunction appended to last night's decision of the University of Toronto Moot Court in favor of the Law Club and J. H. A. McGuinness in their libel suit against The Varsity and Phil Shackleton.

In addition to the decision that The Varstiy award the Law

PERSECUTED

The Varsity cannot help but feel that it has been persecuted, in view of the overwhelming layers of damages levied upon it by the Moot Court at last night's trial. However, we hesitate to make any really assertive remark on this subject until we have consulted our suave and skilled counsel concerning the possible defamatory angles of the matter.

However, we should like to reveal the facts behind this most recent and highly successful Moot Court case for the benefit of an amazing number of dulleyed readers, or rather perusers, of The Varsity who have taken the whole obvious hoax seriously. No, my dear little Virginia (and Virgil, for that matter), we weren't in earnest. The whole thing was cooked up in a sportive vein at the instance of the Law Club who wanted an occasion for their favorite indoor sport. The key-log of the whole tangle was the AD NAUSEAM edition of the Speaking of Sport Column by Phil Shackleton. After Speaking of Sport Column by Phil Shackieton. After it appeared The Varsity was approached by Syd Robins, President of the Law Club, with the suggestion that if The Varsity minded its manners a little less we could doubtless work up a good thing together and give the Moot Court a spectacular climax for its dogged, but little known annual series of mock trials. The Varsity, as is obvious, complied. The S.O.S. reiterated its contentions and applied comment with a trowel, and when the writ finally issued the editorial columns sounded the battle cry and The Varsity (much to the later worriment of its counsel) leaped feet first into the legal

fray. We would like to commend J. H. A. McGuinness for the good humor with which he has submitted to personal attack in the interest of his favorite indoor sport, and extend our congratulations to him, his colleagues and our own counsel for the able manner in which they play that game. Although we must maintain all possible respect for judges and jury as legal institutions, we cannot speak highly of them at this time due doubtless to certain prejudices we are harboring, but the consumate dignity of the bench and the cheerful submission to unofficial subpoenas by the jury were notable.

As for those damages. To the judges we cheer-fully extend the stipulated invitation to our next party, but append also the notification that they are to consider themselves in no way exempt from the besetting horrors of membership on a party committee. To the jury we say that we will gladly pay the damages they demand if they will individually sign a document recognizing that The Varsity has paid in advance for the right to defame them on at least one occasion each. As for J. H. A. McGuinness and the Law Club, they will be paid just as soon as the green ink dries.

Dream Come True

We note with satisfaction the first appearance of radio on this campus, even though it does concern itself only with the presentation of an exhibition keyboard. basketball game. When the Canadian Broadcasting basketball game. When the Canadian Broadcasting Lisat has the fault of announcing a pure theme, Corporation goes so far as to pack its grips and come which could sing by itself, and then embarrassing

to Hart House to take what we can offer it puts itself in grave danger of approach from other campus organizations who also have wares which might profit from an airing. Or do we overestimate the initiative of such organizations and their eagerness to take advantage of opportunity's knock.

The proposed broadcast of two Varsity basketball games is in truth the realization of a dream and the outcome of long planning. Full credit for the scheme goes to the two dreamers and planners, the absent Director of Athletics, Warren Stevens, and announcer, Roy Dilworth. It is regretable that Steve's new duties with the Air Force will not allow him to witness the first broadcast of his Blues in action, but perhaps the fulfilment of his crusade will enable him to follow the game play-by-play through the eyes of his co-planner, Mr. Dilworth.

We recently treated ourselves to a discussion of the present status of radio on the Canadian campus with particular emphasis laid on the lack of any radio activity here at Toronto. In doing so we hoped to spur on any latent ambition hiding in campus dramatic and musical organizations. To date there has been no audible reply from the student body. Instead we witness the CBC approaching the Athletic Directorate and asking for the privilege of broadcasting a University event. With the establishment of a new station, CJBC Toronto, it is only reasonable to assume that the CBC might have the odd quarter or half hour to devote to a presentable University program. The opportunity is plain to be seen. The only question is, have Varsity students and their organizations lost that one-time energy and zest for new fields to conquer?

WANTED

Even the most casual reader of The Varsity must have been struck in the last few issues by the amount of space accorded to novel advertisements appealing to Athletic Night frequenters to bring books for the troops along with their favorite blonde The Varsity, the Students' Adtomorrow night. ministrative Council and the Athletic Association are all doing their best to convince the student body of the urgent need for books and magazines which may be sent to members of the armed forces. A special effort is being made to collect a sizable contribution over the period of five weeks covered by Athletic Nights. Since they constitute the largest gathering of students on the campus it is only logical that they should be selected as the medium for the collection of books. It is also a well-known fact that student homes and residences are well-supplied with unused books and outdated magazines. We'll wager even last year's Undergraduate would be appreciated in some isolated fox hole or desert tent.

Granted that the average student has access to an unwanted magazine and feels sufficiently benevolent to approve of donating it to the I.O.D.E. for distribution among the troops, there is still the problem of memory. Present standards of social procedure do not in any way induce the average ed, setting out for an evening at Hart House, to think of taking a magazine along with them. We can think of no remedy for this situation beyond urging every student to indulge in a bit of strenuous mental exercise right now and hope for the best results. Then again, the ladies in question might assist by each keeping her date waiting long enough for him to get so interested in some piece of available literature that he will carry it over to the street car for further scrutiny.

Dynamics

Eaton Auditorium

Once in a while a new star of greater than ordinary magnitude swims into our ken. Such a one was Witold Malcwzynski, Polish pianist, who layed at Eaton Audiorium last night. This protege f Paderewski is something quite new in our xperience.

He played a program almost completely in the classical tradition, beginning with Bach's Chromatic Fantasy and Fugue. Building the introduction in a gigantic tonal pattern, he moved into the quiet grace of the fugue and unravelled the counterpoint with almost mathematical detachment. The Liszi Sonata in B Minor received equally massive treat-ment, utilizing every sculptural resource of the

PART I

By Phil Shackleton

RETURN TO NAUSEAM ...

which lar overshadowed that of the plaintiff. Gentleman, we salute you.

We have no doubt, however, that the case itself was fixed. (Sue us!) The Law Club, running its own court and judging its own members against an outsider, could not but be prejudiced. Furthermore, The Varsity could well afford to lose a meaningless suit, but the Law Club would have suffered great loss of face had they been dealt the sad end of the verdict.

This comment is published with no malice in mind. It is only that we deem it necessary to inform the student readers of the true situation in order that they realize the seriousness of the underlying and original matter. Since the first controversial column was published a great many Law students have revealed that they agree with us and our arguments. Even the Law Club's first letter did this. Since that time the Law scheme has been scrapped. At least for the time being. We know that the Law students are looking forward hopefully to the day when their numbers will justify a separate faculty. Until that day the Law students should realize on which side their athletic bread is buttered.

PART II

By Bill Rawlinson

This Saturday evening is Athletic Night in Hart House once more. The hosts for the night, an unusual trio we will admit, Dentistry, Trinity and Wycliffe, promise to provide a full program of entertainment as a salute to the men in Khaki,

CONSIDERATION ...

All men and any others who might accompany them, are requested to wear either blazers, sweaters, plaid shirts or sports jackets in order to add color and an informal atmosphere to the gathering. It is once more stressed that the gate closes sharply at 9:30 o'clock and that after that hour all newcomers will be forced to escort their fair ladies elsewhere; beware, for the weatherman forceasts a cold evening outside. Once inside the building everyone will please deposit their magazines and books in the box provided; but for goodness sakes men, let your companion also bring one—she can carry it. As a novel attraction a substantial proportion of the last half of the main basketball game will be broadcast. Mother might be listening, so be careful what you say when you are near the Mike. Oh, by the way, we noticed during the last two Athletic Nights many lonely wolves walking the halls. So come on out, girls, and entertain the troops.

COURSES OPEN ...

COURSES OPEN ...

Mr. Shackleton yesterday outlined the events arranged and to this we can only add our bit. The main feature of the evening will see the basketball team from Assumption College tangle with the undefeated Varsity squad. The records of the visiting players is admirable and we request you to watch especially their top scoring men, Ado Rorai, a 17-year-old star, and Gino Savran, the captain.

At the same time in the upper gymnasium the mat and ring will feature the grunt and groaners and roundhouse swingers in a display of their manly arts of self-defense. George Lewis, Will Henry and Roberts are a few of the very capable artists participating in this Senior Boxing and Wrestling Assault.

The program for the pool is certainly a diversified one. Starting at 8:15 on the dot some of the highly skilled members of the Dolphinettes, among them Ken Tilley and Evelyn Buchann, diving champions, will provide half an hour of thrilling entertainment. This will be followed in turn by a swimming meet between Camp Borden and Varsity, a water polo game to decide which is the senior service in the pool, the U.N.T.D. or the C.O.T.C., and a comedy diving act performed by Leading Seaman Max Hurley.

PLAN ...

The Athletic Events will continue from eight o'clock until ten,

WHAT IS YOUR W.P.? (Water Power) . . .

A week ago last Thursday saw twenty (20) swim enthusiasts from the University School of Nursing (three cheers for Nurses!) making full use of the U.T.S. pool. Shiela Williams took top honors in the style and ornamental swimming, with Eleanor Cooper second in both events. Eleanor Cooper and Marion Slater are the Nurses! Champ'een divers. The 50-yd. Iree style was taken by Kay Damon, the 50-yd. breast stroke by Nancy Carrol and the 50-yd. back stroke by Eleanor Cooper.

Tripity, too, held a fine arthuistic to the cheer of the stroke by the stroke of the stro

by Eleanor Cooper.

Trinity, too, had a fine enthusiastic turnout for their college meet a week ago Thursday. Pat Patterson and Marg. Fletcher came out on top in the diving and style competition. The 50-yd, free style was taken by Betty Hungerford in 29.7. Mary Cocherane took the 50-yd. breast stroke in 33. and Marg. Fletcher was the 50-yd. back stroke winner with a time of 36 seconds. (Two lengths of the U.T.C. pool is called 50 yards for the purposes of preliminary meets but it is actually not quite 50 yards.) Marg. Fletcher was Trinity's outstanding swimmer of the evening.

swimmer of the evening.

Physio turned out in fine style for the O.T. and P. preliminary meet at the U.T.S. pool. O.T. was represented by one lone swimmer. We will refrain from any obvious remarks (as such things appear dangerous, especially in sports columns) and hope O.T. will be able to muster a little athletic co-operation at least, in the near future. Shiela Riddell of Physio was the outstanding diver of the evening, although Betty Dawson, also of Phisio, looks good. Shiela Riddell also took top honors in style and ornamental swimming. Mary June Myles, another Physiotherapist, took the 50-yd free style in 32.4 seconds. Betty Dawson was first in the 50-yd. back stroke in 28.2 and also first in the 50-yd. beats stroke in 41.6 seconds.

Butherapy LLC.'s second hockey team is definitely out of the

and also first in the 50-yd, breast stroke in 41.6 seconds.

By the way... U.C.'s second hockey team is definitely out of the running after their encounter with Trinity yesterday afternoon when they were taken 3-1. Jean Mann of the Royal College scored a lone goal unassisted. Mary Eleanor Cockeram of St. Hilda's, along with Mary McPherson and Helen Johnson, earned the Saints' totality.

There is going to be a feminine basketball team to play the WRCS from Ottawa on Athletic Night, Feb. 29. Hence will those gals who have been notified by their basketball rep turn out for a practice at 5 o'clock at O.C.E. gym. The coach will be Helen Guerney.

Any time's SHOPPING TIME!

YOU WHO CHOOSE your friends with discrimination, take note. A fur coat is a friend of long wearing, should therefore be chosen with some hesitancy and considerable discretion. A fur coat by Creed is unquestionably in the aristocracy brackets. It's a coat which has been built on the theory that perfection alone is good enough for the fection alone is good enough for the faction alone is good enough for the lucky lady who is to wear it, and there-fore to own a Creed fur coat is the ambition of many and many a clothes-

SEE YOU TOMORROW at the King SEE YOU TOMORROW at the King Edward The Dansant... and tohy not! Blues Defeat Assumption In Saturday Cage Thriller To Maintain Win Streak

Varsity Players Assure Victory by Two Baskets in Last Minute of the Year's Hottest Athletic Night Game

SCORE IS 39 - 35

In a thrill packed finish that would do credit to a Hollywood scenario writer, the Varsity Blues edged out a powerful basketball quintet from As-sumption College in Windsor, by a 39-35 margin Saturday night before an 39-35 margin Saturday night before an enthusiastic borde of followers. With less than a minute to go and the score tied at 35-35, both teams strove desperately for the winning basket. Then, dramatically, guard Don Pringle netted the winner from close in after taking a short pass from Joe Ryan. A few seconds later, Doug Spry sank another to assure the Blues of their sixth straight victory and leaving their understanding their properties. straight victory and leaving their unde-feated string intact.

The visitors floored a confident and

The visitors noored a confident and experienced team which outplayed the Blues for the first ten minutes of the game. Their offensive tactics proved puzzling to the locals as did the tricky playing of team Captain Gino Sovran, who amassed a total of 17 points to lead

the scorers for the evening.

The Border City crew also displayed a dogged attitude under the basket by a dogged attitude under the basket by repeatedly picking the ball off the back-board and also by tipping the ball back towards the basket after a miss. This shooting kept the eventual winners in hot water throughout the game. Along with the high scoring Sovran,

Rolton Wade and Ado Rorai proved very effective for the losers. Each came up with five points.

Reliable Don Gibson lead the home attack with 12, followed closely by Joe Ryan who played the entire game without relief. Ryan picked off eight points. Team Captain Ken Tettmar was eredited with six before he was banished late in the second half after

his fourth foul.

The opening moments of the tussle

up Britain's health standards to a level higher than that which held in prewar days, Dr. L. B. Pett, director of nutrition services, Department of Pensions and National Health, said Saturday. He spoke to a press conference prior to his address that evening to the Royal Canadian Institute.

A graduate in biochemistry from the University here who has spent more than two years in Britain recently. Dr. Pett told newsmen that Britain's national-scale food program-which provided for equitable distribution of food for all classes according to need-had in the club was limited to male mem produced "real miracles."

The miraele, said the Doctor, was that instead of slipping, the health standard had soared, and this was all the more startling because of the social conditions with which the people had now to combat. He cited such deplor-able conditions as uncleanliness due to the country's lack of soap, poor physical resistance due to lack of fuel and a possible mainspring of disease caused by

possible mainspring of disease caused by crowded housing.

"History has shown that there is an important relationship between food and war," he said, "whether it be referring to an army marching on its belly or the civilian of today struggling with ration Causens and food paries.

coupons and food prices.
"But even Britain's efficient food planning doesn't permit dictatorial food distribution," he continued. "People bave certain tastes and babits. If you wish them to retain their health under wartime rationing and shortage conditions, we must deal the production of the control of t you must educate-or re-educate-their food habits."

The University Press Club will hear Dr. H. A. Innis, Head of the Department of Political Economy, at its first luncheon meeting of this academic session to be held today at 12:30 p.m., in Diana's Restaurant.

The Press Club is made up of members of The Varsity staff who meet to hear addresses by prominent journalists or men of known authority on journalistic subjects. The club attempts to make some addition to the informal journalistie training offered by older staff members and mastheaders on The Varsity. Until last year, membership bers of The Varsity staff, but last year the overwhelming majority of womer staffers caused a reversal of this ruling

Professor Innis last year gave a paper before the American Society of Economic History on the subject of the role of newspapers in history. Dr. Innis has made a study of the development of the newspaper and its influence on politics and education. In view of this work it was felt by the Press Club executive that an address by him would be of extreme value to its members.

Members of The Varsity who are planning to attend the luncheon and have not yet signed the list in the New Office are requested to do so today.

COMMUNITY NEEDS AND RESOURCES

Women taking this course will please consult their bulletin boards for time and place of field visits.

New Guinea Hardships Described By Bodger

The greatest foe of the Allied cam- | per week. He has been called a compaign in the south Pacific is ignorance, the Reverend J. D. Bodger said in an address at Hart House Theatre on

Mr. Bodger, a member of New Guinea's Legislative Council and adviser to Lieut. Gen. Douglas MacArthur, has spent 16 years as a missionary in New Guinea. He is an unqualified medical doctor, surgeon, dentist, engineer, printer and farmer, and has done a great deal of work befriending the natives and enlisting their help in the

natives and enisting their neip in the present war.

Rev. Bodger was flown from Australia to the United States by bomber and his trip was arranged by General Mac-Arthur. He has been speaking in the United States on behalf of MacArthur with a view to enlightening the American people as to conditions in the South Pacific.

The ignorance of the white man has caused much innecessary hardship to American and Australian troops, said Mr. Bodger. As an example of this he Mr. Bodger. As an example of this he cited the long, ardous march of a company of Americans who travelled through the jungle for 49 days to reach Buna. The Americans expected to encounter Japanese and were in great fear of the native population. They were ignorant of the fact that no Japs were on this part of the island and that the satives were peaceful and friendly.

Kingston — (CUP) — A policy of large-scale post-war immigration has been favored in two intercollegate debates held recently between Queen's University and McMaster, and between Queen's The former was been. march to Buna and obtained native pilots to guide ships around the coast to the spot where emergency landing fields could be made. With native held these fields were constructed in a short time and when the American forces reached the field the Australians were receiving air traffic from the main land.

bination "church-man and lend-lea

The Papuan natives have never been expolinted, thanks to the fine British government in force there. Eighty years ago most of the natives were savage ago most of the natives were savage cannibals but through the education and material help of the United Missions they have become peaceful and intel-ligent, said Mr. Bodger. These natives have very fine minds, he said, and will make skiffull doctors and engineers. Besides that they have remarkable gifts of patience and perseverence.

The Japs came to within 32 miles of Port Moresby at one time and Mr. Bodger pointed out that the reason that they got no farthir was the supreme courage of the American and Australian troops and the 10,000 native carriers troops and the 10,000 native carriers who carried supplies on their shoulders from a spot where they were dropped by aircraft, many miles over rough country. Many native boys have gone behind the Japanese lines to bring out wounded soldiers. Nine of Mr. Bodger's schoolboys joined the Navy for wages of \$1.50 per month and sailed on a native warship. The ship was wooden and boasted an armament of three Lewis guns.

guns.

Rev. Bodger said that many American soldiers are surprised to find that there is another land that might fittingly be called "God's Own Country" and that the intense nationalism of the Papuans equals that of Americans for their native

spot where emergency landing fields could be made. With native held these fields were constructed in a short time and when the American forces reached the field the Australians were receiving air traffic from the main land.

From a base at Degura, Rev. Bodger's Mission, 1,200 pounds of fresh fruits and vegetables are flown out to troops

Canadian Trends Topic of Lecture

Canada is the child of divorced arents, a problem both to the United States and to Great Britain, Professor G. W. Brown said in a lecture on Trends in Canadian Foreign Affairs on Friday aftersoon. Professor Brown, who is a member of the History Department and also managing editor of the Canadian Historical Review, was speaking in the Canadian Trends lecture series held weekly in the Botany Building.

Although Canadians in general have Although Canadians in general have been unaware of the existence of any definite Canadian foreign policy we have actually had a very consistent one ever since Confederation. This policy, explained Prof. Brown, has been based on hard facts such as the vastness of the territory compared to the relatively small population, the immense quantity of natural resources and the existence of the two racial groups; and also on the aspirations of building up a greater Canada. Canada.

I'ms policy bas been essentially one of finding a definite place in world affairs, especially in relation to Great Britain and the United States. In regard to Britain, Canada has consistently

Britain and the United States. In relard to Britain, Canada has consistently
refused to surrender her autonomy,
while at the same time refusing to leave
the Empire. She has had since the last
war a great influence in determining
the Empire's affairs, and her insistence
led to the transformation of the Empire
into a Commonwealth of Nations.
Canada's policy in dealing with the
United States has so far been only "A
bundle of negations," Prof. Prown said,
although the war has in some ways improved the situation by intensifying the
intimacy between the two nations and by
forcing Canada to stand on her own feet.
The marked tendency to collaboration
in world affairs which is apparent at
present will probably give Canada an
extremely important place in the postwar world. For she stands on the
crossroads between East and West, the
speaker pointed out. "No 11 million
people in the world have a greater
potential importance."

Prof. Brown concluded by saying that

potential importance."

Prof. Brown concluded by saying that the next few decades in Canadian history will be a time of pioneering, not in the same sense that the 19th century was, but pioneering in international relations.

Toronto Graduate Dies Overseas

It has been announced recently that Lieut. Gordon A. Richardson, a graduate of the University of Toronto, died of wounds received in Italy on Feb. 1. Lieut. Richardson, a member of the Calgary Regiment, was with the 8th

the University in 1941. He was a memthe University in Park It was also the CO.T.C. He received his commission with the Irish Regiment and completed his training at Brockville and Camp Borden.

Various Phases of Army Life Outlined by Director-General of Medical Services for Canadian Army

MUST LEARN TO KILL

Large numbers of men are refected because of inability to make the necessary readjustments to army life, said Brigadier Brock Chisholm, Director-General of Medical Services for Canada (Army), speaking in the College of Education auditorium on Friday night. "It behooves us to find out why so many men can't make this major adjustment," said Brig. Chisholm, "A man must be able to kill, and do it cold-bloodedly and intentionally, and if he can't do that he is of no use in the army. It is no good arming young men who are just civilians. We know that there is a large number of young men in their late 'teens and early twenties not fit to become fighting soldiers."

Brig. Chisholm gave as a basic reason for this inability to early training of boys by their mothers whose natural tendencies were to protect their children from harm. Boys who have been brought up on the principle of "safety first" and seli-preservation at all costs cannot make good soldiers, "A man must be able to trust himself to protect other people," he said.

Turning to the men who had "what it took," be said that they were more civilized in the army the good soldier learns to discount personal importance, convenience and comfort but on returning home is often de-civilized by the selfishness encountered where it is not "one

home is often de-civilized by the selfish-ness encountered where it is not "one for all" but "all for one." Speaking of commissioned men, he

said, "An officer is in a goldfish bowl, and his men watch him like a cat watches a mouse. There is a part of every man that doesn't want to be a soldier and that part is always looking for an excuse for not being a soldier."

Opportunity Missed

The remarks made by the Rev. J. D. Bodger in Hart House Theatre last Friday were witty, fluent, informative and authoritative. There is scarcely a person of his background and specialized knowledge of his subject lecturing today, and Mr. Bodger's own time is extremely crowded with engagements It was a great opportunity which University of Toronto students had last Friday, one which was supplied them through the industry and alertness of J. R. Gilley, Acting Warden of Hart House, and in the preparation of which he was assisted by a small but appreciative group. The opportunity was made and offered to the students, and with some 50 or more exceptions, they missed it entirely.

To try to detail the information and discussion not to mention the sheer entertainment of the man's talk-which students of this University missed would be futile. The fact that actually no one was interested in the first-hand account would make the attempt peculiarly senseless. But it seems pertinent to remark in these columns on the peculiar apathy which pervades this campus where matters informative but extra-curricular are concerned. This closely-packed talk taking but half of a liberal lunch hour and given in a central location was within reach of any student who was at all interested, and attendance for most of the male population of the campus was almost literally as easy as falling downstairs. But except for a mere handful of students, some staff members, and a contingent of Air Force men from the Pre-Aircrew Educational Detachment

What can the answer to this be? Is it a case to prove the general contention, not voiced just at present, that all the best and most interested minds amongst students have gone leaving only the un-curious, dull dregs behind? Has the race of students fallen into a decadence, or are they just too busy The latter is the answer which we'd probably hear if the question were more than rhetorical, but it doesn't stand up to examination. There was little else to compete with the talk as an attraction in the time that it was given, but students did not attend in as large numbers as the reputation of the speaker and the interest of the subject would lead one to expect.

Yet still the "busy" plea stands, for students think they are too busy. The excitement, here actually only minor, and latent uncertainly of wartime set us on edge. We actually only think we are too busy most of the time. This leads to a pleasant feeling of self-importance and is at first an easy excuse for letting unpleasant irrelevancies slip. Later this false sense of frenzied occupation leads to a habit of refusal whenever it is suggested that we add something else to a schedule which we like to think of as utterly full. True, we are busier than ever before, but this is a time when the world about us is changing more quickly than ever. It is the very period when all of us should be watching the changing horizons more carefully than ever and it is the distances turn all but the most forecible orators into time when actually we are turning with narrowing mutes. Except when an important vote is to be taken or announcement made, only a handful of demand the least possible from the individual

mentality. This is not what a University is for. Increase of this tendency will lead to the degredation of the college degree to the point where a diploma will be unjustifiable in the face of the present paper shortagė.

Correspondence

In the Public Interest

The Editor, The Varsity. Feb. 12, 1944.

Dear Sir:

News stories dealing with the Moot Court Trial have appeared in the Friday issues of your paper for two weeks now, and each has contained a vague and confusing reference to the Victoria College At-Home.

This letter is intended to clarify these obscurities and I would ask that it be printed therefore in the

interests of public enlightenment.

The story of February 4th made reference to a libel action in 1939 in which damages of \$1,000 or two tickets to the Vic At-Home were awarded. Now, sir, while it is quite obvious that two tickets to any Vic At-Home are worth \$1,000, I should like to make it very clear that this year we are charging a considerably smaller sum.

Again, purely in the interests of public enlight-enment, I might add that the At-Home this year is to be a Leap Year dance, held on February 29th, and that many girls will therefore be extending invitations. Men not so honored, however, may ourchase tickets themselves, of course

Spaciously located in Eaton's Auditorium, the dance will be featured by the music of Mart Kenney and his orchestra throughout the evening, and of Kathleen Stokes at the organ during intermission. Dress this year is semi-formal-men informal, girls formal.

The story in February 11th's issue of your paper remarked "that The Varsity be ordered to award one ticket to the next Vic At-Home to each . . . of the jury." May I recommend, Mr. Editor, that if you are to make the purchases, you be on hand at the V.C.U. Office in Vic at 9:30 a.m. on Monday, February 21st, when ticket sales will commence and the 50 tickets available for outside faculties will be obtainable.

In conclusion, may I thank you for printing this letter and reiterate that its publication is solely in the interests of public education and not, of course, an effort to secure gratuitous advertising.

Sincerely yours,

PAUL W. Fox, Social Director, Victoria College Union.

Ottawa Calling

A Canadian University Press Feature

By Neil MacDonald

PARLIAMENT

Statistics would show, if anyone bothered to make the count, that most readers of this column have never been inside the House of Commons or the Senate in Ottawa, and know very little of the physical aspects of the buildings or the manner in which Parliamentary business is carried out.

The Parliament Buildings are built at the top of sheer limestone cliff, overlooking the Ottawa river, facing generally south. The two Chambers are housed in the central building, rebuilt after the disastrous fire during the first great war. The two adjoining buildings, the East and the West Blocks, were probably originally intended to shelter all the administrative arms of the government, and may have, at one time.

Ottawa's skyline is completely dominated by the Peace Tower, built over the entrance to the main building and containing a Memorial Chamber to the dead of the last war. Hanging high above the city s one of the finest carrillons in North America upon which recitals are given to the edification of summer isitors; Ottawans seldom attend, through the usual indifference of the native to his surroundings.

To drop into the House of Commons Visitors' Gallery (most of us rate none of the Private Mem-Gallery, the Ladies Gallery, or the Press Gallery) may be, when the House is sitting, a dis-illusioning experience. Te begin with, as someone has put it, the acoustics are too good, the echoes and

THE VARSITY SERIAL "We Make You Think"

The air-gun of "Q" is levelled; the audience of the Sunday Evening Concert is rising to its feet, hissing imprecations; McGeech, hypnotized and befuddled, is in mortal peril...NOW READ ON...

CHAPTER ELEVEN

The beady eyes of the arch-spy gleam and his chest expands as he carefully adjusts the throggle-pin of the rear sight.

"Q" is in his glory. But it is to be short-lived.

The plastic bullet has sped.

Then the rarified atmosphere was split with a "Q"-like curse. For the missile is not buried in the heart of McGeech. It has buried itself in the Miltonic quotation running round the

No, reader, the eagle aim of "Q" is not failing. Not that. But the floor is heaving. The very floor of the Great Hall is surging beneath his feet.

The Great Hall surges and rocks; suddenly through a rift in the marble floor there springs aloft a muddy fountain of foetid water. Is it soup? Is it coffee? No. The Taddle has crupted!

In an instant all is pandemonium, panic, blind escape. Throngs surge toward the doors. Shortly the ruined hall is deserted, but for two men: "Q" still cursing, fingering his impotent air-

Owing to a typographical error, many readers had difficulty locating the tail of last Thursday's Cat. The line "Continued on page 4" should have read "Continued on page 5."

gun; McGcech, still hypnotized at the piano, dutifully pounding Bach and hearing it come out boogie-woogie. The erupting waters spray over him, but still he plays on.

Then from the yawning chasm there emerges a dusty pate. It is followed, after frantic struggles, by a khaki-clad body. With a justifiable Pop the huge figure expels itself from that perilous aperture.

"We dood it," the apparition exclaims n triumph.

Who is this? Why, reader, have you ailed to recognize Acting L.-Cpl. Cuthbert (with pay), Engineer C.O.T.C. (T.E. class 3*)?

For several days, at the express re-quest of Col. Madrool, he has been eading a party in search of the missing Gilhooley; and his tunnelling, ramifying beneath the entire campus, has led him beneath the Great Hall tonight.

Six bedraggled ghosts in khaki pull hemselves up after him. They are the themselves up after him. They are the surviving members of his sapper section. Alas for "Q." Troubles are piling upon him tonight. For scarcely has he taken in all this, when something causes him to spin round. McGeech is at his side. Not now McGeech, the hypnotized, the drugged player of involuntary boogie-woogie, but McGeech in his the drugged player of involuntary poogle-woogle, but McGeech in his ancient glory, the Terror of Under-world, walking again.

For the waters of that coffee-colored fountain, playing over his brow, have restored McGeech to sanity.

"Q" is beleaguered. There is but one exit. He dives down the gaping hole in

the floor.

McGeech, now instinctively in charge, eaps after him, waving the sapper comany to follow

Down there in the dust, through the newly-dug tunnel, races "Q," the arch-fiend; and McGeech with seven sappers is hot behind.

The great chase is on.

-Woo, with proverbial aid from Cuthbert.

SPORT NOTICES

U.C. WOMEN'S HOCKEY All players are requested to attend the practice at Varsity Stadium today from 5:00 to 6:00 p.m. VIC WOMEN SWIMMERS Vic Women's Preliminary Swim Meet on Monday at 7:30 p.m. in U.T.S.

cluding Monsieur Russell, who won the cluding Monsieur Russell, who won the diving competition earlier in the evening, to shame. The Blue swimmers repeated their previous pool victories over the Navy and the Air Force by taking the Army guests to the tune of 43 - 21.

The soldiers from Borden put up a stiff fight from the first event. In fact it was the best displayed so far this it was the best displayed so far this

it was the best displayed so far this season, but as usual the hosts came through with that little something when the chips were down to cinch the verdiet. The Borden boys had a tough break when five of their swimmers were quarautined due to an outbreak of numps in one of the huts. However, there were no complaints—the Army drafted a few civilians from the city and managed to make things very

interesting. Included in the revised khaki line-up were Sgt. Pritchard, who formerly went under the Blue and White of U.C.C., Bill Fydell, who swam against brother Johnny, and took just 26.5 seconds to do Johnny, and took just 26.5 seconds to do
50 wards for top money in the short
event, Ernie Backer, who helped the
cause with a hard-driving win in the
100 free in 61.5; Dean, one of the
auxiliary troops; Jerry Medina, a
former swimming champ from Detroit;
and for the Sam Preedom who helped and finally, Sam Freedman, who helped along in the 100 breast. Diving for the soldiers were Ed Jones and Bob Little, Canadian Junior Swimming former Champion

Champion.

Most of the Varsity team were on hand, including the old reliables Johnny Northwood, with a win in his specialty, the 100 back; Jim Martin and Norm Lea who teamed with the "Cap" to take the 300 medley in 4:31; Bill Moffat and Pam Lockhart, who took Bill Fydell's foam in the 50 free; Walter Sharpe, with a nice chore in the 100 back; Pete Aykroyd, with a second in the 100 free; Johnny Fydell, who helped put the whammy on the Army with some the whamny on the Army with some torrid work in the 200 relay; last but not least, Gil Boa, with a third in the 200 free. Diving for the Blues were Russell and Sommerville who took first and second money in the board event; these boys really put on a show, as was evidenced by repeated applause from a well-filled gallery.

THEY CAME . . .

Gino Sovran was in form, the Assumption College basketeers acted the part of champions—but what could they accomplish against the finest collection of local stars who have had the benefit af masterful and magnificent coaching?

The only logical answer would seem to be: Lose. And. that is precisely what they did.

It will be some time before the twelve hundred odd besketball fans will forget the display put on by the smooth and fast Sovran. He stood head and shoulders above any other player on the floor, while, according to one of the visiting players, suffering from a foot injury.

stood head and shoulders above any other player on the floor, while, according to one of the visiting players, suffering from a foot injury at the same time. If so, we'd love to see this same Mr. Sovran in action when he is in top form.

On Saturday's performance, however, this gliding ghost had little on our own Don Gibson, who certainly played one of his better games. Gibson covered more territory than he usually does—which is always plenty—and was a tower of strength on the attack. He was particularly effective under the opponent's basket.

we saw...

After the game we wended our way down to the door of the Assumption dressing room which was engulfed in a pronounced silence. The produced close man-to-man playing as set-back had been taken in a true sportsmanlike manner—hard and the visitors moved slowly down the silently.

Paucke informed us that the Purples are in the Although most of their he picked up a loose ball under the Although most of their he picked up a loose ball under the most nasking play

Manager John Bourke informed us that the Purples are in the midst of one of their most successful seasons. Although most of their games have been against American teams, the Windsor squad took time out to tangle with the famed Western Mustangs whom they soundly trounced by 47-24. Claimed that Western would be a soft touch for the Blues.

Coach Red Nantais, a guard during the great days of Windsor Alumni, expressed surprise at the strength of the Varsity crew and marvelled at the playing ability of the same Gibson we mentioned. However, the Blues were not underestimated by the genial red-head, as Father Hussey's charges were quick to explain. They had been put through their paces as strenuously as for any other if not more so.

Just then, a perspiring player spoke up with another word of praise for the winners. He claimed that Doug Spry was the best check he had encountered all year. 'Later, we discovered that the speaker had been none other that the stary Sovran. Take a bow, Doug.

THE BLUES CONQUERED ...

It's all in the pages of atheltic history now. Next on the list are Detroit Tech who downed this same Assumption team by 11 points. This ensures a battle royal between the two teams, Roy Dilworth, the entiment Canadian football announcer and the broadcaster of the game Saturday, was highly impressed with the type of basketball displayed. According to Roy, the referees let the teams play ball by lessening the number of whistles. The good spirit that prevailed between the two teams was also noted by the nenowned authority on all sports.

A special word of credit to Mac McCutcheon who not only has done a marvelous job with the players but also engineered the perfect timing of the broadcast. Very favorable comment has been heard on the airing of the game and much of the credit is due to the hard working intramural director.

These two broadcasts will do much to encourage the return of intercollegiate sports. Time will take its course.

Hosts Tie Army Course In "A" Nite Basketball

In the first exhibition basketball game at the Athletic Night on Saturday the Army Course held an all-star team from Dentristry, Trinity and Wyeliffe to a

16-16 tie.

Army led 8-7 at the end of the first half, on baskets by Oster, Bate, Neil and Doune. Turner with two and Tropea were the Host's scorers, and the extra point was scored on a foul shot by Rotman.

II vs. Vic I-Referee, Groover.

rashed into the end wall

The Sportswoman

By Helen Stewart

In the last games of the hockey schedule played on Friday in Varsity Arena, P.H.E. II emerged triumphant over Trinity II while Vic II defeated Meds.

Vis II defeated Meds.

The Trinity II hockey team went down in a blaze of glory as they succumed to their rivals, P.H.E. II, to the time of 4-0. The resulting tally was not necessarily indicative of the game on the whole but the Saints found their defences pulled down against the fast-skating and stick-handling of the victors. Terry Dyer starred for P.H.E. as she sank the elusive puck in behind the opposing goalie to net for herself two goals. Connie O'Connor and Joine Brownless counted the remaining goals. We noted that the winners were more than once ably aided by Kay McMillan, a forward, and their very effective defence line of Arva Stuart and Joan Christie. The playing of the Saints was generally on a par but Mary McPherson and Mary Eleanor Kaufman were outstanding. Before passing on to the next game we would like to remind all you people who have a fondness for skating on your toes that it is strictly thumbs down on this practice, at the same time meaning a penalty if the referee sees you. So don't say we didn't warn you. say we didn't warn you.

at the same time meaning a penatory in the reteree sees you. So don't say we didn't warn you.

The Vic II team literally swept through the Meds players, as they earned a score of 6-0. The Scarlet and Gold displayed some neat team-work and passing plays. Ruth Johnston opened the scoring as she neatly flicked in the puck. In the second period the Vicettes went on a scoring spree as the forward line of Chalk, Barker and Hardy put on a power drive which resulted in Joan Chalk making two successful rushes against the goal, while Barker earned one for herself. The third period saw Beryl Rutherford stick-handle her way into the opposing zone, gaining for Vic its fifth goal. Incidentally, Vic's defence of Rutherford and Chandler presented a veritable stumbling block to the Medicos. The last tally of the game was certainly a fluke goal as one of the Meds players accidentally shoved the puck into her own net. The Meds star of the game was their goalie, Dorothy Ley, who saved some goals for her team. We especially liked the attitude of the Meds team, who were out there playing just for the love of playing. We saw no high-sticking or dirty looks throughout the contest. So here's to more opponets like the Meds!

With the end of the scheduled games we have next on the program.

the Meds! With the end of the scheduled games we have next on the program the semi-finals. It promises to be a fight to the finish for the four teams are all determined to win. The brand of hockey has definitely improved since the beginning of the hockey season so we should see some good games. The winners of Group A, Vic I, will play off against the winners of Group B, P.H.E. II, as will the runners-up, U.C. I and Vic II. We won't do any prognosticating, but may the best team win!

THREE LITTLE FISHES . .

THREE LITTLE FISHES . . . Several bedraggled and dripping figures wandered back to Whitney Hall on Thursday night last. At first we thought they were late-comers from the Moot Court, but it appears that they were just athletic babes who had been decorating the U.T.S. pool for U.C.'s swimming prelims. Beneath the hags and straggly hair we discovered that the outstanding mermaids were none less than Nancy Fraser, Hilary Dodds, and a gal by name of McKinney. McKinney took the 50-yd. crawl and the 50-yd. free style without any trouble, while Dodds collected the honors in the ornamental swimming and the diving.

Monopoly Problems Investigated In Thursday Afternoon Lectures

Thursday afternoon the first of a series of four Thursday afternoon lectures on the problems of monopoly was presented by Dr. D. A. Mag-Gibbon, members of the Board of Grain Commissioners, in the Economics Building. "A cheek on monopolies," said Dr. MacGibbon, "represents an attempt on the part of society to protect itself against exploitation.

"The passing of legislation against monopolies was accomplished by a group of philosophic radicals on one hand and manufacturers of the Man-mand and manufacturers of the Man-mester school on the other which tresulted in the Navigation Acts and then the Repeal of the Corn Laws."

The speaker said that the course of the Man-mand and manufacturers of the Man-readjustments and expansion," this outright contribution many times over two co-eds.

We disi in confidence that the results will repay this contribution many times over in the years of opportunity which lie

The speaker said that the course of development of monopolies in Canada has proceeded along the same lines as in the United States only at a later date. As early as 1908 the Canadian Manufacturers' Association took notice Manufacturers' Association took notice of the increasing number of mergers. The second period of growth in consolidation began in 1925 and it could safely be stated that the percentage of combines was relatively as high in Canada as in the United States.

In 1934 the Price Commission was set up which gave the most comprehensive report on conditions in Canada. However the acts of parliament which followed, failed to implement its recommendations. One clause was killed in the Senate. Some ammendments which were made lessened its effectiveness. One provision inspired by the "New Deal" in the United States was referred to the Supreme Court who dropped it on the grounds that it was "unconstitutional." These actions illustrated In 1934 the Price Commission was

in the years of opportunity which lie ahead." said Premier Drew.

the difficulties of legislating to control large-scale industries.

large-scale industries.

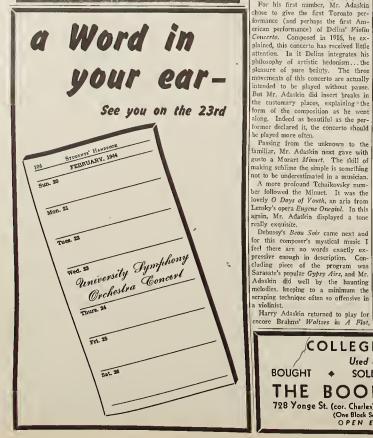

Dr. MacGibbon showed how monopoly hampers the working of free enterprise by destroying competition where it already exists as well as by preventing the free entry of new competitors. The speaker advocated four possible lines of policy. These were to turn over to business the task of settling its own problems; compulsory competition as set forth in the Sherman Anti-Trust Act; restriction by ad-nti-Trust Act; restriction by ad-

Cavell Speaks In Union Today

Captain R. G. Cavell, vice-president and general manager of the Automotive Electric Ltd. (Canada), will speak on "The Far East and the Future" at a

"The Far East and the Future" at a meeting of the International Affairs Society today at 4:30 p.m. in the Women's Union.

Captain Cavell spent 14 years as a cavalry officer in India and served in Mesopotamia during the first World War. He was president of a company doing business in China and Japan before continue, to Canada and it was in fore coming to Canada and it was in this capacity that he acquired much of his knowledge of the Far East.

Ottawa Calling

members are present. These read their papers, call the page boys, walk about at leisure, and talk-for the speech will be given them the next day, in Hansard (the reports of proceedings, in full).

A good deal of what is said in each debate is for the benefit of the electors in the home riding, in order that the member may report back that he has been doing his best for those citizens who elected him.

Most of the preliminary business of the House is carried through by its committees, such as that on War Ex-penditures, where more expeditious pro-cedure is possible. These inquire into certain subjects, and are empowered to call outside witnesses to testify before them (a privilege which the House seldom exercises).

The Senate is doing its best to justify the death sentence which the C.C.F. has vowed to pass on it if it gets to power. It serves as an instrument to concur in the decisions of the Lower House, and its right of introduction of anything but money bills has almost fallen into abeyance.

Both the Commons and the Senate Chambers were designed for a two party system, where the majority of one party would not overwhelm com-pletely the other. With the number of pletely the other. With the number of overflow of Liberals has swung over groups in the House of Commons, and fill part of the opposition benches.

The University's symphony orehestra is now in the last throes of practicing for the coming annual concert. Ac-cording to Hanus Gruber, the associate conductor, there is a full and varied

conductor, there is a full and varied classical program.

The guest artist of the evening will be Robert Graham, a young Toronto virtuoso of growing fame. "Bobble" was a student at U.T.S. when he started to carve his niche in the musical world a couple of years ago. He will play Mozart's Concerto for Violin No. 1, Another feature of the evening will be seen when Hanus Gruber takes over the baton from Mr. John Reymes-King and conducts the orchestra for one number.

The symphony orchestra for severa years was practically non-existent until Victor Feldbrill brought it into being again, doing much hard pioneer work on it. This year, Mr. Reymes-King, who has volunteered his services as director, it carrying on the work. He has been striving to teach the students how to intermet the much carrier or the striving to teach the students how to intermet the much carrier or the striving to teach the students how to intermet the much carrier or the striving to teach the students how to interpret the music, emphasizing sub-stance as well as technique. Hanus, who is in I Honor Music, told The Varsity how Mr. Reymes-King man-aged to bring out the best in the orchestra.

"It's because of his ability to handle

people. He's very cheerful and has a wealth of knowledge, musical and otherwise. It's rarely you find anyone like that. And above all he is anxious to teach the members of the orchestra the real meaning of music."

The aim of the orchestra is to give

all those students really interested in symphony playing a chance to gain ex-perience. At present there are 65 students altogether. Charles Dobias, the concert master, is a first year St. Michael's student who is an active worker in the orchestra.

worker in the orchestra. Hanus mentioned the names of several people who are, he thinks, indispensable and have proved invaluable in helping to prepare for the concert... George Armbrust, the head librarian of the orchestra. Iovec Morrow, his of the orchestra, Joyce Morrow, his assistant, and Alison Kemp. of the orchestra.

the overwhelming Liberal majority, the scene is strange: there is opposition on the Speaker's left, and the

Equality In The Far East Is Basis For World Order Is Stressed Contends Capt. R. G. Cavell

International Affairs Society Speaker, Former Resident of Orient, Traces Growth of National Feeling in Far East

DECRIES WESTERN RULE

The only basis of a world order in the future is absolute equality in the Far East. The nations there will not tolerate further domination, was the opinion expressed by Capt. R. G. Cavell, opmion expressed by Capit. A. G. Cavett, vice-president and general manager of the Automotive Electric Ltd. (Canada), in his address to a meeting of the International Affairs Society held yesterday afternoon in the Women's Union.

Captain Cavell stated bluntly that the East will play one of the most important East will play one of the most important roles in post-war settlement, but she will only be able to do so when the white peoples, a minority there, recognize the fact that the brown people cherish a growing spirit of nationalism; more and more do they resent Western

domination over their countries.

The Oriental nations, while they differ in many respects, have much in differ in many respects, nave much in common; they all suffer from high mortality rates resulting from malnutri-tion and disease, and many of the countries live in a state of feudalism; all suffer from the upset of long-established social balances by modern industrialization. Capt. Cavell again industrialization. Capt. Cavell again stressed the fact that there can never be peace so long as a majority of the human race live at a stardard much lower than that of the rest of the world. Like Europe, the Far East has re-

Like Europe, the Far East has re-cently undergone many revolutionary changes; the sudden rise to power of Japan, the revolutions in China; these are current examples. The growing consciousness of national feeling throughout the East is especially apparent in India.

long-time opposition to the Japanese, so vital to the allied effort, has always been impeded by internal rumblings — the uneasy alliance between the Communists, the say alliance between the Colimanses, Chiang Kai-Shek and China's inflated economy. But such dissension can only be expected of an old civilization in the

The Varsity Reviews

The Trinity Review

Guiltily we confess that the latest Guiltily we confess that the latest Trinity University Review has lain on our cluttered desk-top for a good week now while we lacked an opportunity to do more than look at its smart new blue, white and gray cover, the design of which, we understand, is the work of W. R. Beny. The design is the most striking thing about the issue, but by no means the last of the good things about it.

In the fetion field this issue shows.

In the fiction field this issue shows more strength than previous issues with Siesta, a short sketch by Patricia Lang-Siesta, a short sketch by Patricia Lang-staff 'way in the lead, and fcaturing strong and lucid imagination productive of affectionate images. Don and the Bady Beautiful by Elizabeth Hillman is a bit longer and is marked by quiet, aneedotal humor at the expense of amateur physical culturists. Low on the list, but by no means an unworthy contribution to our favorite undergradu-ate magazine is Jane Maeder's Hello! ate magazine is Jane Maeder's Hellot Your Town which takes as its theme an incidental murder in a small town. This would have been better as an essay on small town life, as the main incident is not too well handled, although the surrounding material is good, mildly satirical stuff written in a straight-forward manner. Another bit of satire of a more direct nature is *Temples and* parent in India.

Capt. Cavel then discussed three of Holy Ones, inserted, for some unknown the chief Oriental countries separately. reason, in the fiction section. It pur- In speaking of China, he said that her ports to be part of the Mentiors of the long-time opposition to the Japanese, so vital to the allied effort, has always been Graham Cotter. The striking analogies impeded by internal rumblings — the with modern Trinity are a little too continued to be true and the striking analogies continued to the striking analogies continued to the striking analogies of the striking analogies continued to the striking analogies of the strik consistent to be true and we denounce the translation as a fraud—but it's still fun to read.

The verse this month is largely ob-

scure in meaning as verse so in undergraduate magazines. (Continued on page 4)

Red Cross Executive Tells of Wartime Britain

After describing his voyage across, he told of London as he saw it.

"The lights were all blacked out so that they could not be seen from above," he began, "and you had to flash your light on the road to hail a taxi or bus."

"I went to the Maple Leaf Club No. 2. There are two of these clubs for Canadians. The first is for nurses.

for Canadians. The first is for nurses and other women connected with the war. The other is for Canadian officers and different men."

"They almost spoiled me there, they gave such good service. For one thing, I had breakfast in bed every morning. Over there you can't have bacon and teggs at the same time. For my first breakfast, though, I had canned beans and bacon, and porridge. There isn't much milk, just that powdered milk as a rule."

He went on to describe other things of similar interest and then went into the question of the Red Cross work he had seen. One of the outstanding things he saw was the nursery at Silverwood for children under five. Every one of the

Mr. J. N. Kelly, publicity director tots was wearing clothing sent by the of the Canadian Red Cross, spoke of his experiences in wartime Britain to a group of Red Cross workers yesterday are from the slums, from bombed afternoon in the Household Science wanted.

"It's lamentable but there are such cases," Mr. Kelly pointed out. "Their fathers may have been killed over in Africa or some place like that, and the mothers have married again and don't want them. Some mothers are unable to support the children and send them to the Silverwood Nurseries." There are 300,000 orphans in England

Press Power

The great power wielded by the press in the formulation of public opinion was emphasized in an address given yester-day to the Varsity Press Club by Dr. H. A. Innis, Head of the Department of Political Economy.

In discussing the role of the press in

In discussing the role of the press in relation to the problems of modern government, the speaker stated that the press has great effect in preventing the outbreak of fanaticism. He cited as an outbreak or saggest strike in Winnipeg.

outbreak of fanaticism. He cited as an example the general strike in Winnipeg in 1921, where, when the press was not in action there was a general outburst of rumors, speculations and wild statements, all of which died out as soon as publication was resumed.

Among modern methods of keeping society to a moderate course, the press, it has been said, accompanies religion and liquor in keeping people quiet. Certain years, such as 1843 and 1857, have witnessed outbreaks of fanaticism even in newspapers, but at this time editorials played a much more important part than played a much more important part than

the more unbiased news writing.

The function of the modern press, as seen by Dr. Innis, is to fuse a certain degree of skepticism with the prevailing trend of popular journalism, in order to maintain a reasonable, balanced approach.

proach.

The press has enjoyed varying degrees of reputation, he said. In the middle of the 19th century when there were big issues at stake, such as the repeal of the Corn Laws, the press played a dominant role. It was respected because it appealed to intellectuals; now there is a wider area to be covered, and the appeal is necessarily wider.

The declining standards were accentuated by the increasingly lower costs of newspaper production, and their increasing sensationalism, exemplified

costs or newspaper production, and their increasing sensationalism, exemplified in the publicity given the Boer and Spanish-American wars. The final step came with the efforts to compete with radio, which appealed strongly to the

Dr. Innis stated that the relief from this general trend lies in the independ-ence of the good journalist. Above all, it is necessary for him to remain completely aloof from other lines of endeavor, particularly in positions con-nected with the government. pletely aloof from

To Discuss

Michael's College, will be guest speaker at the fifth meeting of the Modern History Club to be held tonight at 8:00 in the Women's Union.

Dr. Phelan's subject will be "The Catholic Church and International Order." He will base his discussion on the plca for peace made by the Pope at Christmas 1939. This appeal, under five main headings, calls for a jus settlement of international affairs and is not a matter of purely denominational interest.

Prof. D. J. McDougall, who will introduce Dr. Phelan, told The Varsity that the subject was not narrow or se tarian. "The Pope's Five Points", he said, "outline an effort to make religion the basis of world relations, and they have been generally accepted by leaders of all Christian denominations," Dr. Phelan will leave time for ques-

tions and discussion by the audience Refreshments will be served.

Robinson, Lawson Discuss Crime

"A crime against the Crown," said Dr "A crime against the Crown," said Dr. W. L. Robinson, "should be considered an offense against our social order."
Dr. Robinson, provincial pathologist and professor of pathology at the University, was the first of two guest speakers who discussed the medical aspects of solving crime, at a meeting of the Medical Arts and Letters Club in Wymilwood last night. In the

of the Medical Arts and Letters Club in Wymilwood last night. In the absence of his legal friend, Mr. Cecil Snyder, the "evening with crime" was spent with Dr. Robinson and Chief Coroner, Dr. Smerle Lawson.

As provincial pathologist, the speaker found that Crown attorneys made im-partial investigations and did not take undue advantage of situations. He further emphasized that at least nine times out of ten the Crown is right and times out of ten the Crown is right and that miscarriages of justice are more likely to mean freeing the guilty man, rather than punishing the innocent. The jury system is the backbone of our judicial system and 12 ordinary jurymen have been found to arrive at a more just decision than a single man in his position as indee.

his position as judge.

From his own experience the pathologist found his best protection on the vitness stand against legal questioning that tended to discredit his evidence, was an honest presentation with un-biased opinion, but only in the one field in which he was qualified to speak. One duty of the medical profession was to interpret medical language and viewpoint to the layman, especially a lawyer with whom it was fatal to crass verbal BILL point to the layman, especially a lawyer

Chief Coroner, Dr. Smerle Lawson was the second featured speaker and he emphasized the great responsibility of the doctor undertaking a post-mortem. Examination is best by day-

light which is more conducive to analytic and microscopic investigation.

Dr. Lawson quoted two contradicting reports on the post-mortem of Abraham Lincoln who was assassinated in 1865. The autopsies both agreed that the bullet fired by the actor, Boothe, passed through Lincoln's head but in the report of one examination the bullet was in this picture.

We hate to sound incessandly nasty; left eye and in the second report the (Continued on page 3)

Third Anniversary of Banting's Death to Be Marked By Ontario-Born Doctor's Lecture on Scientific Research

OPEN TO PUBLIC

Doctor John Ralson Williams will be this year's speaker at the memorial service commemorating the third anni-versary of the death of Sir Frederick Banting, Doctor Cody told The Varsity yesterday. The cermony will take place in Convocation Hall on Monday, Feb. 21 at 4:00 p.m.

21 at 4:00 p.m.
Doctor Williams, a native of Renfrew,
Ontario, is a graduate of the University
of Michigan and has been chief of the
medical staff of Hyland Hospital,
Rochestre, since 1918. He is a specialist
in diseases of metabolism and has made
a special structure of dibusts. He is a s special study of diabetes. He is the author of numerous works on the economies of milk production and dis-tribution, problems of domestic refrigeration, and the development of the use

of insulin.
It was Dr. Williams who was chiefly responsible for gaining the consent of the United States Maritime Commission to name one of their Liberty Ships after Doctor Banting.

Doctor Williams will lecture on "The

Social Implications of Scientific Re-search" following a short memorial prayers read by Doctor Cody.

Doctor Cody urged all students to at-tend the ceremoy, "Not only to benefit from hearing the lecture but also to pay tribute to the memory of Doctor

let's go places

Good old inexhaustible New York! It provides Hollywood with all sorts of things to talk about. Alleged to be the Feature Attraction at the Midtown this week, "Fired Wife" is the result of a script writer and director

MIDTOWN gone much too escapist.
DOUBLE The story deals with
BILL some problem people of the theatre world who

get all emotionally involved. With typical Hollywoodian ease, the story flits back and forth from Reno to New York to Virginia to Reno, etc. It's york to Virginia to Reno, etc. It's just a gawdy sophisticated bawble off which the facets have been smashed by some pretty grim acting. Diana by some pretty grim acting. Diana Barrymore, on the downward and outward path, we fear, wears too much clipstick and wiggles her shoulders too much and talks down her nose too much in this one. And we have yet to see a husband as harrassed as Robert Paige in this ofcure.

Dale Brown to Speak On Student Prisoners

Dale Brown, travelling secretary in Canada for the European Student Relief Fund, will speak on the topic "Students Behind Barbed Wire" at the Vie S.C.M. Open House this evening at eight o'clock in Alumni Hall.

The European Student Relief Fund is one branch of World Student Relief which is supported by Internation Student Service (I.S.S.), the World Student Christian Federation and Pax Romana.

Mr. Brown, an American, is a graduate of the University of Kansas, and has done post-graduate work at Yale University. He has been doing student relief work among student refugees since 1940. He spent the year of 1940.41 in Cuba, helping refugee students from Europe who were waiting to go to the United States.

In his present capacity as travelling secretary of E.S.R., Mr. Brown visits exerty of E.S.R., Mr. Brown visits one brain work in He university of Kansas, and has all across Canada on his work in Student Policy William (Singing, games, folk dancing and restember of the University of Kansas, and has considered to the William (Singing, games, folk dancing and restend a cordial invitation to everyone extend a cordial invitation to everyone who is interested to come and hear Dale Brown and enjoy a social evening.

Sheepskin At 18

The University of Chicago, home of experimental education, is the scene today of a revolution in American education, a revolution rising out of a war-time necessity but one which might well remain as a peace-time fixture. The University is taking boys and girls of 15 from their second year in high school, giving them three years of college and graduating them with a B.A. at 18, an age when the ordinary pre-war boy or girl was entering University. If this new scheme were limited to boys it might appear as a war emergency measure intended solely to give today's young men as much education as possible before being drafted into the armed forces. A slightly moderated system of this sort has been worked out by some other universities in the States to give exceptional students a chance to further their university career before induction. But Chicago's President Hutchins has set up his new course as a permanent measure. It serves to illustrate his contention that it is between the ages of 15 and 18 that ideas germinate in the mind and that this is the period for a liberal education.

Radical Education

President Hutchins is well known for his so-called radical ideas on education. He is an experimentalist and undoubtedly one of the pioneers of the modern age. Middle-of-the-road educationalists look askance at his innovations but his ideas are greeted with acclaim by the youngsters who benefit by them. It is too early yet to assess fully the worth of and results of this latest Hutchins experiment. Whether or not it would be advisable for general education is hard to tell. Opposition has been offered the scheme from many sources. The high schools resent being pushed aside, communists fear a fascist youth movement, some respected educators deplore the principle of hurry involved. But the plan is finding favor among the students now enrolled and older youths, educated under the well-worn present day system, are finding in President Hutchins' new course some of the answers they have been looking for.

Extended Childhood

Modern civilization tends to delay the child's coming of age. As life becomes easier, softer, loses its hardships, there is a tendency to slow down and wait for responsibility. In pioneer days children grew up early in life, they had to dig in and fight their own way. Modern civilization makes no such demands on the individual and children are encouraged to keep their youth and delay entry into the world of business and competition. Our present system of elementary and high school education fosters this spirit. Now at the age of 18 the average boy has just completed his general education. If he intends to go into a profession or any specialized work he must continue still longer in school. A century ago boys of 18 were considered men, formal education finished and life begun. We refer here to those few who went to university; the rest had finished school long before. Present trends favor higher education for more people. To some this may mean keeping done; the filming is interesting and well thought everyone in school till 21. For others, like the (Continued on page 4)

progressive Mr. Hutchins, it means improving the calibre of education offered to those under 18.

Trained to Think

The central principle of the Chicago course is one which educators have always cried for; it strives mainly to train students to think. President Hutchins believes it impossible, in these unpredictable times to train students specifically for an unpredictable future. He wants education to enable them to meet new problems cooly and think them through to the Instead of cramming the mind with a useless burdend of half-assimilated knowledge they use the history of the world and the culture of the ages to the student to use his mind and evaluate life for himself. During the first year at Chicago the disicpline is rigid but after that the student is on his own. In the last years attendance at lectures is entirely optional and it is up to the professor to hold his audience. Standards are exacting for teacher as well as taught, a welcome combination in any uni-

Advantage of War

The sheepskin at 18 school owes its practical birth to the exigencies of war. But it should not for this reason be looked upon as detrimental to all accepted systems of education. Count it one of the advantages of war that we suddenly realize how old our children are. War is a grim business. It takes a man's courage and a man's grip on life to survive war suc-cessfully. If boys of 18 are old enough for war then they are men. In emergency we grow up quickly, we forget about play. Now that we have seen how old a boy of 18 really is, perhaps, with the aid of enterprising educators, we can let youth come out of the cradle and stand on its own two feet.

A Crusade For Law

Last Thursday's session of the University Moot Court served to impress upon us one backward feature of the Canadian judicial system which might easily form the basis of a worth-while crusade for the young and energetic lawyers now being formed on this campus. We refer to the present ruling which forbids women the privilege of sitting on juries. Canadian women have proved themselves capabel of becoming lawyers, have even within the past year been elevated to the bench. They are allowed to vote and engage in business on an equal footing with the lordly male. Why not allow them to sit on juries as well?

Arguments for the case are plentiful and it must certainly be only a matter of time until the necessary reform is undertaken. But like everything else, it takes a clear voice and steady purpose to start the ball rolling. We would turn the project over to the students of law as suitable material for the scope of their energies. The women students particular should be willing to accept the challenge and use their wedge to lift women up to equality in the jury box as earlier crusaders gave them equality before the bench.

More Hate Than Love

Royal Alexandra Theatre

This week a movie is playing at the Royal Alexandra, but this fact is no more unconventional than the movie itself. The film is a Russian one called No Greatre Love, prepared, however, for English audiences by the substitution of English dialogue. With this exception, no changes from the original Russian production are evident.

Probably the most notable feature is the strong play on the emotions from start to finish. Perhaps even stronger than love, which keeps cropping up at various places all through the plot, is the feeling of implacable hatred, manifested at times in rather shocking (to Canadians) brutality. All in all No Greater Love is not for those who are averse to witnessing a little rough play, such as grinding people under the treads of tanks, or killing them by literally tearing them apart, or shooting in the back countrymen who happen to disagree with the plans of the majority.

Even if one is not disturbed by this realism, if it might be called that, nevertheless the picture seems to leave a sour impression. This is attributable to the revenge motive; all the brutality on the Russian side seems to be an attempt to wreak vengeance according to the law of the desert for wrongs that, once past, can never be set right.

On the technical side, the picture is excellently (Continued on page 4)

Ballot Fixers Nabbed (Hah) In Raid on 73

Following a surprise raid last night, provincial police and men from the Attorney General's department put padlocks on all the doors to 73 St. George St.—U.C. Men's Residence. Reason for this closure was, explained Attorney General Blackstrap, the fact that three of the immates of 73 St. George were discovered early Monday morning turns. liscovered early Monday morning turn-ng out thousands of Hart House election ballots.

Authorities expressed surprise that the students in 73 were able to get hold of a printing press; but astute detecting by a plainclothesman revealed that the printing press was made several weeks ago and publicized as a "Supersuds Milk Shake Machine (Patents Pend-ing)."

"It was well camouflaged," reported Blackstrap, "the darn thing could even make milkshakes . . . they were good,

The culprits who were apprehended after a fierce gun duel up and down the stairs and corridors of 73 said they were trying to railroad the elections because they'd heard there was a machine in operation working out of Trinity

College.
"The Hart House elections this month wouldn't have been democratic," claimed one hungry-looking and emaciated indione nangy-looking and emaciated indi-vidual. His companion, though, gave what is felt to be a more accurate reason for this perfidious violation of the Bal-loting Act. "We wanted to railroad Gilhooley right outa Hart House and right into a snowbank," he cackled hysterically.

hysterically.

Asked what their plans were for a better Hart House house committee, the two culprits said they would first make the short cute Tuck Shop attendant the Warden of Hart House and then carry out their alterations from there.

"Winterzitch would be moved from lis office beside the Pool and he'd be made the Comptroller," confessed one.
"We were gonna make sure that the Hall Porter was put in charge of the Athletic Wing. Then we were gonna recall that ex-Athletic Director from the Air Excess in Ottown and set his Air Excess in Ottown and set his the Air Force in Ottawa and set him to work polishing the brass door-knobs and brass studs on the front door of the House, sobbed the other.

"Oh, yes, yes indeed, yes, our plans ere most ambitious. We were gonna oust that there executive secretary of the S.A.C. She shouldn't have that job. We had a good place for her bussing dishes in the faculty dining room. We were gonna substitute the check room attendant in her place," continued the now-twitching U.C.

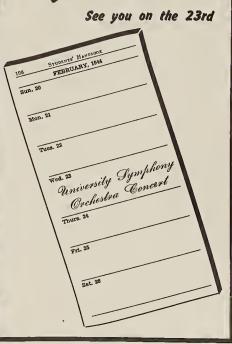

"And what is more," cried his com-panion, "we was gonna let the two people that work in the S.A.C. office enroll in Pass Arts. They been leadin' a dog's life, between them."

Horrified, the Board Syndics of Hart House beat a full confession out Hart House beat a full confession out of the two men and among other radical suggestions for improvement of Hart House, was the plan to change the purpose of the S.C.M. rooms in Hart House. The confession read, "The S.C.M. offices would make a dandy place for a swing club." Editor of The Varsity has his office in Hart House and the Godilic has distincted. House and the fiendish plan stipulated that his office would, following the elec(Continued on page 4)

THE MIND MEANDERS ...

THE MIND MEANDERS...

That was some broadcast Saturday night, we've been told. In fact we're beginning to wish we could have stayed at home and listened... The senior interfaculty swimming meet closes its entry list this afternoon at five. If you're not on it yet there's still time to dash to the Athletic Office and scribble your name where it will do your faculty the most good... Commentator Roy Dilworth confessed to us Saturday night, after broadcasting the big game, that Whitey Clayton's set shots are just about the best he's seen. And he's seen a few... Things sure seem dull since the lawsuit has blown over. Anybody got a peeve?... For the first time in years, the Assumption squad which faced Varsity Saturday is an all-Canadian team. The draft has cut off the pre-war flow of American students to the Windsor college... One of the highlights of the Assumption team's work is their dribbling extraordinaire. To each a player the real technique of such is no mean accomplishment... We see that the junior jousters are about to take up their annual intramural quarrel. The preliminaries in the novice foil events begin next Monday... So sorry the boxing and wrestling results were not published yesterday but we had more copy than space. Hope today's story will remedy the situation... We feel that the Blue basketers could have walked all over the Assumption squad had they had the experience their opponents had. Assumption as papent a long season meeting most of the Michigan teams, including the almighty last-word-in-basketball University of Detroit, Ontario service and civilian teams, and several professional teams, including the well-known Harlem Globe Trotters.
... Department of frustration: Now that we have a little snow roundabout we've lost track of that ski columnist who's been promising to turn out copy since last September.

REVIVAL MEETING ...

Something we seem to have ignored hitherto this term is the re-introduction to circulation of the Durnam Trophy. Through no fault of our own we arrive here on the day the meet to decide its tanureship begins. By the way, the trophy is awarded for interfaculty swimming. The frantic note we received today from the Athletic Office informs us that entries close Feb. 12. However, post entries are allowed so you may paddle off to your favorite event right now.

entries are allowed so you may paddle off to your favorite event right now.

The setup differs completely from the normal swimming arrangements. That is the events are scattered over several weeks; each event may be completed during any of three or four days. Thus the swimmer is allowed to attempt the same event three times. The diver, however, can compete in his event but once.

Anyway, the meet begins today with the 50-yd. free and the 200-yd. breast stroke. These events will be open from now until Friday. The 100-yd. free and the 100-yd. back will be held from Feb. 21 to 25, and the 440-yd. free from Feb. 28 to March 3.

The diving, the note tells us, must be held with all participants present. It will be left to these people to set a date for this competition some time during the week of Feb. 28. There are two compulsory dives, plain front and plain jacknife, and two optional which may be taken from any list of dives in the C.I.A.U. rules.

A word about the relationship with the Reed Trophy. In order to qualify for Trophy points a swimmer must enter at least four events. This isn't very clear to us but it's what the note says. If you have any difficulties in understanding the Athletic Office can put you right.

The Sportswoman

SNOW FUN ...

'S no fun when we go north to ski and return to find as much snow down here as there is up in Muskoka. . . . However, judging from the number of Varsity-ites on the train we figure we weren't the only one who could have skied at Summit or Rosedale this weekend. But if you're really interested in some zooty sking on light, fast snow, the trails around Huntsville (team, team, team) will satisfy all your requirements.

We encountered some 15 or 18 ski-clad co-eds stretched out at strategic points on the train, some of whom smacked suspiciously of sitzmarks at a bridge table. Despite this fact, though, the totality of babes could have warranted an intercollegiate ski meet as there were representatives from Western, McMaster, and Queen's, as well as Varsity.

were representatives from western, meaning of the damsels skied as as Varsity.

But we never did find out how many of the damsels skied as we didn't see any of them again until some ungodly hour yesterday morning and we are still wondering whether that extra baggage on their faces was a result of skiing in pure Muskoka air or a weekend of "co-eds delight."

A NEW SCHOOL OF THOUGHT . . .

We saw several exponents of the comparatively new "Loosli" parallel skiing while we were home. Said school entails as the fundamental of all action the same principle we use in tempo turns. All of which is fine and dandy for three inches of hard-packed snow, but not as efficient in a couple of feet of loose flakes where we would utilize a telemark. But as for us, like the blokes who have a "personal" religion, we have a "personal" technique in skiing which seems to be a conglomeration of things from the useless jump turn to the inevitable phannydunker. It's the only way to get stiff in any joint, these days.

727 MORE DAYS ...

a constomeration of things from the users lamp and onto the phannydunker. It's the only way to get stiff in any joint, these days.

??? MORE DAYS . . .

It strikes us that there are only a few more days before the final cram. And what (is the question of the year) is going to happen to badminton? We thought that everything was arranged but somebody apparently lacks the initiative to geep shoving the plans. Sufficient birds have been obtained, courts shouldn't be hard to get. . . What's the hold up?

By Barry Tounley

Man, why bother with 14 men when six can turn out all that jazz? We are referring, of course, to the John Kirby sextet, currently sending the characters at the Club Kingsway. This group is one of the most satisfying combos in the business. Their ingratiating three-way voicing, their relaxed attack, their incisive beat, all place the Kirby outfit at the top of the small band heap. Speaking of personalities, Ann Cornell, the canary, is one cute package (and she sings well, too). Kirby himself plays a tasteful unobtrusive bass, and follows a relaxed, laissez-faire and follows a relaxed, laissez-faire and sidepline goes. Buster Bailey is a fine musician, though his clarinet is at times too harsh. Charlie Shavers, who this seems to pay off well so far as discipline goes. Buster Bailey is a fine musician, though his clarinet is at times too harsh. Charlie Shavers, who the seems to be a better man salf round than his predecessor. Minucapolis Symphony Orchestra

minicipous Symptony Ortenata

It is not often that Toronto is
honored with the presence of a visiting
symphony orchestra, and whenever a
full ensemble comes, the performance
ought to be truly superlative. Even
with this high ideal to be met, the program at Massey Hall last Firday night
was fully not a exception.

the musical surroundings with just the proper compromise between dominating the orchestra, and remaining in the background while the composer's own expression comes to the fore. This nice

balance is the essence of true conducting.
When the orchestra played the Bennett symphonic arrangement of airs from Gershwin's Porgy ond Bess, it was the true modern American rhythm that resulted; Mr. Mitropoulos entered into the spirit of the thing with every move-ment of his body. His hands, neither of which he encumbers with a baton, his head, shoulders, and knees all moved in

curate picture of various aspects of eockney London; and the Brahms Symphony No. 2 in D Mojor really was Brahms, not the opinion of another man as to what Brahms intended.

man as to what Brahms intended.
We have left to the end to comment
on the rendering, of Bach's Brondenburg Concerta No. 3 in G Mojor for
string orchestra. There was no fault
to be found in it; but a couple of
indelible impressions remain. The way
that the different sections of the string that the different sections of the strings responded to one another was unfor-gettable; back and forth the melody flowed, expressed in different media each nowed, expressed in different media each time, achieving a perfection that we have never seen equalled. The second impression was that the Concerto lost nothing by being written for strings only. It showed that for this type of

True Craftsmanship

Canvocation Hall

Convocation Hall

If matters continue as they are there may yet be a full house at Convocation Hall for the organ recitals. Though there were still plenty of empty scats evident yesterday, it was gratifying to see that more than 90 persons—treble the audience of two weeks ago—had turned out to enjoy Dr. Healey Willan's expert necformance.

expert performance.

Terms of praise, though, cannot be expressed for his program selection, for two pieces in any case. A man of discriminate taste ordinarily, Dr. Willan discriminate taste ordinarily, Dr. Willan erred, for instance, in choosing Handel's conventional Overture to the Opero "Semele," a buillabaisse of tones as undistinguislied as the little-known opera which Handel composed in 1743, and which was ill received then and since then. The overture's only saving grace is a soft and wielding nasaver toward. is a soft and yielding passage toward the end, which Dr. Willan raised to fine dignity.

with this high ideal to be met, the program at Massey Hall last Firday night was fully up to expectations.

Much of the satisfaction that the Minneapolis Symphony inspires can be said about the equally conventional Chorole Preludes, composed by Sigfrid Minneapolis Symphony inspires can be traced to the conducting of Mr. Mitropoulos. From the purest of the classical to the modern American idiom, this native of Athens shows a breadth of understanding that can hardly be appreciated by one who has Again, it was only Dr. William's contout witnessed it. In his capacity as conductor he fits his personality into the musical surroundings with just the

The other two selections in the repertoire, though, were more worthy of the organist's consideration. While by no means his best, the Sonato Na. 7 in F Minor ranks well toward the top of Josef Rheinberger's 20 sonatas, and Dr. Willan's craftsmanship was probably most apparent in the clever way he handled the middle section of this work. The music here is a mere wisp of a whisper, and it requires someone with

more than passing ability to work the organ stops to create that effect.

Probably even an amateur with middling capacity could play Robert Schumann's Fugue on the Nome "Bach" sympathy with the rhythm. Schumann's Fugue on the Nome "Bach" Schumann's Fugue on the Nome "Bach" and produce noble effects, inasmuch as the work allows the organist much program music, he conjured up an active the work allows the organist much program does not confine him to subtle nuances. In Dr. Willan's hands, however, the piece had the last ounce of wild and stormy energy squeezed out of it, as the eonsole thundered volume into the finals, sounding like a clean

under his influence—the one who was has been fighting "the Battle of 51st taken to the hospital—was a home-town boy from Arkansas with a Bob Burns self, incidentally, as "The smartest man drawl and an all-enveloping loneliness.

... Most people liked him but he never did not come unexpectedly to him. Durting his years in their country before the war he saw their military authority, overshadowing all other, successfully suppressing all liberal movements. Capt. Cavel illustrated this point by recalling an incident in one Japanese city. An entire school of teen-age girls was arrested and forced to bow con-tinuously for 24 hours to an image of

boy from Arkansas with a Bob Burns drawl and an all-enveloping loneliness. ... Most people liked him but he never seemed to realize it ... But he liked people, particularly hearing them talk. ... He sat at bars by the hour, draining lonesome drinks and listening to conversations in which he seldom had courage to join. ... He was gaing to call "I'm Crazy Too." ... It was cold, and nasty in New York early last month. ... He eaught a bad cold, began to run a headachy fever, was taken protesting to the hospital, and died. ... The doctors ealled it pneumonia, cirrhosis of the liver and extreme alcoholism.... linuously for 24 hours to an image of the Emperor, just because one girl was overheard stating her disbelief in his divinity. To re-educate a people who have known but one way of life presents a challenge to teachers of liberalism. Next, after briefly summing up the history of India up to the present day, Capt. Cavell elucidated some of the problems the peace-makers will face when the war is won. The growing Indian nationalism, complicated by the diversity of religious factions, is the alcoholism...

when the war is won. The grown Indian nationalism, complicated by the diversity of religious factions, is the chief difficulty in appeasing the different national leaders. The bitter feeling between the British authorities and the native Indians has been aggravated by the Britishers' reception of the religious-political parties, by their failure to provide a system of education adequate to Eastern philosophy.

Capt. Cavell recalled the time when, as a magistrate in India, he was resulted by a native who had received his usual. But he's been sipping ice-water ever since.... water ever since....

vice a system or contention acceptate to Eastern philosophy.

Capt. Cavell recalled the time when, as a magistrate in India, he was re-buked by a native who had received his M.A. at the University of Madras. The latter's complaint was that though the English made their schools accessible to seen active, they did not received. THERE'S A LITTLE FELLOW who talks through his nose and comes, appropriately enough, from the New English hills of Vermont. . . . He wants to talk philosophy, agrees that Schopenhauer offers perhaps the most convinc ing philosophy for a traditionally-cynical newspaperman, but he says he prefers Emerson. . . . Although for his money (he's a Boston Catholic) he'll take St Thomas Aquinas any time. . . . This causes other citizens to argue with him, which in turn eauses him to say that he true

A CHARACTER who fits well into one's preconceived notions of how people one's preconceived notions of how people are expected to behave is a red-haired, London-born, Montreal-raised "public relations eounsel" currently handling an account connected with the estate of Thomas Edison. . . Perhaps you read recently of how—for the first time since Pearl Harbor—the tower lights of the Empire State Building were turned on the commenceate the 97th antiserance. Empire State Building were turned to commemorate the 97th anniversary of the birth of Edison. . . The whole magnificent credit for this "natural" publicity scheme goes to the red-head, who sports one of the finest cases of who sports one of the hnest cases of perpetual jitters you ever saw. . . . At a total cost of \$232.33, the lights flashed on in the midst of a mid-winter blizzard, state governors and former governors sent their greetings, Mr. Roosevelt issued a presidential proclamation, the grayd Mrs. Edition made one of hexaged Mrs. aged Mrs. Edison made one of her rare New York appearances, and photog-raphers got some of the best newsshots in years . . . Our Montreal friend gulned his way nervously but efficiently through the ordeal of directing dignitaries to their posts punctually, a glass in one hand, a jar of indigestion-pills in an-other, a wad of expense-money in another. . . . He kept wating to burst out crying, he told us, because an alley-cat he sheltered for 14 years had just

THESE PIXY PICTURES are all drawn, without embellishment, from life.
. . . But that doesn't convince us, any more than it convinces you, that they are pictures of real people... They couldn't possibly be... If you value your sanity, don't believe a word of it, even if it is

(Continued from page I)

notable is Variation on a Theme (from notable is Variation on a Theme (from T. S. Eliot, the writer informs the reader) by M. T. Wilson who left Trinity last year to serve with the R.C.N.V.R. Milt's poetry, as we were inclined to expect, on reading the table inclined to expect, on reading the table of contents, easily outshines the rest, although we did not pause to pick out more than part of the meaning. It shows, to a high degree a technical competence which marks most Review verse (sometimes in a very barren form). Elizabeth Hillman's Graduation [23] reflects uncompromisingly the hitter '39 reflects uncompromisingly the bitter dissatisfaction of warring youth with the spiritual gifts of the last generation but one. Skiers Gone to Wor is a fresh example of pathetic fallacy worked out with admirably controlled emotion. Fate for a Night by Catherine Bliss represents, in its solitary jogtrot, the depart-ment of light verse to complete a good

balance in the department of poesy.

This month the non-fiction section is but lightly represented. Chief item of interest is Teanwork by W. M. E. Clarkson which presents some seemingly trite, but much-to-be-repeated sound basic facts about post-war reconstruc-tion. Part of the content of the leading editorial on the place of the educated man in the democratic community is worthwhile. The arguments are pre-sented with all the clarity and incisiveness of a Matthew Arnold, but the keer and worthwhile observations on intellectual snobbery should be circulated. REX WILSON.

U.T.S. Principal, A. C. Lewis Is Named Dean Of O.C.E. To Succeed Dr. Althouse

An Honor Science Graduate of University of Toronto; Was Principal of East York Collegiate 1930-34

MacMURRAY, U.T.S. HEAD

Dr. A. C. Lewis, principal of University of Toronto Schools, has been appointed Dean of the Faculty of Education by the Board of Governors. He has been carrying the responsibility of both positions since the former Dean, Dr. J. G. Althouse, was called upon to act as Director of Education for Ontario. Meanwhile, William MacMurray has become principal of University of Toronto Schools.

Dr. Lewis graduated from the University of Toronto in 1915, in Honor Science. He then enlisted as a gunner in the Fourth Brigade Artillery and in the field. By the end of the war he went overseas. winning his commission was adjutant to the Eighth Brigade. In 1920 he received his M.A. degree at Toronto. During 1920-21 he instruced at Western University. In 1921 he in-structed at the Royal Military College, structed at the Royal Military College, Kingston. From 1923 to 1924 he at-tended O.C.E., and then taught at Mal-ver Collegiate. In 1928 he returned to the University of Toronto Schools as an assistant teacher for two years. He was principal of East York Collegiate was principal or 123st York Collegiate from 1930 until 1934, at which time he returned to the University of Toronto Schools as principal, the post which he has held until now. During his stay at University Schools he was well filted by all who knew him.

The new principal of the school, William Brock MacMurray, is himself a U.T.S. man. He attended O.C.E. in 1932-33, graduating as a physical education specialist. He taught at Weston Collegiate Vocational School until 1939, and

negrate vocational Science mini 1939, and then at Parfeldale Collegiate Institute until he joined the staff at U.T.S. in 1942. He has now become principal. Dr. A. C. Lewis, the new dean of the Faculty of Education, received his degree of Doctor Pedagogy in 1940. Since the beginning of the war he has been major, second in command of the Seventh Toronto Regiment, Royal Ca-nadian Field Artillery.

Shaw to Speak On Dante at Vic

The third in a series of lectures on the classics will take place tomorrow at five o'clock in Alumni Hall, Victoria College, when Professor J. E. Shaw of the department of Italian and Spanish

will talk on Dante's Divine Comedy.

Prof. Shaw will discuss first the conditions under which the comedy was

Today D. E. Hamilton, D.Paed., Professor of Greek at University College, will deliver the first in a series of six Wednesday afternoon lectures sponsored by University College. They will be held in Room 8, U.C. at 4:30. Prof. Hamilton will discuss "The Rig-veda," the sacred writings on which the religion of Hinduism is based.
Next week W. C. White, Director of the School of Chinese Studies, will speak on "Confucius."
Subsequent speakers will be Prof. F.

Subsequent speakers will be Prof. F. V. Winnett, Prof. W. R. Taylor, Prof. W. S. McCullough, and President Cody, who will conclude the series with ar address on "The New Testament."

Service Selection Boards

As already announced in The Varsity, Service Selection Boards will visit the University on February 21st, 22nd and 23rd and will hold their meetings in the Board Room and Senate Chamber, Simcoe Hail.

All final year Science students in the U.N.T.D., C.O.T.C. and U.A.T.C. who are to appear before these Boards will attend a meeting in the Debates' Room, Hart House, at 1640 hours on Thursday, February 17th. At this meeting full instructions will be given and lists of appointments issued.

All Third Year Science students who wish to be considered for Active Service Summer Training with the Navy, or for Summer Training in the R.C.E., R.C.C.S. or R.C.O.C. (O.M.E.) will also attend this meeting and receive their appointments.

A. B. FENNELL,

Registrar of the University.

February 15th, 1944.

U. N. T. D.

The Commanding Officer U.N.T.D. has been informed that the following may appear before the Naval Selection Board in the Board Room, Simcoe Hall, on the afternoon of

Wednesday, February 23rd:

(a) Male university graduates or final year students who are completely proficient in the German language

- (b) Male graduates, or final year students who have majored in Bacteriology in non-medical courses— preferably with practical experience in a public health laboratory.
- (c) Female graduates or final year students who are out-standing honours students in Mathematics.
- (d) Female graduates or final year students who have specialized in Statistics.
- (e) Female graduates or final year students in Library
- (f) Female graduates or final year students with straining and experience in Meteorology.

(g) Females with at least six months training and service in libraries who are not graduates or final year students in Library Science.

All persons in these categories who desire to appear before the Board must register at the Ship's Office, Hart House, not later than 12:00 Saturday, February 19th.

by some of the members of the club, is to be the feature of the program. Re-freshments will be served, and there will be dancing.

Everyone interested is cordially invited to attend.

Educational Advisor for Each Camp: Benefits for Servicemen Resuming Education

AIR FORCE REPORT TODAY

Discussion and unification of the ducational facilities and post-war rehabilitation for Servicemen was the work accomplished by the first con-ference of the Unit Education Officers of Military District No. 2 The Army of Military District No. 2 The Army personnel concluded their discussions in Hart House last night and the Air Force personnel will draw up their resolutions today, at the close of the

Force personnel will draw up their resolutions today, at the close of the three-day conference.

The men of the Army, under the directorship of Major Z. S. Phimister, District Army Education Advisor of M.D. No. 2, discussed the possibilities for Educational Officers within camps and the organization and use of the information rooms. These rooms are available in each camp to provoke the men's interests in the world of today and tomorrow and where and how they themselves will fit in. Maps and posters on the walls of the rooms remind the men of the progress and set-backs of the war. Discussion groups, quizzes and talks by leading civilian authorities are held to teach the men keen citizenship. The main purpose of these information rooms is to keep the men mentally alert and well-informed. It is hoped that through this planning the rooms will be used to a greater advantage in the future.

vantage in the future.

Among the resolutions adopted by the Army personnel were: the adoption of a principle establishment with provision for a full-time Educational Advisor and a non-commissioned officer; another N.C.O. to be in charge of the library and the recreating attribute. library and other recreational activities; the Educational Advisor of each camp to be asked to co-operate with other departments of the service; a committee to be set up, selected by the Commanding Officer, to assist the Educational Advisor; in the event of a full-time Educational Advisor becoming available all the incoming personnel to be interviewed by the Advisor; that there be necessary authorization for the transportation of men to civilian night schools within a radius of 20 miles; that (Continued on page 4) library and other recreational activities:

Atrocity!

agencies to release stories of atrocities committed by the Japanese on British and American prisoners must be admitted, although the sudden wave of such stories which has swept through the press in recent weeks is to be deplored. We have a right to know unvarnished truths about our enemies, we need information about them on all phases of their conduct in order to understand them, but it is the duty of the press as an organ of public enlightenment to keep the various aspects of the whole story in as true

that such stories are serviceable in promoting anger against the enemy which may produce a tightening up of a home-front morale which has tended to sag because of complacency, but the excessive dosage which has resulted from the sudden removal of restrictions will produce in addition a sickened feeling which will cause use to approach the peace with hatred in our hearts and revenge as a primary demand. As a recent speaker on this campus said, although he was heard by few, "After all we have to live with these people after the war." We cannot, no matter how much our anger would prompt us to, kill them all in their millions. The Japan of unrestrained barbarity represented by her armed forces on numerous occasions is no more the whole real Japan than was the doll's house Japan of chrysanthemum and kites which many us of believed in not so long ago and whose spell was still strong enough in 1941 to make Pearl Harbor possible.

That we entered the Second Great War with a heritage of hate left from the atrocity stories of the First is a fact borne out by the early burgeoning of the word HUN in newspaper headlines in 1939. The poison spread by that old hate campaign (much of which had no basis in fact, later evidence showed) was subtle. It would be presumptuous of one of this generation to try to estimate its full effect, but many members of the previous one showed signs of having come in contact with it right up to the present war. Some of them even communicated a milder form of Germanophobia to their children.

How much greater then will be the difficulty of developing a sound humanitarian outlook on a nation whose atrocious actions, even when taken with nine basic facts and methods of human knowledge and parts of salt, are greater than those claimed for the Hun? Yet the fact remains that we must live in citizen the world needs. Some such plan rather than whose atrocious actions, even when taken with nine the same world with these people after the war, and despite the guilt of the present generation, their the same world with these people after the war, and despite the guilt of the present generation, their children are going to be technically as worthy of a should be available to more of the population after in the sun as anyone.

periodicals have done the rest. It is not merely the essential service of making available what comes through regular news channels that has fed the Atrocities are now on the market. At least one large newspaper we know of has definitely been digging for atrocity stories, and another periodical announces the purchase of rights to the combined stories of a whole escape party mentioning the disposal of proceeds from the possible future sale of book and motion picture rights. The development of future markets for this sort of thing is apparently dependent only on public demand.

To some the attitude of this editorial may seem soft, despite an earlier disclaimer, but we would merely point out in conclusion the advisability of keeping the clarity of our vision undimmed by poisoned emotions for the following reason. After the war those who have actually suffered the depredations of war may well be mad with vengeance. efforts toward peace may be like a half-swamped boat in a raging sea of hatreds. The less water we have within the boat the less likely we will be to ship more while we try to bail it dry.

The Chicago B.A.

The subject of yesterday's leading editorial is one which has received much publicity of late and has been a point on which much nonsense has been talked and considerable misapprehension has been felt. It is inevitable that many people should feel that the Bachelor of Arts degree granted 18-year-olds at Chicago is a substandard product, that its bearers can never be regarded in the same light as one who has completed a more orthodox four-year course in a first-class institution. The mathematics of the matter seems to be obviously out of joint.

Dr. Hutchins has pointed out that the many versions of the degree of Bachelor of Arts now existing in the United States make the designation practically useless as an indication of training. The Chicago B.A. is something different. Recognition of the degree of Bachelor of Arts now existing in the United States make the designation practically useless as an indication of training. The Chicago B.A. is something different. Recognition The basic soundness of the recent decisions of both is inevitable that many people should feel that the United States and British official information Bachelor of Arts degree granted 18-year-olds at

are unpleasant, or because of any softhearted regard for our seldom-admirable enemies that we deplore the sudden swelling rush of atrective tales.

accustomed to recognize as a B.A. degree.

The College Liberal Arts course which takes students after their second year of high school is, as was stated yesterday, one which trains students to think. Emphasis is placed on the manner in which knowledge is gained rather than on the memorization of facts. The principles of experimentation and scientific procedure is emphasized in the physical sciences course, for instance. In addition there are general course in the biological sciences, a course in the social sciences and one in the humanities. Like the course at St. John's College (Varsity, Nov. 12, 1943) these courses are compulsory, the elective system has been cast aside as of little value since the average student scarcely knows what to choose and frequently overbalances his education under this system. In addition to the compulsory courses there are additional courses for students with specialized interests, but the emphasis is on the main core of the four first-named courses,

Examinations are of a comprehensive nature which, if of a searching enough character, should do much to assure a high standard of general scholar-ship and make the degree of the College what Dr. Hutchins claims it to be, the mark of the completion a program of liberal education.

The Chicago plan sounds good. It seems to fill a long vacant spot in the educational picture. Over-specialization in the United States and frequently uninspired teaching in the high schools both there and here have tended to catapult students into the university unprepared. This plan tends to draw together as much as possible in the modern world the There is vast moral this war. Whether it can justify the awarding of a place in the sun as anyone. There is vast moral rehabilitation to be done, admittedly. It will be a hard enough task to perform without sabotaging it with an unsound basis in clinging hate.

But this is the sabotage that is being done now, and by the newspapers and periodical. The responsibility is theirs, not the governments'. The country and on this University will probably be fossible sources released some material and lifted the ban on atrocity stories previously held back. The

Refuting the charge that Life-as-She-ix-Lived-in the Big-Nordi Ontside eludes the ken of students, The Varsity presents a calumn of uside functial guidance prepared by recognized author-tics; edited with a glassary and three appendiese (removed by cenor) by Waavius van der Woo.

and K. Wood, II U.C., 5.06.

Coming up next week will be the two mile senior and the half mile relay

S.P.S. Down Meds In Waterpolo Tilts

Two games were run off in the Interfaculty Polo loop last night in the Hart House pool, and in both cases School vanquished their Doctor friends by rather decisive margins.

In the first exhibition S.P.S. IV went to town over Junior Meds B to the extent of 6-1. In this game the Engineers spotted the Red and Black a goal in the first half minute and then proceeded to pile up their half dozen, with about three a period. Patterson had a bit of a time as he rapped home three counters; Walt Sharpe had a brace of goals, while Lockhart sank one. All in all, School showed great improvement over their last appearance and looked good for bigger and better things come play-off

which weighs about 12 pounds and is known as the shot. Best heave was Dom Pringle's, IV S.P.S., with 40 ft. 7½ ins. Next came Cam Burgess, II Trin, 39.6, with H. Tiffin trailing with a 36.8. In the high jump, 24 hoisters displayed their leg art, with W. Kerr, II S.P.S., taking top money with a 5 ft. 7 in. Ieap. Next came A. Antoni of I Meds, and in third place, three fellas: Shaw of I. S.P.S., D. Fraser, II Trin, and A. Tood, I S.P.S. D. Fraser, II Trin, and A. Tood, I S.P.S. Cach Hee Phillips also made with the following into about the junior rules run off last work:

INTERCOLLEGIATE SPORTS?

INTERCOLLEGIATE SPORTS?

Now to bring up a intite-discussed question, "Why no Intercollegiate sports?"

The answer may be that it is contrary to public opinion; but what of the broadcast of the Blues basketball team against Assumption last Saturday night? If that is not asking for public opinion, nothing is. The broadcast was planned weeks in advance and the persons who planned it must have taken into consideration the effect on the public and thought it would be beneficial for the University as a whole. So then why not McGill, Queen's and Western?

The answer may be that the students can find no time to train with military training, etc. This answer is far from adequate for men seem to be able to find time to train for basketball games each week, play professional hockey, or play interfaculty water polo and swim in numerous swimming meets. A capable basketball team has shown itself and a very capable hockey team could probably be assembled from just the University men playing in outside leagues who supposedly have no time to train. The answer to this is a man can find time to train, go to school and fulfill his military requirements if he makes use of his time, providing he has the ambition for them all.

all.

The answer may be that it is the transportation problem. This answer can easily be squelched by mentioning the teams that have already put in an appearance at the Athletic Night, Pendelton Air Force basketball team about the same distance as McGill University, Assumption College from Windsor and the Army from Borden, not to mention the team coming this week from Detroit.

All in all it is hard to see why the boys work so hard on those Saturday nights. They must be truly amateurs, that is, they play the sport for the live of it only, because they certainly get nothing out of it except perhaps a few P.T. credits which is small compensation for the long hard hours of training put in. There is nothing like the hope of winning a First T that spurs them on as in the old days, but just their fighting spirit. So if you want to see more fighting spirit than you would ever see in the Intercollegiate days, turn out Saturday nights and see the boys representing the Blue and White.

The Sportswoman

By Betsy Mosbaugh

Weir chalked up a second, making the ultimate score 2-0. The honor of star of the game, we think, is divided between Peg Graeb, who did an excellent job of defence for U.C. and even got an assist on the second goal, and Isobel Reid, who is as able a forward to be

Vic's forward line of Barker, Hardy and Chalke executed some neat playing, while their best defencemen were Hutcheson, Rutherford and Chantler. Their team took more advantage of close-ins on the U.C. net than the Red and Whiters did on their proximity to

Vic's goal.

Much credit is due to Cuddie Faber
whose strategic coaching was evidenced
in U.C.'s snappy power plays and good
skating. Definite training was seen in
the way the Royal College babes
handled their skates in fast stops and keen about-faces.

VIC DOES THE TRICK ...

Toronto Symphony Orchestra

Concertmaster Elie Spivak made one of his rare appearances as soloist at last night's T.S.O. concert, and left behind him a very favorable impression indeed; this despite the fact that bis tone was not nearly large enough to fill the hall, and despite too, the un-fortunate last-minute switch of program necessitated by the non-arrival from Russia of the orchestrated Khatchachrian Violin Concerto, which was to eccive its American premiere.

The grim decision to give up any idea

ahead of the soloist

ahead of the soloist.

It is a tribute to Mr. Spivak's musicianship that his coolly meditated interpretation and magnetic platform manner could balance so formidable a catalogue of defects, leaving his hearers with the memory of a performance if not involved meaning the second of the soloid platform of the memory of a performance if not involved meaning and the soloid platform of the sol inspired yet at any rate pleasing and

tuneful.

The rest of the program requires little comment. Mozart's sublime. Symphony No. 40 in G Minor received an adequate and well-balanced rendering, free from dolor and hysteries.

Till Eulenspiegel's Merry Pranks, one of the earlier of the great Strauss tone-poems, was played with more roguery than the Toronto orchestra commonly displays. The wonderful little coda displays.

displays. The wonderful little coda laughed without restraint; and Sir Ernest did not burst its small sides with an over-inflated tone.

I would rather have one tithe of Beethoven's legacy than all the tin-selled glamor of Richard Strauss; but when we do have Strauss let us have him as bewitchingly played as he was last night. HUGH KENNER.

hither and yon

with dorothy harley

We, personally, do not find that we are often in a condition to appreciate humor at 8:30 in the morning. However, hithrable items actually do occur around that hour and here are a couple we remembered at, say, perhaps 12:301

F'rinstance now, one morning at that particular hour we were standing on a street corner waiting for a bus. And bus after bus was passing us by, Just in front of us, also waiting for a bus, stood two co-eds.

"This is awful," said the first co-ed.
"Well," said the second, "the first HUNDRED years are the hardest."

Optimism, of course, its what we like to see.

Optimism, of course, its what we like to see.

This we heard from a Trinity freshie. It seems that one morning she, with an 8:30 look in her eye, was on her way down to college. At a street corner she saw a man thumping enthusiastically away at the sidewalk with a cane. She, being a helpful little girl, immediately dashed up and offered to escort the poor blind man across the road. But it seems she'd made a mistake, because this individual didr't reciprocate in the accustomed manner. reciprocate in the accustomed manner. He was he assured our poor quaking little freshie, quite capable of taking himself across the road. He hadn't, he

etc. But that just made unings work.
"I was just going over my lecture,"

Every college girl smokes these days. It's necessary to her reputation, that's all. However, one freshie we know was completely unaware of the importance of this attribute, and believe it or not, when she first came to this sink of iniquity she didn't smoke cigarettes, cigars or pipes, or anything. Of course as soon as she got here she set about

Sportswoman

(Continued from page 3)

The other day as we were ambling around the campus we discovered in front of us a co-ed carrying an enormous sign affair on which was some big black printing. We were intrigued; we just had to know what the thing said. Finally by skillful maneuvering and Finally by skillful manocuvering and having practically turned ourselves upside down we were able to read it. It said, "DO YOU PREFER THE COMPANY OF MEN ONLY? THEN EAT AT HART HOUSE."

Minimum, is that the secret of her

Comes the moment and our co-ed tripped down the stairs and waits for ohs and ahs from Archibald.

But small brother beat him to it.

"Huh," said he, "going to a dance with your hair in curlers?"

himself across the road. He hadn't, he explained, been a professor at the University of Toronto for 20 years without learning that.

All this, of course, made our lady friend very unhappy. She hastened to explain that it was the stick and stuff, etc. But that just made things worsel. "I was just going over my lecture,"

"I was just going over my lecture,"

"In was just going over my lecture," man. This character leaves his girl on man. This character leaves his girl on the sidewalk and rushes over to the ear 8:30.

**This character leaves his girl on the sidewalk and rushes over to the ear where he earries on a sotto voce conversation with the driver. The whole is the character of the ch versation with the driver. The whole atmosphere is sinister, see! Finally Joe returns to little-Sally-left-

waiting-on-the-pavement and drags her over to the car

over to the car.

"Come on," says he, "we're going to get a ride home."

"Nooo," yelps she. "I don't like the look of that man."

"Hey," sez he, "that's my father."

as soon as she got here she set about learning, and after a few sessions in the common room she decided to venture forth in public. Come her next big date this girl-child pulled out a cigarette and puffed smoke in all directions. The audience, of course, was simply fascinated. In fact as soon as she had finished, part of it handed her another

Call Democracy Mockery At Hart House Elections As S.P.S. Rules Committees

Figures Released By Warden's Office Fail to Show a Single Wholly Representative Committee

PITIFULLY LIGHT VOTE

By The Varsity's Chief Statistician

Thoroughly undemocratic conditions existing among the Hart House committee elected last year are revealed by a study of committee membership by faculties according to figures released from the Warden's Office.

The figures show, among other things, that the House Committee is 50 per cent controlled by Engineers, the Music Committee 30 per cent. Library and Art committees are swelled 30 per cent with members halling from Vic and

with members hailing from Vic and Trinity respectively.

Two faculties—Forestry and Wycliffe, have no representation on any com-mittee; U.C., third largest male body on the campus, appears on only two committees, being only half as heavily represented as Trinity, though it boasts more than three times the registration. So imperfectly does the House Com-mittee represent the electorate, that only

mittee represent the electorate, that only five of the ten faculties are represented on it; and not one single committee can

be called wholly representative.

Hart House authorities blame this mockery of democracy on two factors: first, ruthless over-nomination for nearly all offices, resulting in a badly-split vote in which several candidates from some one struggling faculty actually strove to defeat one another; and second, a pitifully light vote, with only 2I per cent of the electorate turning out to use their franchise

Many suffer from the misconception that large faculties like S.P.S. simply cannot be kept from running away with all offices; but that is untrue. To see why, we must examine the principle why, we must examine the behind the election machinery.

Last Year's Figures

Each committee has ten men, and the campus boasts ten separate voting faculties. Hence for ideal representation one man from each faculty should serve on each committee; of the 40 elected candidates for the four major com-mittees, each faculty should contribute

But only the faculty of Medicine But only the faculty of Medicine cleeted exactly four last year, and they were badly distributed. Two served on the Music Committee, and there was no Medismen on the Art Committee at all. S.P.S. elected 12 members—three times its share—and Vic and Trinity had

seven and six respectively.

seven and six respectively.

Of the remaining faculties, U.C.,
Dents, and St. Michael's returned three
candidates each, Pharmacy two, and
Wycliffe and Forestry none at all.
This lopsided result is not wholly to

LIFE SAVERS

out at their regular periods.

Examinations should be completed within the above dates.

The Artificial Respiration Course will be held on Feb. 24 and 25.

Divina Commedia Love Poem -- Shaw

Dante Alighieri's "Divina Commedia" was described as a poem of love, by Professor J. E. Shaw, of the Depart-ment of Italian and Spanish, who delivered the third in a series of four Wednesday afternoon lectures in Vic-toria College yesterday. Dante was famous for his poems about

the love of women, and the desire to show that poetry could be instructive as well as agreeable, motivated his attempt to write 15 books on the Divina Commedia, Prof. Shaw said. However, the writing of the first four books encompassed a period of over three years and the plans for further books were never consummated. While in exile Dante had been wander-

ing without occupation from one country to another, where he was dependent upon the bounty of ruling princes. He conceived the idea of writing a symbolic work in the vugar Italian tongue for nose whose occupation prevented them from gaining a knowledge of philosophy and Latin. His motive was to place his own knowledge at the disposal of others and he scorned those who acquired learning but who never pro-duced works. those whose occupation prevented them

The definition of love found in the The definition of love tound in the Divine Comedy expressed the idea of spiritual union of the soul with the Divine Object, the speaker declared. Dante did not need his powerful imagin-ation to describe the journeys of tortured souls in his Divina Commedia,

(Continued on page 4)

guarantee of popularity. But above the 300-vote line candidates are chosen by faculties in order of rank. If six School-men headed a poll, followed by repre-sentatives of other faculties, candidates from all those other faculties would have to be elected before another Schoolman would be considered. Thus if every would be considered. Thus if every faculty boasts at least one candidate polling over 300 votes, then every faculty will elect its most popular candidate automatically. Only where faculties fall below the 300-vote line is it necessary to draw upon second and third candidates from those with big registra-

Wycliffe and Forestry none at all.
This lopsided result is not wholly to be blamed on uneven registration in the various faculties. For example, Trinity, with six men elected, has actually fewer male students than Phatmacy, which elected only two.

It is true that S.P.S. contributed 36 per cent of those on the voters' list, and Meds 19 per cent; it is true that Wycliffe and Forestry are swamped in all that mob with approximately one half all that mob with approximately one half of one per cent of the electorate in each; but with a sufficiently large electorial turnout that sad lopsidedness can be ironed out; it is combotted by what is called the 300-vote Rule

The 300-Vote Rule

The 300-Vote Rule

The 300-Vote true can be explained as follows. Each candidate must poll at least 300 votes to be elected, as a loft as follows the proposal this year is to insist on each candidate polling at least half the vote polled by the top man for that committee, before standing any chance of election.

Must Be In Top Half Students Present Papers To Continue In Arts

The following is the text of National Selective Service Interpretative Letter Number Seven which was released to The Varsity yesterday for publication by A. B. Fennell, registrar of the University. Although dated Feb. 10 the letter has been withheld from publication at the request of local Selective Service officials. (The text of the letter is the result of the meeting of the University Advisory Board in Ottawa in early January to discuss manpower problems affecting

The problem of adapting these regulations to the particular conditions of courses and examinations on this campus is at present under discussion by faculty members.

NATIONAL SELECTIVE SERVICE INTERPRETATIVE LETTER NUMBER 7 - P.C. 10924 (12)

1. Any male student of the age of 18½ years or more, who is subject to call under The National Selective Service Mobilization Regulations and who is enrolled in any of the following degree courses in any Canadian university, or college shall be considered to be pursuing a course contributing to the prosecution of the war or in the national interest:

- (a) Medicine (b) Dentistra
- (c) Engineering or Applied Science
- (d) Architecture (e) Agriculture (f) Pharmacy

- (g) Forestry (h) Education

- (ii) Ideatasia (iii) Commerce (i) Veterinary Science, and (k) Specialized courses in Mathematics, Physics, Chemistry, Biology, or Geology, or in courses which enable students to prepare and qualify for specialized courses in Mathematics, Physics, Chemistry, Biology or Geology.

2. Any male student of the age of 18½ years or more, who is subject to call under The National Selective Service Mobilization Regulations and is enrolled in any degree course not enumerated in paragraph 1 above, will be considered to be pursuing a course essential to the national interest provided that in the regular session of 1943-44 he is in the upper half of all the students enrolled in the same academic year of his course as determined by the final examinations for the session.

3. Any male student of the age of 18½ years or more who is subject to call under The National Selective Service Mobilization Regulations, who enrolls in 1944 for the first time in any degree course not enumerated in paragraph 1 above, will be considered to be pursuing a course essential to the national interest provided that in the regular session of 1944-45 he is in the upper half of all the students enrolled in the same academic year of his course as determined by the final examinations for the sessionres inations for the session.

· 4. Any male student permitted under paragraph 1, paragraph 2 or paragraph 3 above to continue his course shall be reported to the appropriate mobilization authorities under The National Selective Service Mobilization Regulations if be fails to do sastifactory academic work or fails to comply with the requirements of military training.

5. Any male student who has been required to leave a university or college by reason of the application of paragraph 2, paragraph 3, or paragraph 4 above, and is subsequently rejected for military service by the Mobilization Board concerned may be permitted by a university or college to resume his course provided that he presents a permit so to do issued by the appropriate National Selective Service Officer.

6. No male student of the age of 18½ years or more who is subject to call under The National Selective Service Mobilization Regulations, who is enrolled in a university or college for the regular session of 1943-44 and who is doing satisfactory academic work and complying with the requirements of military training, shall be called under The National Selective Service Mobilization Regulations until the end of the regular session of 1943-44 of 1943-44.

7. No male student of the age of 18½ years or more who is subject to call under The National Selective Service Mobilization Regulations who has been enrolled in a university or college and subsequently ceases to attend a university or college for a period of one academic year or more shall be re-admitted to a university or college without the consent of the Mobilization Board concerned.

Hindu Bible Is Hamilton Topic

The Rig-Veda, the Hindu bible, was discussed by Professor D.E. Hamilton Building. vesterday in the first of the University resterday in the first of the University

College series of public lectures, which development for aircraft is the subject this year concern great sacred writings chosen by Jack Ward, IV Mechanical. of the world.

Prof. Hamiltion described the origin of the Rig-Veda (meaning knowledge of hymns) as a collection of songs of praise written by Hindu poets over a period of a thousand years, the latest of which was probably written about 500 years before Homer. These poets belonged to an Aryan race which in-vaded the Indus valley and convered the black natives living there. In order to retain the purity of their race, the Aryans originated a system of social differentiation which developed into the contemporary caste system in India. The Hindu believes that extreme righteousness in this life may raise his easte in his next incarnation.

The universe was believed to be divided into three sections, earth, air and a remote heaven. The heaven w and a remote heaven. The heaven was inhabited by a goddess of eternity and her seven sons. The idea of human souls being part of the all-pervasice spirit of this goodness, is similar to the Buddhist pantheistic thought, stated Prof. Hamilton. In the air lived the her seven sons. The idea of human souls being part of the all-pervasices spirit of this goodness, is similar to the Buddhist pantheistic thought, stated Prof. Hamilton. In the air lived the gods of wind and storm; on the earth, the gods of wind and storm; on the earth, the god of fire and Soma the god of a plant which when allowed to ferment with barley produced a divine potion which "inspired poets and made men strong."

Prof. Hamilton said that allegiance of Hindus to their rules has always been secondary to their allegiance to their caste. They have never united to fight an invader. Mahatma Ghandi, he said, is trying to unite his people through the common beliefs of the Rig-Veda.

Rig-Veda.

Biochemical Society To Hear Addresses

Four technical papers will be de livered before the 102nd meeting of the Toronto Biochemical and Biophysical Society in Room 13 of the Medical Building tonight at 7:35.

Society in Room 13 of the Audican Building tonight at 7:35.

The first paper, by G. H. W. Lucas, associate professor of Pharmacy and Pharmacology, will be on the subject "Detection and Determination of Nupercaine and Other Local Anaesthetics."
L. J. Rubin, Instructor in Chemical Engineering and Applied Chemistry, will speak on "The Synthesis of Naturally Occurring Ethers of Glycerol." and "p-Fluorophenylmercapturic Acid" will be the subject of a communication by L. Young and S. H. Zbarksy, both of the biochemistry department. "Toxic Substances from Muscle" is the subject of a joint paper by F. D. Pen, J. Campbell, and Mrs. J. M. Fisher, Demonstrator in Biochemistry.

Jet Propulsion, Fluid Drives, Glass, Magnesium and Flood Control, Subjects of Technical Papers

ASPINALL RECEIVES PRIZE

Jet propulsion, fluid drives, glass, magnesium alloys, and flood control, will be subjects of technical papers to be presented by Engineering students tonight at a joint meeting of the Engineering Society and the Junior and Senior Branches of the Engineering Institute of Canada. The meeting will be held at 8:15 p.m. in the Household Science

Hugh McNiven, IV Civil, will present a paper on "Glass as a Structural Ma-terial." Doug Perkins, IV Civil, will discuss "Flood Control." The above cuscuss "Flood Control." The above three from fourth year will constitute the senior group. In the junior group will be Ed Peacock, III Mechanical, speaking on "Fluid Drives," and Jack H. Ward, II Civil, on "Magnesium as an Aircraft Alloy."

Cash prizes and student memberships in the Engineering Institute of Canada will be awarded to the contestants. The annual certificate and prize of the E.I.C. will be presented to R. H. Aspinall, IV Electrical.

The Answer

The answer to the year's burning question has come to the campus in the most recent National Selective Service Interpretative Letter. At last we have some sort of basis for plans and speculations on another year of University life. The uncertainty as to exactly what are to be considered "essential" courses has been replaced with a crisp list of 11 classifications. But at the same time new minor problems are raised.

The surprise in the package is the fighting chance that has been given to what were formerly assumed to be "non-essential" students in the second paragraph of the letter. Men subject to the draft may now fell assured of their continuation in college as long as they can keep their marks in the upper half of the list for their year of their course The soundness of this vision is particularly notable. It provides for a continuation of liberal arts studies, ecognizing as essential the national interest work of the highest calibre in course whose direct application to the current war effort is considerably less than This marks the first firm and enlightened step in the direction of academic reconversion for peace. Previous policy, while fortunate for the universities, has been marked only by an apparent desire to disturb the academic life of the country as little as possible. Those who have been thankful that we have been spared the widespread disruption of college life which occurred a year ago in the United States, and yet feared that it might happen here, must greet this new point of policy with admiration for its wisdom, and a welcome for the seal of approval which it puts upon the young man of academic ability who has frequently been subject directly, or indirectly, to narrow public censure.

This second paragraph should be remembered if ever we are so unfortunate as to be involved in another war. It is regrettable that it was not applied earlier in the war. It would have prevented much of the criticism of the universities and contributed greatly to the stability and consequently to the quality of academic work.

New Ouestions-I

The great question is answered, but the letter raises smaller ones of interpretation which may be very close to vital in individual cases. The first general question which is naturally asked is, "Does

students are to be taken into account, although women will not be prevented from returning to college if they are in the lower half (provided, of course, that they pass by ordinary academic standards). Thus if all the men in one course were in the upper half they would all be permitted to remain. There is one school of thought amongst the powers that be in this University which holds the belief that the correct interpretation is that those whose marks are in the upper half of all male students in the same academic year of the course will be allowed to continue their studies. It seems, however, that if there is a philosophy behind this ruling-one which it has taken so long to formulate must have some sort of philosophy behind it; to make any other assumption is to accuse the University Advisory Board and Mr. A. MacNamara of mere somnolence-that philosophy must be one of salvaging from the waste of war the best scholars of the country. To keep half the men of a course in college when they were all in the lower half of the course would run counter to this philosophy, as would also be the case if all were in the top half and half of them were excluded from the University.

and II

A second general question is, "How many men will this take out of the University?" Since only part of the faculty of arts is concerned the loss is not expected to be very noticeable. The first year will be as full as at present, if not fuller, since no new academic restrictions are being imposed there. The upper years of arts courses have been largely depleted of fit men, so that many who fail to meet the "upper half" rule will not be draftable and will be permitted to return to college. The proportion of unfit men will increase next year as more men invalided out of the forces return to college. Any estimate is complicated further by the fact that there are many future theological students who are exempt from military service here and by the unknown factor of increased scholastic determination in the coming final examinations. We may feel assured, however, that, except for those graduating, or volunteering for active service, the most active and capacious minds will be back next fall.

The Smaller Courses

In the smaller courses there will doubtless be some difficulty in applying the rule. This could be done arbitrarily, permitting X who stood I,1 to continue his studies, while compelling Y who stood I,2 and is almost equally brilliant to leave college. The injustice of this and the obvious clash with the philosophy which we have assumed lay behind the provisions of the second paragraph suggest that some special exceptions will have to be made in interpreta-

The inclusion of Commerce in the list of essential courses raises a problem here since there is very hundreds, and would result in unlittle difference between the last years of the Comlittle difference between the last years of the Commerce and Finance and Political Science courses.

Why, in considering third year examinations, should one be preferred before the other?

These new questions along with others, such as the one implied by the supposed lower standard of Pass Arts, arise from the letter are being discussed.

These new questions along with others, such as the one implied by the supposed lower standard of Pass Arts, arise from the letter are being discussed by the Council of the Faculty of Arts, and undoubtedly conferences with Selective Service officials

Scandal

The scandal implicit in The Varsity's front page story of lopsided representation on Hart House Committees is not one in which corruption figures to any great extent. As a matter of fact the voters have only themselves to blame for the disproportionate state of affairs. The Faculty of Applied minimum vote rule. Science holds 30 per cent of the undergraduate seats on Hart House Committees. This is not quite equal general question which is naturally asked is, "Does the 'npper half' provision mean the upper half of all wersity, so they can't be rightly said to have more than their fair share. But the Hart House Committees are designed on a basis of unit representation would run the same academic year of his course."

This would seem to indicate that the marks of women the number of committeemen up into the continued on page 4)

to their proportion of male registration in the University, so they can't be rightly said to have more than their fair share. But the Hart House Committees are designed on a basis of unit representation would like on interpret our editorial for any who may have received an impression of its so small that true proportional representation would run the number of committeemen up into the (Continued on page 4) to their proportion of male registration in the Uni-

School Outclasses Knox; Forestry Over-Runs Meds

Past Hard Checking Knox Defense Who Connect With Solid Body Checks

HANNON AND YOUNG STAR

III S.P.S. outclassed Knox A yester-day noon to the tune of 3-I in a hard fought hockey game at the Arena. They are now out in front of their group by a wide margin, and look good every time out.

The Knox defence was very tight,

and this came late in the second period. All the scoring was done in the first period, and although both teams had plenty of chances, the goalles did a good job of keeping the elusive dise out of the nets. S.P.S. had a decided advantage in the play but Knox put up a good fight and their defencive work least them in the grame cities up to the second of the net them in the grame cities up to the second of the net them in the grame cities up to the second of the kept them in the game right up to the final whistle.

In the first period Kaufman scored on passes from Crawford and Hannon to put School out in front. Hannon came right back to bounce one off the post. S.P.S. kept up the pressure and got another at 14:20, Young getting this one on a pass from Milne from a ganging attack on the Knox net. Moorhead broke the ice for Knox when he got the credit for one that Milne hanged into credit for one that Milne banged into credit for one that Milne banged into the corner in trying to clear from in front of his own net. Then Hannon came right back to fool Anderson, this time on a setup pass by Kaufman at 18:50. S.P.S. kept up the pressure and Waddell centred one to Young as the period ended but Young let it roll off

Straight Victories With Convincing Win By 7-2 Count in Penalty Riddled Game

THAT LAWSON MAN AGAIN

Yesterday afternoon the Forestry

Yesterday afternoon the Forestry hockey team ran their record to five straight group victories by defeating Meds III to the tune of 7-2. In the first period Mackay scored two goals for Forestry, one unnassisted and one from Clarke and Lawson, while George Callahan scored one for the men in Red and Black, unassisted. Forestry outshot the Medsmen II-7, and a minor penalty was given to Ienkfus.

The Knox defence was very tight, and was the big reason why the score didn't mount much higher. Their body-checking was really connecting, and few Shoolmen can testify to its effectiveness. Aiken in particular, dealt out some solid checks.

The game was remarkably clean with one penalty all that was handed out and this came late in the second period. All the scoring was done in the first period, and although both teams had plenty of chances, the goalies did a good job of keeping the elusive disc out of the nets. S.P.S. had a decided adto Graham, Clarke, Callahan (2) and Jenkins were given in the period and provided both teams with good scoring

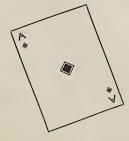

SPORTS NOTICE

WOMEN'S BASKETBALL

The All-Varsity women's basketball team will practice on the Hort House floor on Friday evening at 7 p.m. instead of 8 p.m. as previous announced.
Players should come dressed for practice except for shoes and report direct to the gymnasium.

Cards too, preferably 52 in a pack.

Bring them with your magazines to Athletic Night Saturday

By Mickey Michasia

HART HOUSE BLUES . .

HART HOUSE BLUES...

The renowned sceptics have begun to wonder just how lucky number seven will be for the Blues. Game number seven brings to us next Saturday night the only American basketball squad to grace the Hart House floor this season. That team is none other than the famed Detroit Tech basketeers who are classed as the finest intercollegiate team in Michigan.

This promises to be the feature game of the current season as both teams sport amazing records. The Blues are undefeated in six starts. The Techmen have met the top teams around the country, including the Western Mustangs whom they soundly trounced twice, the last by a convincing 53-22 score. They also took a fall out of the same Assumption Purples that gave the Blues no end of trouble last Athletic night.

News filtering through from the border town reveals that the Detroit roster boasts of at least three Canadians which is quite unusual. The rest, with one exception, call Detroit their home.

Of the 14 men on the line-up, no less than seven tower above that widely aclaimed six foot mark. Their average age is slightly over 18.

According to the scouts, Bill Coulthard is the present high scorer

over 18.

According to the scouts, Bill Coulthard is the present high scorer of the crowd. Bill performed for Windsor Partick Service last year, the same team reaching the finals of the Canadian Basketball Association playdowns. The man in the next slot is Mort Bunnell, a six foot forward from this side of the border. The other Canadian on the team is big Don Hamilton who learned his backetball down Windsor way.

Windsor way.

The team, unlike others who have performed here this year, is not built around one prolific scorer. This was proven against the Mustangs who developed a defense against Coulthard only to have 17-year-old Joe Arteakis lead the scoring parade.

Little is known of the type of game they emphasize but a stiff zone defense has been the order of the day in at least two of their games to date. Western's man-to-man game was quickly broken up by this type of game. So, Blues, beware.

Another dark cloud appeard on the horizon on Tuesday when Don Pringle turned his ankle. While this is not official, it is rumored that Don may be out of the game for the next week at least. This is indeed a sad blow as Pringle was one of the most effective men on the floor the last time out.

THE FRUIT BOWL . . .

THE FRUIT BOWL . . .

The deep purple team will not be the only attraction come this Athletic Night. Those lonely wolves will get theirs at the early basketball game when a group of pretty Wrens from Ottawa tangle with the Varsity Girls. So come early, fellas, the game is billed for 7:15. . . In the upper gym, Charlie Zwygard will run off the interfaculty gymnastic tourney. . . In the pool, girls' water polo for the starter, then a swimming meet, followed by a men's water polo set-to. . . If time permits before the popular sport of square dancing, volleyball will be played in the upper gym. . . The lads from Meds and Pharmacy also promise swimming novelies throughout the evening. . . And don't forget the books, magazines and playing cards for the services.

STOP THE PRESS NEWS . . .

The Blues will take the floor this evening for an exhibition game with the Malton Observers from the Air Observer School at Malton. The game is announced for 7:50.

The Sportswoman

By Betsy Mosbaugh

WHAT'LL WE DO WITH THE ??? NIGHT EDITOR?

WHAT'LL WE DO WITH THE ??? NIGHT EDITOR?

It would seem that the Sportswoman suffered wittingly and unwittingly yesterday. Feeling sonewhat verbose we let it run single column but we did not allow for the severe operation it suffered at the hands of the night editor. Now, mind you, if some of the verbosity had been deleted, we wouldn't have minded so much, but when the most important part is thrown away... then we become a bit irked along with all you babes whose names were down for the all-star basketball team. So come what may today, we insist on including what we intended to say YESTERDAY.

Helen Gurney, Varsity coach, has selected the following babes to uphold the prestige of the Blue and White in their upcoming encounter with the WRNS Saturday night. P.H.E. has the majority of representatives with Joan Davis of track fame; her sister Bette Davis who is not of Hollywood athletics; Jeanne Stinson and Jean Barnhart both old veterans of basketball, the latter being head of that sport in the University this year. U.C.'s lone hoopster is Mary Reid who has earned a goodly number of points for the Royal College in the field of basketball. Vic reputation is borne by Joan Campbell who is a bit of a zooty swimmer as well as a netter. St. Mike's two best players turned out to be no less than Rosemarie Cunningham and Mike Malioney. So if you want to see proverbial all-star in action turn out en masse at 7:15 Saturday night.

WHADDA BEAUTIFUL MORNING...

WHADDA BEAUTIFUL MORNING ..

WHADDA BEAUTIFUL MORNING ...

De don't know yet whether the U.C. or the Vic hockey team will be singing said song ... but if you're curious zip up to the Arena and watch the best man win today at 12 o'clock. U.C. gals are kicking up a fuss over the lack of support their team is getting in the semi-finals. There were a few male voices cheering the other day, but apparently the babes would like a combination of both sexes to watch 'em knock around. Vic always seems to have loyal support. On Monday the Scarlet and Gold had a cheering section double that of the Red and White. Whatcha gonna do about it??? If ya got a sense of humor ya can stand it we sez. And if ya haven't got a sense of humor, go anyways and you'll have on when you leave.

Then there is always the game at Little Vic tonight between Vic 1 and P.H.E. If you have a lecture that sops attendance at the noon game you can at least take in the 6 o'clock match. And to maintain an aesthetic pattern er something we can give that match the head of "Blue Evening."

WE'VE BEEN WONDERING . . .

What's happened to the badminton, the bowling and the ski clubs?? The babes around Varsity are howling for action. If the heads of these sports carry on in their seemingly inefficient manner we'll have to import an efficiency expert. It's a great old shame that now we have snow, nothing is being arranged by that mysterious organization, the University Ski Club. Or is it still in existence?

ATURDAY, FEB. 19

SATURDAY, FEB. 19
4:00 p.m.—School of Missions, 97 St.
George St. Those planning to attend
the S.C.M. Conference with Dr.
Henry Pitney Van Dusen are asked
to register immediately at the S.C.M.
office, Hart House.

VIC S.C.M.
Professor Leslie's Group, "The Christian Faith," will meet today in Room
to register immediately at the S.C.M.
are welcome.

BULLETIN BOARD

Shaw on Dante -- | Basic English (Continued from page 1)

because he was quite aware that his fellow Italians would have burned his alive otherwise.

alive otherwise.

Although cruelty was so common in the Middle Ages that mention of it did not shock people, Dante realized the aesthetic necessity that the fate of those who rejected good for evil, should be more distasteful. Thus the chief reason for the horrors of the Inferno was to make the light appear lighter and the dark appear darker. Souls in Purgatory were those who had repented of the sin of looking to the lower good too much and to the higher good too little.

To the Medieval mind there was no incongruity between intellectual knowledge and charm in a woman which is expressed in the Divine Comedy, he said. It is our Modern Age which frequently rejects this combination.

of Mr. Bell, and the University of Toronto Schools' Literary Society are
presenting a concert including excerpts
form Shakespeare, tonight, tomorrow
and Saturday at 8:15 pm. in the U.T.S.
auditorium. Admission is 50 cents.

Editorial

(Continued from page 2)

correspondent.
The general tone of the letter seems to contain a veiled accusation of Nipopohily. Our love for the present inhabitants of Japan and especially for the perverted regime which governs them is virtually non-existent. Let that he understeed.

them is virtually non-existent. Let use be understood.

We have no wish to prevent the publication of atrocity stories, "we have a right to know the unvarnished truths about our enemies, we need information about them on all phases of their conduct in order to understand them, ..."

It is true we have little knowledge of atrocities, but the subject of our calibraid was not atrocities. Our con-calibraid was not atrocities.

editorial was not atrocities. Our con cern was with the unrestrained com-mercial spread of hatred through atrocity stories by an irresponsible press. We trust our own observation on the operation of hatred, some of it based on first hand knowledge. We feel that this letter has increased our experience this letter has increased our experience in this line no little bit and proves one of our later points on the power of hatred. This letter, we believe, it but a ripple on the tossing sea which the peacemakers will have to face. We must sympathize with the writer, her experience has been extremely unfortunate, but we must seem that it experience has been extremely unfortunate, but we must repeat that it
is up to those who have no first-hand
experience of wartime cruelty to keep
"the clarity of our vision undimmed by
poisoned emotions . ." Unfortunately
we are unable to admit that we do not
believe most of the Japanese atrocity
stories that we hear, but we would
point out that we never hear anything
of a counterbalancing nature about our
Oriental enemy, although, surprisingly

believe most of the Japanese atrocity that this hand had no fingers which stories that we hear, but we would point out that we never hear anything of a counterbalancing nature about our Oriental enemy, although, surprisingly enough, such things have happened on the war front. We repeat our plea for less vicarious hatred. There'll be enough abroad after the war. The acts of cruelty committed by the enemy against our allies must not be repaid in kind and in rage for these will beget further retailation. We do not, however, deplore the application of stern justice to individuals responsible for the ordering of war crimes.

Correspondence

Feb. 16, 1944.

Dear Sir:

A little knowledge is a dangerous

A little knowledge is a dangcrous thing.

In the editorial of February 16th,
"Atrocities," you speak of something you do not know anything of. You say,
"The Japan of unrestrained barbarily is no more the real Japan than was the doll's house Japan of chrysanthemums and kites." May I know on which facts you based this assumption?

I agree, probably the stories have been dramatized, but if I say by 5 per cent I think I give a very large push to your side of the affair. If you had your side of the affair. If you had heard another recent speaker on the campus (on Monday, February 14th in the Womcn's Union) you would have heard this gentleman, who surely knows Japan better than any of us here, as he lived five years just outside Tokyo, tell the audience that he was not survived at these stories hearts the had prised at these stories, because he had seen this happen often to Japanese who dared speak up against their govern-ment or even to Japanese who dared to

Undergraduate and Senior Members Art Exhibit

The exhibition of art by under-graduate and senior members of Hart House will open on Friday, Feb. 25 and contributors are reminded that their entries must be handed in to their entries must be handed in to the Warden's office by 6 p.m. on Tuesday, Feb. 22. The exhibition will remain in the art gallery until March 17 and there will be a visitors' day on Sunday, Feb. 27 when mem-bers may bring their friends to see the show between 2 and 4 p.m.

mention that there was any other form of government as good as the Imperial Japanese.

Then you say that there is no basis

for the hate campaign of early war.

Have you ever seen anyone come out of a concentration camp? I have and I can tell you it is no pleasant

sight.

This man had finally managed to get out and come to Holland where his daughter had arrived earlier and stayed in one of the houses for refugee children there. I was present at their meeting, because my mother was head of one of these house and I helped her sometimes in organizing games for the children. This man came out of the car and his little girl ran to meet him, but she stopped when she saw what came out of the car.

I won't give you a full description, you only believe ten per cent of the stories anyway. Well, ten per cent was that this hand had no fingers which

You don't know what it is to live in slavery; neither do I. But I know a bit more about it than you, and I know that none of the people of my country or of any country under the heel of Germany will be able to live peacefully with the Germans who have caused them so much grief and sorrow. You will not be able to tell them that the Ger-mans are their brothers. That chance has been killed by the Germans them-

I hope you will be able to publish my

Your truly,

Rose-Marjan Hartog, U.C. I, "Netherlands."

P.S.—My love for the Japs isn't very great either. My father was a prisoner in Hong Kong.

Student Day of Prayer

In the year 1895 in a mediaeval castle in Sweden, the World's Student Christian Federation was founded, under the chairmanship and leadership of Dr. John R. Mott. It sought to unite the various Christian movements of the world among students into one organization. Its basis was and still is the Christian faith in God, the Father, the Son and the Holy Spirit, according to the Bible. Its unity coexists with diversity of race, of culture, of custom, of theological tradition.

Such an international federation will exercise a powerful and beneficent influence in bring together representatives of all peoples for the promotion of peace, through goodwill, world order and world co-operation. Even in this time of grim struggle the communion of this federation is asserted year by year through the observance of a universal day of prayer for students, in which many churches share.

Next Sunday Federatory 20th has been cat agant as such

Prayer for students, in which many churches share.

Next Sunday, February 20th, has been set apart as such a day of prayer. I trust it will be duly and widely observed on our own campus. On Sunday evening at 7:30 p.m. in Convication Hall, a special service of intercession will be held and an address delivered by one of the ablest of the younger theologians on this continent, Professor Henry P. van Dusen of Union Seminary, New York. I heartily commend this week-end observance of the day of prayer for students. We sorely need to pray for powers equal to our tasks.

TRENDS LECTURE

Owing to the illness of Dean Lewis, who was to have substituted for Dr. Althouse, the lecture on "Education" in the series "Trends in Canadian Life" will not be given

Sir Bernard Pares Scoffs Russophobia

In scoffing at the "Russophobia" he has met in many places, Sir Bernard Pares, former head of the School of Pares, former head of the School of Slavonic and East European Studies at London University, said, "You cannot know Russia today unless you knew it before the revolution and have returned to see the changes that have occurred there since that time." "The United Soviet Socialist Republic" was the topic of Sir Bernard's lecture in University College vesterday afternoon. This was College yesterday afternoon. This was the fourth and last lecture in the series, Pillars of the United Nations, which was sponsored by the History Depart-

In 1914 Russia had a completely incompetent government, the lecturer stated. This incompetence resulted in versity Students to Be Ob-served in Convocation Hall Sunday Evening.

The real cause of the revolution was this slaughter, and not the Marxian theories. The majority of the revolutionary ideas have been done away with, he added. In fact the laws passed from 1934 on have shown very different leaning in the matters of labor, family life, and property from those early Dr. ideals. Indeed, added the lecturer, inion "some of these laws would make Marx will turn over in his grave."

Sir Bernard said that, while Trotsky wanted a continuous revolution, for if he did not win everything he would not win in Russia, Stalin was interested in socialism only in one country— Russia. There were three attempts to

Russia. There were three attempts to start Bolshewik revolutions, in Germany, in England and in China. All failed. As for the future, Sir Bernard be-lieves if we continue to make a bogy out of communism, we are merely further-ing German plans. A failure to understand Russia led to uphappy events in

Sir Bernard was with the Russian Army from 1914 to 1917, and was attached to the Embassy at Petrograd in 1917. Prior to lis visit to Toronto, Sir Bernard lectured at Cornell University and the University of Wisconsin.

Monopolies Defended by Beach

Housing Proposal Inadequate; Speculation in Real Estate and Conflicting Interests May Prove Barrier

POLITICAL DYNAMITE

Professor C. W. M. Hart, Supervisor of Studies in Sociology, said last night that the recommendations of the city planning board were political dynamite; that no matter what was done someone would object and that the plan would probably not be adopted due to conficient interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the conficiency interests at the next new section of the city planning board were politically as the city planning board were planning board were politically as the city planning board were planning boar

ificing interests, at the meeting of the Sociology Club in the Women's Union. The plan however would, he said, be an improvement on the present situation, if it should be adopted.

Prof. Hart said that all cities have certain objectionable features; that planing is not unique to Toronto, but has been developing in North America for the last ten years. The typical plan, he said, has a certain incoherence because

vested groups have a voice in forming it. Planned cities are virtually unknown in practice.

The Toronto plan proposes to build up self-sufficient living areas in undeveloped sections. The city would be beautified by the use of green belts in various which would feet hearded. ravines, which would form boundaries for the living areas.

These ravines could be put to a sociological use, Prof. Hart continued. They would foster community spirit by clearly demarcating neighborhoods.

Prof, Hart said that the plan's housing Prof. Hart said that the plan's housing propositions were inadequate. Sixty percent of Canadians who need housing can't afford to pay for it, but in the plan only decimal six per cent of the necessary group would get assistance.

There is no list of priorities as to what should be done first, nor controls to prevent speculation in real estate, and there is no attempt to protect land values.

"The plan is a pipe-dream, and is going to stay that way," said Prof. Hart.

Those parts which are going to make money for vested interests will go in piecemeal; but the other parts will depend on the force of public opinion. Such a plan has only been effective in Russian or Germany.

Dr. J. C. Ferguson, an authority on Chinese art and culture, will lecture in the Museum theatre today and tomorrow at 4 p.m. on "Chinese Painting" and "China and the Outside World." Dr. Ferguson, who returned to America or the exchange ship "Gripsholm" last De-

To Inform Candidates And Voters

Nominations for the various Hart House Committees open at nine a.m. tomorrow and will close at six p.m. the following Wednesday. The annual Elections will be held one week from that day on March 1. Formerly noisy and closely contested affairs, the elections have caused much less excitement in recent years. Last year only 21 per cent of the men of the University voted. Recent invetigaand more active voting as a remedy. In order to help the public spirited students who are willing to run for office to understand what faces them, and to assist nominators in choosing wisely, The Varsity publishes herewith the customary annual outline of the duties of the Committees. It is base on an editorial written for The Varsity in 1940 by J. B. Bickersteth, Warden of Hart House, who is now on leave of absence overseas where he has been prominent in the organization of Army education, serving for some time as Director of Education for the Imperial Army. The list has been brought up to date by Hart House officials.

The House Committee-

The House Committee are concerned with the genincluding the annual All-University Fall Dance. They are responsible to the Board for seeing that the structure itself and all equipment are maintained in good repair. They deal with all matters that make for the comfort and convenience of members. The tuck shop, billiard room, barher shop and guest rooms come under their supervision. This committee is also directly concerned with the operation of the Great Hall, both as regards the daily meals served to members and the large number of special functions and dinners. The House Committee is represented and dimers. The House Committee is represented on the Board of Directors of the University Settlement, and members of the Committee visit the Settlement regularly. They are also responsible for the management of the annual committee elections in March.

The Library Committee

The Library Committee controls the library, being responsible for the purchase of all books, which include biography, novels, history and general litera-ture. Its object is to build up and maintain what is ture. Its object is to build up and maintain what is rapidly becoming a first-rate collection of books chosen for leisure reading. This committee is making a valuable collection of private press books which are ashown in a display case. This committee also sclects the periodicals for the reading room.

The Music Committee—

Convey to the average music-lover the fact that the Milkshake (plug), said, "Specialization program was perfectly proportioned and beautifully is the keynote of Human Progress, solvent for a valuable collection of private press books which ease. Six wives are a perform with the susual mezzo. Her low register is phenomenal in control and quality.

Of the opening group Gluck's aria Divinités du Styx from "Alceste" received the optimum in vocal shading and dramatic nuance. The panel by Poulence is the keynote of Human Progress in the keynote of Human Progress and thoughout the ages. Six wives are a difficult to a periodical for the payed by the throughout the ages. Six wives are a difficult to the payed by the throughout the ages. Six wives are a difficult to the payed by the throughout the ages. Six wives are shown in a display case. This committee also periodicals for the remainder are adding to the payed the housework, and looking after the kids. Ask any man. If he is honest he will say six."

The Music Committee supervises all the musical

activities of the House, the chief of which are the series of eight Sunday Evening Concerts. The musicians of this city most generously make themselves responsible for these programs as friends of Hart House. The Committee arranged mid-day Sing Songs each Friday, which are a popular feature, and informal piano recitals by members are held from time to time.

The Art Committee-

The Art Committee arranges fortnightly exhibitions in the Art Gallery and monthly exhibitions in the Print Room. It organizes weekly art classes and informal discussions on art in the gallery. The arts and crafts room comes under the supervision of this Committee, as do the purchase of prints and art books, and in conjunction with an Advisory Combooks, and in conjunction with an Advisory Committee of Artists the purchase of pictures for Harr

The Camera Committee-

The Camera Committee is in general concerned with the encouragement of photography among members of Hart House. It controls the use of the camera quarters, the valuable equipment in these quarters, and the arrangement of exhibitions.

Squash Racquets Committee-

This committee controls the use of the squash courts, arranges individual tournaments, and is in touch with the intramural Squash Racquets Committee regarding the tournaments arranged by that body. This committee also arranges matches between other clubs and Hart House.

The Graduate Committee-

The Graduate Committee is responsible for the social and athletic activities of senior members of Hart House (both faculty and graduate). The graduate dining-room and north common room come under their supervision. From time to time dinners prime misister, opend the debate by are arranged, and in general the committee seeks to provide for the comfort of senior members. As regards athletics, it arranges gymnásium classes, revolver tournaments, and other activities. tions into the resultant lopsided representation on the are arranged, and in general the committee seeks to committees have pointed to more careful nominating provide for the comfort of senior members. As rerevolver tournaments, and other activities.

The Hart House Ideal-

The ideal which should inspire the committees and all members of Hart House cannot be more nobly "bourdoir diplomacy" followed by the expressed that in the Founders' Prayer of Hart

expressed that in the Founders' Prayer of Hart House, which is as follows:

"That Hart House, under the guidance of its Warden, may serve, in the generations to come, the highest interest of this University by drawing into a common fellowship the members of the several faculties, and by gathering into a true society to the several faculties, and by gathering into a true society to the several faculties. faculties, and by gathering into a true society the Swineherd: I rise on a point of perteacher and the student, the graduate and the undergraduate; further, that the members of Hart House may discover within its walls the true education that Speaker Dodger: The member is out of management and social activities of Hart House, is to be found in good fellowship, in friendly disputation and debate, in the conversation of wise and carnest men, in music, pictures and the play, in the casual book, in sports and games and the mastery of the body; and lastly, that, just as in the days of war this House was devoted to the training in a constant of the state of earnest men, in music, pictures and the play, in the casual book, in sports and games and the mastery war this House was devoted to the training in arms practical." of the young soldier, so in the time of peace its halls may be dedicated to the task of arming youth with strength and suppleness of limb, with clarity of mind, and with a spirit of true religion and high endeavour.

Clandestine Dehaters Decide to Force the Facts After Monogamous Controversy

WHITNEY REJOICES

On Friday afternoon, Feb. 4, the parliament of Ure Ceedy met in the padded basement of that institution to debate the subject: Resolved that monogamy is obsolete and as such should

Among the 15 Ceedy undergraduates who slithered furtively into the murky atmosphere of the barred chamber, we noticed Wrennis Gong, the notoriously taciturn campus hermit and Swyllis Crone. The speaker, Sorry Dodger, striding across the rotten floor-boards announced the resolution to the apathetic mob, and lay down carefully, brushing aside the whitened bones of previous debaters.

The Rt. Hon. P. U. McStench, the self. Speaking for the negative, the Hon. R. U. A. Swineheard, leader of the opposition, with his customary timidity, ventured, between bites of the

sonal privilege. Does the Honorable Member infer that I have a mentality? order

When the discussion was thrown to the House, Coy Lark, entering the fray with impetuous eagerness, made several pointed remarks which were unfortunateby inaudible because at this point the clerk of House, Meanne Morman, rose to enforce the "No Smoking" regulation by borrowing all the available cigarettes. by borrowing all the available cigarettes.

As a result of the overwhelming mass of material presented by the government and the convincing nature of the arguments, the vote was 14½ to ½ in favor of polygamy, the one half when interview, refused to give his name to The Varsity.

ART, MUSIC & DRAMA (Continued from page 2)

Quatres Airs Chantés, was modern in feeling, included many fine shades of lyric interpretation

The Russian section included two elegaic things by little-known Lithuanian composers, Simkus and Dirvianskaite. He was Alone, by Paxson, had something of the quality of a Hebrew chant, was marked with rare emotional significance. A spiritual Poor Me, by the negro composer Detts, in its rich and velvety tonality was the summit of the enchanted evening's fare.

Collins Smith was admirable at the piano, and at mid-program, did some rather distinguished Rachmaninov and Chopin.

BROCK BRACE

Wing to see the circus of sports specialties.

IN THE BIG GYM ...

The main feature of the evening presents itself as the victorious Varsity Blues, as yet undefeated and still hot after a spectacular 39-35 win over Assumption College last week, take on the renowned Detroit Tech basketball team. Detroit is also undefeated and we judge, from the fact that they have beaten Assumption by 12 points as against Varsity's four points, that this prove to be a major test for our boys in blue . This game will be the second radio broadcast and we wish the team every possible success.

As the added feature on the Big Gym program we find a crack handful of W.R.C.N.S. from Ottawa coming to challenge an all-star aggregation of beautiful belies from our campus. They will be on the floor at 7 15 as a luring preduce to attract a sell-out crowd—so come early fellas—avoid the rush before all the chairs are taken—and leave the red head alone—she goes steady!

Special features at half time in the main basketball game will include short surprise numbers including anyone of a dozen things.

IN THE TANK ...

short surprise numbers including anyone of a dozen things.

IN THE TANK.

No less spectacular will be the program presented by our aquatic enthusiasts. To start with an attraction to draw the crowd is simple logic which not only our Artsmen possess. Opening the program no later than 8 pm. will be two water polo teams—all female women—in a wild and possibly unruly game of sea rugby. (Girls report at 7.30 for fingernail trimming). Immediately succeeding will be the Senior Interfaculty Swimming Meet, followed by a spectacular display of diving gymnastics by Canada's one and only world champion, Alf Phillips.

To show water polo as it should be played Sr. Medis have dared to.

To show water polo as it should be played Sr. Meds have dared to challenge an All-Varsity team lead by Johnny Northwood. The full team might not be present but the remainder are still eager for the fray, which at half time will be featured by a tilting tournament. In order for this extensive program to be run on time, swimmers who are late for their events will have to be disqualified.

BE SURE TO REMEMBER ...

To bring your books, magazines and playing cards.

Wear your faculty or high school sweaters and crests—prizes

will be given.

3. Come early and give the girls your athletic support.

4. Prepare to join in the fun from 10 to 12. See Missing Persons Bureau if you lose your girl.

U.C. Smothers ST. MIKE'S PLAY

Senior School

U.C. outplayed Sr. School last night to come out on top in a hard fought game by a 2-l count. Plenty of solid and questionable checks were handed out by both sides but the refs could only see one act of michief and credited that to Boa for tripping Graham.

The Red and White team deserved the win on their ability to pass the puck in on their ability to pass the puck from the author of their play.

Boa for tripping Graham.

The Red and White team deserved the win on their ability to pass the puck around, something which S.P.S. woefully lacked. U.C.'s backchecking was as good as ever, and showed up among a disorganized but otherwise brilliant it was decided that only one play would be attempted, due to the lack of seasoned. butch of Schoolmen. Clare, in par-ticular, did a lot of fine work, and Boa and Shand turned in good efforts along.

Other, members of the cast exand Shand turned in good efforts alongside. Moore did a neat chore in goal, and the ones that got past him were through no fault of his. Wade and Hart beld the rearguard defences intact for U.C., and managed to make some nice rushes besides.

Other members of the cast, experienced actors but new to the Players, are Milwood O'Shaughnessy, Joseph Stefani, Gordon Oatway, John Stephennice rushes besides. nice rushes besides.

for almost ten years.

With the growth of the study of Chinese literature and art in this Uniwith the growth of the study of schinese literature and art in this University during the twenties, the purchase of a library to supplement future work in this field was deemed advisable. Bishop White who was commissioned by Dr. Cody to select the books, finding that the building of a library book by book was a lengthy and expensive process, decided to solicit the aid of Dr. Ferguson in choosing a complete library. Dr. Ferguson recommended the private collection of Professor H. H. Mu of the College of Chinese Studies, Pekin. The Mu family, prominent Chinese bankers, glad to be able to keep the library intact as a memorial to the late Dr. Mu, sold it to the University for approximately 30,000 Chinese dollars, considerably less than its original value. The expense was shared by Dr. Ferguson, Bishop White, Dr. Sigmud Samual and Sir Robert Mond. Shortly after the transaction was

Detroit Teck Cagers Defeat Varsity Team In Athletic Nite Game

defeated Detroit Team Scores Another Victory to the Tune of 66-38

HAMILTON OUTSTANDING

A packed - to - the - rafters Athletic Night crowd saw the Varsity basket-ball team take its first defeat this season as the mighty Detroit Tech machine administered a bitter 66-38 dose Satur-day night. Unbeaten this season, De-troit gave Varsity its first defeat in seven games. seven games.

The Toronto team was not to be

recognized as that which had swept all before it throughout the season, as formerly dependable scorers missed shots by the dozen. If half the Toronto shots had been sunk the score would have been close to say the least. Perhaps the only first string player up to scratch was Whitey Clayton, the set shot expert, who lobbed in four shots by this method,

by this method.
Detroit worked a smooth attack, confident around the basket. In fact they seldom left the attack until the rebound was in the basket. Tall guard Don Hamilton was everywhere at once, lancking down a Varsity shot one moment, sending one hoopward himself the next. Detroit's passing was a coach's joy which completely baffled the Toronto team and kept the ball moving toward. team and kept the ball moving toward the Toronto basket more often than Mac McCutcheon's boys liked,

McLutcheon's boys liked.

The Detroit team scored first within a minute of play and from that point on led all the way. They jumped into a lead which read 12-8 after ten minutes of play. Half time score was 32-20.

Toronto showed up with closer checking in the arms.

NEWSFRONTS

Will all students registered in this Course please arrange to visit the City Planning Board exhibit at the Robert Simpson Co., if they have not

Already done so.

Guides conduct parties over the exhibit from 10 a.m. till 5:30 p.m., when the last tour of the exhibit starts. As the exhibit closes on February 29, please plan now to go well before that date. The store is open on Saturday afternoons but closes Wednesday afternoons; this applies to the exhibit also.

Hogg Discusses 'Speeding Stars"

The motion of the fastest star, when observed by the naked eye, resembles that of a fly walking at the speed of one that of a fly walking at the speed of one mile a year when observed from a distance of one third of a mile, Dr. F. S. Hogg, Associate Professor of Astronomy, told a meeting of the Royal Canadian Institute at Convocation Hall, Saturday night. Dr. Hogg was discussing the subject "Speeding Stars." Because of this apparent slowness of the motion of the heavenly bodies, for centuries they were considered to be fixed, said Prof. Hogg. In 1718 the astronomer Halley observed that three stars were not in the same position assigned them by the Greeks 2000 years. assigned them by the Greeks 2,000 years before and concluded that constellations changed over a long period of years.

Until 50 years ago transverse motion was the only kind attributed to the stars. Radial or line of sight motion, a Toronto showed up with closer checking was the one of the second half but Detroit kept stars. Radial or line of sight motion, a discovery of this century, determine second half went 34-18.

Bill Coulthard went to the head of the class in the scoring field by count
the class in the scoring field by count
Du sorting out the frequencies of light By sorting out the frequencies of light waves through prisms the astronomer can gauge the number of miles per second that the star is travelling and in

what direction.

By means of lantern slides Dr. Hogg illustrated the variance in the number of stars that can be observed in Toronto and in Richmond Hill with the unaided eye, and then with the telescope and showed the difference in the appearance of the big dipper over a period of 100,000 years.

In the nine years the staff of the Observatory can catalogue the velocities of 1,500 of the two hundred million tenses they become of the important of the other period of the control of the control of the two hundred million tenses they become of the important of the control of the two hundred million tenses they become of the important of the control of t

known stars because of the immensity of the task of charting the speed of all the stars certain methods of choosing special stars to observe are adopted. These

methods Dr. Hogg outlined.

By examination of the stars neares to the earth, astronomers have proved that the danger of any star colliding with the earth will not be imminent within the next million years, Dr. Hogg

McGill Polish Institute Announce Essay Contest

Students in universities across Canada are invited to enter an essay contest, writing on any aspect of Polish history or culture, it has been announced by the Polish Institute of Arts and Sciences,

McGill University.

Open to all students, regardless of nationality or citizenship, the contest offers awards of \$150, \$100 and \$50 for papers revealing original and unpub-lished research material.

Essays must contain from 6,000 to

Orders Concerning Medical Examination

Each student who receives an Order for Medical Examination from the Divisional Registrar "B", or from any other Divisional Registrar, will take this order to the Orderly Room of the unit in which he is enrolled for military training and obtain a certificate showing that he is taking this training satisfactorily.
 He will then present both order and certificate at the Registrar's Office, Simcoe Hall. A record will be made of the order, which will be returned to him, and the Certificate will be retained in the Registrar's Office.
 As the Mobilization Section has declined to accept in the future the categories assigned to students by physicians or medical boards other than those named by the Section, the student must comply with the instructions in the order and present himself for medical examination at the time and place indicated.
 If the time set for the medical examination conflicts with

time and place indicated.

If the time set for the medical examination conflicts with important University work, such as an academic examination, he may, on applying to the Divisional Registrar, have the date changed or if he should be called for a medical examination outside Toronto, the Divisional Registrar will, on request, arrange for him to take the examination in Toronto.

Each student is warned that he must inform the Divisional Registrar promtly of any change in his home or permanent

Former Nanking University President Lectures on Chinese Art and Culture

preciation of Chinese Art Depends on Personal Powers of Perception

IN MUSEUM THEATRE

Chinese painting is the essence of China should be regarded as one of the democratic countries of the world, velopment, Dr. J. C. Ferguson, former Dr. J. C. Ferguson said in bis lecture president of Nanking University in China, said in an address on "Chinese Painting" in the Museum Theatre on Friday afternoon.

The general principles of Chinese art as expressed in jades, porcelain and pottery were based originally on Chinese writing with its own specific characteristics, he said. Futhermore, the historical development of China in all phases of art has been homogeneous.

Just as anyone who wishes to admire a Turner or a Corot painting must also have the capacity to enjoy Shelley and Keats, Virgil and Ovid, similarly the finest appreciation of Chinese art de-pends on one's own powers of percep-tion, Dr. Ferguson said.

Scholarships Offered By British Council

The Registrar has announced the British Council's offer of four scholar-ships tenable for 12 months to selected women graduates of universities, medical schools or academic institutions of similar rank in the dominions for re-search in the United Kingdom,

The value of each scholarship will be approximately \$300 with the method be approximately \$500 with the method of payment varying with the nature of the study or research followed by each scholar. In addition, the British Council are prepared to meet the cost of the rail fares and ocean passages from the student's home to the British Isles and back at the end of her term of study.

These scholarships are intended, to

Ferguson Declares That Ap- China Described by Ferguson as One of the Few Truly Democratic Countries of the

SPOKE SATURDAY

Dr. J. C. Ferguson said in bis lecture on Saturday afternoon. The second of his talks here at the University, the lecture was about "Cbina and the Outside World." He said that in China any boy could rise from nothing to a higher position.

"It that not democracy?" he said. "Or is democracy just high living, ease, comfort? Is democracy to be defined by limits of personal conflict or by the development of the intellectual mind? If it is the latter case then China is most certainly democratic. It has a demo-cratic background, a democratic form of thought."

"When I went to China I thought that I had something to teach them," he said.
"Evidently I didn't know anything about art and culture, and I had come to Cbina to learn rather than to teach."

"There are two distinct trends of civilization," he explained, "the Western and the Eastern. The Mediterranean was the centre of one civilization to begin with, and China the centre of th

Writing began as pictograms. Writing began as pictograms. In Egypt these represented things, later ideas. These developed into about 1,000 hieroglyphics. In Mesopotamia there were only 300. The Chinese were the only people to take pictograms to appeal to the eyes alone, not the ears.

In 500 B.C. Confucius and Mencuis were able to put their works in writing. Chinese sages could express opinions concerning philosophy, art, government, just as well as Plato and Socrates, Their poetry was not inferior to the

Williams Addresses Memorial Lecture Held For Dr. Banting

Architectural Exhibit

This afternoon from two until six chance to see the architect's exhibit in the Art Gallery at Hart House. The exhibit given by student of all five years of the School of Architecture has been up since Feb. 19 and will go down next Friday,

School Candidate

Sole Nominee

No candidates have so far been nominated for Hart House Committees from Wycliffe College, Pharmacy, University College, Victoria College, St. Michael's College, Trinity College, or the Faculties of Dentistry, Medicine or Forestry. Only the Faculty of Applied Science was represented on the candidate lists as last week came to a close.

As The Varsity goes to press the single name of W. A. Neale, If S.P.S., stands at the top of an otherwise blank sheet of paper provided for the names of House Committee candidates, the rest of the sheets remain blank except for the headings.

House officials are not alarmed over the present state of affairs, as they point out that it is usual for about 50 per cent of the nominations. They expect that other nominations. They expect that other nominations will follow quickly.

Final Evening Concert This Coming Sunday

The final Sunday Evening Concert of the season will take place in the Great Hall of Hart House on Sunday, February 27, at 9 p.m. The program will be given by the Toronto Alumnae Singers under the direction of Mr. Leslie Bell

Representatives of the various col-leges and faculties are asked to call at the Warden's office today for their allotments of tickets for this concert.

Professor K. B. Jackson

Professor K. B. Jackson
To Address Camera Club

The Camera Club of Hart House will hold an open meeting in the Debates Room of Hart House on Thursday, Feb. 24 at 8:00 p.m. This meeting, which is open to all members of Hart House, will be in the form of a Color Night, and all members of Hart House, will be in the form of a Color Night, and all members of Hart House, will be in the form of a Color Night, and all members of Hart House are encouraged to submit color transparencies for exhibition and criticism.

Professor K. B. Jackson, of the Department of Applied Physics, will also address the meeting on some of the latest developments in photography. All transparencies must be bound in Australia, New Zealand and the United States lecturing at various universities

Perennial Memorial

Monuments to the benefactors of mankind are all too easily passed without a glance by the oblivious beneficiaries of later generations. A name carved in granite may in time evoke the query, "Who was he?" to which the general reply will be "I don't know." The University to whose name he added to much lustre has established a memorial to Sir Frederick Banting which will long-serve to keep his name from becoming detached from the beneficent discovery of

The Banting Memorial Lectures, the third of which will be delivered this afternoon in Convocation Hall, were established the year after Dr. Banting's untimely and tragic death as a peculiarly fitting commemoration of the man whose discovery of insulin at this University in collaboration with Dr. C. H. Best meant life to many a hopeless diabetic. Preceded by a brief memorial service, the lectures customarily bring to the campus some man of note in medical research to speak to layman and medical man alike on some development in modern medical

This year's lecturer, Dr. John R. Williams, is especially fitted for the task. Not only has he a notable record in his own field, but he is also a personal friend of the late Dr. Banting. It was he who headed the sponsoring committee which approached the United States Maritime Commission with the proposal that a 10,000 ton Liberty Ship be named after Sir Frederick. Their idea became fact last year when, on Dec. 20 Lady Banting named a huge gray ship S.S. Frederick Banting at a launching ceremony in the Bethlehem-Fairfield Shipyards, Fairfield, Maryland.

Dr. Williams' subject, "The Social Implications of Scientific Research," is one which will fill a notable gap in the average person's fund of general know-The Memorial Lecture this year will supply all who attend with valuable interpretation in subject too little touched upon. The useful nature of this living memorial institution is the most strikingly appropriate aspect of it.

The Nominee

By actual count yesterday there was only one nominee for all the Hart House Committees. If interest in the forthcoming elections does not perk up amongst the male students of this University before sundown on Wednesday a single gentleman from the Faculty of Applied Science and Engineering, who is standing for the House Committee will become dictator of Hart House by default as far as undergraduate interests are concerned.

Should nominations fail to come in at more than their present rate the situation will indeed be appal-However, there is nothing to be alarmed at It doesn't seem, if our memory serves, that nominations have been so slow in previous years, but even with the slim number of nominees of last year

ing to University next year have become somewhat more clear. There will definitely be men in every faculty here next year, although just who they will be is not quite certain. The slight uncertainty should heavier nomination. Each faculty and college should nominate as many men as it thinks it can get out a substantial number of votes for, thus assuring itself as well as it can of having a highpolling candidate ready to replace their highest man if he should have to leave school. It is certainly no time to concede most of the representation meekly to the technical faculties

At least this fellow from School should be made

Ottawa Calling

A Canadian University Press Feature By Neil MacDonald

NEW LABOR CODE

Just prior to the deadline of this column, the government tabled a new Order-in-Council on Labor Relations, providing for compulsory collective bar-gaining in designated industries. The text of the order is unavailable to the writer at this point, but summaries of it appear to point to its being the first step towards the revision of certain sections of the Wartime Wages Control Order, passed in December, over which the ire of labor leaders and Members of

Parliament has been aroused.

The latest order provides machinery for the designation of a bargaining agency in an individual industry, by vote or other means, to negotiate with the employer on behalf of the employees. After 40 days time has elapsed (ten of them to give the employer notice, 30 to negotiate towards a settlement) a government conciliation board may be requested by either party. A period of time must elapse between the request for and the appointment of the board. Fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen days after it has reported back to the fourteen to see the fourteen the fitting to the bis underground and that hideout beneath the Biology Building whose existence not even McGeech had hitherto suspected. But McGeech was only ten yavning stamping light that marked his steel-doored lair. Another hundred yards and he would be safe...

But McGeech was only ten yavning stamping light whose existence not even McGeech had hitherto suspected. Finally, far off through a yavning stamping whose existence not even McGeech had hitherto suspected. Finally, far off the properties of the day of the properties of the properties of the b Minister of Labor, providing its recommendations have not been implemented, the employees have the right to strike to gain their demands. Strikes are forbidden, however, during the period in which a collective bargaining agreement is in effect.

Without examining the order further, it may be said that it has excellent points, and may well succeed in conciliating Labor, partially at least, in its antagonism towards the previous "Absolutely No Strikes" Order. It is, however, open to one serious criticism: there does not appear to be any means of enforcing the decision of a conciliation board. The board may decide in favor of the employees and the employer may refuse to accept the decision; a strike becomes inevitable. Strikes at any time are wasteful, but, in wartime, they may be disastrous. What had been hoped for by many Canadian

citizens was a Labor Code which would set up conciliation boards in whose decisions both Labor and Capital might have confidence, and whose word would be binding upon all concerned. A necessary concomitant of such boards would be the ability to reach decisions quickly, and that, as much as the required confidence of employees and employer, may have proved impossible to achieve.

The recent word in Toronto if a reduction in the number of deferments to Arts students in nonscientific courses is only a part of a much larger scheme, revising the situation as regards all students.

The only word which Selective Service allowed

to creep out was that only those students in the top half of their courses would be allowed further deferments. All others, in Arts courses, will be subject to call-up. It will be interesting to see what stand is taken on those courses which are made up by the student himself, combining Arts and Science

Which all swings around to the point that examinations are closing in!

The Word is Unity

Wymilwood Musicale

At the last Wymilwood Musicale of the season, the student audience was privileged, highly privileged, shall we say, to hear the Parlow String Quartet in a program of chamber music. Miss Kathleen Parlow even with the slim number of nominees of last year is reputed by many to be the foremost woman there was still some frantic filing of papers in the Warden's Office during the last hour of the final day.

There should be little hesitancy over accepting nomination this year since the conditions for return-

Undergraduate And Senior Members Art Exhibition

Contributors to the exhibition of paintings and drawings by undergraduate and senior members of Hart House are asked to note that all entries are to be handed in to the Warden's office by 6 p.m. on Tuesday 22nd February. The exhibition will open on Friday

By Phil Shackleton

If you want our opinion, which you probably don't, they're getting to be too much of a good thing. What we mean is there's too much humanity there. The rabid fans Saturday night were literally hanging from the gallery to get a partial view of the big game. After all Hart House was built to hold a limited number. The problem

all Hart House was built to hold a limited number. The problem is how to limit it.

Give a belated cheer for Canada's contribution to Detroit Tech. The two boys who led the scoring were Bill Coulthard and Don Hamilton, both Windsor natives. And as natives go they look like they're going far and fast. Detroit's fourth place scorer was also a Canadian boy, Mort Bunnell. Windsor had planned another of those Canadain championship teams this year, we're heard. Like the old Windsor Alumni team. But they needed players like Coulthard, Hamilton, and Bunnell and went about angling for their services. That's where Coach Goldman of the Tech team put down the old foot. And so the three Canadian boys stayed with Detroit and we haven't heard a thing about the Windsor team since.

Gymnastic Meet Honors Taken By Physical Eds

Torpedo Wrens

The Navy Wrens' basketball team from H.M.S. "Bytown" met their first defeat Saturday night when they clashed with the All Star Varsity team at Hart House. The U. of T. girls chalked up 38 to Navy's 23 points in four fastmoving quarters.

moving quarters.

The first quarter was comparatively even with Varsity netting eight baskets to the Wrens' six. Both teams muffed numerous shots at the basket but in the second quarter the Blue and White hoopsters settled down and completed time with a total of 23 to 10. Aided by Joan Davis, the Toronto team totalled 33 baskets to the Bytown squad's 12. However, the Werens became more see However, the Wrens became more ac-climatized in the last quarter and snaffled 11 more points to Varsity's five, making the final score 38-23.

The Wren team had been previously Playing men's rules in their league and their encounter with the U. of T. girls inaugurated their use of women's rules. Despite this hindrance excellent playing was manifested by them throughout the match. Dixie Elhatton from Winnipeg threw in seven baskets; Mary Emmett from Toronto copped two points, while Hazel Dickinson from London netted

The Varsity team found its support in Joan Davis who earned seven baskets, Mike Mahaney of St. Mike's who Mike Mahaney of St. Mike's who waltzed away with five successful shots, Jeanne Stinson of P.H.E. who slipped in four baskets, Rosemarie Cunningham of St. Mike's with three and Virginia Kitto of P.H.E. with one.

The Navy girls will continue on their tour playing warners are cent West.

our, playing various teams out West. tour, playing various teams out West. It was in anticipation of these future games that they were schooled in men's and western rules. Their team was coached by Sub-Lieut. Les Monk, who is well known in western sporting circles. The Varsity team was coached

circles. The Varsity team was coacned by Helen Gurney.

Members of the Wren team represented many Canadian provinces with Mary Webster of Vancouver, Diskie Elhatton from Winnipes, Mary Emmet from Toronto, Helen Rathwell, Medicine Hat, Volda McLeed of Toronto, Andree Ley of Vancouver, Zeke Caudwell and Helen Rathford of Toronto and Felici Arsenaul from Charlottetown, P.E.I.

Varsity All-Stars
P.H.E. and School Pile Up
Points at Athletic Night;
Army Course Representative Takes Fourth Place

ROPE CLIMBING NOTABLE

P.H.E. nosed out a victory over P.H.E. nosed out a victory over S.P.S. in the Interfaculty Gymnastic meet in Hart House's upper gym Sat-urady night by 11 points. Both had three men participating in the events, the only other faculty represented being the Army Course. The score was 796 to 785 with Phippen of the C.A.U.C. counting 269 on his own.

The individual honors went to Mc-Laren of P.H.E. with 321 points out of a possible 400. Pudsey of S.P.S. was second with 279, and Burak of S.P.S. third with 270, also out of 400. Phippen of Army ran a close fourth with 269, and Whittle of P.H.E. with 238, Lane of P.H.E. 237, and Georing of S.P.S. 236, were the other entrants. Each event was marked out of 100.

was marked out or 100.

The standard of marking was much tougher than other years. The points were awarded as follows: Approach and Retreat Form, 20 points; Difficulty of Movement, 50; Variety of Movement and Combination, 30.

All the entrants in the other departments performed on the horizontal bar and the mats, while all but Burak tried the parallel bars. Four of the contestants used the pommelled horse to get their points, and three of the seven participating displayed their wares on the vaulting box. McLaren was the only one to attempt the stationary rings and he gave a good account of himself on them.

The special event of the evening was the rope climbing. Mason was the only on to enter this event and he did the trick in 8 4/5 seconds. The rope was 18 feet long and he started from a sit-ting position and climbed with the use of his feet. Any would-be challengers were invited to try it but there were no takers. It certainly isn't the casiest thing in the world to do, and Mason made a good time on it.

Winning Fitzgerald Cup Third Straight For School

Athletic Night Swimming Features the Victorious Trinity Water-Poloettes; Alfie Phillips' Diving Awes Audience

VERNE PAGE M.C.

The Fitzgerald Trophy, emblematic of the interfaculty swimming supremacy for 1943-44, went to S.P.S. at the Ath-letic Night show last Saturday, making it three straight for the Engineers in the past three years. School was far ahead of the field, which, as a matter of fact, was nearly all Blue and Gold, with only a few swimmers from equally few faculties opposing the winners; thus the Toike Oike technicians ran up more than two-score points to single digits for the losers.

In the other features on the menu the Trinity water-poloettes took their Meds soeurs in a close battle by a 3-1 count. securs in a close battle by a 3-1 count. leaving the Senior Meds steam to regain lost face by taking a 2-1 verdict over the Varsity All-Stars in the more rugged brand of sport. At the conclusion of the swim meet, Alfie Phillips. the old master of the high board, showed his wares on the low timber to the awe of all the fans. His piece derisistance was a double somersault which had the rafters ringing.

M.C. for the evening was Verne Page, Honor Law, who has been handing this chore for the past four Nights. A few of the female pool fans have been easting a few coy glances at Monsteur Page, so just to bring them up to date we might say that he was a swimmer of we might say that he was a swimmer of the word with very the control of the

way back when, with the same Alf Phillips and also the late Winst Mc-Catty, so he is well fitted for the swim-job. He also does some work with swim-job. He also does some work with the Police Department at night, is in case of dispute, Vern can call on some real Blues, and then the Blues will really get the blues. (Ouch!)

Now, for those interested, here is a quick summary of the Swim Meet:

300 Medley—Only one team entered;
S. P.S., with Northwood, Lea and Lockhart strolling over the course.

BOXING, WRESTLING & FENCING, RUGBY Standing Committee Meeting Today, 12.30

The Sportswoman

By Betsy Mosbaugh

SCUPPEREDI

SCUPPERED!

Saturday nigbt's game was somewhat ambivalent . . . the Navy team came through with smooth passing and keen co-ordination despite their handicap of using women's rules for the first time. On the other hand, the Varsity co-eds had had only two practices together but exhibited fine style under the able coaching of Helen Gurney. From all account the Blue and White hoopsters this year are the best combo to be had for many a moon. But at this point we will refraint from the obvious lament!

The Wren Basketball team is the only team in the women's services. It is, perhaps, the most representative Canadian team yet to be . . . , with players hailing from all parts of Canada. Sub-Lieut. Monk, their coach, is to be commended for the maintenance of moral in this branch of the services by participation in athletics.

THEYEE DIVEY, TOO

P.H.E. damsels held their preliminary swimming meet t'other night with Molly Murray carrying off the honors for the diving. Ruth Christman was outstanding for her neat exhibitions in the style swimming, tricks and ornamental. Irene Martin copped the honors for the speed and Jean Stinson walked away with the award for free style, crawl and breast stroke,, perhaps we should say she swam away with 'cm.

ROLLING IN THE GUTTERS . . .

. . . is what Judy Henderson, head of U.C. bowling, wants all co-eds to do quick like a flash. Apparently there's a heap big tourney coming up with an interfaculty basis. Hence all scores will be totalled, tallied, etc., etc., and a Red and White team will be selected from the top notchers. Carry on, you too can be the life of the party.

Joan Snyder, head of badminton, whispered that the badminton tourney might be held this Friday coming . . God willing and the Granite Club comes through with the courts. Definite arrangements will be made before nightfall, she sez.

Foils Tourney Begins Today

night was a tribute to her essential three words, continue to act without genius.

The Mozart Quartet in D Major was Bob Grosskurth.

The Mozart Quartet in D Major was played with the required intimacy of approach, the Memetto and Rondo note-worthy for their Mozartian elegance. A Scrienade Tradre by the Belgian composer Jongen was piquantly interpreted, its vagrant harmonics budding and flowering by turn with each instrument. In similar spirit was Turina's La Oración del Torero, with its half-heard thrumming 'cello accompaniment. And the F Major Quartet of Maurice Ravel brought the program to a spirited Ravel brought the program to a spirited to Ravel brought the program to a spirited conclusion, the last complicated move-ment vij et agité as marked.

BROCK BRACE.

Centenarian

St. Michael's Players

The story of "Whiteoaks" by Mazo de la Roche, is a microscopic section of humanity, of a circle of satellites held in their orbits by a single compelling personality, and as such was creditably performed by the St. Michael's College Players last week-med. Adeline Whiteoaks is is woman. end. Adeline Whiteoaks is is woman who can still catch the salt and tang of living after a hundred years of it. Agnes Futterer portrayed this taxing role with vitality and zest; the centre of a com-paratively amorphous group of char-acters, she stands out like a teaspoonful of pepper in a rice pudding, and much ore pleasingly.

The presentation, with the exception

of a few rough spots in the third act of a tew rough spots in the third act ran off smoothly. This breakdown in the third act is unfortunately character-latic of amateur productions. The east-ing, with the unhappy exception of the role of Renny, was done with exactitude. John Stephanson, by reason of his slight boyish build and immature voice, was singually unconvicing in this role. The ingualrly unconvincing in this role. The difficulty with voices was also ex-perienced in the part of Nicholas. Joseph Stefani, admirably made up as a paunchy old-school gentleman of 60, sounded oddly like a college student just out of his teens. Dan McCarthy as Finch, the

his teens. Dan McCarthy as Finch, the psychopathic adolescent, gave a very creditable performance in an extremely difficult part.

The make-up of the players was of better calibre than is usually seen in eampus productions. The staging was accurate and the direction of Father J. O'Donnell, gave almost, a confestional. O'Donnell gave almost a professional touch to the play. It is pleasant to see the minor actors, having spoken their

Bits 'o the Bard

U.T.S. Auditorium

At a time when even the moneyed professional theatre would think twice before staging classical drama, the in-itiative of the U.T.S. Dramatic Society merits high praise. With an eye to the box office, they might have lured the public into the U.T.S. auditorium with modernistic productions, such as Mazo de la Roche's Whiteoaks, as contrived de la Roche's Whiteoaxs, as contrived by the amateur St. Michael's College Players. Or else they might might have produced a pre-publicized Candle in the Wind, as contrived by the amateur U. C. Players' Guild. But instead of doing these things, the society had the courage to greent last week for three courage to present last week for three nights, scenes selected from three Shakespearian plays, Macbeth, Julius Caesar and Henry Fourth, Part I.

Despite this commendation, however, we are sorry to say that their classical efforts were dismally disappointing.

The trouble was, probably, that they were not well enough acquainted with the plays. Nor did they understand the context of the seenes. Consequently, the words they spoke, for the most part, were as meaningful to them as the heiroglyphics on an oblesik. Any stagestruck dunce, it would seem, can parrot the words of a famous play-wright, but it takes time and trouble to truly understand the motivation, at-titudes and feelings of each role.

The Dramatic Society will protest that they are but amateurs and lack sufficient time. That is understandable but it is not a valid excuse. We suggest that they visit a rehearsal of either the Belmont Group Players or the Plaquest Dramatic Group, and they would see there how these Toronto amateur groups find time to analyse their roles as circumspectly as any Broadway actor.

Outstanding among the society's scenes, regardless of other deficiencies, was Charles Palmer. As the half-insane, emotion-chocked Macbeth, obsessed with the consequences of his murder, Palmer was one who did understand what was was so realistic that many in the audience looked at their program twice to see that he was po

Macbeth.

The Julius Caesar selection seemed devoid of any merit whatsoever, and, we admit, the young players cavorted about so vigorously that the slaying of their emperor resembled more the pic-ture of a group of little boys attired in Roman togas playing oldtime cops and robbers.

As the licentious Falstaff in Henry Fourth, Carl Erickson, cushioned pleasingly plump, was robust enought in his role, but how realistically so we decline to say. The beard and periwing he wore helped with the illusion, but beards and dusty, dishevelled, followed by his faithfull Sapper Section and . . . McGeecht!

All through that dusty chase McGeech had been rolling about on his periwigs are not enough

Scenery was excellent, and the direc-ion of J. L. Gill was imaginative. It was too bad that the acting did not was too bad that attain to equal merit. FRANK RASKY.

Personnel Boards Here Friends Mourn Interview Science Men For Job Placements

to Facilitate Army and Civillian Job Placement

MEETING 3:45 TOMORROW

Three Armed Services and Personnel Bureau Represented Here Last February

Service Selection Board and Michael's and Knox. representatives of the Wartime Bureau of Technical Personnel, to universities across Canada, arrived here yesterday and set up headquarters in Hart House. Interviews with graduating Science students were conducted all yesterday and will continue today and part of tomorrow.

Science students have been assinged times for interviews and have been turning up regularly at the rate of five to ten every half hour. The student, after filling out a form or two, is directed first to the representatives from the Wartime Bureau of Technical Personnel who size him up and direct him to the Service Selection Boards, where he is further questioned so that he may be placed where he is best

The Examining Boards have been The Examining Boards have been visting all the universities across Canada. With only O.A.C., Mc-Master, and Western left to go, they plan to complete their itinerary next Saturday. The results of their interviews all across Canada will then be compiled and compared. Their decisions on the placement of graduating students

Travelling Board Here to Interview Fourth Year Engineers Few Nominees For Elections In Hart House

Although the nomination lists for on Board Similar to the One Hart House Committees showed ten names yesterday, they still lack nominees from U. C., Dentistry, Pharmacy, St.

The small college of Wycliffe has representatives for election on every now nearing the end of their visits committee except the Camera Commitcommittee except the Camera Committee and the Squash Committee; J,
Coneybeare, IV Wyelifie, is up for the
House, W. Beattie, a junior, will run
for the Library Committee; H. Balfour, a sophomore, is nominated for
the Music Committee, and another
second year man, M. Wulsh, will run
for the Art Committee.
Forestry has a representative, H. D.
Graham, of third year, for the Camera
Club. These two smaller units between
them make up one half of the nominees
to date.

The remaining five potential commit-tee members come from the Faculties of Medicine and Applied Science and from Medicine and Applied Science and from Victoria College. J. R. McAllister, II Vic, and D. L. Bastedo, IV Meds, both are running for a post on the Music Committee. J. Boadway and W. Traill, two Schoolmen who have been nominated for the Camera Committee, make up the total.

There is a carry-over of Committee members from last year equal in number to this year's nominee list. They include, for the House Committee, P. Aykroyd and J. Horton, both of III S.P.S.; R. Grosskurth, III S.P.S., and on the placement of graduating students in the services and in industry will reach the campus about March 18.

Science students graduating this year who are not applying for technical appointments, or who may be medically unfit for such appointments, are reminded of the meeting to be held tomorrow at 3:45 p.m. in the Debates Room, Hart House. A representative of the Wartime Bureau of Technical Constituted on passe 4)

"The nomination lists will be taken down at 6:40 p.m. tomograduate."

After Long Service

WORLD WAR I VETERAN

The funeral service of one of the The funeral service of one of the University's great surgeons—Dr. D. E. Robertson, M.D., F.R.C.S.—was conducted at Convocation Hall yesterday afternoon by Bishop R. J. Renison, assisted by Canon Cody.

The service was attended by hundreds of citizens including many of the doctor's former colleagues and patients.

Dr. Robertson graduated from the University of Toronto in 1904. At the time of his death he was Assistant Professor of Surgery at his alma mater, Since 1912 he had been connected with the Toronto Hospital for Sick Children

except for a period in the first Great War when he served in France. In addition to these positions Dr. Robertson was consultant in orthopaedic surgery, Department of Pensions and National Health; member of the council, Royal College of Physicians and Surgeons of Canada: member and pas vice-president, 1936, American Surgical Association; member and past president, 1941, American Orthopaedic Association; past president of the Academy of Medicine, 1939-40. He was also a mem-ber of the Psi Upsilon and Sigma Nu

fraternities.

During his 32 years of service Dr Robertson was an active research scientist and recently had been studying osteomyelitis, a disease which destroys the bone structure. He was the first surgeon in Canada to perform sympathectomy, an operation to reliev paralyzed members of the body. H treatment during the polio epidemic of 1937. played an important part in organizing

Engineers Hear Dr. Rybka's Talk

Greater interest of the Canadian public in the more important political ssues was exhorted by Dr. K. R. Rybka, Honorary Chairman of the Mechanical Club at its annual dinner last night. To this end he quoted from Jennings, "You can defeat the British government on a rise in the price of beer, but not on the most important political issue of the day."

Dr. Rybka, who graduated from Prague University, is now engaged as a consulting engineer for air conditioning work. He has made installations in the Maple Leaf Gardens and the Dominion Square Building, Montreal.

Professor R. W. Angus, Head of the Mechanical Department, who is retiring at the end of this year, save in what he called his "swan song" a résumé of the growth of engineering. Carrying his audience back to 1899 when he received lis diploma, before the existence of the gasoline engine or the steam turbine, he said that the call blue rich the savell. asid that the only blueprints then available were made by hand. "I hope you like your profession," he concluded, "as I have mire."

Dr. Rybka, main speaker of the eve ning, hastened to quell any thoughts by his audience that it was presumptious for him, a man of European background, to comment on American politics. Geopolitics, he said, resolves itself into a question of pressures; with our present Canadian political setup a population density equal to that of Europe would result not in a war every 25 years, but in a state of continuous war.

Im a state of continuous war.

The German geopolities does not compare, he said, with the subject as usually recognized. They advocate a survival of the fittest, recognizing their own nation as the only possible fittest. Comparing the wars of modern history with the Wars of the Persians, Dr. Rybka said that the third Punic War was fatal, that we must not permit a third modern war.

As a solution, he suggested removal of immigration restrictions to relieve population pressure, improvement of living-condition efficiency in crowded areas, free trade and a closer alignment of political and educational systems. In Europe, Dr. Rybka said, university professors are often encouraged by govern-ment officials to accept portfolios con-nected with their studies; if they can teach a subject, it is assumed that they can efficiently apply it.

Tribute Paid to Sir Frederick Banting on Third Anniversary of Fatal Plane Accident in Newfoundland

RUSSIAN RESEARCH CITED

Wide and Rapid Promotion of Medical Science Both in Universities and Profession Is Needed Williams Claims

The hope that those who are directing our destinies after the dance is distinctive in presenting Mart Kenney, Kathleen Stokes and the Bob Quartet all on the same bill of fare at Eaton's Auditorium."

"Where else," he asked, "would you get a combination with refreshments, semi-formal dress and Lcap Year Night all thrown into one evening?"

Virginia MacLeod, social directress of the V.C.U., explained that semi-formal dress means that formal attire by the men.

"The committee," she added, "felt that semi-formal dress means that formal attire by the men.

"The committee," she added, "felt that semi-formal dress would be more satisfactory for most people under the circumstances than either optional of formal attire. The committee has also decided to rule corsages out."

Tickets for the "Dance of Distinction" will be on sale today at the V.C.U. office in Vic. They will also be sold at Wymilwood and Annesley every day this week at noon for the convenience of the girls who are taking advantage of the fact that the At-Home is a Leap Year dance. war will realize the importance of

found significance for the human race,"
He said that while Dr. Banting is
important for two things, the isolation
of insulin and the stimulus he gave to scientific research, it was the latter which he regarded as his real mission. Speaking of the need for more agri-

cultural land to support the population of the world, Dr. Williams said that it is illogical and absurd for civilized people to engage in wars to get living space when there is so much unused land in the world. What is needed is a change in the fighting front, he said, the problem being one of scientific research.

Using as an index the British esti-Osing as air mines the Division estimate that one acre per inhabitant is required to produce adequate food, he estimated that two billion acres are necessary to supply the inhabitants of the world with an adequate food supply. which is less than one-half of the present cultivated area. "FLUORINE FOR SOUND TEETH," SAY DENTISTRY EXPERTS TWO SCIENCE MEN FROM RIPLEY SAY PHOSPHOROUS

By Frank Rasky

town press—in one instance anyway—is all wrong.

It's about teeth.

It's about teeth.

The Toronto dailies last week revealed the startling news that for every ten persons in the village of Ripley, Ontario (pop. 375), nine people owned perfect sets of uppers and lowers.

The press credited the phenomenon to the high content of flourine, a bone-building element, said to be existing in the water of the town's artesian well. So believe "dental experts," the press wrate.

students in the School of Practical Science here believe different-ly. Harold Donnelly, 19, and Huffman "Huffy" Harris, 23, only natives of

Not that they want to give aid and lie buried in an Indian cemetery near comfort to the enemy, but there are the centre of our town. Through the laws from home have been the ruination town press—in one instance anyway—through the soil and into the artesian had seven teeth filled. Which should, of immigration of immigrat well."

"Sounds plausible to me," said Harris In any case, both students agree the artesian well is a wonderful thing. They agree, morever, that it must have some uniraculous potency. Donnelly recalled that the well—which supplies the whole

that the well—which supplies the whole village—contained plenty of calcium, too. "I remember," says Harris, "that there's so much calcium in our water that Ripley housewives had to put marbles in the bottom of their tea-kettles to make the stuff disappear. A borrowing neighbor of ours, I recall, once came to our place and handed me the kettle, asking me to fill it with water. But to me, it already felt heavy." "So I asked: 'But isn't it full now?' "No,' she said.
"I looked into the kettle, and there

had seven teeth filled. Which should, he avers, prove something. Meanwhile, the research department of the Faculty of Dentistry, in conjunction with the Ontario Department of Health, is still working full blast in attempts to discover the "believe it or not" mystery behind Ripley.

Investigations have been going on at this time village on the castern shore.

Investigations have been going on at this tiny village on the eastern shore of Lake Huron since last April. That was when Dr. J. A. MacDonald, the town's dentist, evidently wondering why business was so slow, checked up on the condition of children's teeth in the town's secondary school. He tipped off

ly. Harold Donnelly, 19, and Huffman "Huffy" Harris, 23, only natives of Ripley on the campus, are the boys. They credit phosphorus with the dental magic.

Donnelly, in first year electrical engineering, affirms: "The secret to disease-free molars probably lies in Ripley's phosphorus. Phosphorus, as all dentists know, makes for better bome structure. My theory is that the phosphorus comes from the bones which the structure of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus comes from the bones which the content of the phosphorus of the phosphorus content of the phosphorus of the phosphorus content of the phosphorus content

Youth Follows Up

The Ontario Provincial Committee of the Canadian Youth Commission, a national body pledged to a two-year study of youth problems, is finally shows signs of life, having called a conference of all Toronto delegates to the Ontario Youth Conference of last November and all other interested groups to undertake the establishment of a smaller local group, a Toronto Youth Commission. The great body of people, young and old, throughout the Dominion who are interested in this national survey have gradually been broken down into smaller groups to study individual regional problems thoroughly and forward their findings to the central executive. Local groups are now operating in Hamilton, London and Kingston. Thursday's conference in the Economics Building should set the Toronto group on its way.

The provincial meeting of last November broke The Varsity Reviews the first trail toward the Commission's goal of a comprehensive report on youth problems in the post-war world. Some 500 delegates gathered to bring

mission. In addition the conference will consider the setting up of machinery to facilitate the study of the six topics introduced at the November Con-Life, Religion in the Life of Youth, and Citizenship. night will be expected to state the field of their interest and the conference will break up into six groups to decide the best way each organization can participate in the work of the Canadian Youth Commission and how the results of their study can be best tabulated and presented.

The Ontario Provincial Committee has drawn up a list enumerating by youth groups the proposed composition of the Toronto Executive. On this list the University of Toronto, through the Students' Administrative Council, has been ascribed one representative. It is important that the University be represented on a board of this kind, in order that we may have a voice in the future proto attend. Individual student governing bodies are urged to send delegates to this conference sines the central S.A.C. has no immediate contact with the student body except through the college and faculty executives.

Any students who attended last November's conposals of the Commission. The S.A.C. has not

ference only to lose their interest in the face of long-winded discussions and conflicting interests, are advised to try again on Thursday. The Commission is gradually getting down to brass tacks and dis-cussions of the Toronto group should be much more to the point than the buzz of a provincial group of 500 ill-assimilated delegates.

Obstructionism!

Obstructionism of a peculiarly physical and irritating type is being practiced upon the University by the civic works department. It happens every year at about this time or earlier, depending on when the really heavy snowfalls begin. It becomes necessary to remove excess snowpiles from the city streets. These are disposed of by dumping them by the truckload in selected city parks. Generally speaking the resultant tattle-tale grey heaps do little harm and many a young sprout has peachy fun climbing the small ranges or playing frigid Guadal-canal from one simulated shellhole to the next.

Queen's Park it is different. There the loads of dirty snow are gradually spread over a wider area until one or more paths are cut off, forcing ong and serious detours upon hustling students. This year already a secondary path from Hart House to northern section of Queen's Park Cres-cent has been engulied and another direct route cent has been engulfed and another direct route from Victoria College connecting with the main express path to the central and southern part of the campus has been forced several yards out of its proper position. Soon this artery may be obstructed entirely.

obstructed entirely.

This lack of consideration for a large group who another man came into the study. The habitually use these paths is very irritating. It is father stopped pacing long enough to too late this year to do anything about the sludgy acknowledge the newcomer's presence. Then they both continued the wild pacture of the property of the barrier, but a University protest is called for to be followed by a memo to responsible officials next winter to be sure that these paths are not blocked then. Not only is this an indefensible violation of a long established right-of-way, but it results in extreme inconvenience to at least one considerable groups of students who have to dash from Victoria College to Baldwin House, a stretch on which minutes have to be made to count and the shortest distance is understandably preferable. Queen's Park, after all, actually belongs to the University, it is only leased to the city.

The Incomplete Anglers

complete Anglers by John D. Robins is forth the problems most interesting to their group. Some of the panel discussions became bogged down early in the session but the conference did accomplish its purpose in beginning a process to find out what youth is thinking.

The Incomplete Anglers by John D. Robins is aboratory in a nearby University. Iwo students are speaking: "We'll get those two guys whose ostensibly chiefly concerned, the reading of the book which to the conference did accomplish its purpose in beginning a process to find out what youth is thinking.

The Incomplete Anglers by John D. Robins is aboratory in a nearby University. Iwo students are speaking: "We'll get those two guys whose of the part of the book bears interruption for less pleasant, but more necessions."

The world's repertory of fishing The Toronto conference has been called primarily to elect an executive for a Toronto Youth Comtion of fish stories which are frequently only the former in disguise, therefore there is nothing novel about the genre of this book. This, combined with -Health, Recreation, Post-War Jobs, Family the fact that the author happens to be one of the reviewer's favorite professors, caused the book in Groups represented at the conference Thursday this case to be viewed with considerabl judicial eserve. That is until we had read a page or so.

The Incomplete Anglers proves to be the funda-

mentally unremarkable tale of two guidless tenderfeet (foots?), but the childlike candor of the telling (plus certain tacit faslehoods which are made transparent by the very obviousness of their omissions), and the imagination, unabashed and unregenerate, which neither the incomplete Izaak Walton nor his companion have allowed themselves to lose since their hoyhood days make *The Incomplete Anglers* courtroom. the north woods. We strongly suspect that the book itself is a product of gas rationing. It we are right, then this restriction has become an undisguised blessing to those of us who couldn't discharge the strong that the strong the strong that the strong

Beardon lifted the bottle to his lips

Beardon lifted the bottle to his lips and drew lustily on the contents. Amethyst, his girl, clutched at the bottle and the fiery liquid burned down her throat like a chocolate millshake. With a blast and a throaty rumble on the drums, the music began and Beardon and Amethyst staggered out onto the dance floor and began to bounce up and down at a great are. It was a up and down at a great rate. It was a lecherous dance they danced, and there was an almost savage glint in Beardon's eyes as he danced with Amethyst—the little guttersnipe who didn't have a chance.

In another corner of the hotbed of

In another part of the city, an anxious father paced up and down the floor of his study. It was easy to see that he was nervous and anxious. He paced up and down muttering to himself. Then Then they both continued the wild pacing. Three o'clock in the morning, they were still pacing. Five o'clock in the morning, they were still pacing. Eyes bloodshot, legs bowed, ties askew, the two men were still pacing at seven o'clock the next evening.

Suddenly, both cracked at the same moment. Their furious pacing stopped, they looked at one another, then raising their arms in supplication to the alabaster ceiling above them, they screamed in unison:

"WHERE ARE OUR WIVES??"

"WHERE ARE OUR WIVES???"

A tired and anxious police sergeant picked up the phone for the fittieth time that day and heard the anguished plea of the two men as they screamed hoarsely into the phone. "WHERE ARE OUR WIVES???"

Our scene changes. It is a Sociology laboratory in a nearby University. Two

The second student, a most agreeable chap, answered, "Surely,"

* * *

Our scene changes again. It is in the city hall. The city commissioners are sitting around a long table, smoking fat cigars, eating peanuts, telling dirty stories to each other and laughing hearitly. The committee for adult delinquency enters the room and a hush falls on the group. Nobody is hurt. Then the committee introduces Amethyst's husband and Shasta's husband and the latter tell their sad tales

"Yes, this is a serious problem," said the mayor. "Why this might develop into something serious like juvenile delinquency." A shocked gasp rocks the

U.C. Blasts Vic With 12 Goals

Vic I were handily trounced I2-1 by U.C. I at the Arcna yesterday in one of the most lopsided hockey games of the year. The Scarlet and Gold team fell apart at the seams and absorbed a terriffic beating during the last half of the first period and all through the second, after outplaying U.C. for a good five minutes at the start of the game. The Vic defence was the worst seen this year, and U. C. forwards coasted in on poor Moriartey almost at will. When the properties of the game but Skinner was too good for them. U.C. came out of their fog when Wade slipped a pass to Bremner who hit the goalie and then Warren got a hold of it and hit the post. Then Graham took a pass from Nesbitt and sifted around the defence to beat Moriartey with a shot to the bottom corner at IZ:20. Nichols shot one that

PRO AND CON .

Guest columnist Johnny Northwood struck a resounding note last week by mentioning that almost forgotten idol, the true amateur. At every Canadian college amateurism is to be found in its infancy. The fellows at Hart House pay and play for the love of the game and thus carry on the democratic athletic heritage. This heritage permits the physically fit speciments to receive expensive, extensive and specialized training no matter what their means or origin, and rightly so.

Amateurism is difficult to define today. The line separating it from the professional aspect is all too faint and seems to be getting fainter with each passing year. One by one, the different leagues are silently dropping the word amateur from their names after having dropped the meaning and sense of the word long before. A few of the more brazen remain but they, too, shall follow the examples set by their predecessors 'ere long.

The paying public are at the stage that they suspect any event billed as amateur as something with big, or at times not so big, promoters behind the scenes. Amateurism has been tainted to say the least.

Happily as Johnny pointed out cells we have a support of the scenes.

Bremner to make it 6-I as the period ended on a pass-out from the corner.

U.C. kept up the pressure in the second period and Neshit got one from Furry and Graham after Moriarter had stopped three shots in a row. Furry slipped a pass over to Graham who went right in to score another within IS seconds. Graham got another on his own as he coasted around the defence and went right in on poor Moriartey. Schell got the game's only penalty when he started swinging his stick at U.C. players in general. Hart went right in on Moriartey and bounced a hard shot off his pads. Warren got it over to him again and this time he made no mistake about it as he drove into the top corner with fwe minutes to play. Graham carried the puck all the way up the ice to score a nice goal to boost the count to II-1. Bremner put one in while standing inside the crease which was disallowed. He immediately banged it out to Warren from the faceoff and Warren parked the puck belind Moriartey to wind up the scoring. The game ended with U.C. still turning on the heat.

K S

TED

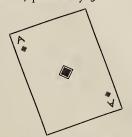

We do not pretend to know all that lies back of everything but it is only learned that anyone who cannot back his statements with facts to play. Graham carried the puck all the way up the ice to score a nice goal to boost the count to II-1. Bremner put one in while standing inside the crease which was disallowed. He immediately banged it out to Warren from the faceoff and Warren parked the puck belind Moriartey to wind up the scoring. The game ended with U.C. still turning on the heat.

K S

That sounds reasonable enough to start with but if this were ever instituted at colleges, it would invite the ever-grasping promoter to move in on the unsuspecting athletes. Colleges would enter the professional field and compete amongst one another for the leading high school athletes. Thus the only logical step would be to continue the present set-up, which gets us back where we started. And logically, it must work as well across the border as it does in Canada, so why the useless t

No Two Days The Same In Athletic Office Duties

By Betty-June McKensie

files. They have quite a system of filing there. All the games are scheduled, the referees appointed, the times ar-ranged by the Athletic Office. On an ranged by the Athletic Office. On an average they arrange two hookey games, two water polo, four basketball and three baseball games each day.
"Oh!" Miss Lea threw up her hands.
"The records are terrifie!"
Miss Boyd told about arranging athletic meetings and conferences. "And Athletic Nights!" she added.

When asked about their daily routine the three ladies laughed. "Oh my goodness, there isn't one day like another," they said. "Each day brings its own work."

work..."
"Today? Well, I don't know," Miss Boyd turned around and looked at Miss Walter. They smiled. Then the game book was brought out with all the game reports field; someone pointed to a list, someone clies to the Reed Trophy and said something about points. We

By Betty-June MeKensic

You hear people talk about the folk behind the scenes who never get any credit, but did you every really think about it? Take the Athletic Office, for instance...

We walked into the large sunny office in the athletic wing of Hart House and approached the counter. There were the three ladies we had heard about, typing, leafing through files and talking to Mae MacCutcheon.

They're very friendly and full of good humor in there. But they would have to be to handle all the work they have to do. As Mr. T. A. Reed said, "You should see the crowd before that counter wanting information, schedules and such."

While we were talking to the staff members several be-sweatered lads came puffing in at different times, and work was supposed to have slackened off by then.

"Miss Lea. I'm supposed to referre that there will always he voult—"

which is so Boyd went across the latte of Mr. Reed, will the old inter-oclegiate adsist Mr. Reed, with his white latter work there this last August. But kindly Mr. Reed, with his white lamined work here this last August. He has been here for 30 years and has generation after generation flock proving grabbing a hockey stick in one hand, a book in the other.

"Best thing there is for a fellow—sport," he said. "I think it's one of the most important parts of university life. And its really something to see all the most important parts of university life. And its really something to see all the dathleties. You can see the point of view constantly changing with each new batch, too. It's nice to be able to know that there will always he voult—"

"Miss Lea, I'm supposed to referee game at 4:00 and it ..."
And Miss Lea buzzed through some was something underneath. was something underneath that he wanted to point out but just couldn't manage to put into words.

NO SLACKS - BUT FACTS!

When Whitney Hall denizens start throwing snowballs, we know a couple of facts (all personal data disregarded). Likewise, when we see other damsels of other residences indulging in the same ladylike sport, we figure that the co-eds are becoming frustrated. Now this is a very serious matter in any institution and we decide we must get to the core of all this. And whaddya think we find? With all this now, the beauteous ones are simplee dying to ski. But being of the naturally retiring and shy sex they are of the opinion that it is the job of the head of skiing to whip into action and dash off a bit of organizing. Think how distraight the lasses would be if all the snow melted 'cre they could get all decked out in Christmas-presentogs and make like they were skiing!

Now all this is a propos of subtly suggesting to the ski club prestat she do something quick like a flash. She's had a comparatively easy time of it all year, what with no snow. So let's see if we can have the rare combination of a good skier and a good organizer. Ten to one we won't see.

STAND UP AND CHEER .

UNFINISHED BUSINESS . . .

Everybody likes to see themselves in pictures. But some athletic fems are going to be disappointed unless their Torontonensis reps snap into action and get those team pictures in before the end of February. The dummy for the athletic section of the book is being made up now, so beetle off to the photographers as soon as possible. Again we are in a position to commend the expediency of Vic who have their quota in and engraved. Quite a number of pictures are over in the S.A.C. office in Hart House waiting for the reps to tab them with the right names . . which is just as bad as not having the pictures in at all, since the proofs can't be sent to the engravers' until the data is complete. Do you want your Torontonensis on time?

MORE UNFINISHED BUSINESS . . .

While we're on the subject of T'nesis, leave us remind you, here and now, about the big bowling festival scheduled for the 28th. Isabel Genmill, Convenor of the University's Setemup and Bashem Down League, whispers the glad tidings in our ear that it's going to be held from 4 to 6 p.m. at the Midtown Bowling Emporium. Dust off your shoes and answer the call of the slippery maple.

Vic Relay Team Best In Half Mile Canter

Two more track events were run off in the upper bowl in Hart House yesterday under the watchful eye of Hec followed by Trinity with 1.57.3, Meds Phillips. The events on the menu were the half-mile relay and the two-mile grind. Some good times were run up but on the whole a mite more conditioning would have made a big difference, according to Hec.

Here is the way they stood after leaves the half-mile school's Frank Fordye in 10.14 led Phil Shackleton of LC. (10.17), followed by Lorimer of School, Fielding of Meds and Delaney also of Meds.

(Continued from page 1)

disease, caused by myriads of insects destructive to human life, and it is the task of medical science to overcome

"Russia is devoting a far larger share of her national income to scientife research than any other nation in the world," Dr. Williams stated. Speaking of recent Russian development in general, he said that no country in the long history of civilization has made so much some control of the said progress in so short a time as has been brought about in Russia by properly co-ordinated and supported scientific and social research. He pointed out that after the last war, Russian industry was

Speaking more specifically of medical science he stated that research should be planned as a long range problem by people ready to devote years to a task which may end in failure. He stressed the necessity for acquainting the public at large with these projects as it is the people as tax-payers who will supply the funds necessary for such research. He said that it is the special task of physicians to see that this public interest is created, that thry should be the missionaries and proponents of medical

U. N. T. D.

ful letters, nor bibliophile his first edi-tion, nor chubby child her broken doll, with any more devotion that I cherish that knife. It is a clasp-knife, nine and social research. He pointed out that after the last war, Russian industry was reduced to one-seventh of its pre-war level, but by the end of 1937 it exceeded that of Great Britain and Germany and was second only to the United Sates. He added that more than nine billion books have been published by the Soviet Union in one hundred languages and that more books of Darwin and Shakespeare are printed and read in Russia than in Britain and the United States. and works and things, and that I would just as soon slit your weasand as look at you. It is my consolation for a boyhood wasted, far from the bloody glories of the Jolly Roger. The steel is somewhat soft."

And there is more of this sort of thing and other passages that are different. The inward truths of life in the open, especially as it is lived by the barely competent, can all be found between the covers of this warm and jovial volume. REX WILSON.

let's go places What's On Today

There is an important message in Where Are Your Children, playing at Midtown this week. Juvenile delinquency has become a serious wargenerated problem and Monogram Pic-

tures have, if DELINQUENCY nothing else, de-AT THE picted the serious-MIDTOWN ness of the problem dramatically a n d

well. Of course the delinquents in the picture don't act like the delinquents that you and we know. The movie characterization was that of an artist who smears the paint on his canvas with his thumb and fore finger. Barring this criticism, the movie is a straighforward story with a well-conceived moral. We recommend it because it will show you how easy it is for children to become delinquent and how easy it is to mis-interpret innocent activities. The movie solution to the problem is glossed over;

interpret innocent activities. The move solution to the problem is glossed over; but we inferred from the quick sequence of scenes that the solution is an expensive one. Whether Toronto has a more serious juvenile delinquency problem, we don't know; but if she has, this picture will open an eye or two.

Also running with Where Are Your Children is an innocent little grade-Bicture called Get Going. It's all about the hundreds of white-collar cupcakes in Washington, the Yankee capital. Housing shortage, manpower shortage and talent shortage predominate in this story about a girl who goes after a man in an unorthodox fashion and who turns up a nest of Nazi spies in the process. Mildred Donaldson, Joan Campbell and Dorothy Mees. The identity of the broomstick was not disclosed.

The annual Mardi Gras featuring a Leap Year motif will take place at the club tonight. Prizes and novelties will be in keeping with the theme. Tickets are 35 cents at the club only

Engineers to Debate Post War Controls In 2nd Segsworth Forum

Second of this year's Segsworth Debates is to be held this afternoon on the subject, "Resolved that the government should control industry in the post-war era." Donald H. Millard and William A. Neale, both of second year Engin-eering, will uphold the affirmative against J. Bruce Adams and Cyril A. Fry of first year.

The debate is to be held at 4:30 in Room S25 of the Engineering Building. The judges will be Professors A. R. Zimmer and K. B. Jackson.

THE UNIVERSITY OF TORONTO, WEDNESDAY, FEBRUARY 23, 1944

Meds' Course Length Remains Five Years, Faculty Heads Avow

Nation's Colleges

EFFECT SAID SERIOUS

The rumor that the Meds course was being extended to the pre-war length of six calendar years has now been killed by the posting of large notices in the Medical building explaining the revised schedule of six academic years in five calendar years, The Varsity was informed yesterday.

The notices also explain away the second year students' fear that an extra semester was being added to their third

Assistant Dean E. S. Ryerson stated that the vacations are unnecessarily long and serve no purpose except to allow the students to forget what they have learned. "They have still two months in which they may work," he said. "They have no reason to kick," he added and explained that in the American Medical Schools the four-year course has been reduced to three years and there is a mere two week interval between years.

there is a mere two week interval netween years.
Discussing the post-war schedule Dr.
Ryerson said emphatically that there
would be no return to the old wasteful, pre-war schedule. In regard to the
rumor that there would be a BA. requirement for entrance to the pre-war
source he said that such a requirement quirement for entrance to the pre-war course, he said that such a requirement had not yet been decided upon but it seemed likely that there would be some sort of pre-medical Arts course re-quired. He named the universities of Dalhousie, McGill and Western Ontario as those which already have compulsory pre-medical Arts courses.

School Shuns Gov't Control

The second of this year's series of Segsworth debates at S.P.S. saw the defeat of the motion "Resolved that the government should control industry in the post-war era." Professors K. B. Jackson and A. R. Zimmer, judges of the debate, announced that the negative team won over the affirmative by a con-siderable margin.

Donald H. Millard, first speaker for

the affirmative, defined government con-trol as complete domination short of ownership. He then proceeded to outownership. He then proceeded to outline the set-up of government control.
The second affirmative speaker, William
A. Neale, expressed the view that
talents and discoveries of inventors and
research workers should be used to the
best advantage of the nation.
Cyril Fry and J. Bruce Adams,
speakers for the negative, contended that
the complete control of industry by the
government would result in domination
of the oress and radio, as well as

of the press and radio, as well as fostering of favoritism and corruption. The winners of this debate, hoth from first year, will meet John L. More and Ken R. Coulter, of fourth year, in the third of the Segsworth series.

Don't Fear Russ, They're All Like Us, Sir Bernard Pares Admonishes Class

Sir Bernard spoke last Thursday in the series, Pillars of the United Nations, sponsored by the History Department.

In his opening remarks to the class he stated that "Russophobia" was ex-pressed only by people who had never been there. He said that the Russian

he stated.

Sir Bernard wondered at the constant suspicion of Russia in Canada as well as in the United States, where the feeling is stronger. In the last war Russia was dominated by three people, the czar, his wife and Rasputin, a monk. Within the first four months of the war the regular Russian army was destroyed due to the incompetence of the government.

During the regular lecture period of first year students taking pass Modern Russia, never, will, said Sir Bernard. In the studied the problems, or tried out Russia, never, will, said Sir Bernard. In the studied the problems, or tried out Marxian theories which were prepared five times and has only once fought her, School of Slavonic and East European Studies at London University.

Like the stated. Sir Bernard wondered at the constant suspicion of Russia in Canada as result these theories when put into for an intensety incustiance as a case and needed a working class to fulfil the requirements of its principles. As a result these theories when put into practice, meant ruin and starvation to Russia, which was largely rural, and her population decreased by one third.

It is indeed unfortunate, said Sir Pearand, that propole do not realize the

Bernard, that people do not realize the difference between conditions existing in Russia during 1921 and 1944. Since 1921 fantastic communistic theories have sovernment.

It was the report of the wholesale destruction of an army lacking amfurthermore they are similar to Canadians and Americans, particularly those in the middle-west with their deep ly ingrained sense of initiative and their love of the freedom of the broad, opspaces.

In addition, Sir Bernard said, the Russians have some of the same coonomic problems, such as problems of how far north wheat can be grown and how long navigation can be kept open in the northern regions.

In spite of unfounded rumors, the

"Get Set, . . .

The race is just about to start for membership on are not enough starters to make a race worthwhile in three of the four open committees. Only the Music Committee list of nominees shows that an election is certain so far. There nine men are standing for the eight positions on the committee, one of them The usually crowded starting line in the race for the House Committee needs two more entries before an election will be necessary. The same condition is true in the case of the Library Committee, while the Art Committee needs five more a democracy, so let's see that these hopefuls at least get a run for their money.

Neither PHARMACY nor FORESTRY have graduating may run and all may vote. Neither of man carried over on each of the Library and Art Committees. VICTORIA COLLEGE has nominated only one man who is standing for the Music Committee. Vic has no men carried over on any of the four open committees.

Medical students appear to be on the verge of giving up reading as they have not nominated a man for the Library Committee. They are also ignoring the Art Committee along with the Dents, St. Michael's College and University College.

The time for nominations is getting short. Closing time is 6 p.m. tonight. Then the race begins as candidates propound their platforms through literature and posters. We hope these earnest souls are applying some thought to the problems with which they may be faced, and will regard election as representing something more than the privilege of eating at the High Table in the Great Hall.

Community Music

This year's concert of the University of Toronto Symphony Orchestra will be representative of the finest traditions of community music. This evening in Convocation Hall all who care to listen will have a chance to hear music played for the love of it, with spirit and enthusiasm and as little violence as possible to the composer's original intentions. The orchestra has been working toward this event since last fall, they have had fun playing together, and they hope to share that with the audience this evening. Symphony Orchestra will be representative of the

The concert should be thoroughly enjoyable for all

This year's orchestra will seek to add a worthy gem to a string of interesting and praiseworthy concerts. It is expected that the new addition will outsparkle any of recent years, challenging even the brilliance of last year's concert under the baton of Victor Feldbrill. Certainly if early organization and stability of direction are any indication the orchestra is on its way to a triumph. The program is not recondite, and except for the first and last compositions which may give trouble to those unable to keep one Schubert march or one Strauss waltz separated from the many others in his mind, should give no trouble to the listener who "knows what he likes." If you are the type who mutters" stock" and walks away from any program on which you have heard more than one number more than twice before you won't bother crossing the campus tonight, al-though you'd be well advised to do so. We suggest that such people go to the concert, for they'll like it in spite of themselves. We won't recommend the University Symphony as a competitor for the New York Philharmonic's laurels, but although the two may be somewhat different in size and in the matter of the highest polish, the *elan* of our hard-working amateurs under John Reymes-King and his assistant and pupil Hanus Gruber, will suffice to make up the difference in enjoyment.

Take Off Your Shirt . . .

The recent orders concerning medical examinations for students called up for military service will constitute a minor hardship for students so caught in the toils of military organization, but this should not be the straw that will break the camel's back. Apthe coming year's Hart House Committees. The parently the Mobilization Section of National Sestarter has just called "Get Set!" and as yet there lective Service has caught up on its back filing enough lective Service has caught up on its back filing enough so that it is now able to undertake a task which will be of use to it in the matter of future reference. Whether a man be deferred or not, if he receives a call he will henceforth be submitted to a physical examination, thus the Divisional Registrar will have on hand the physical categories of all men called. Speculation as to exactly what the application of this information will be has so far got us nowhere, but it will undoubtedly come in handy. We understand that the medical examinations will

nominees. Uncontested elections are a bad sign in be given out at Exhibition Park, which, as anyone who has been there will tell you, is still just as far as it was in the good old days when the Canadian National Exhibition used to attract mighty milling nominated anyone for any of the four open com-mittees for which all undergraduate members not trip there and back may be made two or more times trip there and back may be made two or more times in the course of a call-up and the time consumed may these units has a man carried over from last year these units has a man carried over from last year on any of these committees. The smaller groups are perilously close to losing their representation entirely. TRINITY COLLEGE has as yet nominated no rate, the best thing to do when you receive the government's equivalent of "Take off your shirt, and "MacGeel" is comply gracefully and take along your sense of humor for a two-day change of scene at Exhibition Park. You probably need it anyway.

No Crippled Voice Here

Massey Hall

They carried Marjorie Lawrence, stricken with infantile paralysis, onto the stage last night. They dinmed the houselights a minute, and you could see shadowy figures carrying a glittering object and when they turned the lights up again, there she was, seated on a cushioned chair, a lovely blonde Metro-politan Opera soprano, bowing as best she could to wildly cheering audience.

Of course Miss Lawrence's disability struck a chord of sympathy and admiration with her audience, but an artist endowed with the potent voice she possesses would command acclaim under any cir-

Gilhooley **Charged With** Corruption

Candidate Asserts Hart House Administration Attempts to Prevent Contested Election By Using Spongy Nomination Forms as Towels

LICKERBRETH EXILED?

Corruption in connection with the forthcoming Hart House elections was alleged yesterday by Horatio Q. Bungstarter III, III Honor Glassblowing, in a speech before an assemblage of apple-munching students who crowded the basement corridor of Hart House at lunch time. Bungstarter claimed that Acting Warden J. R. Gilhooley had been attempting to rig elections by acbeen attempting to rig elections by ac-clamation in order to install his im-pecunious relatives in lucrative positions on Hart House Committees. This charge was based on what Bungstarter claimed was conclusive evidence. He told The Varsity and repre-sentatives of 16 major daily newspapers and three wire services in an exclusive

sentatives of 16 major daily newspapers and three wire services in an exclusive interview that completed nomination blanks were being used to eke out the paper towel shortage in Hart House wash rooms. It was his opinion, he said, that these represented an attempt by Gilhooley to dispose of excess nominations or untractable candidates so that he might pack the committees for the coming year with suitable political hacks in order to extend his regime.

regime.

Bungstarter, who is contesting election on the Ballistics Committee, hoisted the election banner in an impromptu pre-election speech. "Gilhooley must go!" he trumpeted. "Sink him in the side pocket." He promised voters a full investigation into the handling of Hart House financial affairs by W. R. (Stickefurgers). Concentrate and the

Hart House financial affairs by W. R. (Stickyfingers) Covcatcher and the subtle violences practiced upon the over-curious by W. B. (Torpedo) Barrel, the official 'greeter."

If elected Bungstarter promised to conduct an investigation into the mysterious disappearance four years ago of the beloved warden of Hart House, J. B. Lickerbreth. "He's supposed to be in England on leave of absence. I say he was exiled. Who would ask leave to go away from Hart House! ave to go away from Hart House!'
With that Bungstarter asked to be ex-

cused so that he might return to, as he put it, "Complete my qualifications as a member of the Ballistics Committee," and retired through a glass door off and retired through a game, the front basement corridor.

—Oenipus

songs packed with plenty of gusto. It was for this reason, undoubtedly, that she chose of her own accord for her encore the organ-like Rule

Britannia. Displaying that tophcavy music was not the only field to which she limits herself, though, she lilted through such flossy things as Waltaing Matilda and Ravel's somewhat Prokofieffy La Flute Enchantee.

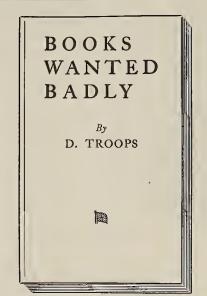

It was pleasant to hear her include among her six encores a piece called Gae Doon the Brae, Davy, Lad, and we heard someone in the audience nearby, evidently an individual more intimately acquainted with Gaelic that we, exclaim

Slushy Ice, Slow Play, As Vic Win Over Knox

Wheeler - Groover - Radcliffe Line Stand Out for Winners, Goalie Hall for Losers, in Slow But Spotty Contest

PUCK OFT AMUCK

Vic's second hockey team scored again yesterday. In fact they scored three times in the game with Knox II. The ice was poor and the playing slow, but nevertheless the game showed some

ice was poor and the playing slow, but nevertheless the game showed some interesting spots.

Outstanding for the Vic team of course was the line-up of Wheeler, Groover and Radcliffe. The game started off with these three boys making several rather fine runs down to the Knox end. From then on the playing seemed to stay around that net. As a matter of fact the first half was rather uneventful. Duke, of the Knox team, was whisked into the penalty box once; it was poor and the playing the series of the se several rather fine runs down to the Knox end. From then on the playing seemed to stay around that net. As a matter of fact the first half was rather uneventful. Duke, of the Knox team, was whisked into the penalty box oncerton of the Purple and White lads flipped the puck netwards and saw it saved beautifully by Vic's goalie, Mur Jones; Rateliffe was seen to carry the puck from one end of the ice to the other... The game was not especially rough, when cherying the purple was not especially rough, when the rough of the control of the contro Ratcliffe was seen to carry the puck from one end of the ice to the other... but otherwise little was done. It was only near the end of the period that Wheeler passed a quick shot to Groover, and Ed just as quickly placed it in the Knox net.

The fee was mucky admittedly, but the growing recklessness as the game the Knox team seemed rather slow in comparison to the other team. Duke, Crocker and Campbell seemed to have the most speed. Campbell was probably the star of the skating part of the team, Meanwhile down at the other end goal-but the score would have soared much but the score would have soared much bigher if it hadn't been for the wondergoalie, Hall. Many were the shots dashed towards the nets, and many were the miraculous saves Hall displayed.

Mannwhile down at the other end goaltwork. Finally wheeler, assisted by Groover, sneaked one in. A short time latter this was repeated when Groover the miraculous saves Hall displayed.

ATTENTION FENCERS

The junior fencing tournament progressing according to schedule, was the report of Dick Blanchet last night. The meet continues today as 11 men compete at four sharp. The following students are expected to turn up for today's freas: Burns, Vandecan, John-son, Morgan, Durand, MacInnes, Lamon, Owen, Turner, Kennedy and Maitland.

The Second period came around with

because of ice conditions or because of The ice was mucky admittedly, but the growing recklessness as the game

As Mr. White sauntered away we heard him mumble, "With School and Forestry behind us we expect it's no skin off our noses." BEGINNING OF THE END .

The hockey situation, we find, is approaching a condition where we can begin to form ideas as to who will appear in the not too distant playoffs. Practically all of the 22 teams are but one game away from the end of the regular season. Several group winners

we can begin to form ideas as to who will appear in the not too distant playoffs. Practically all of the 22 teams are but one game yaway from the end of the regular season. Several group winners have already been declared.

Group One with five teams will send three to the playoffs. At present there are three teams far ahead of the other two; these three, farmy, Meds Firsts, and U.C. Firsts, are sure of playoff slots. Meds lead the group with five wins and two ties for 12 points. U.C. has lead the group with five wins, a loss and a tie, and Army has ten points after five wins and two losses. Senior School has won but one game and tied one for three points, while Vic Firsts have lost six straight for nothing much at all.

Junior School has already been declared winner of Group Two, as they lead with five wins and one loss for ten points. St. Mike's have five points in second place, having won two, lost two, and tied one. Dents A are holing up in third position with four points, fawing five points on two and lost three. Meds Seconds have one win, one tie, and four losses which means they own three points. Two of these teams enter the playoffs. School already has the first birth reserved but St. Mike's and Dents will have to fight it out for the other ticket. Group Three's winner is the School Third team, who have won five straight to carry on alone to the playoffs. U.C. Seconds are in second place, having won three, tied one, and lost two for seven points. Knox A hold down the basement apartment with one win and five losses for two points.

Another group winner is Forestry in the fourth division. The Foresters have won five straight for ten points. Meds Thirds are running second with four points after winning two and losing three. Then comes School Fourths with a win, a tie, and two losses for three points. Dents B have one point for a tie and three losses.

The final group is experiencing a photo finish with Emmanuel and Wycliffe but one point apart and but one game to go. Emmanuel leads with 12 points for six vi

The Sportswoman

By Carl Herman

FIN PRELIM . . .

FIN PRELIM . . .

The Sportswoman is afflicted with a terrible disease these days. Its fairly prevalent around these times (It could even happen to you). Essayitiss numeri supremus. This is definitely a bad thing. She is getting people to write Sportswomen. So:—

It says here that Wednesday the 23rd of February is to be a day of great import for Women (This is a good thing). The pool is to see the interfaculty preliminary swimming meet. There is to be: (a) An exhibition of diving style and ornamental swimming (Men take careful note). (b) An All-Varsity team swimming in a 200 yard relay against a grad team recruited from the best swimming cites (Beautiful women—beautiful). (c) There will be an exchange of times with Queen's University. The telegraph company is espected to participate in this event. Spectators are invited, encouraged and entreated. The meet promises to be very thrilling. The cast is all-star. Anything can happen . . Anything? . . p.s. the meet starts at 7.30. Competitors are warned not to forget to hand in their eligibility slips. p.p.s. I know a pool can't see, but you have to be literary. pool can't see, but you have to be literary

BEGINNING OF THE END...

Today at 5.30, Varsity Arena will see an event too. The final women's hockey game will be played between U.C. and Vic. (Two good hair pulls guaranteed).

This really promises to be an interesting event. Imagine the rhythmic grace of seeing those bewitching, gorgeous, voluptuous creatures gently murdering each other; the inherent attraction of these lovelies enhanced by flowing curves of hockey pads.

By special arrangement, a phone number of these skating dreams has been compilled. Any male at the game may have access to any number he wants, providing he fills in the required slip. Ordinary unessential males must have their application countersigned by two professors. Schoolmen — three professors. Theologs — five professors. Pass Arts men must bring three professors, each of which must be countersigned by McGeech.

We men must support the activities of the women. There hasn't been enough female appreciation around here. We are to prone to overlook many of the truly greaf qualities of these people.

Did you ever stop and think where you would be if it wasn't for women? . . . (see what I mean) . . . or what you would think of? Revealing, isn't it.

Women definitely are a good thing. They need our support. On this there can surely be no argument. 'Gwan up to the Varsity Arena and cheer 'em on tonight.

Playoff arrangements for Water Polo will also be

Blank Scotties

In a hard fought but unskilled game yesterday the University College hockey team shut-out the Knox College squad by a score of 2-0. The Knox boys were by a score of 2-0. The Knox boys were weak on the defence and the many U.C. rushes were stopped only by the beautiful saves of Anderson, the Scotties' goalie. The Knox rushes seldom clicked and usually ended up in a misplaced pass somewhere just over the blue line. The Royal College had better and faster skaters on their line-up and their passing was better timed.

until Monday night Vic led the six-man relay but three teams beat their mark Tuesday. Firstplace in the finals of the event, which is a little over half a mile, went to Trinity with a 1.48.1 performance. The oft-sung Meds team were close behind, followed by an Engineering sextet. During the two days 24 teams competed in the event.

Knox — Ferris, Mark, Self, Dobie, Moorehead, Jack (forwards); Robert-son, Aiken (defence); Anderson (goal).

U.C. Pucksters | Track Meet Sees Relay Shake-up

The second day for this week's track events saw a shake-up in the relay but no change in the two-mile event. Up until Monday night Vic led the six-man

was better timed.

Rough play netted the U.C.'ers three penalties, keeping their team strength down, as against the single penalty which Knox received just as the final whistle blew. Penalties for U.C. were on Polos, Henry and Fine; for Knox Jim Jack got the penalty.

U.C.—Staley (centre); Purcell, Henry (wings); Polos, Fine (defence); Eil. beck (goal); Nickol, Bartlett (subs).

Knox — Ferris, Mark, Self, Dobie.

then issuing this appeal to the students of their faculties to bring all the magazines and books they possibly can to this coming Athletic Night.

Total of 71 Will Run In Hart House Elections

De Beaumont MacKenzie

The oldest narrative poetry of France deals with the heroes and heroines of deals with the heroes and heroines of Christianity, said Professor V. De, Beaumont in his lecture, "Varieties and Outgrowths of the Epic in France," yesterday afternoon. This was the last in the series of public lectures spon-sored by the Victoria College Council, Prof. De Beaumont discussed the romantic and serie presert of Errosa.

Prof. De Beaumont discussed the romantic and epic poetry of France from the IZth century on and spoke of the Chansons de Gestes or the Songs of Deeds. He said that at that time France had a feudalized life of Christian peoples who were greatly influenced by the church, and in the 18th century there was an advance in culture and chivalry flourished. It was the time of the Crusades to France, Italy and the Holy Land and many songs were written in connection with the pilgrimages, The Chansons de Gestes were written anonymuously and were chanted by professionals, and not intended to be read, said Prof. De Beaumont. "Warming Himself by the Fire" and "Watching the Snowflakes Fall" were among these epics. "Roland" and some 40 other poems were written to magnify the deeds of Charlemagne. The Crusades were the renewed acceptance of that

were the renewed acceptance of that mission which Charlemagne had nuder-taken for France, said Prof. Dr Beauhas now which characteristic had been as students. Due to immed accommand taken for France, said Prof. Dr Beaumont. Love is not mentioned in these songs and the women received little attention except in the case of war songs. The supernatural element was used to military personnel.

There will be games of chance characters excel in virtue, said the

professor. protessor.

The Britonic epic, which followed these first songs, was under a social and ecclesiastical influence, and the romances tell of the Round Table, the Holy Grail and the death of Arthur, said the speaker. This epic passed on to other ountries and may have been the origin of the European novel, said Mr. De

In the 17th century the slavish imita In the 17th century the slavish imita-tion of Virgil combined with the rigid form of the epic, said Prof. De Beau-mont. "These poems are pretentious and disappointing," he said and also con-tain a great supernatural element. However there came a rapid change

and reformation in the French epic when the writers tried to prove the superiority of Christianity and gave up imitating ancient potes, said the pro-

fessor.

He pointed out the difference in the 19th century when the writers were anti-clerical and there was much vchemence and hostility. There was a broadening of subject matter and the poets turned to the consideration of the

THE TEST

Phase II

So far, so good. Undergraduate members of Hart House yesterday completed lists of nominations strong in numbers for the four open committees of the House. There will be elections for these and for the Camera Committee. Failure to obtain sufficient mittee. This is unfortunate, but the strength and broad representativeness of the nominations for the four important open committees, House, Music and Library, show a healthy state of political affairs as far as student politicians themselves are concerned. Phase I of the general test of democratic aptitude amongst male studest of this campus has en successfully concluded.

We now have the candidates; Phase II will show what the candidates have. Have they ability, as shown in their past extracurricular efforts, which will be applicable to the problems of House Ad-ministration with which they will be concerned? Have they observed outward evidences of current problems and applied some thought to possible solutions? What have they to offer the permanent administrative staff, and thus, indirectly, the members who elect them, in the way of thoughful co-operation, faithfulness to at least the minimum duty of attending as many committee meetings as they possibly can, understanding of the necessary limitations put upon their real direct power, and resolution to do all that they can to use this limited power for the im-provement of the House and its administration? There should be something more to their campaigning than mere ballyhoo and repetition of a name until it is is worn in the voter's mind that he marks his X by the prompting of a conditioned reflex. We suggest that within the limit of his five dollars expense limitation each of the 58 gentlemen who are standing for election concentrate on attaching some solid significance to his name.

To promote a more thoughtful attitude toward the election this year The Varsity is willing to help spread this information, although necessarily within narrow space limits. We therefore agree to publish daily, on a strictly first-come-first-served basis, the names of candidates plus a brief 25-word statement of facts concerning himself. These should include such details as faculty or college course, executive positions held, and hobbies or other special interests which may seem relevant background for the position sought. The list of candidates will be published in four instalments beginning tomorrow and the complete list will be republished on next Wesdnesday, election day. Copy for this list should be handed in to the Students' Administrative Council Office, Hart House as soon as possible. Nothing submitted after 4 p.m. on Monday, Jan. 28 will be published until the complete list appears on election

(Those desiring extra publicity in The Varsity will find that agreement to pay certain modest

committees and that they be representative of all groups of undergraduate members so that the ad-ministration may have the most valuable student counsel and the most nearly representative opinion in directing affairs of the House. These are times to elect committees which will take their work seriously, who will not dodge the limited responsibilities placed upon them and who, if they are dissastified, will work to trace the cause of their dissastifaction to its roots in committee instead of venting their dissatisfaction in ill-natured griping about corridors and campus.

Concern In Education

Concern is being expressed in United States educational circles concerning the Army's decision to curtail its Specialized Training Program in American colleges. This concern must be small compared with that which was felt a year ago when the draft seemed about to take virtually every fit man over 18 out of higher educational institutions. The main worry then, as is the case in part now, was over the survival of many small, all-male colleges. This problem was solved to some extent, by the establishment of Army and Navy specialized training programs to utilize the educational facilities of the nation. Further help was found in new and already existing special courses being given in Universities.

The most recent development may signalize the The most recent development may spanned the conditions of war, although the remaining Navy program, which would seem less subject to stress and has always been backed by a more liberal attitude, plus certain of a small daily at one time. Army courses significantly not curtailed and probably not curtailable, would indicate that there are limits to this withdrawal from the colleges.

Another element of the problem, now being stressed equally with the matter of the fate of the labeling that the standard of the stressed equally with the matter of the fate of the labeling that the standard probable stressed equally with the matter of the fate of the labeling that the standard probable stressed equally with the matter of the fate of the labeling that the standard probable stressed equally with the matter of the fate of the labeling that the standard probable stressed equally with the matter of the fate of the labeling that the standard probable stressed equally with the matter of the face of the labeling that the standard probable stressed equally with the matter of the face of the labeling that the standard probable stressed equally with the matter of the face of the labeling that the standard probable stressed equally with the matter of the face of the labeling that the standard probable stressed equally with the matter of the face of the labeling that the standard probable stressed equally with the matter of the face of the labeling that the standard probable stressed equally with the matter of the face of the standard probable stressed expectations of editorial writers who lock themselves are different and conditions of editorial writers who lock themselves and conditions of editorial writers who lock the different part of editorial writers who lock the all the field probable stressed that the same of the stressed expectations and control part of editorial writers who lock themselves and conditions of editorial writers who lock themselves and conditions of editorial writers who lock themselves and conditions of e crumbling of these programs under the conditions of

stressed equally with the matter of the fate of the less hardy institutions of learning, is the matter of stressed equally with the matter of the fate of the less hardy institutions of learning, is the matter of withdrawing young men from the university altogether. This has meant only an accentuation of a condition that came into being when the Army of necessity had to push certain courses to the wall for the time being, but it is none the less appalling to think that it will be at least three years after demobilization (assuming the continuation of acceleration for a time) before United States universities will earned and the six gentlements. About three in the morning he stifters will read the six gentlement and the six gentlements. nominees precludes an election for the Squash Comsities will graduate full courses in the Liberal Arts. This will mean, probably, a minimum hiatus of seven years in the finishing process of certain types

It has been pointed out that such a gap in industrial production would be unthinkable. In most industries would never be necessary, but the process called Liberal Education is a slow one. Indeed, as T. H. Huxley's famous definition indicates (see the main entrance to the Connaught Laboratories for the handiest reference) it is really a lifetime process and the University section of it is merely the final shop polishing before a useful life produces the final mellowing. Dr. Ray Lyman Wilbur, Chancellor of Stanford University, said well when he called the proposed curtailment "one of the mistakes people in a democracy make because they do not look far enought ahead." Under stress they seem only able Under stress they seem only able to see individuals as part of a great pool, instead of part of a stream. They wish to remove men from universities at a certain age to meet an apparent crisis. They do not realize that a diversion here will make the current weaker downstream, say at the distance of three or four years, where they may need a greater volume of flow. This sort of planning (or lack of it) is faulty enough when it is applied in a long war. It is even more faulty when it is applied within sight of a peace which may be one of the most arduous the world has ever faced, for here it is not merely the case of saving men for the manpower needs of three or fours years hence unim-paired (and possibly improved for having completed their qualifications for the bachelor's degree) but one of wasting just those men whose training will be needed, not in high and vitally responsible positions, (Continued on page 4)

Correspondence

On Hart on Housing

Feb. 22, 1944.

The Editor,

A great deal of clarification is necessary with clarges will gain them the full co-operation of our business staff in the S.A.C. Office.)

The Varsity realizes fully the limitations necessarily placed upon the scope of a committee's work in these times, but we feel that in such times it is not these times, but we feel that in such times it is all the more important that the best men serve on the serve on the serve of two reports appearing in the valsity of last week. They are the announcement of Prospersor C. W. M. Hart's address to the Sociology Club on Feb. 17, and the report thereof in the following issue. In Thursday's paper Professor Hart (Continued on page 4)

Lessons in Journalism

Lesson III

How to Be an Editorial Writer

(The man who wrote this column for the series is doing a ten-yeor stretch at Kingston. He was found guilty of de-fomatory libel. Hence, this column will be at leost outhoritotive.)

Some of my best friends are editorial Some of my best friends are editorial writers. I never hold that against them. Before I retired from the game I learned the best of editorial writing techniques and they seem to fall into three schools.

The first school consists of the group of editorial writers who look themselves

of editorial writers who lock themselves where. About three in the morning he finally realizes that he isn't getting any-where so he goes to the lintoype operator and tells him to write something for the editorial column. Which the lino operator does and everybody is happy and nobody knows any difference. Lino

and nobody knows any difference. Lino operators are smart people.

The second method of writing an editorial is largely a trick grammatical bit of nonsense. This consists of avoiding the use of the period. Long, involved, complicated sentences are the rule. The more involved they are, the better people like to read them because when they read an editorial that they can't understand they say to themselves, "Gee this guy that wrote this editorial is "Gee this guy that wrote this editorial is awful smart because I can't understand what he's talking about and when I can't understand what he's talking about that means that it's pretty profound and so I'll be able to tell all my friends that I read this fellow's editorials and they'll think I'm pretty smart and profound too just like the fellow who wrote the editorials that are so profound because I can't understand them, don't you?"

Do you see what I mean? Editorial writing also includes writing such columns as the hither and you ing such columns as the hither and yon column of The Varsity. This particular facet of journalism is called editorial an account of because it isn't factual news but rather a commentary by one person. To explain how to be a good editorial writer in the hither and yon column, I'll give you an example of the use of the editorial "we." The editori use of the editorial "we." The editorial "we" differs from the garden variety of "we" because it doesn't really mean a bunch of people are talking but really stands for just one writer. Why he allatime says "we" I'll never be able to tell you. Maybe it's 'cause he thinks he's two other people all at once and he doesn't know which one of them is talting so he covers up by just saying "we." Anyways, this is the best method of writing editorial in a hither and you column:

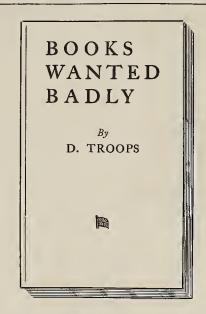

olumn:

We wax wondering to ourselves the
other day what we was gonna do wid
ourselves when we was gonna graduate from our alma mater. So we told
ourselves that what we really oughta
do is get ourselves all fixed up with
some kinda job we might like. So
we hied ourselves off to see one of
our professors whom we file an awful
lot; but who doesn't like us on account we aren't yery want. count we aren't very smart....
Which gives you a purty good idea of how to write editorially.

LAST CHANCE Athletic Night, Saturday, February 26th

Hart House Bulletin Board

SUNDAY EVENING CONCERT TICKETS

Fifty single tickets which will admit men only to the concert to be held at 9 p.m. in the Great Hall of Hart House on Sunday next 27th February will be issued from the Hall Porter's desk after 12 noon today.

ART CLASS

The art class will meet at 7.30 tonight in the art gallery of Hart House.

By Phil Shackleton

THE CHALLENGE ACCEPTED . .

"So White thinks he's gonna have me pushing peanuts around Hart House? He'll change his tune when he sees the flock of mags that we collect Saturday night." The foregoing is the reaction of one, Mr. Bill Rawlinson of Trinity, after reading Brien White's mag collection hallenge for the next Athletic Night. Bill continued, "White's broad nasal facilities enable him to accomplish the peanut derby with greater fierses enzyway. And besides he's been under the table in that position at home come Saturday."

From the above quotes we conclude that Rawlinson is very certain that School and Forestry cannot equal his book and magazine collection. Our only comment upon the matter is that now is the time for all good men and women to rise to the support of their athletic directors. The Schoolmen had taken a beating good men and women to rise to the support of their athletic directors. They're rare nowadays," he says.

LOOK AT OUR TEAM . .

We see by the Tely that people are grieved about the neglect which Canadian basketball is gettin a lot of. Some of J. P. Fitzgerald's correspondents are unhappy because American teams draw huge crowds, while Canadian teams play by themselves, almost. To these critics we extend an invitation to next Saturday's Varsity-O. A. C. game. And look at last Saturday's. Do you call a crowd of 2000 people, 90 per cent of whom were standing, basketball neglect?

And if basketball is being neglected, who is to blame? And where, apart from the already overbooked Maple Leaf Gardens, could basketball games be billed. That is, billed in a place big enough to hold the crowd these people expect? Practically every gymnasia in Toronto has but a small gallery capable of accomodating only a comparative bandful of fans.

ARTIFICIAL RESPIRATION COURSE

The University of Toronto Athletic Association, with the co-operation of the University Health Service, is offering to men students and staff a course (lecture, practice and examination) on Resuscitation.

The outstanding authority on the practical application of Artificial Respira-tion, Mr. Wills Maclschlan, of the H.E.P.C., will be the lecturer.

Men who satisfactorily complete the course will qualify for the Resuscitation Service Badge of the Royal Life Saving Society.

All men enrolled in Life Saving Courses must take this Course to qualify for their awards,

Schoolmen Score Upset By Defeating Emmanuel In 4-2 Hockey Contest

S.P.S. V set Emmanuel back on their heels with a 42 victory at the arena yesterday in a hard lought hockey game. The Schoolmen had taken a beating Irom them earlier in the sason and pulled the unexpected by upsetting the Theologs. They were Iar superior to Emmanuel in the back-checking and accurate passing departments, Emmanuel made it mighty uncomfortable lor them at times with their

Emmanuel made it mighty uncom-fortable Ior them at times with their gauging attacks and kept the play in the S.P.S. end olten. Denhau in the School nets was too godd Ior them, and looked to be well on his way to a shutout when Emmanuel managed to park a couple behind him towards the end of the second period.

end of the second period.

The first period had just go underway when Fryer put S.P.S. in Iront on way when Fryer put S.P.S. in Iront on a solo rush that payed off. Glen got the gate for charging but Emmanuel was not very effective while he was off. At the 8-minute mark Soulivan made it 2-0 for School on a pass from Mosher. Mould got a hold of the puck while standing just outside the crease but he muffed Emmanuel's best chance when he couldn't control it. Sullivan got another for the Engineers at 14:50, this time on a pass from Fryer. Walker

couldn't control it. Sullivan got another lor the Engineers at 14-50, this time on a pass from Fryer. Walker got the game's second penalty for hooking Smith, and while he was off the Drologs really turned it on, but Denham in goal was equal to all they could odish out. Cummings came sliding out of the net to fool Mosher towards the it all by himsell. The first line then had end of the period, and they left the ice with S.P.S. leading 3-0.

Emmanuel started to get those goals back early in the second period and kept Drologs in the test of the heat on lor a good 5 minutes. Denham was outstanding in the nets as School couldn't seem to get organized. Their passes just weren't clicking, and while Stoddard was off for grabbing the puck they had a hard time holding on to their lead. Fryer set Mosher up on a lovely play but Cummings came out to smother the puck. The Emmanuel [in Stoddard was off for grabbing the puck they had a hard time holding on to their lead. Fryer set Mosher up on a lovely play but Cummings came out to smother the puck. The Emmanuel [in Stoddard was off for grabbing the puck they had a hard time holding on to their lead. Fryer set Mosher up on a lovely play but Cummings came out to smother the puck. The Emmanuel [in Stoddard was off for grabbing the puck they had a hard time holding on to their lead. Fryer set Mosher up on a lovely play but Cummings came out to smother the puck. The Emmanuel [in Stoddard was off for grabbing the puck they had a hard time holding on to their lead. Fryer set Mosher up on a lovely play but Cummings came out to dish this time Mosher let Cummings; Defence: devorthy, Jones; Centre: Mould; Wings: B. Smith, Zurbrigg; getting it on a pass from Edworthy.

The Sportswoman

By Liz Kennedy and Betsy Mosbaugh

THEY DOOD IT AGAIN . . .

THEY DOOD IT AGAIN . . .

Vic pucksters stick-handled their way into the lead in the hockey finals yesterday, by tronncing U.C. 4-0. They came through with a consistently strong offensive game and smashed the Royal College's defence mercilessly. Leone Eunson and Isobel Gemmil knocked up a goal apiece and Shirley Pearse pushed the puck into the U.C. net no less than twice. Her first goal was the result of a beautiful bit of passing, which was Vic's outstanding feature.

U.C. co-eds didn't exactly exert themselves . . . and that was where Vic maintained her superiority. Perhaps if the red and white team had a bit of moral support (sez they?) things would begin to happen. Mary McMillam, U.C. goalic, executed several spectacular saves, but her defencemen were too much on the weak side to give value to her hard work. (Stoo bad that we are of the Royal College, ourselves . . . we can't resist the temptation to give the U.C.-ites the odd bit of heckling, but toujours gai, gels, you'll have your revenge). However, goals are to count for the championship. Vic has a record of six straight shut-outs and ofur goals to their credit. The results seem fairly obvious, but Kennedy sez maybe if U.C., is better organized the next game, they can slip in five goals and maybe chalk up a shut-out themselves. Personally, we think it suspiciously smacks of wishful thinking. All bets made payable to the Sportswoman. It's about time the U.C. team had a gambol, eh?

CALLING ALL ALLEY CATS . .

CALLING ALL ALLEY CATS...

Bowlers are warned to be on their pins pretty soon. There's a tourney on the 28th. But apparently a few of the colleges need to have the odd score in so that they can select a team. Consequently, when you zip over to the Midtown to knock em down and stand em up, when you zip over to the Middown to knock em down and stand em up, be sure to hand in your total three or four hundred points, or whatever you've got, to the guy in charge. Four gutter rollers are needed to constitute a team. The players in question are cordially requested to leave off the spike heels (or maybe we mean the spiked heels, whoever they are), roll up their sleeves and literally get down to this low business. The sooner the better is the only pear of wisdom that the head of gowling has to make on the matter, aside from the cryptic statement quote . . . unquote. We think so too.

Doreen Campbell of Vic. It was as representative as possible of all the colleges . . . and this array of snazzy mermaids gracefully put forth their best efforts to cop the honors. We don't know yet whether Queen's can top the Blue and White co-eds time of 1 minute, 41.2 seconds. Yuh see they'll telegraph us when they run off their relay . . . just like we telegraphed them last night.

GRADS'N'EVERYTHING ...

GRADS'NEVERYTHING ...

There was general lament around the campus last night, what with numerous maidens bemoaning their sodden tresses. So we figger there must have been something athletic cooking because they all couldn't have stood on their heads on the sidewalk. Beauteous babes (there's that word again) don't risk their locks on such minor details. But we did learn that the interfaculty swimming meet was also held at Hart House pool last night. The Varsity team swam against the Grad team, incidently, for practice. A couple or three of the finalists will be selected to demonstrate on Sattiday between other muscle matches at Athletic night.

of gowling has to make on the matter, aside from the cryptic statement quote unquote. We think so too.

MAD, BEAUTIFUL, GAY FUN . . . The winnals of the interfaculty for the diving (semi-finals) were Molly Murray, PH.E., Estelle Brown, Meds, Lois Lloyd, Vie, Margines est with Queen's however, didn't quite measure up to this standard, No bands playing, no Varsity yells, no high pitched excitement, and as a matter of fact no Queen's team in evidence. The Varsity relay was there with Jeanne Stinson, P.H.E., Mary McKenny of U.C. and

art, music and drama

Last night's performance started a week-and-a-half run for the Ballet Russe de Monte Carlo at the Royal Alec; which indicates that things are looking up for balletomanes in Toronto. What's a balletomane, you ask? Why, a guy what's nuts about ballet. Just that

what's nuts about ballet. Just that Last night saw the introduction of two new ballets, Chopin Concerto and The Red Poppy, which should please two classes of inthusiasts, the classicists and the neo-romanticists. The former, choreographed by Bronislava Nijinska, and with Chopin's E Minor Concerto. and with Chopins 2 Minor Conterior
for background music, was danced
against a flat grey curtain in subtley
subduel lighting; it incorporated most
of the old academic forms, with the
addition of a few tricks borrowed from modern adagio technique. It was for the most part marked with classic grace and precision, the soloes of Miles Krassovska and Tallchief virtuoso per-It was for formances in the great tradition. Krassovska, however, was more than brittle in her pas de deux with Nicolas

The Red Poppy, story and chorec graphy by Igor Schwezoff, author of the best-seller "Borzoi," has a distinctly cosmopolitan air. With authentic set and costumes by Boris Aronson, danced to Gliere's unoriginal music, this ballet purports to have certain ideological angles, which fortunately are not too obvious. Frederic Franklin's robust sketch of the Russian Sailor makes a sketton of the **RISSAM ONLY makes a supple foil for the deeply tragic **Tail to a confident and musicianly showing of Alexandra Danilova, and the trio is completed by Grant Mouradoff's grim mining of the Jap menace. Mile. **Concerto and the Eine Kleine Nachtof the Jap menace. Mile. Concerva, a living link with the Golden musik.

Age of Ballet, the Diaghilev era, re-Age of Ballet, the Diaghilev cra, retains all her famous magnetism, and
creates here a new role which will live
honorably alongside her Dancing Doll of
Coppelia, her Village Maiden of Les
Sacres de Printenips and the Can-Can
Dancer of Le Boutique FontasqueIgor Youskevitch, on loan from the U.S.
Navy for the Canadian tour, contributes
a dynamic sketch as the Ribbon Dancer,
sites a contribute because digness in total using a routine borrowed almost in toto from Shawn's O Libertad of some half-

dozen years ago.

Little need be said about Le Beau Little need be said about Le Benu Donnthe, except that Youskevitch dances the old Massine role with more elasticity, but not quite enough of the Iberian fiair that characterized the old master; while Leon Danielian's King of the Daniers has a slight edge on that of Yurek Shabelevsky. Danilova again as the Street Danuer, contributes to the general slickness of this production.
They could probably do it in their sleep.
They probably do. Brock Brace.

Campus Event No 1

University Symphony Orchestra

An audience that came close to filling onvocation Hall heard the annual performance of the University Symphony last night. John Reymes-King, con-ductor, and Hanus Gruber, associate conductor, led the orchestra, while Robert Graham, violinist, was soloist.

Considered as a whole, the performance was very good. Although appear-ing to lack assurance at the beginning, the orchestra soon settled down to give

said to have assisted in the preparation of the City's Planning Board Re-port of 1943. The Sociology Department had merely contributed a limited amount of data to the Board, and has participated

is compulsory before one brick is laid on another, and such legislation has become traditional with no doubt as to the benefit to the community. The techsiques of planning are new on this side of the ocean, but conflict of interests, or stagnation of civic action will not prevent them from gaining support from the citizens of Toronto.

Yours very truly,

NORAH MCMURRAY.

If it were necessary to ferret out the defects, probably the most obvious would be the occasional slip in timing, for there were a few instances where the different sections were a fraction of a beat separated for a phrase or two. But this applies only to one or possibly two numbers before intermission.

A large measure of the credit for the secollent rendering of the Eine Kleine achtmusik is due to the conducting of Hanus Gruber. Perfectly at ease on the podium, he exerted a smooth control over the players with a minimum of effort and body movement. Every gesture of his hands was used to achieve the precise effect desired, with no superfluous showmanship. No character-

istic of his conducting was more out-standing than poise and dignity. Robert Graham made the Mozart Concerto a true work of art. It contains delightful melodies which seem as if they could scarcely be played on any other instrument but the violin. His other instrument but the violin. His cadenzas revealed a sensitive ear for true ones and a sure touch in embellishments. As an encore Schubert's Ave Maria, accompanied by Mr. Reymes-King at the console of the Convocation—Hall organ, was magnificent. Surprisingly enough, the violin and organ harmonized were used.

prisingly enough, the violin and organ harmonized very well.

Finally, it would be a mistake to overlook the playing of Charles Dobias, the concertmaster. His vigorous bowing and his confidence held the orchestra steady on the few occasions when it appeared to falter slightly or weaken.

The University Symphony cannot, of course, be compared to professional ones, but last night's soloist and last night's conducting can well be compared on the

* * *

Here is a story about the War Services Drive last fail that has only just now come to light. Until now to no further extent. It may then he his blunder that he kept it to himself, said that Professor Hart has no intimate However, his sense of humor finally knowledge of the evolution of the Master Plan for Toronto.

The report of Professor Hart has no intimate the story was revealed. It seems that the story was revealed. the hero of the tale was so ashamed of said that Professor Hart has no intimate, said that Professor Hart has no intimate, and the Master Plan for Toronto.

The report of Professor Hart's talk to the Master Plan, and to Professor Hart. His acquaintance with the Plan having been established as that of an 5 onlooked and not a creator, conclusions may be drawn. That, being blinded by Professor Hart's criticisms, which, the professional planner, would seem superficial, the reporter has ignored much of the lecturer's more aniable comment. That Professor Hart interpreted the Plan to the Sociology Club without considerable knowledged of the more comprehensive aims of the City Planning Board, with the unfortunate result that doubt is cast on its success by such words as "impractical," "someone would object," "no priorities," "propositions for housing inadequate," ""propositions for housing inadequate," ""propositions for housing inadequate," ""propositions for housing inadequate," ""propositions for housing inadequate," "no attempt to protect land values." Impractical is not the word to describe a Master Plan which has the reputation of one of the best of its kind on the continent, but it is the word to describe a first plan which contemplates realistically a fuller life for a greater number of people be labelled as a "pipe dream" by a professor in Sociology.

Professor Hart has misjudged the words as with a camera that day to the story was revealed. It seems that this so live we as the professor and the section of the safety cover on his film park and all those other little details, but all the time he had his eye on that beauty contest. Well, it was a rainy beauty contest. Well, it was a rainy to the safety cover to keep everything dry.

After a lot of trouble, he finally wormed his way into the Theatre and backstage. Ah, said he, viewing the boundary words as "impractical," "someone would object," "no priorities," "limp for. Oh, boy, said he, as he safety cover in the professional planners for land control and use, and timing of reconstruction, but is se In School Nite there is always a cer-tain amount of female impersonation. So it was that at a rehearsal the director was heard to say: "Whoever has the skirt belonging to Miss—, please re-turn it. She wants to go home." Well okay—if she gives me back my bants. beyond the call of duty. was very much surprised when he found two long lost sheets from another lab in his Physics book with this professor's red pencil thereon, scrawling enthus-iastically, very good.

After this, he will shuffle his lap re-

timing of reconstruction, but it seems incongruous that a plan which contemplates realistically a fuller life for a greater number of people be labelled as a "pipe dream" by a professor in Sociology.

Professor Hart has misjudged the value of a city plan as such. In the more advanced cities of Europe a plan is compulsory before one brick is laid on another, and such legislation has

Tell Camera Club Latest Techniques

Professor K. B. Jackson last night gave a lecture to the Hart House Camera Club on "Latest Developments in Photography." His lecture was illustrated by slides of photographs taken by himself. The lecture included an explanation of the latest techniques of infra-red, panehromatic and teleoscopic abstraction. By means of red and photography. By means of red and green glasses which were distributed to the audience Prof. Jackson demon-strated how the illusion of depth may

Flyers Put Up Stiff Fight and Led at Half-Time: Ryan Tops Must Apply Blues with 16 Points: Visitors For Prizes Before March

In a thrill and action-packed basketball game played at Hart House last night, the Blues out-lasted Hagers-wille R.C.A.F. to cop a 48-40 victory. The airmen proved to be one of the most spirited and aggressive teams to show on the polished floor this season. Group Captain's charges took the lead in the opening minute and maintained the lead throughout most of the game. Ket Tettmar netted the opening Toronto basket to equal the one scored by Morris but the persistent flyers came right back with two set shots that swished through the netting. The half time score was 23-20 for the visitors.

The flyers maintained their advantage through the early part of the second the control of the second through the early part of the second through the early

tional Research Council inviting applications for post-graduate scholarships and giving March 1 as the final date on which applications may be mailed. Science students of the class of 1944 in various universities have already been advised that they may not negotiate for any type of employment or scholarship until the armed forces have made their final choice to those who are to be chosen as potential technical officers.

"In discussion with Dean C. J. Mackenzie, Acting President of the National Research Council, it has been established that although there are valid reasons for retaining the March I dead-line for mailing of applications, no awards will be made until well after the armed forces have made their seections from the 1944 graduating class.

"In view of this, may we have your -operation to the extent of advising your student body that anyone who wishes may immediately submit an application to the National Research Council, that the Council will later be given the names of all 1944 graduates chosen by the armed forces as potential technical officers, and that no awards will be made by the Council to those so

Yours sincerely, H. W. Lea, Director

Summer Employment Arranged For Engineers

It is in the national interest that undergraduates in science and engineering should engage in summer employment essential to the prosecution of the war. It is also desirable that summer work should advance the technical training of

With this in mind, the Wartime Bureau of Technical Personnel has compiled lists of available employment, made up from applications for the services of students for summer employment received by the Bureau up to February 5th. One or more supplementary lists will be issued later.

Arrangements have been made with National Selective Service to provide for the issuance of the permits which undergraduates must have before seeking or taking employ-ment, and officers of Selective Service will be in attendance at the University for this purpose, at a time and place to be announced later.

be amounced later.

While many students will obtain work of a professional nature, it must be understood that it would be impossible to provide such work for all, especially for those of the first or second year. Students are asked not to take too narrow a view of this matter and, if necessary, to take summer employment in a war industry. By so doing they aid in the war effort and, at the same time, broaden their own experience. A student who has in mind applying for what he thinks essential work which is not included in the attached list (and it is obvious that there will be such) should give details of the proposed work to the National Selective Service officer when applying for the permit.

Students are asked to canvas openings first in areas nearest to them, and subsequently in other areas. Employers will negotiate directly with students and will make their own selection. No negotiation may be carried on until the student has a National Selective Service permit to seek employment.

The Wartime Bureau of Technical Personnel cannot undertake to find employment for or to allocate students, but is prepared to guide and supplement the efforts students, universities and employers may make to utilize the long vacation to the best advantage.

Lists are posted on the bulletin board in the Mining Building, and may also be seen in the I, II and III Year Drafting Rooms, the Registrar's Office in Simcoe Hall, the Engineering Society Office, and the Faculty Office in the Mining Building.

THESE LISTS ARE NOT INTENDED FOR THE USE OF STUDENTS WHO EXPECT TO GRADUATE IN 1944. SUCH STUDENTS WILL NOT BE GIVEN PERMITS BY NATIONAL SELECTIVE SERVICE.

Omitted Nomination

The Varsity was informed last night that one nominee had been omitted from the Hart House elections list published yetserday. The additional nominee's name is Harold Stiver, III Vic, who is running for the House Committee.

Visitor's Day at Hart House

Sunday, Feb. 27, will be the last Visitor's Day of the season at Hart House when members may introduce their friends, including ladies, to the House between the hours of 2 and 4 p.nt. The exhibition of paintings and drawings by undergraduates, senior members and faculty will be

Peanut Pushin' Papas

We've seen a lot of publicity stunts on this campus but the payoff comes tomorrow night when a group of athletic directors get down on their knees to push peanuts across the floor of the big gym in Hart House, and all this just to augment the take of magazines-for-the-troops at the last Athletic Night of the session. For the past three weeks, after a pitifully small pile of magazines had accumulated from the first two nights, The Varsity has earried in its news, editorial and advertising columns persistent pleas for more and more magazines. They did not go completely unanswered for the pile of books grew noticeably, giving us faint comfort in the realization that *some* people read The Varsity. But the collection of books, magazines and playing cards resting in Hart House today is still far from imposing, representing, as it does, the contribution of some 7,000 Varsity students. True, all students do not go to Athletic Night, but each student must know someone who does go and could easily volunteer a magazine by proxy.

Tomorrow night's intermission antics were dreamed up by the athletic directors of S.P.S. and Forestry, host faculties for the last night. combination of these two ingenious and spirited faculties was a happy choice and they may well bear representative. out their boast and bring in more magazines Saturday night than all the other faculties combined. Both schools are noted on this campus for close fortunate athletic directors beware for they are the chosen few who will pay the wager, if it is lost, by pushing a peanut across the floor of the main gym mission might just as well throw up their hands in after the big game. Whatever the outcome of this disgust and go home. last fantastic blurb, the main object is to get in the books and in that department may both sides win.

Open Door Now

There is considerable food for thought in the recently published highlights of a survey of the 1943 field of employment for university graduates in the United States as compiled by the acting secretary of appointments at Columbia University, New York.

Most interesting report in this survey deals with the tremendous broadening in the field for university women in full-time employment. According to the Columbia figures, the rise last year is set at 153 United States they may be taken as indicative of the general Canadian trend as well.

A rise in female employment is a natural and expected adjunct of the fact of war. But such employment today is remarkable not so much for its volume but rather for the extensiveness of the sphere of activity opened to women. In 1943, college women in the States snapped up opportunities in transportation, manufacturing, banking and investments, insurance, engineering, publishing, art, labor diversion from the traditional classical ballet. Dorothy

were opened obviously because of the lack of male personnel but they now threaten to remain open come what may, as long as the women can produce. Many other fields not mentioned in the catalogue above may be invaded before the men return and women will find their bearings in all manner of hitherto strange places. Nor is there any great harm in this or any serious danger of women excluding returning men from their rightful work. For the majority of women working today will return to their homes when homes again take on meaning and those who remain in the world will be settled and skillful career women whose work is a cog in the life of the nation. One indication of the mere stop-gap nature of most of this war-time employment of women is the fact that 18 per cent of the women registered through the Columbia appointment service were over 40 years of age. Likewise many women found employment in answering the increased de-mand for child care workers.

Women now completing their university work can not help but be interested in present-day employment opportunities. Now, more than at any other time, are graduates thinking in terms of immediate occupation. There is no other course for them in these disjointed days. But the thing to remember in seeking occupation is that all fields are open and the wise women will develop her talents to the full and seek the most interesting life.

Correspondence

S.A.C. Unrepresented

Feb. 27, 1944.

The Editor,

Dear Sir.

The editorial columns of The Varsity have, in the past few months contained numerous references to the essential nature of courses in the liberal arts, in relation to planning the post-war world. Presumably then, in view of the variety of studies in these courses, the students taking them are interested in helping to solve the problems of Canadian life.

A body, known as the Canadian Youth Commission, has also received considerable publicity both in the news and in the editorials, since last September. Less than a week ago you published an editorial announcing the formation of a Toronto committee of this organization, and urged the students of this university to support the committee. However, it appears that your appeals have been wasted. At the first meeting of the Toronto committee this evening no official representative of the U. of T. was present. This is indeed unfortunate, since the officials of the commission had provided a position on the Toronto executive for an S.A.C.

I hope that this letter may be of some help in bringing to the atention of my fellow students the fact that the Youth Commission is endeavoring to student co-operation and support, so let the rest of discover what OUR problems are and what WE the University beware. Or rather, let the unwhole show as much interest in their work as this campus apparently does, the Youth Com-

Moderns

The Ballet

Novel, gay and exciting was the program presented by the Ballet Russe de Monte Carlo last night to the Toronto audience. Ballet in the modern manner per cent. Although these findings refer solely to the predominated on the program which included Etude, Rodeo, Pas de Deux and Cuckold's Fair, and this was very favorably received by the audience.

The curtain rose on a most impressive presenta-tion of Etude. The spirit of Bach's music was very expertly interpreted by Mme. Nijinska's choreographic composition, and by the pianist, Rachel Chapman.

ments, insurance, eighteening pointsing, at table relations, personnel, merchandising, government Etheridge was a convincing Cowgirl from the Southagencies and public utilities. One enterprising lass even ventured into farm management. The doors Franklin, whom she wasn't trying to catch. Both may develop in the future.

By Heel McRonald

No students are as ignorant As students from Toronto; The way we run the government They never ean get onto; And so I bat this column out To clear their thinking pronto.

The other day an Honored Mem. (If memory can be trusted, His name was something like LeBum) Proclaimed in accents rusted That William Lyon Mackenzie King Was great I felt disgusted.

And then from o'er the plushy floor (I like these rhymes internal) A Tory rose to demonstrate The platitude eternal
That King was but a crawling louse.
I thought it was infernal.

A C.C.F.er bobbed about And took a drink of water, And said we toadied to the banks, And how we didn't oughter, And how he'd run the whole concern Revolting little rotter.

At one o'clock we went to lunch, And I was fuming crossly, So I dictated tons of mail, And beat my staff morosely, And widowed mothers by the score I treated rather grossly.

A concert in the evening I thought extraor I thought extremely thin.
A man was scraping catgut on
A squeaky violin. That bunglers win such vast applause Is something more than sin

There isn't any more to write. And so I beat this column out,
Of implications vasty,
I've written to improve your mind
And make it function chastely.

Time was I used to be the guy That browbeat violinists
And knew that hatred of the studes,
Habitual aginists.

Habitual aginists.

It's much more fun to scarify
The party out-and-in-ists.

--Woo.

these character parts were fine examples of interpretative dancing.

As an extra, the audience was delighted with the presentation of Pas de Deux superbly done by Danilova and Youskevitch. In this well-know classic, Danalova continues to fascinate her audience in showing her complete conaudience in showing her complete con-trol in intricate passages. Igor Yous-kevitch, on leave from the U.S. Navy for the Canadian Tour, is an able partner for Danilova, both exhibiting the skills of which they are masters. Last on the program and least satis-fying was the Spanish presentation (Cuckold's Fair. This new ballet com-bines extreme muste and denotes and

bines extreme music and dancing, and is based on an old Spanish custom. Danilova again excells in her solo parts and is well supported by Frederic Franklin, but the ballet ends in a maize of dancers crowded onto the stage, pre-senting no final lasting impression.

The setting and costumes throughout were beautifully executed, and con-tributed greatly to the success of the erformance, from the classic simplicity of Etude to the Cuckold's Pair. HARRIET LEIGH-MALLORY, AILSA BALFOUR of Etude to the colorful panorama

Review Progress of Art In Today's Lecture

The next lecture in the series "Trends in Canadian Life" being given by the members of the University faculty, will be delivered by Prof. E. G. Alford in the Botany Building today.

Under the title "Trends in Canadian Art." Prof. Alford will make a brief general survey of the way in which Canadian art has progressed in the past 50 years with a suggestion as to how it.

Dancing to the letest "Hit" tunes, arranged in the distinctive style of Horace Lapp and his Orchestra, will give you a "lift" and help to relieve the tension and cares of the day.

Spend a few relaxing moments in the quiet majesty of the Imperial Dining Room, any night from 10:30 p.m. to 1 (Saturdays 9:30 p.m. till midnight.)

MIDDAY SING-SONG

There will be a sing-song in the east common room at 1 o'clock today.

Army Defeated By U.C. 1; Score 4-2 In Fast Game

U.C. I First in Group 1; Tie in Second Period Is Broken By Hart and Workman; Ice Is Fast

ONLY ONE PENALTY

U.C. I downed Army in a fastmoving hockey game at the arena yester-day by 2 4-2 count and took over undisputed possession of first place in Group 1. The play shifted from end to end as both teams skated hard going

both ways.

The ice was very fast and when Army tied the score in the second period it looked like anybody's game. U.C. held off the Army power plays however and

off the Army power plays however and finished strong to deserve the win. Only one penalty was handed out and that went to Goldylocks of U.C. for cross-checking Ballick. The Army Course turned up in full force to support their team, far outumbering the Red and White supporters.

List after the first period got wakes

Just after the first period got under way, Howson slipped a pass to Wise as he was right in, but Skinner came sliding out to block the shot. Furry sent Graham a nice pass as he broke past the defence and Graham picked the hatton officerure with a week chest heatton of the bottom off-corner with a weak shot that didn't leave the ice to give U.C. their puck first goal. Wade left a lovely trailer chance pass for Bremner but Bremner lost it clear,

Mise combined on a lovely play to fool
Wade completely but lost it as they
were slow to break inside the defence.
Then Wade shook Givens and Warren loose but Warren went in and
missed the net. Wise brought it back
but Skinner stopped the shot to leave

but Skinner stopped the shot to leave the score at 1-0 as the first period ended. Nesbitt lobbed a rolling puck from outside the blueline into the bottom corner of the Army net in the second period to make it 2-0 for U.C. It bounced and rolled crazily under How-arth into the net and no one was more surprised than Nesbitt himself. Then Workman shot one under Skinner's pads on a pass from Howson at 3:20 to put Army just one goal behind. Skinner. on a pass from Howson at 3:20 to put Army just one goal behind. Skinner beat Short from point blank range as Army went all out for that equalized. Seconds later Short got the tying goal as Sherry sent a nice centre out to him from the faceoff in the corner. Hart broke out of his own zone and passed to Furer who relayed it back to him and Furry who relayed it back to him and he went in to beat Howarth from the side to give U.C. the lead again. Goldylocks got his penalty then and Army tried to even the count, but outside of a couple of shots that Skinner saved, they were not as effective as when they were at full strength. Nesbitt hooked the puck from Howson and had the best chance of the day as he was in the

LAST CHANCE Athletic Night, Saturday, February 26th

By Brian White

By Brian White

The doors are swinging shut this Saturday evening at midnight, on the final Athletic Night of the season. So much has gone before that, one would hesitate before claiming that bigger and better things are to be seen on the inside tomorrow night (hesitation).

Varsity Night is the theme as the Blue teams will meet the Red and Blue clad squads from the Ontario Agricultural College, on the basketball floor and on the canvas upstairs. O.A.C.'s quintet, a practically unknown puantity in some respects, can be judged only on past performances, which imply a tough, possibly rough, but at least exciting game. Five of the local lads will be making their last appearance in Varsity Blue. Captain Tettmar, Scott, Clayton, Pringle and Sturgess are all due for graduation and its aftermath.

The boxers and wrestlers hereabouts get their first opportunity this year to display their wares to outsiders as they take on the bruisers from Guelph. Prior to the big basketball game, the Army Course from McMaster meet the Number Two boys from our own campus in a 7.30 basketball game. Previous performances here merit an early spectator turnout. At eight, in the pool, the girls from School make their inaugural plunge into interfaculty sport. We'd like you gals to know you have the moral support of all School. Some eighty other odd females have been added to round out the field for the Women's Interfaculty swim finals, an aquatic extravaganza of racing, diving and ornamental swimming.

ornamental swimming.

Half time period will see an exhibition track meet featuring the cream of Hec Phillips' annual crop in a one mile and a relay event. The fencing room is to be set up a la Roxy, and movies are to be shown from 8.30 to 11.00. Our double bill is made up of a fire-fighting film and three remarkable ski reels.

The next two rooms are the remarkable ski reels.

THE BIGGER AND BETTER THINGS?

Mr. Rawlinson and company will, of course, chase with glee, an clusive peanut across the Hart House gym. Our extensive espionage system has reported that Trinity, Meds and U.C. students have cried down requests for books, mags, cards and sweaters, on the grounds that they want to see Bill, George and Jim pushing peanuts. Confidentially, and this is definitely off the record, so do I. Your contributions could be added to School's truckload, or the bet could be switched so that in case of a School defeat, the above three could be expected to go through their paces. through their paces.

But to satisfy all concerned, and for the sake of D. Troops (who is

that guy anyways?) all three have agreed to lower their dignity and give a demonstration of the latest technique, win, lose or draw.

However, aside from the fun that is bound to come from the above

spectacle, the need is urgent, and the cause couldn't be better. An armful of Liberties, Post, Lifes, Digests, a couple packs of cards that are lying around home will have their lives increased many times over. Who knows, you may be reading your own mags this time next year.

The Sportswoman

MOVE OVER, SHACKWARMER . .

We have just received a letter from Joan Campbell, head of swimming, informing us there was no such thing an an intercollegiate swim meet. This is an amazing contradiction—we obtained our data from two girls who participated in the meet. This leads us to suspect one of two things—(a) that you can't trust babes to cover an event for you, like we did on Wednesday night, or (b) there is something fishy. Now if it were the former we offer our humblest

St. Mike's In Semi-Finals To Meet Army Or Meds

Tie with Dents to Gain One-Point Lead in Thursday's Hockey Game; Penalties In-fluence Score

GREGOIRE, CASTALDI STAR

Yesterday afternoon St. Mike's and Dents A fought to a 1-1 draw in a hockey game at Varsity arena to put St. Mike's in second place in group two of the interfaculty hockey league. This tie game gave the Irish a one-point lead over the Dents on the season's play, giving them a semi-final spot with either Meds or Army, which ever is

Following Trackmen Pick Up Passes

The following runners are asked to pick up their passes for the meet with O.A.C. early today:

Millers: Fordyce, Lorimer, Moull, Georing, Shackleton, Fielding, De-laney, Mowbray, James and Parke-

laney, Mowbray, James and Parke-Taylor. Sprinters: Wilford, Lewis, Kerr, Wally Brown, Booth, Hikicki, Wesson, Burgess and Mathews.

the Meds or Army, which ever is the third team in group one.

The ice was hard and fast, but it took the teams half of the first period to warm up to the speed of the ice. The play was of the end-to-end type, but the forward lines of both teams found a hard-checking defence and they could get no clear shots off on goal. Things peeded up a little in the last half of the period, the rushes became faster and the defence was not always there to break it up, but despite this, shots on goal were few

Dents started ganging the St. Mike's was given a penalty. They didn't get out of that spot and it was can be the priod, the priod, the minutes of two minutes. The next five minutes of the game were the best. Dents did slightly better than St. Mike's on the rushes beau goalle Hurley kicked out or la minor penalty for each team.

and three remarkable ski reels. The next two rooms are the surprise of the evening, but we will let the cat partially out of the bag by saying that Forestry is taking complete charge of one, while the other is to become a Waltz room for devotees of three-quarter time. Square-dancing, for those with the rural urge, or even just those with extra calories to burn, will follow the grunt and groan artists in the upper gym, and modern dancing with a floor show will be had downstairs.

Today at five o'clock at Varsity Arena Vie I clashes with U. C. I in the second game to decide the girls' hockey championship. U.C. to make any showing whatsoever has to get at least four goals to tie Vic and five goals to win the championship and at the same time maintain a shut-out. Vic, on the other hand, can give the Red and White team free play to three goals. Consequently, the question of the future champs is not as debatable as last year, since the majority of the Scarlet and Gold players were on last year's championship team. However, miracles can happen—whether you are religious or not, go up and watch the game today.

Tribute is Paid To Orchestra

Tribute was paid by Hanus Gruber, assistant eonductor of the University Symphony Orchestra, to the personnel of the orchestra for their fine work and untiring efforts, which contributed greatly, he told The Varsity, to the success of the concert performed by the

"The orchestra members, all of whom

"The orchestra members, all of whom are fine musicians in their own right, worked hard to carn their laurels,"

Only ten per cent of the orchestra members were conservatory students, the explained, the remaining 90 per cent being drawn from the various university faculties. He made special mention of the work of Clarles Tobias, 2nd year:

Mishable, student and concert. Michael's student and concert

In addition to those who comprised the personnel of the orchestra proper, many others gave valuable assistance, Gruber said. "In fact the concert could not have been given without the co-operation of George A. Armbrust, head Joyce Morrow, S.A.C. representative Shielah Riddel, and Miss A. E. M. Parkes and Mrs. R. Ircland

Any time's SHOPPING TIME!

IF YOU CAN'T STEP out in a new costume these bright days, it's a timid soul who doesn't know what can be done with colour to blaze smartness into an old timer. Just stop around at your nearest Evangeline Shop, the one at Yonge and Bloor, and mill over those accessory possibilities with one of the girls whose job it is to advise you along those lines. The correctly chosen acthose lines. The correctly chosen ac-cessories to a costume are always a handsome gesture, but lady what you can do if you've an eye for contrast and colour in the accessory field with a gypsy scarf or bright mix-or-match ef-fect in blouse or skirt is veree encourag-ing to the scant budget.

WISE IS THE GAL who buys herself a suit these days. There's no need to stress how practical as well as becoming stress how practical as well as becoming a well chosen suit con be. You can weer it now, and go on with it right into the summer months. (In Spring and cycles with a true story about anyou'll practically live in it.) By next other ceonomics prof—in Lower Callantum it's oil ready to step out with you agoin, and you'll be turning to it. Seems this profix pedagogue had been foully come winter time, nuder a fur coal. A tour of Fairweather's suits for mand curves and past and future curves of the uninhibited human consciousness, we present for your detection to the College Girl is something you ought until one poor little co-ed didn't know to take in on your next trip downtown, on which curve she was sitting. So after There's an intelligent round-up for you, the lecture she accosts him, coy-like: the sort of collection that inspires you to "Please sir, I don't understand the the sort of collection that inspires you to pick up your reputation and vow to be a better dressed woman from now on.

TORONTO'S SPOT FOR going gay on Saturday afternoons, the King Ed-ward Hotel's Vanity Fair, with Norm Harris and his boys giving out in truc Vanity Fair style. Take yourself and the gang for a swell time. Or if you're the gang for a swell time. Or if you're in a twosome mood, take your gal for a dollar a piece. There's always something going on at the King Eddy Thé Dansonts, and they add up to the best Saturday P.M.'s entertainment you'll find at that money in a month of Saturdays. Dancing starts at four, and you can order tea for two. Take elevator to the Mezzanine Floor and follow the crows:

NEW YORK CALLS IT the Heartbeat Casual. It has simplicity and smartness, it's a dress every girl will love. It's tailored enough to wear on the comps during the wearn spring days, and still it's smart enough to wear on a date. It comes in reyon gaberdine in exciting colours: golddust, sierra blue, rose bowl red, some with stripes. It is softly gathered at the wait which gives the skirt becoming fullness. This choru-ing dress way be found at Noethenue. ing dress may be found at Northways Junior Miss department, third-floor.

POLLY TUCKER was a smart New York career gal who wore such attrac-tive clothes, girls everywhere followed her fashion lead. So Polly Tucker styles appeard with Polly Tucker labels, There's one in Roshanard crepe with a fascinating duco dart design. White waffle pique laced through the coat just below the shoulder line, ends in a dressbelow the shoulder this, thus in a diess-maker bow. Backgrounds of black, green, brown, or navy blue; sizes 12 to 18. It's a copy of New York fashion, spring dress-sult for 1944. This dress may be found in the Better dress de-partment, third-floor Simpsons.

Orders Concerning Medical Examination

Each student who receives an Order for Medical Examination from the Divisional Registrar "B", or from any other Divisional Registrar, will take this order to the Orderly Room of the unit in which he is enrolled for military training and obtain a certificate showing that he is taking this training satisfactorily.

He will then present both order and certificate at the Registrar's Office, Simcoe Hall. A record will be made of the order, which will be returned to him, and the Certificate will be retained in the Registrar's Office.

As the Mobilization Section has declined to accept in the future the categories assigned to students by physicians or medical boards other than those named by the Section, the student must comply with the instructions in the order and present himself for medical examination at the time and place indicated.

If the time set for the medical examination conflicts with important University work, such as an academic examination, he may, on applying to the Divisional Registrar, have the date changed or if he should be called for a medical examination outside Toronto, the Divisional Registrar will, on request, arrange for him to take the examination in Toronto.

Each student is warned that he must inform the Divisional Registrar promptly of any change in his home or permanent address.

A. B. Fennell, University Registrar.

February 17th, 1944.

hither and yon

with hugh kenner

"Ah, well," beams the lecherous lec-turer, "I understand very well the meaning of yours."

In fact profs are running to storics these days. There was another one who diverted a tame half-hour with a tale about a man he saw standing at the corner of St. George and Bloor. (You know—the corner where you stand and whisper "I WANNA WRITE A SPORTS-WOMAN" and Betsy hears you.)
This man was acting like an R.S.M. unsure of the step. He was stepping off the curb with one foot and stronging

unsure of the step. He was stepping off the curb with one foot and stepping back on again and stepping off with the other foot and so on, all the time looking straight alacd (like an R.S.M., we still say). All the time making like he wanted to cross College St., see, but too timid to begin.

So the kindly prof takes him by the arm and leads him across. At the other side the man intones, "Thank... you.my... friend... there... a.few... kind... people... left... in ... this ... world..."

To which the prof in embarrassment responds, "I mistody you for a friend of mine. I thought you were blind."

"My friend, I am blind. Ay, blind. BLIND DRUNK."

The Varsity, as you may not have

There is a prof—we have a prof—guessed, is batted out daily upon typeabout whom the universe revolves. If writers: half a dozen of them. The
the universe were aware of the fact
things would be much less confusing.
The other morning, according to custom,
the slass owing allegiance to this prof
a class owing allegiance to this prof
appeared copy in its place at twenty to.
Also, according to custom, there was no
prof present. He blew in, as usual, at
five to. And promptly, perceiving that
the clock in the room did not keep
time with his habits, he turned it back.
"Please sir," pipes up a co-edly voice,
"the Hart House clock says five minutes
to." "Bah," grumbled the mighty one, "I can't REACH Hart House clock."

** * * * * But the repairman makes no move;

And just to show the yawning depths of the uninhibited human consciousness, we present for your delectation the authentic typewritten scrap left behind

authentie typewritten scrap lett behind by this same repairman. Quote:
A MAN ONCE SAID THAT WOMEN WERE THE SCOURGE OF
THE EARTH. OHM WHAT A
FOOL was there. Little did he know then that all the stories that his manna then that all the stories that his mama idone told him were true. For the fact that roses are red and violets are red and so are violets did not affect him the same I think that sex and jive are here it stay. Similarly, when soto goes to church each tuesday evening one ther will fad all manner. However ther will find all manner . . . Unquote.

What depths! What further depths! What suggestions to the left and right!

And with the contemplation of that we

Varsity's Basketball Squad Defeats Guelph Aggies At Final Athletic Night

Game Starts Slow But Varsity Goes into Scoring Session in Last Ten Minutes to Win By Wide Margin

SCORE IS 44-28

The Varsity Blues won the last basketball game of the year on Satur-day night by 44-28, setting down the Ontario Agricultural College boys from Guelph. The contest climaxed the series Guelph. The contest climaxed the series of Athletic Nights held at Hart House this winter and A.O.C. made Toronto go the limit for their win as they led 11-10 at half time. But the Blues finished strong by outscoring the visitors 34-17 in the last half.

The first quarter was slow and both teams missed enough shots to give either of them a considerable lead. Varsity led 8-7 after ten minutes; the low score was good indication of the rough play. The second uarter was even worse as only six points were counted by the two teams combined. The game was certainly no crowd-pleaser as checking was close and no organized passing com-binations were exhibited. Most of the shooting was well off the basket.

The second half was much faster with Toronto having a big edge in the play. Their shots began to drop through the hoop with amazing regularity as they broke up the O.A.C. zone by sinking some lovely set shots from the corners. O.A.C. matched them for a while, and had the count deadlocked at the end of the third quarter 24 all. But Toronto was raing away from them at the facile to the count deadlocked at the end of the third quarter 24 all. was going away from them at the finish as they were really hot on the shooting. Clayton and Ryan were particularly good for the winners, while Gilbart turned in the best effort for the O.A.C.

Sturgess, Clayton, Tettmar, Scott and Pringle were playing their last game for Toronto as they will graduate this year. Pringle was out with an injured ankle.

Ryan got the first point of the game on a foul shot, but Ladoucier came back with a basket and a foul to give O.A.C. a 3-1 lead. Sturgess counted a foul for a 3-1 lead. Sturgess coliner a 10th tol
the Blues and then Gilbart popped in
a dog shot to put O.A.C. on top 5-2.
Clayton sank one of his famous set
shots from the corner, Ryan counted his

Hebrew Varsity ls Fischel Topic

"The lives of thousands of members of the Allied forces in the Middle and Near East have been saved through scientific research and advances in medi-

scientific research and advances in medicine made at the Hebrew University in Jerusalem," said Dr. Walter Fischel of the department of Oriental Studies at the University of Jerusalem, speaking in University College Friday afternoon. He explained that the Jerusalem University has become the source of cultural awakening as well as an example of economic and social development. It is the endeavor of the university to be "a lighthouse sthining out eastwards and westwards to help in the great awakening for the sake of civilization and humanity." humanity."

The three main trends which char-acterized the great awakening of latent forces in the Near and Middle East were listed by the speaker as being westernization, secularization and nationalization.

In the course of westernization there was a renewed activity of building roads, dams, bridges and harbors. Revolutiondams, bridges and harbors. Revolution-ary methods in travelling and communi-eation resulted. The trend toward secularization was characterized by the discarding of certain restrictions im-posed by Islamic religion and culture. Especially in Persia it was more in-tolerant and retarding, as illustrated by the ban on the importation of tobacco beause it was against the principles of Islam religion; and also in the relation between believers and non-believers such as Jews and Christians who had to be outwardly differentiated. Dr. Fischel told how a glass that he used in a told how a glass that he used in a hotel was thrown away because he was a non-believer and a believer might be ontaminated.

However the enactment of a statute decreeing uniform headgear bridged the defreeing uniform neagear origide the differences of race and religion which had formerly relied on this means of identification. This reform, though trivial in detail, did more than any other one reform towards cementing the various creeds into a national conscious-

In Turkey, the religion of Islam has been imposed without becoming in-grained in the life of the Eastern people.

Schoolmen Dance At Tuesday Party

Coleman Hawkins, one of the well-Coleman Hawkins, one of in well-known bands of this continent, will provide the music for the Leap Year party to be held by second year S.P.S. at the Club Top Hat tomorrow. The band and the dance floor have been secured for the night with Frank Bogart

Employment Regulations , For Science Students

It is in the hatonal interest that undergrandates to one of engineering should engage in summer employment ssential to the prosecution of the war. It is also desirable hat summer work should advance the technical training of such students.

With this in mind, the Wartime Bureau of Technical Personnel has compiled lists of available employment, made up from applications for the services of students for summer employment received by the Bureau up to February 5th. One or more supplementary lists will be issued later.

Arrangements have been made with National Selective Service to provide for the issuance of the permits which undergraduates must have before seeking or taking employment, and officers of Selective Service will be in attendance at the University for this purpose, at a time and place to be announced later.

While many students will obtain work of a professional nature, it must be understood that it would be impossible to provide such work for all, especially for those of the first or second year. Students are asked not to take too narrow a view of this matter and, if necessary, to take summer employment in a war industry. By so doing they aid in the war effort and, at the same time, broaden their own experience. A student who has in mind applying for what he thinks essential work which is not included in the attached list (and it is obvious that there will be such) should give details of the proposed work to the National Selective Service officer when applying for the permit.

Students are asked to canvas openings first in areas nearest to them, and subsequently in other areas. Employers will negotiate directly with students and will make their own selection. No negotiation may be carried on until the student has a National Selective Service permit to seek employment.

The Wartime Bureau of Technical Personnel cannot undertake to find employment for or to allocate students, but is prepared to guide and supplement the efforts students, universities and employers may make to utilize the long vacation to the best advantage.

Lists are posted on the bulletin board in the Mining Building, and may also be seen in the I, II and III Year Drafting Rooms, the Registrar's Office in Simcoe Hall, the Engineering Society Office, and the Faculty Office in the Mining Building.

THESE LISTS ARE NOT INTENDED FOR THE USE OF STUDENTS WHO EXPECT TO GRADUATE IN 1944. SUCH STUDENTS WILL NOT BE GIVEN PERMITS BY NATIONAL SELECTIVE SERVICE.

Alford Discusses Canadian Art

The artist as such in the modern world is becoming more and more de-tached from the society in which he lives, due to the increasing mechaniza-tion, Professor E. J. G. Alford stated in his lecture on Trends in Canadian Art Friday afternoon. This is not exclusive-ly a Canadian trend, he explained, but ather one of the age.

Tracing the development of Canadian irt, Prof. Alford said it was necessary o go far beyond the boundaries of the

to go far beyond the boundaries of the Dominion, both in time and location. He explained that the roots of some of the early Canadian portraiture were in the courtly tradition of Van Dyke, Reynolds and Lawrence. The beginning of other Canadian painting, however, developed from the romantic natural-ism of 19th century Eurone. Prof. ism of 19th century Europe. Prof. Alford illustrated this in Homer Wat-son's work, among others, which con-ceives art as a description of heroic and noble subjects yet features almost rural

simplicity.

"The general theme of romantic naturalism," said Prof. Alford, "is the largeness, purity and grandeur of nature as a drama of live forces contrasted with the comparative littleness of man." In the third quarter of the 19th century, he went on to say, the effects of industrialization began to be felt. As a result the trend of romantic naturalism gave way to primitive Epicureanism an era of Impressionism in painting when the slogan was "art for art's sake," and meaning was subordinated to light

and meaning was subordinated to light and color.

The Post-impressionist period combined the impressionistic techniques and use of color with new emphasis on form. The influence of this period is seen in the work of the Group of Seven. Also a significant influence at the present time, the lecturer continued, is the imposition of geometric forms stimulated by modern industrialization and similar to Egyptian and Syrian art.

With an unprecedented volume of sales, Victoria College At-Home dance officials put up the "Sold Out" sign on Friday afternoon. Tickets for the Leap Year Dance, to be held this Tues-day, went on sale only at the beginning

Seventeen - Year - Old Class Would Replace Specialized Trainees Now Leaving Military Courses in the States

WOULD BE DRAFTED AT 18

Washington -- A proposal was made here last week by a committee of col-lege presidents that 100,000 17-year-old high-school graduates be sent to college at the Army's expense. This suggestion has been stimulated by the Army's announcement the week before that it would be forced to remove 110,000 mem-bers of its specialized training program from colleges by April I, the previous withdrawal-of 50 per cent of the Army college aviation program, and a recent change in selective service regulations on student deferments which will remove an undetermined number of previously immune students from college through

immune students from college through the draft.

While recognizing the "imperative military necessity" of the recent developments the committee, including the presidens of Cornell, Harvard, Indiana, Vanderbilt, Villanova and Hamilton Universities said in a public statement that their plan would provide the "most effective wartime employment" of young men between their high school graduation and their induction into the armed forces at the age of IR. They also tion and their induction into the armed forces at the age of 18. They also said that the program would benefit the boys greatly by giving them intellectual and physical training and this in turn would help the Army by giving it a reserve of potential leaders.

The 12-year-olds would all be volunters.

Election Posters Fail to Appear

This advice is directed to the men of

This advice is directed to the men of Hart House.

Don't go making up your minds to vote Jamieson, who promises deeds, not words, on the Library Committee. Don't vote for Asselstine (whose slogan is Mightier Music, More Divine). And never mind assaying the merits of Todds for Art.

It's a waste of time. They aren't running this year. Those posters you see in the corridor are from the per-manent collection.

Though the campaign season for this

Also a significant influence at the present time, the lecturer continued, is the imposition of geometric forms stimulated by modern industrialization and similar to Egyptian and Syrian art.

Leap Year Dance

For Vic Tomorrow

With an unprecedented volume of sales, Victoria College At-Home dance officials put up the "Sold Out" sign on Friday afternoon. Tickets for the Leap Year Dance, to be held this Tues-increasing the continuation of the apparent lack of interest in earn-paigning. Effective Employment

A committee of United States university presidents termed a year of college education the "most effective wartime employment" for young men who graduate from high school at the age of 17. The occasion was their suggestion that the Army undertake to accept these young men as volunteers and put them through a year in college before they reached the regular draft age of 18. The emphasis of the committee, according to news reports, was on the value of these young men to the Army. No mention was made of the benefits to educational institutions in the country which are facing the loss of vital revenue through the proposed withdrawal of 110,000 men from the Army Specialized Training Program, nor was mention made of the value of this training to the young men beyond the wartime period and of its value to the nation in the peace.

The "most effective employment" thesis has long had recognition here. It was first definitely applied last year when this University did not actually expel men who failed to reach a satisfactory academic standing in the first term, but allowed them to continue their studies until called up for military service. Thus they did not become involved briefly and to no particular point in war industries, but were able to continue those studies in which they were assumed to have some reasonably strong interest if not high academic standing. Similarly the principle was applied when manpower needs made it seem necessary to limit students' military exemptions in some more drastic manner. Last fall the Canadian government guaranteed one year of college to each man entering who had showed normal progress in his previous schooling.

American college presidents are now seeking to bring something similar to men of pre-draft age, although they are limited by the more stern conditions prevailing in their country. No doubt they that this scheme will instil in these young men a desire to return to college to complete their education when the war is over. Although it has unfortunately been found necessary to interrupt the flow of educated young men to a considerable extent the permanent damage will be minimized if an incentive is given to young men to continue their education. That incentive is given by the very fact of their possessing part of something which they will naturally wish to complete. This plus a proposed one year of education at government expense to each man or woman demobilized from the forces should go far toward bridging the ghastly gap in American higher education caused by the war. The college presidents are working wisely for the sake of education and their nation; it is to be hoped that their suggestion

Ottawa Calling

A Canadian University Press Feature By Neil MacDonald

TORS FOR ALL

Pensions Minister Mackenzie precipitated a minor bombshell in wartime Ottawa when he announced in

Parliament that, from reports by representative Canadians, 77,274 jobs were available immediately for post-war rehabilitation. Even leaving off the 274, that is a lot of jobs.

What amazed the local analysts most, however, as the fact that 4,515 positions were currently waiting to be filled in the Civil Service. Not content with that number, a revised figure was given to one of the local papers, setting the number at 15,000. Ottawans have had visual proof of the fact that certain government war departments are closing down, partially at least. For instance, over the past few months a good number of senior men in the Department of Munitions and Supply have been released because their positions have been eliminated in office reorganization, and it is an open secret that there has been a good deal of difficulty in their securing positions in other departments.

There is little doubt in the minds of political There is little doubt in the minds of political rimmph, "O" 's fearsome underground forecasters of the purpose behind all this barrage of chomber is plunged, with the flick of a fearures. Canadians have been uncertain as to the switch, into darkness... figures. Canadians have been uncertain as to the post-war possibilities of the Canadian scene; have even been critical of the government's plans to return This series of statistics to peaceful production. appears to have been designed to confuse the issue and provide an apparent answer that will make the average Canadian feel that something is being done

Let us hope that the Canadian public will accept the "77,000 jobs" promise with several grains of salt.

According to newspaper reports, the information as to the number of jobs available came from Provincial Governments, first of all. However, several hundred mayors, reeves, and municipal officials co-operated in supplying data on municipal employment opportunities.

Statisticians are entitled to do strange things; and a good deal of their work is sheer "guesstimaadding figures together from all kinds of sources, reliable and unreliable. However, it will require more than the estimations of provinces, reeves, and mayors to produce work for the millions

And the government has yet to show, concretely, ow Canadians can secure universal employment.

Someone was talking about elections, the other

This Hour Of Charm

Hart House Sunday Evening Concert

"This motley mass we see before us This odd aray is called the chorus, Or glee club, choral group, or choir, Which Bach and Beethoven desire.

Sopranos, altos, tenors, basses. Are rarelly chosen for their faces, But for the strength that they employ, For shricking out the Hymn of Joy

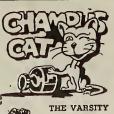

The keen-eyed listener often sees, Impending tonsilectomies, Or hears the twanging of the hordes, Of taut, (and untaught) vocal chords.

One thing seems definitely certain-They should perform behind a curtain, And change the adage then to mean, Singers should be heard, not seen."*

-all of which was disproved last night, by the Toronto Alumnae Singers, Mr. Leslie Bell, Director. The sixty-odd ladies of the choir presented not only highly pleasing sounds, but, indeed, an equally pleasant sight. Strictly musically, however, they were not all times faultless. In Popule Meus, Quid Feci Tibi?, otherwise exquisite singing was somewhat mitigated by the half Anglicized, half Italianate diction, "Popuile Meus, Quid Fetchi Tibi?" And, we fear, Strauss would have been the last one to recognize his own Emperor Waltz, as sung and arranged last evening. Miss Jean Leitch, solo soprano, sang Gershwin's Summertime with feeling. In the Gavotte from "Manon," however, an otherwise good vocal performance was marred by a bad French diction, and unmusical phrasing. Tschaikowski's every-beautiful None but the lonely heart was appreciated and deserved encore.

The best singing of the evening, by the choir, was

Women's Hockey Crown Captured By Victoria Belles

The rah-rah gals from Victoria won their second straight hockey crown in two years last Friday night by taking their U.C. rivals 1-0. The winner's lone O.C. rivals 1-0. The winner's lone counter was a combination of lzzy Gemmil from Jean Brandon, and made the score on the round 5-0 for the Scarlet and Gold.

Sarvicay's Athletic Night, Victoria College carried off top honors, followed by U.C. and P.H.E. No new records were pregnable, as it has been all season, giving Helen Stewart in the winner's eage lots of protection. Vic showed lots of puck savvy and skating ability, which, added to the stonewall blue-line, meant the small difference. The result of the final contest was in doubt right up to the last bell, with Vic finally coming out on top with their counter late in the game.

Saturday's Athletic Night, Victoria College carried off up honors, followed by U.C. and P.H.E. No new records were set at the meet, which featured novelty races and exhibitions of style, ornamental and diving. Outstanding swimmers were Mary McKinney of U.C., Barbara Hinchefinal contest was in doubt right up to Vic; Margaret Fletcher of Trinity; Lucille Berry of Dental Nursing, and Mollie Murray and Martin of P.H.E. Results:

out on top with their counter late in the game.

Play started with U.C. needing four counters and rarin' to get 'em. Thus the Red and White put on the pressure from the first bell. However, the at-tack wasn't clicking so that the major portion of play was around the little cotton cottage presided over by Mary McMillan. This gal was called upon to make a few "phenomenals" which she did with finesse. Her main source of worry was Vic's first line of Captain Billie Ban, Shirley Pearce and Betty

sent a spinning puck into the corner to open the scoring; the assist went to

second foul, and then Clayton got one over to Tettmar to make it 7-5. doucier got his second basket and Tett-mar sunk a foul, so it read 8-7 for the Blues at the end of the first quarter.

Gilbart and Ladoucier put it through the hoop for the Farmers and Ryan countered with one for Toronto to give O.A.C. a 11-10 lead at the end of a ver

uneventful second quarter.

Scott got his first of the game for Toronto as the second half opened, but Gilbart was right back with two for O.A.C., the second as he went nuchecked and dogged it in. Clayton counted a set shot but Burnett equalled it, and when Ryan sunk his third foul, the score was knotted at 15. Spry made a lovely check on Ladoucier as he was right under the hoop, and Scott got one for Toronto to give them the lead. Ryan got his first hut Gilbart mated it. Ryan got his first but Gilbart mated it on a beautiful play. Clayton increased the Blues' lead to four points on a nice the Blues' lead to four points on a nice push shot from the corner and ther slipped a pass to Ryan while lying on the floor, and Ryan put it in to make it 23-17. Ladoucier sunk a foul and Scott got it back the same way. Pazer made good on two of them and Gilbart got two baskets to make it 24-24. Then Toronto started as Spry sank a one-Toronto started as Spry sank a one-hand push shot from the corner and Scott put in a foul. Ryan got his fourth foul and Young went off with four against him. Clayton, Ryan, Tettmar and Ryan again stored hoops in that order and Burnett got one of them back. Clayton sank another long set shot but Gilbart was back for an equalized. Tettmar, Spry, and Booth finished up by increasing Toronto's lead to 44-28 and it was all over.

Ryan with 14 points lead Toronto, while Clayton with ten, Tettmar seven,

speaking of OF

By Phil Shackleton

By Phil Shackleton

The old and every popular paper chase took on a new form here Saturday night as four of the campus' select athletes fought it out in a race which was eventually won by a nose. The four sportsmen, Bill Rawlinson, Bill Clipperton, Jim Graham, and Brian White, literally began their contest with clean sheets to their credit, if nothing else. The spirits of the Hart House crowd had been raised by the Blues' last half victory against Guelph's cage squad, and were about to come to earth again. But did these athletes let the pent-up emotions go to naught. No. In a few minutes the four were at the post (the west end of the gym) awaiting with keen anticipation and four rolls of Scottissue, the starter's gun.

And what a race it was. Jimmy Graham, that spoon-billed athlete from U.C., jumped into the lead as he unwound his roll like a veteran. Brian White had trouble in keeping his roll in the position in which it unreels most efficiently and fell behind the field at the start. Clipperton had difficulty, too, as his roll broke several times during the sprint for positions. Bill Rawlinson, once started, like old Man River, just kept rolling along.

ton had difficulty, too, as his roll broke several times during the sprint for positions. Bill Rawlinson, once started, like old Man River, just kept rolling along.

Graham kept increasing his lead as his second, Dave Bairstow, polished a path before him. Bairstow, incidentally, with his broom-wielding, reached the most active role which he has yet aspired to in the athletic world. To make a gym-length story short, Graham won the race in a blaze of glory and was showered with tissue paper by the frenzied crowd. The other three positions were never quite determined as the crowd swept over the floor to hail the winner.

We should have more of this sort of thing department: Forestry came up with a winner when they transformed the wrestling room into a little section of Northland. We can't help but admire this faculty which seems always to provide something different when it comes to student entertainment. Witness the Forestry float in last fall's War Service Drive.

The Sportswoman

By Jan Murray

HEADIN' FOR THE LAST ROUNDUP . . .

HEADIN' FOR THE LAST ROUNDUP...

That's the position of women's sports these days. In hockey the final game has yielded Vic the title again, after the fracas on Friday. U.C. played well but although they kept the puck at the Vic end throughout, the defense was too good and their shots at the goal were few and far between. Vic's chances were far fewer but they made the most of them. Only miraculous saves by Mary MacMillan, the U.C. goalie, kept the score down. U.C. just couldn't seem to clinch it and the 4-0 score against them didn't help matters any.

In Swimming, as may also be seen on the other half of this page, Vic again copped the title, ousting U.C. and P.H.E. Roses should go to Joan Campbell, Head of Swimming, for her wonderful organization of the meet. The whole thing went off without a hitch, which is a thing not found every day.

And finally Volleyball. In a game last Wednesday the St. Hilda's No. I team was edged out of the running by P.H.E. I. The score was almost double, but really it wasn't that one-sided. It was good volleyball and one of the hardest played games seen around L.M. gym this year. The final game is between P.H.E. I and P.H.E. II, sometimes this week (we think) but we're not certain of the day nor of the time.

WHAT ABOUT BADMINTON?

... is the question being asked round the campus, as rumors continue to fly concerning a badminton tourney. What about it? Is there one, or is there not one? We'd rather like to know, as would everyone else, and if we were to find out about it we could tell everyone else. Again, what about it?

WE ADVOCATE . .

... a ping-pong, or should we say a table-tennis tournament. It's a game requiring a lot more skill than you might think (or possess), and in these days of no badminton birds, it might fill a need. Or are ping-pong balls casualties too?

Scott six, Spry four, Booth two and Sturgess one, completed the Blues' scoring. The usually reliable Gibson went scoreless as he bad one of those off-nights. Gilbart with 14 was the losers' top man, with Ladoucier with eight, Burnett four and Pazer two, rounding out O.A.C.'s scoring.

But, greatest response was produced by a group of humorous songs, which really were humorous.

A throughly aniously a greening was

A thoroughly enjoyable evening was the result. This choir gave every sign of superb training by Mr. Leslie Bell, for they showed a technical accomplishment that often verged on virtuosity, but never virtuosity for its own sake. And another splendid rarity, the technique was used to display the music, and not the reverse so prevalent today.

Drawing Close

Nominations for the Engineering Society may be handed in today and tomorrow; election speeches are to be made tomorrow afternoon at 3:30 in Convocation Hall; and the balloting will take place Friday.

Two signatures are required for a nomination. The Engineering Society officers must be nominated from the various years as follows: President, from Fourth year, 475; 1st Vice-Pres, from 4T5; 2nd Vice-Pres, 496; Treasure, 496; and Secretary, 4T7.

Each year is responsible for the nomination and election of their year executive, and each course is responsible for the nomination and election of their club chairman.

close of this life-long chase. Give me your hand, O Cuthbert."

close of this lite-long summer your hand, O Cuthbert."

Tears came to the eyes of both men, and as the vile "0" cringed in a corner the two heroes solemnly shook hands.

"But McGeech," choked Cuthbert, "McGeech, are you not coming up with a sagain to the light of day, bringing "Q' cringing in chains behind you?"

"It is my duty," said McGeech, "to hand 'Q' over to the law. But our chase has been a personal affair, and is to have a personal affair, and is to have a personal conclusion. Here with our bare hands shall we fight that last struggle from which one at most will return alive.

Tensing "Q" loked wildly up into the eyes of his captor and bare hands shall we fight that last deversary; and McGeech advanced towards him slowly.

(To be concluded)

School Elections | Varsity Students Explain Planning

In the past three weeks over 35,000 people have visited the Toronto City Planning Exhibition at Simpson's. The Plan, which will be on view until Satur-day, March 4, is summarized and ex-

The 30-Year Master Plan, and all the maps and charts showing the necessary study of the city before planning can be done, has been executed by the City Planning Board whose technical staff has been largely recruited from the University of Toronto. Several graduate and undergraduate Architectural students worked on the plans during the summer holidays, and have continued part-time work during the winter. Among the staff giving brief lectures at the current exhibition are three students of the University—one undergraduate of the University—one undergraduate and two graduate students studying housing and community planning.

AUTHORITY ON RUSSIA

Using a quotation from Kipling, Every word in Russian means something different from what it says," Sir Bernard Pares emphasized the need for "regional study" in preference to philosophy in his address to the Modern History Club in Wymilwood last night. Sir Bernard was formerly head of the School of Slavonic Studies in London which is now in the hands of a Canadian.

As suggested by Dr. C. Martin, Head of the Department of History, in introducing the guest speaker, he dealt with the personality and sagacity of the rising figure of Stalin. In his remarks Sir Bernard said that Stalin is known for his great art of hiding from the Russian people who seldom see him. As secretary of the Communist party under Lenin, he first took an active part in Russian politics. After Lenin's death he automatically became chairman and violently opposed Trotsky who had looked with seorn upon the former secretary who merely carried out the desires of Lenin. Stalin at once made Russia a business concern with no room the personality and sagacity of the rising

desires of Lenin. Stalin at once made Russia a business concern with no room for intellectuals or revolutionists. Sir Bernard has spoken elsewhere on this eampus recently. Last Thursday he addressed the fourth of the Sir Robert Faleoner group discussions at Trinity, and on Friday he spoke on "Religion in Russia" to a large group in Strachan Hall, Trinity College.

Deadline Today For Applications

Today is the last day for filling out Faculty of Arts examination application forms and enrolment cards, which are available at the offices of the University and College registrars.

The secretaries report steady streams of applicants in the last few days, but application returns are still not complete.

The forms have to be sent to Sincoe
Hall to be sorted and re-checked. This
involves another month's work, and
must be completed in order to have the
examination time-table issued by the
middel of April. There is a fine of
one dollar for late applications.

| Feacution a subject to the subject to the subject to the subject to the service would introduce
the initial acceleration would be three gravities,
passengers would have to be slung in layer of atmosphere. The forms have to be sent to Simcoe

Use of Rockets

Transatlantic mail service was sugrocket by Mr. G. Edward Pendray in an address to the Royal Canadian Institute at Convocation Hall Saturday night. "It would be possible to receive a letter from Paris four hours before it was mailed," he said.

it was mailed," he said.

Mr. Pendray began his talk by explaining the operation of the ordinary sky rocket and proving that the rocket needs nothing to push against, being 20 per cent more efficient in a vacuum than in air. He said that the principle is similar to je-tropoulsion, the main difference being that a pyrotechnic fuel is used. In other words, while a jet-propulsion aeroplane sucks in through its nost the air necessary for combustion, the rocket contains its own oxygen.

Since a rocket has no working parts.

Since a rocket has no working parts, its efficiency might reach 85 per cent, if its speed were great enough that the rejected gases were standing still. This speed would be one or two miles per second—well above that of sound—and second—well above that of sound—and the rocket would therefore offer competition to the telegraph. "The rocket would no more compete with the aeroplane," Mr. Pendray said, "than the aeroplane competes with the wheelbarrow.

The speaker traced the history of rockets from their accidental invention by the Chinese to the formation of the American Rocket Society. At that time, about 1930, Mr. Pendray was writing under a pen name for various pseudo-scientific pulp magazines. Becoming interested, along with several others of the same occupation, in the possibility of rocket locomotion, he led in the formation of this society.

The most probable post-war uses are rather disappointing if one is looking forward to interplanetary travel. Rockets forward to interplanetary travel. Rockets may be used on aeroplanes for assisted take-off, increasing the payload and shortening the necessary length of the field. They could be used for high-altitude weather reports, enabling (according to experts of the Smithsonian Institution) "prediction of weather two weeks ahead."

Transatlantic mail might be effected by shooting rockets up at a 45 degree angle through an arc, going at its apex 500 miles above the earth. Research reached a stage by the outbreak of war where a 200-mile height was possible.

Thankful Girls Await Chance

Leap Year Dayl Since Leap Year Day comes only once every four years, it means something different from any ordinary Tuesday. It was found that there hasn't really been a Leap Year Day since that thing called manpower shortage reared its ugly head, which makes today even more special. We thought it might even be special enough for comment, so here's a cross-section

Barbara Clark, I Trinity, says, "A great opportunity, and in these days it might be well to take advantage of it." Eve Maguirc, III C.U., says, "The whole thing is a ridiculous farce. We should adopt the new calendar in which there is no such thing as Leap Ycar."

should adopt the new calendar in which there is no such thing as Leap Year."

Joan Waite, I U.C., says, "In these times one wonders how it could be observed with subtity." Thursa Swinnerton, If Vic., says, "Leap Year's Day is just what Honor Science needs."

Florence Swartz, I U.C., says, "Opportunity knocks but once—here I go."

The men of U.C.'s men's residence said, "There must be a reason for that extra day, but we think it is up to the women to find out what it is."

Such a story as this would not be complete without the comment of a Schoolman. A 4th year Engineer said anonymously, "Leap Year's just wonderful, but what good is it without a Sadie Hawkin's Day? We think Toronto should adopt the plan of making Leap Year's Day a Sadie Hawkin's Day. It would be much more fun."

casted Basketball Games

MEDS HOST TO 1900

On Saturday evening the series of Athletic Nights for 1944 came to a close. This year all previous attendance records were smashed when a huge crowd of 1,900 attended the evening at which the Faculty of Medicine was host. But record crowds were not the sole innovation this year. For two Saturday nights in a row the CBC broadcasted basketball games over a national net-

on the campus co-operating to put the Athletic Nights over is a new, but

The Athletic Nights of Hart House-

evenings in which students can take a date for the modest price of 25 cents, and enjoy sport displays of all kinds, round dancing, and good old-time square-dancing, were instituted by Warren Stevens, Athletic Director, now on leave with the R.C.A.F., to take the place of intercollegiate sports. All the place of intercollegiate sports. All the money proceeds of the evenings have gone to worthy charities, though the price has always been kept low to induce price has always been kept low to induce student attendance. This year there was little need to induce attendance, for on every night the attendants were forced to turn away as many as 500 latecomers who could not make the deadline of 9:30. The Athletic Office reports that it is too early to make any definite plans for next year's series. for nobody knows:

next year's series, for nobody knows how many men there will be left at Varsity, but they feel quite certain that the Athletic Nights are here to stay.

To wind up a successful season, the Athletic Office wants to thank the faculties, the guest teams, the musicians, in fact everybody who helped to make

Edmonton-(CUP)-A conference of the four western universities took place at the University of Alberta during three days last week. The topic under discussion was "The University and the Post-War World."

Meeting twice daily, in morning and afternoon seminars, the student conferees were able to formulate a list of 23 recommendations which are to be assembled and distributed by the Alberta

elegation. Dr. R. Newton, president of the University of Alberta, conducted the first seminar on the place of students in re-construction projects. He emphasized the validity of a so-called political career, and deplored the lack, in Canada, of a tradition in Public Service. Politics should be considered as a foremost prosnotin de considere a su aprenime po-work, putting Varsity before an audience lession open to our youth, Dr. Newton said, but educational careers must also be considered as well as scientific pursuits and engineering. This subject provoked considerable discussion during which the place of the Student News-

metricly successful idea.

McCutcheon of the Athletic Office stated that this new co-operative spirit aroused by faculty participation was a factor of definite importance to the success of this sear's series.

Athletic Night something many of whom were present at the confirmance of the confirmance of the confirmance of the success of the series of past failures and future problems by the students of agriculture, many of whom were present at the confirmance of the c

At the last Athletic Night something many of whom were present at the consentively new was attempted and proved to be a complete success—the utilizing of the Wrestling Room as a Waltz Room. Those present, rather than wrestling, glided gracefully to the strains of Strauss.

The Majazine Drive instituted this year proved an immense success—over 5,000 books were collected over the five-week period to be given to the Forces. more able personnel, and of enlarging school districts, thus making a wider extension of educational benefits to rural students possible and decreasing rural students possible and decreasing the inequality of opportunity between them and urban dwellers. Adult education must be emphasized in the post-war period and a more satisfactory balance achieved between utilitarian and intellectual curricula. Research into new channels of education may well be the coold interest of numericular the cool interest of numericular the coold interest of numericular the cool interest of numericular the coold interest of numericular the cool interest of numericular the co

the special interest of university stu-dents. Mr. Low concluded.

A final special seminar was devoted to a discussion of student government

THESDAY, FEBRUARY 29, 1944

A Diller A Dollar

Today, but for the grace of leap year, would be the to find themselves liable to a one dollar fine for late examination application. But because of nature's gift, that once-in-four-years bonus, tomorrow is March 1, and all you forgetful people who have so far neglected to fill out Examination Application Forms and Enrolment Cards for next year (strictly for the optimists) have got one more day to persuade yourselves that a dollar is a dollar and worth saving respect for a spineless mass of jelly that yields to even at the cost of a slippery walk over to Simcoe every pressure without resistance. even at the cost of a slippery walk over to Simcoe Hall.

It is one of those ironies of life that students in the Faculty of-Arts must get out pen and paper when February rolls around and apply for the privilege of writing those Maytime masterpieces, the annual examinations. But apply you must, and in good season too. We wouldn't be surprised if the walls of the Bursar's office were papered with the proceeds of post-March-first applications. Human nature is always crying for just one more chance; let's see how many take advantage of Mother Nature's grant of one more day.

Western Chat

University and the Post-War World." The conference, held at the University of Alberta, is one more sign that Canadian universities are gradually

The regulations are a compromise between an unrealizing four heads are better than one, and a get-together between universities can be well worth setting aside rules about war-time travelling. (Who said rules were made to be broken?). The West has wakened to this fact more readily than have we in the East and have already demonstrated several times their traditional knack of calling the neighbors together and getting down to brass tracks.

We cannot very well evaluate the worth of this Edmonton conference on the face of news reports. A true picture of the meeting and its permanent value could come only with perusal of the list of 23 recommendations formulated by the students participating. But the mere fact of the conference is is not a case of whether or not to fight, its is your reason for applause. According to news reports, duty to fight for their preservation. We have seen and deplored the state of Canadian politicis but reconstruction projects, the past and future of agriculture (led by Aggy delegates), improvements in education, and lesser talks on student government within universities and the place of the student (Continued on page 4) open-faced candor and freshness we admire in a man. Not afraid to stand up for his rights. Nobedy can ever accuse culture (led by Aggy delegates), improvements in education, and lesser talks on student government within universities and the place of the student (Continued on page 4)

newspaper. The field for discussion was narrowed down considerably, as would be necessary for a short three-day conference.

Of special interest are the words of Dr. Newton, Of special interest are the words of Dr. Aswoon, President of Alberta University, on what he termed "the validity of a political career." Dr. Newton apparently cherishes an idealistic view of the politician-statesman, the educated political economist. Not that it wouldn't be a good idea. We applaud his ideals but sadly shake our head. Politics should be considered a foremost profession open to our youth, says Dr. Newton, and we say it again as a

sentence that bears repetition.

We would like to have the "active debate" which arose over the place of the student newspaper in the university. Undergraduate journalism, like many things these days, is growing by leaps and bounds and in our own quiet way we predict a great future campus journalists, that is if their enterprise equals their opportunities.

Correspondence

Paging Mr. MacNamara

The Editor, The Varsity.

Dear Sir:

This letter is a protest against the new selective service regulations regarding students in the so-called "non-essential" courses. Of late it would appear that students have become so well disciplined to wartime methods of control or are so afraid of losing day on which many carefree students would wake up what little regard society has left for them that they register emotion neither positively nor negatively as the majestic decrees are handed forth. There is but one rule "OBEY."

Perhaps within limits this attitude is justified. But only within limits. The democratic process is not to be scrapped entirely and the public, though to be handled with kid gloves, will never increase its

Surely somebody noticed it, surely somebody guessed it-the new selective service regulations are disgraceful. Either they were drawn up by some one who knew nothing of the situation (not uncommon in government circles) or else they are a deliberate attempt to sabotage the Arts courses.

Just think a minute. Think of the administrative problems involved. How is a professor to decide who stays and who goes on a basis of one or two marks (taken from examinations which are not always indicative of ability)? How is allowance to be made for the difference in standard between the pass and honor courses? How is allowance to be made for the difference in standard of the many universities across the country?

But enough of this, let us come to grips with the real problem. Why are the social sciences relegated real problem. Why are the social sciences relegated to a position of insignificance and inferiority? If English Language and Literature. All the courses are truly "non-essential" then better by far to close them altogether. But this not the ease. The four western universities got together last the courses are truly "non-essential" then better by week to conduct an organized discussion on "The far to close them altogether. But this not the case. The very fact that they have been spared at all is an indication that the government recognizes this.

The regulations are a compression between the second the second that the government recognizes the governme The very fact that they have been spared at all is informed public on the one hand and the govern-ment's own better judgment on the other. Canadian political leadership is weak. It is afraid to declare the said courses essential for fear of antagonizing the great tyrant of modern life, public opinion, and the situation is complicated by the fact that it knows the opposition to be as petty as itself and will not scruple to capitalize on the discontent to undermine the government's position. In short all parties will still the scrup to the scrup that the scrup thas the scrup that the scrup that the scrup that the scrup that th the government's position. In short all parties will make a political foothall out of an issue that should be far above politics.

But as students of the humanities what is the lesson in this for us? If the courses are essential then it

KING OR CHAOS

Steps must be taken. Things have gone on long enough. Sooner or later someone is going to find out. might as well be sooner. Right now in fact. Those Hart House elections tomorrow are a fake and a phoney. Nobody with a single brain rattling around in his head will ever believe that the elections are legitimate.

Why there oughta be a law against such flagrant abuse of franchise. One might even go so far as to say the Hart House elections flout the Defence of Canada regulations. But that's another complaint we'll take up later.

Leave us gawk at the toe-nail sketches of the candidates as they appeared in The Varsity yesterday. First, some The Varsity yesterday. First, some suspicious character nominated for House Committee says he's held positions on social committees and club executives OUTSIDE THE UNI-VERSITY. Nyah! I bet he was a convenor for a apple-bobbing contest somewhere. Then he says he's taught to think clearly in his course. All we can ask is: What would ya do without yer sliderule? Ehh?

Then another nominee for the same committee thinks that just because he's eaten six or seven times a week in the Great Hall at Hart House he'd make a good House Committee representative. What's so wonderful about that? We heard of a fellow that ate in the Great

heard of a fellow that ate in the Great Hall of Hart House about six or seven times a YEAR. Top that. For the Library Committee one chap comes out with the bold effrontery to say he has administrative and executive ability. Which doesn't prove a thing. Betcha a quarter he ain't never seen the inside of the Hart House library. Let

these characters get in on some fluke or other. One Irishman thinks that just because he has a job polishing pianos at the Toronto Conservatory of Music he's make a good member of the Music Com-mittee. This sort of mockery must stop. It is an insult to the members of

didn't already.

There seems to be but one character that has honest qualifications for the post he was nominated to. He openly admits that he shows his ignorance of things musical in The Varsity. This

meeting to take place at Diana's Sweets at 6:30 p.m. Wednesday, March 1.

Mr. Dobson is the honorory chairman of the Electrical Club; in his graduate year he was its student president.

Other attractions of the evening will be two movies, "Sightseeing in the Home—the Story of Television," and "The Story of Frequency Modulation," a teclinicolor film. A draw for an Electrical Engineering Handbook will also take place.

For Gaels Against Rugged But Clean Army Squad: No Penalties Called

IRISH ELIMINATED

A hard-hitting Army Course team eliminated St. Michael's College puckmen in a rugged battle up at the rink last night, to advance against U.C. next Dr. Robert E. Fritsch, Bible teacher and Lutheran Minister, will speak to the Engineers' V.C.F. today in Room E34 in the Electrical Building at 12.30 noon. Dr. Fritsch graduated from Muhlenberg College in Pennsylvania and has completed post-graduate studies at the University of Illinois, the University of Pennsylvania, Whittenberg College in Springfield, Ohio, where he received his Doctor of Divinity degree in 1929.

Dr. Fritsch, who has taught the Bible. Thursday. The Army had more beef stumbling block was the rotund Ed Hurley in the St. Mike's net. This boy came off with about a dozen beautiful stops that had the house on its feet continually; the score against him was an indication of a weak defense more than anything else, as the Army Blue coasted in on him more or less at will. He

spent a very busy afternoon.

Play started off at a fast clip with the Army giving evidence of an oncoming scoring rash; action was mainly centred around St. Mike's cage, with a few breaks up to the other end, all of which made very good looking. The winners opened the scoring at the 11-minute mark with Huycke getting the first of his brace of counters; he repeated at the 15-45 mark from Captain (for sink) 15.45 mark from Captain (for rink purposes only) Don Howson. As the periods were of 15 minutes duration, a rather loud protest was made; the answer was that the clock had started a minute late.

a minute late.
The second frame got going with
Frank Gregoire going in all alone on
Howarth in the Army nets, just to be
caught at the last second by a fiercely
back-checking defense; the blue line
troops played most of their hockey in
the forward areas. At 19.40, Weber
nut the Irish back in the trumping with the forward areas. At 19.40, Weber put the Irish back in the running with a goal, Young assisting. Sherry took Short's pass 15 seconds later to make up for it. With tempers beginning to wear, Howson gave the brass section something to blow about when he sank one from Chess Wyse. Then at 14.40 the Arms of the Arms of the same for the same the same than the same tha one from Chess Wyse. Then at 14.40 the Army defense relaxed enough to let Gregoire in for a hard shot to the lower left corner. Army retaliated with three markers to put the game on ice, but solid. Hurley was making about three brilliant saves for every goal he allowed past, no mean average with the whole team on top of him. The affair ended with Teolis combining with Gregoire and Boland. Score, 7-3 for Army.

picture, but at least they can derive some consolation from their defeat. Bill Mac-consolation from their defeat. Bill Mac-dotter from the form the of the Irish beating the Irish. Bill was of the Irish beating the Irish. Bill was assisted in some measure by another Bill, none other that the Taylor, late of the Leaf hockey squad. Taylor scouted out the winners' faults, which were'nt many, to be sure, and will pass along his judgment next practice. Army will need it, as they have dropped two decisions to U.C. this season, and will have to get by the Red and White to get into the finals.

WATCH WEDNESDAY'S VARSITY FOR BASKETBALL GROUP TIE PLAYOFF DATES

skiers have visited most every terrain from High Park and Rosedale to the Laurentians.

During our most recent excursion to the northland we encountered a most interesting character—a military ski instructor on leave. Although he was rather hush-hush on the subject, we did manage to squeeze some interesting details on his work. The instruction is designed to prepare servicemen to ski in any and all conditions, heavily loaded with packs and other equipment. A raging blizzard is no adversity to these hardened exponents of the game. Mountain passes are laughed at and taken in stride are the down trails that are no wider than a foot path.

Troop movements are also taught. They are all maneuvered at an exceedingly slow pace in order that the units remain as compact as possible. Other maneuvers vary somewhat with the skiers coming on in column of route, in threes and in ranks. The soldier is taught to hold back against the hill and also to fight it. The holding back, claimed the instructor, is one of the hardest things to teach a new ski-trooper who is also an experienced skier. And yet the Snowplow is indispensible in military skiing.

He continued that the old argument of Parallel Skiing vs. Stem interfered considerably with the training of some experienced snow experts. To overcome the same difficulty with novices a technique of instruction similar to the Arlberg method was instituted with amazing success.

When asked why he took a busman's holiday, he replied that

of instruction similar to the state of the state of the analysis success.

When asked why he took a busman's holiday, he replied that the answer should be quite obvious. On a further query, he came forth with the fact that military and recreational skiing were entirely different subjects, as much so as indoor and outdoor baseball.

The Sportswoman

GUTTERSNIPING . . .

Well now, what with no snow worth talking about and no gas to get to the hills where there is snow worth talking about, what do little girls do when they want some excitement? Yesterday we went over to the Midtown Bowling Institute and got ourselves a job as pin boy and found out.

You they how!

Yup, they bowl

Yup, they bowl.

There's no doubt about it. They bowl and bowl and bowl all over the place.

Six teams bowled yesterday at the Midtown. And a good time was had by all as somebody once said. Surprise team of the day was composed of three GIRLS from the Faculty of Applied Science and Enginering. Best team of the day was from University College. The girls from U.C. trundled up the highest total average of 591. The S.P.S.ettes came right on their heels with a 588. Highest individual score of 176 was bowled by Irene Gold of S.P.S. Other teams that bowled yesterday came from St. Mike's, Trinity, Victoria and the Dental Nurses.

Victoria and the Dental Nurses.

Altogether there are ten teams of three players on each in the University bowling society.

Whatever the purpose, the whole set-up can be viewed with some jealousy by the male portion of the campus. Even if they have their Hart House with is billiard tables and tuck shop, they can't bowl there and bowling is a dandy old sport. More people are bowling now then ever before. Hollywood even makes short features on bowling.

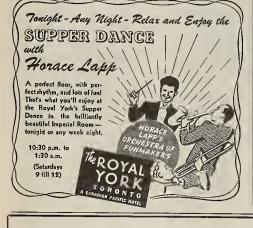

Wing.
Four more teams are scheduled to bowl. The O.T.ists and the ysios and Medettes and P.&H.E.ttes have to finish their schedule

THIS week.
O.K. Hennesey, set 'em up. We'll try again

DRAMA:

The seene is the night door of Whitteny Hall, with Old Faithful beaming forth in its usual chaste manner; and the time is 2:25. A boy and girl approach from the street, linger at the top of the stairs and slowly descend, talking all the while. At the bottom they once more linger, their conversation showing no sign of abatement.

Eventually their farewell takes place: She: Well—uh—goodbye, Helen.
Chorus from the rear: Goobye, Lelen.
Funny how people accumulate around 2:30 a.m.

Last week some fourth year engineers made a field trip to Hamilton. During the lunch hour some of them found their way into a nearby Den of Iniquity. As more and more engineers accumulated, the bill for the original three became comparatively complex to the confusion of the beer-toter.

of the beer-toter.

"Take it easy, now," he sez. "I graduated from the University of Toronto and even I ean't figure that one out."

Army Course men, beyond keeping their sergeants happy, do not indulge in unnecessary self-adornment. But one of them amazes his fellows once a week of them amazes his fellows once a week by assiduously cleaning his fingernalls and combing his hair at the end of the afternoon's lectures, just before he will be marching up for supper. Little do be marching up for supper. Little do that she had been wearing angora gloves the time. esting history (ceture takes place in the same room during the next hour.

Convocation Hall

"In his dim chapel day by day, The organist was wont to play, And please himself with fluted reveries And all the spirit's joy and strife,
The longing of a tender life
Took sound and form upon the ivory
keys.

The organ shook, the music wept; For sometimes like a wail it crept In broken moanings down the shadow

And otherwhiles the sound did swell, And like a sudden tempest swell Through all the windows wonderful

and clear.

The people gathered from the street,
And filled the chapel seat by seat—

Minor, there were some 30 people watching bim. When he finished that selection, 30-odd people tpi-toed into the Hall. Then he played Chorale Preludes by Bach. Twenty more entered. By the time the recital was over, a count re-vealed an audience of 102—which is the record number to appear at the recital

selections.

To many organists, Bach's music, the structure of which is laid out on broad lines, offers varied temptations. The sentimental organist will be tempted to tickle the listener's sensuous susceptibilities; while the unimaginative organist will will be the many components of our bullets; while the unimaginative organist may cut fast and loose with loud

*From Archibald Lampman's The Organist

Bachian thunder. Mr. Rollinson leaned to neither of these extremes, creating a palaneed yet molodic tour de force.

It was unfortunate that Mr. Rollinpadded his repertoire with such son padded his repertoire with such lightweight trivia as Jean Fraser's conventional Folk Tune and Eugene Hill's Scherza (which is as dull as boiled turnips), but he showed a nice taste in selecting Roger-Ducasse's Pasiorale. Rather like Debussy, Roger-Ducasse has a predilection for a quiet, silvery effect, repeated over and over as the theme develops, attains volume, then subsides again. Mr. Rollinson, perhaps not as proficient as Dr. Healey Willan. not as proficient as Dr. Healp evillan, had difficulty working his foot-pedals to achieve that bit of the melody that sounds like surf falling to shore, but he voiced the recels and stops splendidly to attenuate the finale into a beautiful, thin, thread of sound.

As it appears to be the custom of late to lead this column off with an appropriate poem, the above selection might appear fitting inasmuch as it the organ recital in Convocation Hall.

When Mr. Eric Rollinson, from Toronto's Grace Church on the Hill, began with Bach's Prelude and Fugue in B Minor, there were some 30 people watching bim. When he feet in B Minor, there were some 30 people watching bim.

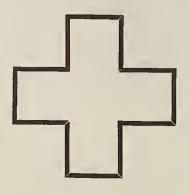

Correspondence

the past generation. Because students and teachers have not carried on the great traditions of the past—have failed to resist the present trend of concentrarecord number to appear at the recital series this year.

You could not be sure, of course, that additional persons were magentized into the Hall after hearing the Bach "tempest swell through all the windows wonderful and clear." But you could judge, however, that Mr. Rollinson did ample and competent justice to the Bach rolling and competent justice to the Bach Rut it is not wet too late. If any sories were wind the recative properties and the present rend of power in a bureaucracy with its stuttification of the initiative and the creative genius of the individual. Had the present rend of power in a bureaucracy with its libraral humanism not failed so lamentably in its task the world would not be in its present state.

Engineering Elections As Usual Preliminary Campaign Indicates

Hundreds of democratic-minded enrunareds of temocrate-minute en-gineers yesterday swarmed into Con-vocation Hall to hear the platform, promises and jokes of the candidates seeking office in the School elections which are to take place Friday. All Government of this year. A total or the have been trained or are training on this scheme. Of these, 408 were instructed at this University. Toronto is which are to take place Friday. Author of the only University to conduct two courses.

The army call-up carries of S.P.S. at this regular meeting of the Engineering Society.

Lack Ward, present chairman of the meeting, at-

eering Society.

Jack Ward, present chairman of the Society, took charge of the meeting, attempted to bring it to order, and limited the time each candidate was allowed to speak. Thereafter the ambitious students were on their own, faced with the task of bringing order out of the general bedlam. Amid cries of "jokes" and "score," they delineated their illustrious achievements in the past, their hot gags of the present, and their rosy pictures for the future if they should be elected.

The offices being contested are presi-

vis., 410, 417 permanent year ex-ceutives, and the departmental club chairmanships. The big struggle will be that for the presidency of the Engin-eering Society, with Pete Aykroyd, Bob Moore and Doug Currie fighting it out for top position.

Nominations close this afternoon at Nominations close this afternoon at 4.30 and election posters will adorn the ancient creaking walls of the School-house after Thursday morning. Friday the Schoolmen will exercise their lungs and franchise and make their annual pilgrimage to the Queen Street Mecca.

Varsity Staff Meeting

An important meeting of The Varsity staff will be held in Wymil-wood on Friday afternoon at 4:00. This being the final meeting for the year the election for next year's editor-in-chief will be held and an announcement will be made concerning the final banquet. Refreshments

Social Legislation Law Club Topic

"Social Legislation" is to be the topic of the address by Mr. John S. Reid, First Secretary and Legal Advisor to the New Zcaland Legation, Washington, D.C., who will be guest speaker at the 14th Annual Banquet of the University of Toronto Law Club, Thursday, March 2, in the Great Hall of Hart House. 2, in the Great Hall of Hart House.

Mr. Reid is a graduate in Law of Wellington University and a member of the New Zealand bar. Prior to becoming First Secretary, Mr. Reid was Parliamentary Law Draftsman for the New Zealand government. He is responsible for drafting nuch of that country's recent social legislation. In country's recent social legislation. In 1936 he supervised the War Emergency Legislation, and he prepared the Social Security Act and saw it through the Parliamentary Committee under the Honorable Walter Nash, now New Zealand Minister to Washington.

Ballots Must Be Marked Correctly Warns Cowan Of Hart House

Lists Seven Main Abuses Disqualifying Ballots; Electors Must Present Admit - to -Lectures Card

VOTE

The particular importance of marking ballots correctly in times of a light votwas emphasized by Hart House officials yesterday in an interview with The Varsity. When there is a probability that either through pressure of affairs or inertia a substantial part of the electorate may not exercise its franchise,

ELECTION OFFICERS

Hart House Committee members who have not reported to the Comp-troller's Office to list their names as election officers are asked to do so this morning before 12:00 o'elock.

the importance of the vote polled increases. "If the privilege of voting is worthwhile it's worth exercising some care to see that it's done right," said W. R. Cowan, Acting Comptroller of the House.

Mr. Cowan outlined the following abuses which have disqualified votes in the past:

Signed Ballots fn order to vote the House Member is required only to present his Admit-to-Lectures Card. No literacy test is required therefore do not sign your ballot. A signature destroys the pur-pose of a secret ballot.

Vote with an X

Mark an X opposite the name of each
of your choices on each committee.
Check marks will not be accepted, nor
will numbers be considered adequate indication of choice. While several members are to be voted for in each case
the ballot is not a preferential one.

Count Correctly

Look at your ballot and find out how many men are to be voted for. Do not vote for more than the number indicated. You may vote for fewer.

Don't Blot

Pencil should be used for marking ballots. If you use a pen be careful when folding ballots so that wet ink markings are not duplicated on another part of the ballot, thus confusing your intention and voiding the ballot.

Nominations for Hart House Com mittees are closed and have been for a week. It's no use adding names to the ballots. No matter how good you may think the man is, unless he was properly nominated at the proper time, a vote for him now will do him no good and will only nullify your other votes on the same ballot.

Use Space Provided
Use the space provided specifically for the marking of X's on the ballot. If you mark them elsewhere your ballot will be spoiled.

CORRECTION

ft was announced in yesterday's Varsity that the Faculty of Forestry was helping the Red Cross campaign for supplying prisoner-of-war boxes. The faculty concerned was that of Pharmacy, NOT that of Forestry.

House crowding around candidates for the election of 1942 and listening to pre-balloting promises,

Franchise Without Frills---As Election Ballyhoo Rationed

is a true indicator, then the tumult and were not running for office, but were shouting which was once prevalent in Hart House elections has vanished from faculties.

But that is part of the colorful heritage of other years. Not today. And if candidates don't make up for their lethargy evident thus far in one last gust of energy today, then it would ap-pear that one of the University's most high-pressure affairs will be laid among the moth balls and catalogued tenderly as one of those things . . . "hying back to the good old days, don't you remember?"

The good old election days were some thing to remember indeed, and a glance through old Varsities filed away at the Library brings to light many colorful pictures

Pre-war elections, for instance. Those were days when candidates snapped their fingers at such lifeless trivia as posters and soap-boxes. Those were days when peaunts, gum and candy flowed freely... days when candidates zipped across the days when candidates zipped across the campus on roller skates. .. days when sandwich boards and clanging bells were in vogue . . . when pretty pictures were dispensed freely . . days when eandidates' musician friends entertained the electorate with hot trumpet solos and jazz . . . days when one enterprising candidate bumped up and down Hoskin Avenue in a buckboard, a modern Ben Hur with an old nag.

The days from 1939 onward showed la deeline in undererad voters and in!

were dispensed freely . . . days when candidates' musician friends entertained the electorate with hot trumpet solos and Jazz . . days when one enterprising candidate bumped up and down Hoslein Avenue in a butchboard, a modern Ben Hur with an old mag.

The days from 1939 onward showed a decline in undergrad voters and in undergrad originality. All in all, 1940 wasn't too bad a year, with more than 1,500 voters turning up, greeted by the boisterous tones of a portable public address system, which promised that one Library Committee candidate would provide ... "One and all with automatic book-carriers to the centre table."

In 1941 the war-burdened electorate began to thin out as only 1,150 registered voters trecked to the polls. They were met by candidates carrying and waving their own posters, and there

ff candidates' performance up to today, were many other frantic barkers who

Hart House elections has vanished from the campus, and the back-slapping barker and the hand-shaking electioneers will soon be as outdated as "Mairzy Doats."

Time was when Hart House halfs were in a pandemonium, and on election day the din of campaign bosses shouting "Vote for ——" thundered across the campus and echoed as far away as the Spadina Street borsh belt.

But their garts of the calestic their the calestic their street of the calestic th dued than usual, the chronicler told too

dued than usual, the chronicler told too, how one canny publicity manager placed advertising blotters under voters' coat collars as each departed from the polls. In 1943, The Varsity's Samuel Pepss was almost in tears as he sobbed in a front-page news-story the worful fact that a mere 754 had cast ballots—less than 21 per cent of those eligible. Only a handful of posters appeared, he blasabhemed, and there were a few sunblasphemed, and there were a few supblasphemed, and there were a few sup-porters of candidates on the scene who distributed blotters" almost apologetical-ly." And thinking back to the wild ballyhoo of the old days, it must have wrenched his newsman's heart as he enscribed the last, terse sentence: "The atmosphere in the polling room was strictly business-fike."

WEDNESDAY, MARCH 1, 1944

THE TEST

Phase III

Today we reach Phase III of the current test of most important element of the test will be passed by the electorate—the majority wlil probably vote today, although the task will not be an easy one. We make this prediction mainly on the basis of the substantial number of nominations turned in plus observations conducted in the corridors of Hart House where pertinent election information about procedure and candidates is displayed. The broad electorate seems interested in its part of the proceedings even if present members of Hart House Committees and current candidates show a certain lack of enthusiasm for their parts.

The results of Phase I were gratifying. The supply of candidates for all open committees sufficient and in three out of four cases more than sufficient to assure a lively contest. Phase II, the campaigning stage, has so far shown activity to be at a disappointing level. Few posters have so far appeared, and up to yesterday noon concerted campaigning had started in only one faculty. It was our hope that active intelligence would be shown by the nominees in placing concrete programs before the voters. Little beyond the usual ballyhoo (and that on a reduced scale) has appeared in this line as yet. Even The Varsity's offer of limited free publicity of past records and qualifications was accepted by fewer than half the men running for the House, Art, Library and Music Committees. It was not our intention originally to back any candidates in particular, but we would recommend voters make their choice from The Varsity's list as representative of candidates who are at least alert.

Election Day has always been the climax of cam paigning activity, and with time a scarce commodity it is probable that most candidates have been hoarding their energies and literature until today. It is possible that around noon there will be a great burgeoning of activity in the House, but past experience would indicate that it will not be of the kind that will lend itself to thoughtful voting.

Thus voters today will be faced with some difficulty in choosing their candidates, but they should not let that deter them from doing their duty in this small way. Voting does not take long and nearly every man in the University will be in Hart House at for any undergraduate man's not voting today.

tion and inefficiency aside, voters would do well to see that they supplant this year's committees with a persuaded that it is wrong or the Section 2. set more willing to share the extraordinary duties of the House. It is reliably reported that up until noon yesterday very few committee members had reported

"Non-Essential?"

We rejoice in yesterday's letter from Rhys Dixon, IV Political Science and Economics, not because v concur in his assessment of the recent National Selective Service Interpretative Letter, but because we share his general view of the student inability to react either positively or negatively to the pressure placed upon it. Generally speaking this year's activity on the campus has shown less of the healthy ferment of former years. This is understandable when the increasing emphasis on academic standing which reaches a new high in the latest policy with regard to so-called non-essential students is taken into account. Last year's "war baby" graduation took away the last group of students who had known the campus under the less unexpansive days before military or National Service training was compulsory

Dixon's letter comes like a fresh breeze to us, who deal in opinion, but it does not bear an over-attractive odor. There is a certain justice in what our correspondent says, but his arguments are illfounded and his assumptions are scarcely just and not always correct. To be sure there has been a good deal of doddering about policy with regard to college students, but except for the irritation of uncertainty, Canadian college students have been richly provided for in these times in comparison with those of other warring nations. That our program has been lacking in complete clarity or foresight should not make us think that there has not been a good measure of foresight applied. The inquisitive have only to look a few miles to the south of this Campus to the other side of the lake to see what can happen when a panic-stricken bureaucracy turns its attentions to the institutions of higher learning. Not only were college men left long in doubt as to their status, but during the last academic year government pronouncements, conflicting from week to week and undergraduate democracy represented by the annual sometimes almost from day to day, kept American Hart House Elections. The divergent results of the college men in a state of academically unproductive first two phases in no way make us doubt that the agitation. Then it was decided to take all the men out of college when they reached draft age unless they were in certain courses of transparently obvious connection with the war effort. Then to save a number of colleges from extinction it was found necessary to send many of these men back in uniform. Re-cently we have heard a proposal to move most of those in kahki, thus leaving many institutions in as parlous a state as before. In continuity, at least, our gradually evolving system has left the universities Canada far better off and has disturbed the students less, although unsupported rumors will spread. There have been no official contradictions of intention, and all steps, a point which will surprise our correspondent, have been taken after frank conferences with university officials.

The time has now come when certain courses have been designated as essential or non-essential. Because of need the nation is willing to take all it desired, but quantity comes first. In other fields of his countless admirers, Dr. Mcnot at present deemed essential continuation of study Geech said that he was irrevocably
pointed out this system, particularly in the state of the committed to: university as this is and in such a welter of courses will pose many knotty problems, but the Council of the Faculty of Arts is at work on them now, and we understand that no serious difficulty is foreseen. Some liberties of interpretation will have to be taken in some cases and the job will be distasteful. This competitive system, however, stems out of a definite suggestion made by educational men in conference with government officials. The alternative elimina-tion by means of an arbitrary fixed standard was rejected by university men because of the obvious but disagreeable fact that such things could be "fixed" very easily.

In our own opinion the application of this system should greatly enhance the standing of the university student in the community where unfounded thought has tended to class him amongst slackers, for it will weed out the real slackers along with the intellectually over-optimistic. In some cases where competition is keen there will be some regrettable wastage, but after all, as someone else has said, there is a war on.

As for the lack of reverence shown for the social one or another of the polling times. Provided he is sciences, that is not entirely explicable, but if our possessed of a sound enough memory to bring his correspondent will recall, last fall's Interpretative Admit-to-Lectures card with him there is no excuse Letter spoke of "such courses as from time to time" may be deemed essential to the national interest. And, the Champus Cat's zany charges of corrup- The phrase "from time to time" suggests frequent persuaded that it is wrong or that conditions have changed at any such time there is no reason why the existing regulations should not be revised. They are willing to concede at this time if yesterday very tew committee members had reported to Hart House officials for assignment to posts during voting hours.

would provide for opportunities to change the list, and it undoubtedly will be changed as the war develops. After all the "non-essential" courses aren't as suitably appreciative).

GILHOOLEY

McGeech for Warden Is Campaign Cry

Heroic Stand Made By Dark Horse After Secret Nomination: Followers All Bewail Absentee Wardenship: Gilhooley Quakes

BLACK HORSE SCARCE

Secretly nominated and only now bringing an under-cover campaign to a whirlwind finish, Dr. Aloysius P. Q. R. McGeech last night revealed that he is running for the post of Warden of Hart House, under the banner, "GILHOOLEY MUST GO."

"GILHOULEY MUST GO,"
"Go be must," elucidated Dr. McGeech when pressed for a statement at his
campaign headquarters, situated
under the north-west leg of the third
pool-table from the left as you go in
the cert door.

he east door.
"Ay," continued Dr. McGeech, "Gilhooley must go. I cannot emphasize this too strongly. He must go. And he will."
"Who taught Gilhooley all he knows?"

continued the dark horse candidate. "Who has been around Hart House since before Gilhooley was born, if not

PLATFORM

No "Q" in the Pool-Room.
 No Thumbs in the Soup.
 No Absentee Wardenship.
 No.

"Creatures of 'Q' will assail me from north, cast and west," proclaimed Mc-Geech defiantly. "Gilhooley may well assail me from the south. The Editor of the Varsity may stamp in his tower hide-out till the roof collapses on me from above, and at any moment I expect the Taddle, traditional source of Tuck Shop coffee, to erupt through the floor. But I continue, invincible, unafraid, and above all, alone. Mark that. Alone. "Though not one stone of Massey's Mansion remain upon another, I carry my battered ensign high. GILHOOLEY MUST GO."

being banned, but weeded. The best of the crop will still be there.

On the whole it is our belief that, imperfect as our system of dealing with essential" courses is in this country, it is by far the most enlightened and would suggest that liberal humanism is standing its ground against the forces of darkness. It has not failed. But the dark words of our correspondent

Meds Team Smash Records SPEAKING For Indoor Track Relays

Medsmen Dyer, Fielding, Wilford and Lewis Complete
12-Lap Course in 4.01.8; S.P.S.

Although details on the ga and Trinity Runners-up

28 TEAMS COMPETE

The classic indoor track relay of the the 12-lap affair, was taken by Meds last night in record breaking time. The race, which is about 150 yards longer than a mile, was the hottest of the year for the Meds foursome who completed the journey in 4.01.8. Actually the runners had to turn in 55 second quarters to turn the trick. The four heroes are Doug Dyer, Bill Fielding, Johnny Wilford and George Lewis.

An Engineering quartet, made up of Gord Lorimer, Bill Kerr, Frank Fordyce and Jim Moull, turned up second with another very good time of 4.04.7, three seconds behind Meds. In third place was Trinity, with Ed Wesson, J. Goering, J. Hickman and E. Stock. Altogether 28 teams competed to field an entry of 112 men.

Varsity Basketeers To Meet Navy Team

Mac McCutcheon announced last Mae McLutcheon announced last night that the Blues would play one more basketball game this season. The Varsity team, which has been defeated only once this year, will meet Teddy Morris' Navy team from H.M.C.S York this coming Saturday night in Hart Hause. Hart House.

Hart House.

However this is not another Athletic Night. This game will give all those who failed to see the Blues in action an opportunity to do so before the season's close. Most of the present team will graduate this year and it will be their last appearance in Varsity Blue. There will be denoting in the main gym following the game. Admission price will be 25 cents.

water polo playoff. Victoria Firsts drenched Junior Meds A by an off balance 10-2 score.

Star Scholarship For Graduates

administration

administration.

Applicants should be university graduates, preferably with professional education and experience in social work or public administration. The recipient will be required to be in residence during the academic year and to be registered in the Graduate School of the University.

The applications, which should be in by April 15, 1944, should include a statement of personal and academic qualifications and a brief summary of the esearch project to be undertaken, de-

The photographs of the Women's Athletic Club managers and the All-Varsity Baskethall team postponed from last Wednesday, will be taken on Thursday, March 2, at 1:00 p.m. in the University Photographic Department, 3rd Floor Engineering Bldg.

Team members who still have uni-

GOOD ASHTRAYS, ANYWAYS!

GOOD ASHTRAYS. ANYWAYSI

Ambling through the Women's Union the other day we cast our eye, and were duly impressed by the striking array of cups and trophies lined up on the mantlepiece. "What a whee of a time the first teams that won them must have had christening them," was the first teams that won them must have had christening them," was the first teams that won them must have had christening them," was the first thought that ran through our mind. So with this picquant touch added to our curiosity we did a bit of research on some of the better known University athletic awards.

But our research resulted in the shedding of copious tears... even though we enjoyed it. For shoved off in a dingy corner of the shelf were two tarnished and intriguing looking cups. Grubbing for historical value, we reached around their shining neighbors and plucked them forth. The newer looking of the two turned out to be no less than a piece donated by Mrs. Ramsay Wright in 1905 for the Athletic League for Tennis. The last inscription bore the year 1911.

Now the other cup was a fascinating little number given by the W.U.A. of U.C... for badminton. The last mark on it was the date A.D. 1942. It was won, in those days, by P.H.E.'s Betty Allan. But let us leave these sad relies of better years and carry on...

The Carlette Cup for tennis was donated by Miss Curlett who was headmistress at Glen Mawr school. It made its first appearance around 1910 and has been given to the faculty amassing the most points in the annual tennis tourney. Last year, although Virginia McLeod of Vic was individual champ, P.H.E. earned the right to a year's interest in the cup on this point system. This year P.H.E. and Vic are tied so that each will harbor the silver for six months.

The Hartsone Cup, donated by St. Hilda's grads in 1914, is for bockey. Vic has copped it an immber of times including this year. The Saints likewise have stick-handled their way to it more often than any faculty. St. Hilda's grads are also responsible for the interfaculty basket

ann ann on the Since 1972 which was a since 1972 which was a since 1974 the Golf Trophy came into being for interfaculty competition. It was won by P.H.E. this year under the able swing of Jean Haigue. We noted that one Canadian Champ at least has her name inscribed thereon . . . Marion Walker who took the cup for four transfer the University.

name inscribed thereon . . . Mation visual four years straight.

So you see, cups are a comparatively new thing for the University. All our imaginative picturing at the beginning of our inquiry has been smashed. No longer can we see Victorian ladies graciously christening the cups from lusty kegs of smelling salts. Now we are forced to conjure up flappers of the roaring twenties toasting the arrival of a new trophy with flagons of gin . . . well, we can dream, can't we???

By Phil Shackleton

BEAT McGILL . . .

For the first time in four years the cry of "Beat McGill!" goes up from the campus tonight. For, although the teams will be 333 miles (by rail) apart, tonight sees the first intercollegiate sports event in which Varsity has competed since the C.I.A.U. (God rest their tired souls) ruling of 1940. With the kind co-operation of an unidentified telegraph company, McGill and Varsity meet at 8.30 tonight in an intercollegiate swimming meet.

intercollegiate swimming meet.

There will be no bands or cheering sections, or ribbons or pennants, no excursion trains and probably few or no spectators. The swimmers will not see their opponents; rather they will hear only the result of another race at the Montreal end of the wire. There will be little excitment and no rah rah ballyhoo of any sort. This meet will be stripped of everything but the essential. And the essential in this case are two swimming teams, some officials, and a telegraph company.

case are two swimming teams, some officials, and a telegraph company. It's going to prove an involved sort of meet. But probably more orderly and systematic than most pre-war intercollegiate extravaganzas. Down in the pool, the swimmer will complete his race. The official timer will despatch the official runner to the Athletic Office with the time and event. In the Athletic Office the official- runner will give his information to the official telephoner who will relay same to the official arbitrator or telegraph company. The telegraph company will see to it that their Montreal office learns all about these goings on in Hart House, whereupon the Montreal office will phone the McGill team the joyous news from Toronto. At this point the McGill officials will have their swimmer paddle his length, will time him while he is so doing, and then will endeavour to put the go-between process in reverse.

reverse. At the end of the evening it is hoped that the officials will be able to struggle through the mass accumulated telegrams in order to declare a winner. These officials will have to do a lot more work for this sort of meet than the old fashioned type we used to know. Now comes the roster of the Blue team. In the 300yard medley relay we have Johnny Northwood, N. Lea and Pete Aykroyd, wbo will swim 100 each, one breast, one back, and one free style. P. Lockhart and W. Moffat will appear in the 50 free. Captain Northinues with J. Martin and A. Patterson showing for the 100 free and N. Lea for the 100 breast. The 200 free style relay team is made up of W. Moffat, P. Lockhart, S. Robinson and J. Fydell.

Some people don't talk much. Like in one of the numbers melted away and at the Ballet the other night. the pair at the Ballet the other man-Husband and wife they were. They came in and sat down without a word and didn't speak a word to each other all through the show, except in one place—when the Snow Maiden featured

Any time's SHOPPING TIME!

HAPPY LANDINGS for Easter parcels, mailed overseas now, from Simpson's Shopping Service Canteen. Our soldiers, airmen, nurses, women in the armed services and Red Cross workers overseas are hoping "some-thing special" will come for Easter. Don't disappoint them. It means every-thing to be remembered. Simpson's Don't disappoint them. It means every thing to be remembered. Simpson's Service Package Canteen on the street floor has an attractive showing of gifts the services want, special parcels are also on display there. If you live out of town or cannot come to the store personally, Simpson's Shopping Service will be glad to make selections for you. You can count on them to see your parcel is wrapped securely, properly addressed and promptly mailed.

FOR A GOOD AFTERNOON, take your girl to the King Eddy this Solur-doy P.M. You've heard Norm Harris and his boys ou the oir...thot smoothest jive organization is yours for a dollar jive organization is yours for a dollar convert charge at the The Dansants from Saturday 4 to 6, but brother, better get a reservation. There is no more popular location in this here town, Remember Geoff Townsend of Charlie Dornburger's orchestrat Well he's recently joined the Horris boys, fast o sample of the top drower stuff they're honding the customers.

NOW'S THE TIME to start picking cottons. There's nothing like 'em for daintiness and crispness. You can wash dantiness and crispness. You can wash 'em all you like and they come up bright as ever. It will make your heart young to see the way you'll look in one of Northways grand new collection of cotton dresses. Don't wait till they're all picked over. If you're a gal who looks ber best in a two-piecer you'll love the plaids and stripes, and they're adaptable enough to wear mixed or matched, as you like. Whether you're looking for cottons, suits, crepe or woo co-ed dresses...it's Northways Third Floor for the shop-wise Jr. Miss.

WELL IT'S HERE of last and se hove the news stroight from Mrs. Head of the Antoine Solou of Holt Renfrew's, that "Cold Permanent" is hot stuff for a gal with a yen for ollure. One of its odvontoges incidentolly is that it can be So Mr. opplied to those short hoirs that simply another couldn't be token in by an ordinary perm, those two inch frightfuls that ordinarily stick out like spikes at the base of your neck. Also it's a honey of o wave if you've been fooling around with rinses and your hoir's a bit dried out. Phone Ad 9441 for details on this new Cool Permanent. It's our guess that it's destined to moke mony o nice girl happy for the durotion ond beyond. The Antoine Solon is on Holt Renfrew's Third Flags. Third Floor

YOU'LL LOOK THE WAY you've always wanted to look... (and that's something!) in one of those new Spring suits at Fairweathers. Fairweathers, you must know, are pretty smart at choosing what does right by a girl in the Springtime, and these new Fairweather suits are the type you can weather weather suits are the type you can wear 'round the clock. You'll get more mile-age out of a carefully chosen suit than out of any other garment, and baby. out of any other garment, and thow you will go in confidence in or those "chosen for a college gal" Fair-weather suits in classics or colours that glow right into your eyes and make 'em shine.

KEEP YOUR FACE CLEAN . . . sounds reasonable enough, but it's not alwoys so easy with the grime sceping in from dust and smoke . . the skin being soft and porous is just o they bit being soft and porous is just o fully bit like blotting poper, with a nasty habit of absorbing what comes. That, why cleaning croom was developed, a smooth, frogrant emallient designed to roll through surface dirt and dreg it out. In face creoms you con't do better than
Du Borry Cleonsing Creom, a businesslike creom which hides its efficiency behind a scent as sweet as lotus flowers.

disappeared completely, leaving nothing on the stage but a few flowers and a

small puddle,
"Where'd she go?" asked wifey.
No reply.
And that was all that broke the silence until they silently rose and left at the end of the show.

Or take the fellow who was out with Or take the fellow who was out with his best girl one night. Quite innocent and happy he appeared to be all night long. Then, at the very end of the evening, when all the dancing and cuddling was done for the night, came

the words:

"Say, how many onions did you eat
for supper?"

He is still in the land of the living.

There was once a Schoolman who was a member of the International Affairs Club. So he met an important personage of the Canadian Institute of International Affairs. Here, said he, is somebody I want to know. So, at the next dance, who should he bump into but this same personage. Enthusiastically, our Schoolman greeted him and chatted gaily about international af-fairs. The personage listened politely, for he was of a shy and retiring nature and was overpowered by this enthus-iasm. But he was somewhat puzzled by it all. Because as it happened, he was another Schoolman who looked quite a bit like this personage but didn't know a thing about the Canadian Institute of International Affairs. For months this went on, our friend enthusiastically greeting this unidentified engineer and immediately plunging into international politics and congratulating him on getting out to so many university functions.

Then one day at last our hero found that this new friend of his with the blank looks was not who he thought it was. The next time they met he rushed up to the Schoolman and apologized for mistaking him for someone else all this time. Again he got a blank look in reply—for this fellow was the personage from the Conodion Institute of Inter-

Wanted, one leopard-skin and a nice dark cave suitable for a hermit.

notional Affairs.

A TRAGEDY: Once a fellow phoned a girl a couple of days before a dance to ask her to go. It was getting on towards bedtime, but not too late, mind you. The girl on the desk bellowed down the hall—he wants a date with Phyllis Ball. But Phyllis Ball, she did Phyllis Bail, but Phyllis Bail, see use not hear—for she was in bed and she had earplugs on because her roommate snored. The girl on the desk regretfully informed Mr.—that P. B. must be out because she didn't answer. So Mr.—had to make a date with another words. woman.

Oh, the shome of it oll-to miss you big moment becouse your

Speaking of people phoning women's residences, one lad phoned his steady girl friend, his one and only. But like most residence phones, it was busy. Several tries netted no result. Then his room-mate, who also wanted to talk to the gal, probably to engineer some fiendish plot, tried and, on one of those chances in a thousand, got through. But when he asked for Phyllis Ball, her room-mate answered and, being a well trained room-mate, said she was out. Ah, me, said he, I should have know. Hey, said he to his room-mate, the line is open—you try. So boy-friend tries—line's busy.

Confusing, isn't it? She must be difficult person to get to ku

Toronto Symphony Orchestra
Today's review won't lead off with
my poetry, but if it did, it would prob-

any poetry, but if it did, it would probably select a quotation containing choice adjectives and tag the thing onto the virtuosity displayed by Ernest Seltz last night at Massey Hall.

Unlike many guest pianists, Seltz does not find it necessary to flop his hair about, sway his body, or emote over the piano with needless theatrical tricks. He is reserved rather than spectacular, an artist rather than a show-off. He turned out Borkeiwicz's little-known Russian Caucerto in B Mojor in a handsome workmanlike manner, and with the Toronto Symphony Orchestra providing an unobtrusive obligato, the two coman unobtrusive obligato, the two com-bined to make the piece a substance of velvety and weird beauty.

It would be pleasant to say that in

It would be pleasant to say that in Symphony presenting the first performance in Schumann, Ganada of Morton Gould's "Spirituols" In his usual genial manner, Sir for String Choir and Orchestro, the orchestra made it worthy of vast appreciation; but sad to say the material Mr. Seitz with their playing of that for String Choir and Orchestro, the orchestra made it worthy of wast appreciation; but sad to say the material was disappointing in its essential framework. The program notes quote the American composer as stating that it was his endeavor to "synthesize" American boogie - woogie or "White Spirituals" with a pattern of Southern

mitting fragments of the known tunes to appear from time to time. His pur-pose is commendable, but his means to that end often did not vindicate that that end often did not vandicate that purpose. Anton Dvorak similarly trans-muted Southern spirituals into his NewWorld Symphony and it was immensely successful; but Dvorak did not employ jazz effect. In Gould's case, the use of boogie-woogie is too predominant, and the whole becomes a Centaur-like affair, so to sneak, neither here nor there

the whole becomes a Centaur-like ariar, so to speak, neither here nor there, neither Gershwin nor Dvorak.

Sir Ernest gave a masterly rendering of Mendelssohn's pretty if somewhat uneventful Overture Ruy Blas, with the brass section galloping through the niiddle section at a brisk, pleasing clip. The orchestra had some difficulty in

attempting to bring to the surface any vigorous qualities in the rather senile Symphony Number Four by Poppa

most unsymphony-like piece, Happy Birthdoy to You. The pianist, born on the freak day, February 29, was celebrating his 13th birthday. He did look it. FRANK RASKY, VIRGINIA FOX. He didn't

McGill Team Victors Mulock to Visit Returns Of Hart House Elections Whitney Girls Show Heaviest Vote In Years

Elections Quiet

Noise Level Low, Handouts Few, As Votes Mount Up; McGeech Defeated, Editor Conscripted.

Meagre spoils for the blotter-col-lectors and a probable new low in noise, campaigning, and poster-quantity mittees stamped registration cards, contrasted sharply with increased elec-tion-day interest in the Hart House corridors yesterday as 1,087 voters went by faculties. marched to the polls to cast almost the heaviest vote on record since elections slumped into the war-time doldrums.

stumped into the war-time doldrums. The Varsity's last-minute candidate for Warden, Dr. Aloysius P. Q. R. McGeech, flaunted three mammoth posters in the paper-strewn corridors and succeeded in polling a lone vote in his gallant effort to unseat the Gilhooley

bis gallant effort to unseat the Gilhooley machine.

During the traditional noon-hour rush, voters lined up at the doors of the polling-room to be accosted by posters and blotters from a handful of candidates who felt safe in sparing the time for a personal campaign. At all times during polling hours there were andidates to be found about the were and the little black crosses. Of the polling manager ment over last year's low of 21 per cent improvement over last year's low of 21 per cent improvement open cent and may be compared with the 50 per cent generally polled in peace time. Revision of the notorious and all-but was successful.

All in all, it is probably well that for any committee resulted in an immentance of the polling and the were and at any rate we did get a blotter. The Faculty of Applied Science and Engineering alone has extended the personal times during polling hours there were and the personal times during polling hours there were and the little black crosses. Of the polling and may be compared with the 50 per cent and may be compared with the 50 per cent improve cent and may be compared with the 50 per cent improved cannot be per cent generally polled in peace time. Revision of the notorious and all-but have a successful.

All in all, it is probably well that the year of the per cent and may be compared with the 50 per cent improved cannot be per cent generally polled in peace time. Revision of the notorious and all-but have a successful.

All in all times during polling hours there were candidates to be found about the doors, but the noise came for the most part rom a brace of leather-lunger stalwart while the rest insisted on their merits with singular quietness.

with singular quietness.

Last year's total vote of 754 was surpassed before the two-thirty break, by which time 799 votes had been cast,

Scarcity of volunteer committeemen was painfully acute as counting time came round, and Varsity Editor Rex Wilson found himself conscripted to sit

Plan Floor-Show 'Chorus
For Therapists' At-Home
The Extension Department Schools of Occupational Therapy and Physiotherapy are holding their annual A-Home on Friday, March 3, at the Club Top Hat. Corsages will be sold at the door and dancing begins at 9:30, lasting until one p.m. The Occupational Therapy class color, green, and the Physio, mauve, are the colors to be used in the decorations and the programs. A combined chorus of O.T.'s and Physios will be the feature of the floor show, and the committee has plans for other entertainment. The committee is hoping that a large number of graduates of both faculties will be present.

Engineer Group to Hear

resor winner yesterday attention in his lecture on the Koran, the third of the current series of public lectures of-fered by University College. Mahomet was a poet and because his verse was religious, he believed that Allah was trying to speak through him. Design Features of the Shipshaw De-Design Features of the Shipshaw Development will be discussed by Dr. H. G. Acres at a joint meeting of the Engineering Institute of Canada (Toronto Branch) and the American Institute of Electrical Engineers tonight in the Mining Building. Dr. Acres, a consulting engineer from Niagara Falls, Ont., is one of the leading hydraulic engineers on the North American continent. He had charge of the design of the Shipshaw plant. His address tonicht will be illustrated with

Allah was trying to speak through him. There are legands that the angel Gabriel had to force him to accept the task of being a prophet. Originally, Allah was the chief of many gods, among them Venus and the moon, pagan beliefs which remain in the star and crescent on many flags of Maelem countries. The monthetistic address tonight will be illustrated with lantern slides.

35 Per Cent Response Comparable with Pre-War Years; Revision of 300 - Vote Rule Improves Seat Distribution

FEW SPOILED BALLOTS

A vote of between 34 and 35 per cent of the total undergraduate registration of Hart House was polled in yesterday's annual House Elections. The total number of men voting was 1,087, while the total registration is 3,174. This constitutes a 13 per cent improve-

protessor of Finisosphy and one tired old reporter were conscripted to count the votes. W. R. Cowan, Chief Re-turning Officer, told The Varsity (when its representative was released from servitude) that this was the first election in the history of the House no recounts had been necessary.

The new committees are as follows:

tree with high branches, is standing as it has for years at the northwest corner of the Museum.

As a matter of fact, he recalls that he once took ex-Premier Gordon Conant along with him on one of the control of the fact.

he once took ex-Frenner Gordon Conant of the Museum.

Interesting facts like these and many more come from Professor R. B. Thompson, professor enertius of the University Botany Department, who gave on Tuesday the first of a series of the netwers will be evidence to the department of the netwers will be evidence as the Patawa the netwers of the permise field the professor energy wooded friends." gave on Tuesday the first of a series of ten feetures he'll be giving at the Botany Building. Called "Trees and Their Identification," the series is intended for public school teachers. A number of others turned up at the first lecture. Like the famed Joyce Kilmer, Prof. Thompson regards trees as phenomena to be charieshed arther than to be chonged in the providing of quiet beauty." Trees,

his contention that such galuess would be more than a private park, but a means "of self-education amid ideal surroundings of quiet beauty." Trees, shrubs and bushes would be adequately tagged, he said, so people would become familiar with names of plants which would interest them. Thompson regards trees as phenomena to be cherished rather than to be chopped down and sliced into cordwood. He explained it this way in an interview:

"A tree is like a friend," he said.
"But like a friend, it must be treated as an individual distinguished from other people. So there you have one of the purposes of my lectures. If I can teach persons how to distinguish between trees, the trees became then, not mere sticks, but friends; and once you attain this discrimination, when you go "It would be most advisable," he stated, "that Toronto be provided with gardens commensurate with her size. A collection of trees from all parts of the teach persons how to distinguish between trees, the trees became then, not mere sticks, but friends; and once you attain this discrimination, when you go for a walk or stroll it will afford you pleasure to distinguish your wooden irriends."

Prof. Thompson, a sad-eyed, grayhaired, gray-moustached gentleman in his 73rd year, has been dedicating his moreover, in terms of a higher, spiritual life to trees and other kindred topics

At Annual Dance Tomorrow Night The Big Gym at Hart House is to be the scene of the second annual dance held by the University of Toronto Air Training Corps next Friday evening at

Training Corps next Priday evening at nine o'clock.

Much surprise entertainment is promised as well as the presentation of a skit entitled "A Day in the Orderly Room," spot dances and the choosing of an Air Force Queen who will be

of an Air Force Queen who will be awarded a prize.

Air Force personalities will be present, among whom are included two Group Captains and an Air Marshall who is flying in from Ottawa for the occasion. Admission will be restricted to mem-bers of the U.A.T.C., airmen on leave, and members of the 23rd Fre-Air Crew Detachment wishing to attend.

Army Course, Fliers, To Liven Final Canteen

The final party this year of the Campus Service Canteen will be held at the Women's Union tomorrow night at eight o'clock. There will be masters of ceremonies from both the Army Course

ceremonies from both the Army Course and the Air Force during the evening. The Army Course band is to play for dancing and they want a large turnout of all the armed forces on the campus. The Alka-Seltzer Radio Show is scheduled to make an appearance, which should attract some attention. For the first time since the beginning of the Canteen, both large halls in the Union will be used, so there will be plenty of room for everyone. Many novelty dances have been planned, as well as something new in the way of ice-breakers.

THE TEST

Results Out

The test of student democracy has been written nd the results are out. Undergraduate members of Hart House have polled better than 34 per cent of their total registration. As everyone knows, 50 per cent is the lowest passing mark contenanced in this University, but considering that 50 per cent is approximately the highest result ever obtained in these elections it is obvious that this mark must come up for review, and it may be conceded that the test has been passed this time.

Next year, however, a greater interest and activity should be expected, and we hope that all who have interested themselves in the election this year will continue to urge greater participation. There is much work yet to be done, however, for even the peacetime 50 per cent was scarcely ideal as a standard of participation in a democratic institution.

The new rule substituted for the 300-vote rule, which was rendered virtually inoperative last year, has proved itself. The revision takes 50 per cent of the greatest vote polled as the basic vote requirement. No faculty may elect a second candidate until some faculty has failed to poll a vote above this line. This has led to very nearly ideal conditions of representa-Through inheritance of re-elected candidates and a powerful potential vote the Paculty of Applied Science and Engineering has been able to corner a few extra committee seats. This is by no means out of proportion to School's enrolment and no one has yet had cause to regret the presence of a large proportion of Schoolmen on Hart House Committees,

The Workers

The early posting of Hart House Elections results was due to the unstinting work of a few members of Hart House Committees and permanent staff members and volunteers. Although there was a noticeable improvement yesterday in the matter of Committeemen making themselves available for polling duties few of them were able to apply their energies to the actual counting of votes due to previous committments with various campus branches of the armed forces. It was at this point that staff members started herding the more amiable and defenceless of hangers-on about the House into the Debates Room where careful checking and tabulation was in progress throughout the afternoon

That we were involved in this business is no reason for added confidence in the results, we confess, but we assure readers that we were closely checked as all points.

No Glamour

Our previous recommendations of the "semiformal" setup for big campus dances is up for revision. Tuesday night we attended the annual Vic At-Home. It proved to be a very enjoyable affair, and we aren't in a minority on this we feel sure. Nevertheless we were impressed throughout the evechivalry of the campus in mere Sunday best in ontrast with its beauty in toilette de bal.

The wisdom of Dr. Cody's suggestion of a year ago last fall that students confine their dances to informal affairs we do not question, but if students are going to set it aside in part we feel, on considera-tion, that they should go the whole way and make their dances formal. As far as actual non-essential expenditure is concerned, no problems are solved by the "semi-formal" setup. Men with overcoats on do not look much different when they appear on the street whether they are in formal dress or ordinary business suits, but the ladies appear strikingly resplendent and require cabs (scare things, if you have not heard) which two features place college students in the public eye as much as full formal dress would and the taxis involved are an unjustified expense in these times.

But if the "semi-formal" basis is a step toward a

return to full formal dress we think that it is high time that something was done about reforming the conventional dress requirement for males. There is no denying that the stupid medieval costume generally expected in the most posh circles is uncomfortable. The collars cut and anyone who has listened to his habiliments go snap, crackle, pop during an otherwise agreeable banquet knows what the verge of insanity is like. The stiff shirtfront is a great offender and the tails of the formal coat have degenerated, even in some of the supposedly best circles, to the status of handy covers for loaded hips. Otherwise, except in a select group made up of professional magicians, the tails are completely useless.

We would suggest, in the interests of comfort, a soft collar cut with a low slope, a soft shirtfront and a black tie (possibly with more flow than the now usual black tie), and in the interests of social vivacity and color, a jacket much on the present pattern, but without tails, in some bright color. This, it has been objected, would put the male populace at the mercy of fashion charlatans who would change the color every season. We would suggest a little firmness and a recognition of the individual right to choose any color as a cure for this.

It's just a thought, and it seems only fair to warn readers that we once had an ambition to own a suit of tails in salt and pepper or red-brown Harris tweed to be worn with a tartan tie. But we think this latest one is a good idea.

Correspondence

We publish below a letter received by our Business Staff in the Students' Administrative Council office thanking them for a parcel sent to some former Toronto students overseas.—Editor.

> With the Canadian Army Overseas, Feb. 5, 1944.

Dear Gang:

I wish that by writing I could convey to you the pleasure and excitement we had on opening your parcel on Thurs. The chocs, and gum came at an opportunte time, when our ration of bars had been ut to two per month-oh the good old days in the Tuck Shop. Every one of us is practically eating those Varsities you sent along-and you'd be surprised at the revered care we are taking of them We issue a few at a time, library style, but mind you we don't charge on overdue copies. We get a great kick out of each article and have a lot of laughs reading C.O.T.C. orders and mimicking those very hard two-hour parades the boys still have. I noticed a few articles on the U.N.T.D. and got the idea of sending some amusing (?) articles from the gang here. Now if we can get the O.K. from the milkshake-drinking bunch of inebriates (that's a toughle) in the Ed's office, we have a few sharp Artsmen here who will wield a mean pen-so let's hear

I'll close now thanking you, on behalf of our band of gunners, very heartily for all you've done and most of all for your sincere thoughtfulness.

Yours sincerely,

A Gunner.

ning by the sadly incogruous appearance of the House in the Sketch Room. It does not come up in

quality to exhibits of the past few years, but there are several high spots

but there are several high spots.

Of the undergraduate contributions, undoubtedly the most outstanding are the two watercolors by W. P. Beny, IV Trinity. The one of the two elevators under a fathomiess evening sky is poetically conceived, and comes off beautifully. His other, a haunting study of a fractured gothic window in a dilapidated partie church, is strongly constructed; an original touch being the reflection of ploughed land in an single Campus Art

Hart House Sketch Room

One of the most interesting shows of the year from the campus standpoint is the exhibition of paintings by Senior and Undergraduate members of Hart House in the Sketch Room. It does not come up in Sketches, and the Sketch Room. It does not come up in Constructed; an original touch being the reflection of ploughed land in an single pane of the window. W. S. A. Dale, IV Trinity, has two vigorous oil sketches, in the idiom of the Swigorous of croup, an waterfall subject, revealing the felicities of the palette knife technique. J. R. Blais, whose work is distinctly improved over last year's, (Continuous Construction) and the second constructed; an original touch being the reflection of ploughed land in an single pane of the window. ART CLASS

The art class will meet at 7.30 tonight in the art gallery of Hart House.

ATHLETIC DIRECTORATE MEN'S ELECTIONS

The Electoral Meeting of the University of Toronto Athletic Association to elect student representatives to the Directorate for 1944-45, will be held on Monday, March 13th, at 4 p.m. SHARP, in the Debates Room, Hart House (south side, upstairs).

(south side, upstairs).

Under the Constitution of the Athletic Association (Article I, section 4) all Standing Committees on sports are entitled to send representatives to this meeting. These representatives must be male undergraduates of the University of Toronto or one of the affiliated colleges who are proceeding to a degree, are in actual attendance upon lectures, and who have paid the annual fee required (By-Law I). The Standing Committees have been notified to meet at an early date, appoint representatives and give them their credentials for the electoral meeting. On presentation of these credentials at the Athletic Office on the morning of March 13th representatives will be given voting tickets.

A student to be elected to the Directorate must, at the time of his nomination, be in the second or a higher year of his course at the University, but not in his final year. The nominations must be in writing on the form provided for the purpose, signed by two male undergraduate members of the Athletic Association in good standing, and filed with the Secretary of the Association not later than 5 p.m. Thursday, March 9th; nomination forms to be obtained at the athletic Office.

Time Marches On--

Have you held your elections for next year's officers?

All University, College and Faculty Organizations appearing in the Students' Handbook are requested to submit to the Students' Administrative Council office a list of next year's officers with their telephone numbers, as soon as their elections have taken place.

Students' Handbook 1944-1945

THE VARSITY Editor-in-Chief 1944-45

Applications for the above position will be received by the Acting General Secy.-Treas, of the Students' Administrative Council, up to 12 noon, Friday, March 3rd.

(Miss) A. E. M. Parkes, B.A., Acting General Secy.-Treas., Students' Administrative Council.

TORONTONENSIS

Applications for Editor of *Torontonensis* will be received by the Acting General Secy. Treas. of the Students' Administrative Council, up to 12 noon, Friday, March 3rd.

(Miss) A. E. M. Parkes, B.A., Acting General Secy.-Treas., Students' Administrative Council.

DON'T DESPAIR

if you have lost your precious Handbook.

Just drop in at the Students' Administrative Council Office and get another.

Tastefully bound in red---lots of room for phone numbers--and the up-to-date map of Greater Toronto in the back, which alone is well worth the price of 30c.

Junior School Demolish Wycliffe As Big Brothers Bow to Meds

utes Mark Slaughter of Game Greenhorns; Wycliffe Goalie Weird but Effective

SCORE 14-1

Jr. School swamped an inexperienced but game Wycliffe team yesterday alternoon by a score of 14-1. School held the play Irom the opening whistle and shot on Storey, the hard-worked Wycliffe goalie, almost at will.

It took School just six minutes to get going, Sabiston scoring on a pass from Morrish. School counted again at the 10-minute mark and from then until the end of the game it was just a question of how many more. Sabiston from Brownridge and Morrish at 10.17, Morrish from Sabiston at 10.35, Andison rish from Sabiston at 10.35, Andison

As the second period started Wyclitte surprised everyone when they broke loose and Cunningham laid across a pass to Harris who sailed in to rob McDonough of his shut-out. School came back with five goals in the next five minutes: Sabiston from Brownridge at 157 Wilson From Browling at 223 Wilson 157 Wilson 158 1.57, Wilson from Bradford at 2.23, Wil-1.57, Wilson from Braifford at 2.23, Wilson from Andison at 2.55, Andison unassisted at 4.35, and Morrish from Bain
at 5.99. Sabistou coasted in on the
Theologs' good at 7.16 to complete a
passing play from Bain and Shaw and
also to notch his fifth goal ol the game.
Bradford from Wilson and Brownridge
at 8.50 and Bain from Morrish at 11.30
completed the rout. completed the rout.

completed the rout.

Undisputed star of the game was Sahiston with 5 goals which should set some new kind of record for a 30-minute game. Marrish, Bain, Wilson and Andison each scored two goals and Bradford notched the other marker.

Storey in goal for Wycliffe had a weird with one each. Best for the losers was by the goals and with one each. Best for the losers was with one each. Best for the losers was with goals in each wind was repeatedly. but effective style of play and was by far the best for the losers, making 40 saves to ten for McDonough.

Crassweller, the most potent player on the ice, tallied again potent player on the rec, called again at 7.30 on a pass from Laidlaw and then came back at 14.28 to perform the hat trick with his third goal. Play ended with Meds leading 4-0.

Meds put on the old power play as the second period started and Callaghan scored an unassisted goal alter a minute personal tally.

goal were: Meds I 22, S.P.S. II 16.

SPEAKING OF SPORT

HEAR YE, HEAR YE .

It is charged hereby and herewith that McGill natators have been secretly dealing with Vasco de Mesurier and one other, somewhere in the vicinity of Montreal, from whence emenated an overwhelming swimming victory last night.

Offered in evidence that the aforesaid Redmen have been up to some mysterious, inexplicable, obscure shennanigans with the aforementioned Vasco de Mesurier and another dealer in the art of black magic are:

magic are:

Exhibit A: name unknown.

Exhibit B: name unknown.

Exhibits C to X: names unknown.

This could be another court case, but one case a year is enough, if not too much. The prosecution tired and the court reporter threw up his hands in awe and wondered as he hurriedly left the scene of the miniature Decathlon staged last night.

Luckily, he left last night, we left early this morning. The revival meeting was awaited with more than a mere curiousity by sporting factors on the campus. The meet was a decided success as far as the actual swim results are concerned. The Blues lost and certainly no alibis are, or will, be offered.

But we have a bone to pick with certain characters down McGill way. We've been scooped by the McGill Daily, and that is not cricket in the strictest sense of the word. Why the names of the competing members on the Redmen roster were not wired with the results, is a mystery, not only to this department, but also to the organizers of the

inystery, not only to this department, but also to the organizers of the meet.

The ever hard working Miss Lea in the Athletic Office, not only included the names of all the local swimmers, but also the names of the officials—and we do mean officials—who so kindly donated their time.

The McGill Daily had the results and the names of all competitors for publication. The Varsity has only the results and the names of the swimmers from the local campus. Little wonder that newspapermen are placed in strait jackets and those nicely padded cells.

The meet itself was one of the weirdest we've ever had the pleasure of witnessing, and it leaves us wondering. A telegraphic meet can only be a success with the full co-operation of the two parties. The cooperation proffered by the McGill officials was done so full heartidly, we feel assured, but the organization could not have been of the best. Blame it on the long lay-off from intercollegiate competition, or what you will, but the fact alone remains. Results were exceedingly slow in arriving, but that can be pushed off on the poor telegraph company. Leaving out important details cannot.

The officiating, however, was of the best. The energetic Vern Page secured most of the local traffic department for the clocking and those gentlemen really proved what a keen eye the local police sport. These men took time off from their difficult tasks to help out. To Inspector Edward Dunn, Sergeants Lytle, Crawford, Harper, Smith; Constable Smith and Mr. Hobson, we wish to extend the sincerest thanks not only from the sports staff, but also from all concerned with the event. And may we say welcome back, your services are badly needed for such meets.

The Sportswoman

By McGeech and Co.

In a stern Athletic tussle at the University Press late last night, a muscular babe from the S.A.C. Office succeeded in tossing ye tired ol' Sportswoman completely out of the paper. In the flush of victory, she requests that we print the following instead.

WOMEN'S ATHLETIC DIRECTORATE ELECTIONS

The electoral meeting of the University of Toronto Women's Athletic Association to elect the five student representatives of the Women's Athletic Directorate for 1944-45 will be held in the Lecture Room, Household Science Building, on Friday, March 17, at 4:30 p.m. sharp.

Nominations will be received by the Secretary of the Association until Tuesday, March 14, at 5 p.m. Nominations must be signed by two members of the U. of T. W.A.A. and must be made on the forms to be obtained from the secretary, S.A.C. office, Hart House.

A student eligible for nomination must at the time of nomination be in her second or higher year, but not in her final year, at the University. A student

A student eligible for nomination must at the time of nomination be in her second or higher year, but not in her final year, at the University. A student planning to enter O.C.E. or similar course, is cligible.

Representatives to the Electoral Body must be appointed and sent to the meeting as follows: University College, Victoria College, St. Michael's College, St. Hilda's College, and Medical W.A.A.'s, lour representatives each; Basketball and Hockey Clubs, six representatives each; Swimming and Tennis Clubs, four representatives each; Badminton Club, two representatives each; Badminton Club, two representatives with undergraduate members of the 1943-44 Directorate. Names of voting representatives must be given to the Secretary not later than Tuesday, March 14, and no proxies will be permitted except by written notice to the Secretary prior to the election. Electoral Body representatives may only carry one vote each. Body representatives may only carry one vote each

WOMEN'S ATHLETIC CLUB ELECTIONS

The annual elections for the Women's Basketball, Hockey, Swimming, Tennis, Badminton, Bowling, Skiling and Volleyball Club executives will be held in the Lecture Room, Household Science Building, on Wednesday, March 22, at 4:30 p.m. sharp. Preferential voting for candidates will determine the

in the Lecture Room, Household Science Building, on Wednesday, March 22, at 4:30 p.m. sharp. Perferential voting for candidates will determine the office to be held.

Nominations for each club should be signed by two voting members of the club in question and filed with the secretary of the Athletic Association, S.A.C. office, Hart House. Voting members for each club are restricted to those who have been registered with the secretary of the W.A.A. as playing members of an intramural team in that particular sport during the academic year, or who are certified by a team manager to have attended at least 50 per cent of the practices of that team; members of the Club Executive and managers of all

practices of that each, includes of the Chib.

The President or Secretary of each College or Faculty Athletic Association should make sure that the complete list of all athlets under her jurisdiction who are cligible to vote is filed with the Secretary of the University Athletic

shows a night scene with strong

dramatic overtones.

The faculty comes out ahead in the matter of quantity this year. Dr. R. G. Agnew is represented with some half-dozen easel pictures of high calibre, in varying moods. I particularly like his semi-abstract treatment of mountain subjects, one of which a colleague laughingly labelled *Yesterday's Ice Cubes*, with a minuscule mountain goat immediate foreground. portrait of the old lady is a pleasant bit of character delineation. Prof. Finch's Red Barn in gouache, is spatially neat and fairly meticulous in perspective. Prof. C. R. Young exhibits two little landscapes, in the primitive genre, reminiscent of the American Kane. Four sketches by J. Campbell are noteworthy for fresh treatment, particularly the civic sky-line as seen through a willow clump on Centre Island. Dr. E. M. Walker paints the country around Aurora with fine feeling for distance, contour and atmospheric effect. Prof. Nelson rather euphemistically calls his lush nude The Triangle of Michaelis; it is a slick bit of drawing in the pastel medium, although as a composiion it falls apart.

Dr. C. H. Best has two sea-scapes which indicate potential talent. The flat portraiture of Prof. Barker Fairley is unique; it's too bad there were not more of his. Prof. W. E. Carswell's in-dividual landscapes with flakey, stylized trees, shows a nice sense of composition, while Prof. Alford's group of Berry-Piekers has strong modelling and freedom of line,

BROCK BRACE

ART, MUSIC & DRAMA To Probe Canada's Spirit At Interfaculty Debate

The last of the Interfaculty Debate series will be held at eight o'clock tonight at Breman Hall, St. Michael's College, on the subject: Resolved that Canada should develop a national spirit. Instead of the usual parliamentary procedure, the "Senate System," complete with judges, which is generally employed by the St. Mike's debaters, will be used. So far two of the desired three judges have been chosen—Father Shook of St. Mike's and Professor Shook of St. Mike's and Professor

Shook of St. Alike's and Professor Underhill of the History Department. The speakers in the final debate are to be Catherine Bliss, St. Hilda's, Dan to be Catherine Bliss, St. Hilda's, Dan McGarity, St. Michael's and Goldwin French, Victoria, for the affirmative, and Joan McGoey, Loretto, Graham Cotter, Trinity, and Dennis Wrong, University College, for the negative.

What's On Today

C.C.F. CLUB
At eight o'clock a panel inclinding
Mrs. E. Jolliffe and Chairman Prof.
E. Havelock will conduct an exching
of "Questions on the C.C.F." in the
Junior Common Room of University College.

BIOLOGY CLUB

Don't miss the Biology Club meeting tonight at 7:30 at Wymilwood. Prof. Coventry will speak. Refreshments.

TRINITY S.C.M.
Thursday Series. Archdeacon Fotheringham will lead a discussion "The
Atonement." The meeting will be held
in the Board Room at Trinity at I p.m.

hither and yon

He looked her up and he looked her down and then he walked around her. Several times. Much embarrassed and becoming rapidly convinced that she should have taken a course in either psychiatry or jir jitzu, our driend dodged in among the coats and mirrors with most unsalesgirl-like agility. She was politely but firmly pursued. Finally she escaped up a cash tube. Comes a half-hour later and another salesgirl approaches with same curious character plus a bright new shining gabardine raincoat, size 16.

"Please, will you model this coat? This gentleman thinks you're just about his daughter's size."

"THEN WE HAVE two playful acquaintances whom we will call for convenience's sake, Willyum and Stinky. Seems that Stinky felt like putting soow.

Judges Award Decision To Supporters Of Negative In Interfaculty Debate

House Supports Motion as Arts College Representatives Debate Canada's Need for National Spirit

VOTE AFFIRMATIVE 43-27

A panel of three judges awarded the decision to the defenders of the negative side of the resolution "That Canada should develop a national spirit" in last night's interfaculty debate in Brennan Hall, St. Michael's College. The judges, Rev. L. K. Shook, Prof. F. H. Underhill and Prof. D. J. McDougall, allowed a maximum of 30 points for each debater's delivery and manner, and 70 points for the matter of the arguments.

Speaking for the affirmative were Dan McGarity, St. Mike's, Goldwin French, Vic, and Catherine Bliss, St. Hilda's; for the negative, Dennis Wrong, U.C., Joan McGoey, St. Mike's, and Graham Cotter, Trinity.

The first speaker of the affirmative contended that if a nation was defined as a people of the same race living in the same country and having identical laws and customs, that Canada could not be called a nation. Although there are two distinct races with two different types of mentality in Canada, there is such a thing as Canadian unity which has resisted strenuously the influence of foreign literature.

The Commonwealth is an example to The Commonwearth is an example to the world of co-operation of nations and of regional grouping, stated the second speaker for the affirmative, and as a member of such an organization Canada has been only a stumbling block because she has never attained effective nationalism at home.

The third speaker declared that Caandian trade has suffered because Canadians have never been encouraged to buy Canadian manufactures. Lest Canada becomes in the post-war world merely a buffer state between the U.S. and Russia she must develop an attitude religious habiting and half and the control of the con

and Russia she must develop an attitude midway between a belligerent selfishness and insipid lethargy.

Speaking for the negative, Dennis Wrong declared that social malaise and economic distress are responsible for the pathological development of Fascism and National Socialism. Although the term "national spirit" is very vague and can exist in any society if it is carried to its logical conclusion it becomes Fascism or Socialism. Concentration upon its development would divert our progress and blind the lower classes to their true good.

SPECIAL OFFER

Cards of appreciation similar to the one appearing on page 3 of to-day's Varsity will be inserted for successful candidates at the special rate of 25 cents. Anyone interested get in touch with the S.A.C. office, Hart House.

New Northland Is R.C.I. Topic

"The Opening of the New North "The Opening of the New North-west" will, be the topic of the Royal Canadian Institute lecture to be given on Saturday evening in Convocation Hall. Dr. Camsell, the speaker, holds the triple position of Deputy Minister of Mines and Resources, Ottawa, Com-missioner of the Northwest Territories, and Director of the Northwest Territories, Dr. Camsell knows this district and its problems intimately. problems intimately.

The lecture will deal with the natural risources, the future development of mining and forestry, and the agriculture, fur and tourist trade. A motion picture, entitled "North Pacific," and depicting the development which is going on in that part of Canada, will be shown.

Undergrad' Distributed In U.C. Rotunda Today

This year's first issue of The Under-Inis years nirst issue of Ine Undergraduate, University College's student magazine, will be distributed in the U.C. Rotunda today from 10:30 to 12:45, the Editor, Vernon Lang, told The Varsity last night. Copies are free on presentation of U.C. registration cards.

Printing difficulties, the editor said, ave delayed the magazine's appearance for about six weeks, but despite this he intends to go on and produce a second issue before the end of term if U.C. will support him on the venture.

"We will stick to the originally scheduled deadline of March 18 for all contributions to the second issue" he contributions to the second issue," he went on, "so the creative minds in U.C. will have to hurry up and produce."

'Artificial Canadianism."

The third speaker argued that social and economic interdependence should be the motto of the future and that Caprogress and blind the lower classes to nadans must guard against the attitude of arrogant nationalism prevalent not should grow from within the hearts of the people over a period of centuries.

To purposely foster it would be "Selling Canada to Canadians" and would necessitate a revision of our educations.

ing Canada to Canadians" and would necessitate a revision of our educational system to indoctrinate our youth with 43-27 vote in favor of the affirmative.

AGRICULTURAL MONOPOLIES TOPIC OF IOWA LECTURER

Recent theory, ne continued, has a large to the recent theory, ne continued, has a failed to distinguish between socially a co-operative system of agricultural desirable and socially undesirable industries could do a better job than is now being done in the field if there cultural industries such as the tobacco, meat packing, dairy, and other food better than the present system where products companies. "Each industry there is perfect competition.

"It is time that we economists put monopolistic theories in a clearer perspective," said Professor William H. Nicholls in the fourth of a series of lectures on monopoly problems at the Reconomics Building yesterday afternoon. Prof. Nicholls, who is a professor at the lowa State College of Agriculture and Mechanic Arts, was speaking particularly on the monopoly problems in agricultural industries.

"Recent theory," he continued, "has falled to distinguish between socially a co-operative system of agricultural as co-operative system of agricultural continued, "has

it is expected that as many will vote today before the polls close at 1:45. The halis of Vic are already plastered with election posters, These posters are many and varied, some finely executed by students in Fine Art, and other roughly done with lipstick. Most of the posters have a nicture of the of the posters have a picture of the candidate. The actual appeal to the voter is varied, ranging from the slogan type "Bob for Bob" to the simple call

type: "Bob for Bob" to the simple call
"Marg Banting for Social Directress."

On Wednesday the usual camgaign meeting was held. Each of the candidates or their sponsors was allowed two minutes to persuade the gathering of students to vote for them. However the meeting lacked the spice of the notorious Medical and School elections cines the idea was all on. With alone.

of Primary Importance in Furthering University Education

LIBERAL ARTS DEFENDED

The attitude and aims of the C.C.F. concerning universities was the first of the questions considered by Eamon Park, E. M. Davidson, Howard Brown, M.P. (substituting for Mrs. Joliffe), and John Rottenberg, members of the panel presented by the University C.C.F. Club last night. Introduced by guestchairman Professor Havelock, the query was among several submitted by mem-

bers of the gathering.
"The C.C.F. aims to make university education available to all who can assimilate it," stated Mr. Brown in giving however, trying to give a B.A. label to everyone 22 years of age, pointing out that it would be better, in that case, to

pass the entrance exams was then put forward. Mr. Brown replied that if that were to come about we should exthat were to come about we should expand the university in order to give more varied training, since everyone attending would not be able to find a suitable course. He cited as an example of co-operative education a university in Ohio where work and study are alternated in order to derive the best benefit of a higher education.

A defense of liberal arts was thrown into the discussion by Mr. Davidson and John Rottenberg. They stressed the value of the liberal arts, the former pointing out that arts as such were the basis of the education of ancient Greece, where the socialist state was first con-

since the jokes were all on a high plane, exived. The latter said that even as a The polls are open from 9:30 am, science student, he must also go to bat to 1:45 p.m. so it is hoped that all the students will exercise their franchise.

On Equal Footing

We spoke recently in this column about the increasing volume of employment now open for women university graduates, and the manner in which they are filling new jobs. We can never think long in this strain without returning to the field which ranks first in our mind, journalism. And newspaper work may be taken as a representative example of the gradual rise during the course of the past two decades of working women whose talent and determination were great enough to carve from the unknown a satisfying career. There are in newspaper circles today women who are accepted on an equal footing with the best of the men, women, moreover, whose place could not be filled by any man, so completely have they taken over the work and made it their own. In the earliest days of women in journalism, and even today in diehard offices testing their first member of the opposite sex, the hardbitten newspaperman's highest accolade was: "She writes like a man," words given grudgingly, after much convincing. And in the beginning the budding Jane Arden fought for those words and wrote her soul out to earn them. But now that women have proven themselves in this field it becomes a dubious compliment, for nowadays they can afford to write like women with no fear that such writing will not be considered good.

We cannot deny a fundamental difference between men and women, and this difference is as apparent in their writing as in anything else. Women have something to offer which the men lack, but often they must imitate men in order to gain a foothold from which to prove the worth of their own con-This was so in journalism, at least for tribution. the idealistic group who were after the heights. The famous "sob sisters" of years gone by (at least we hope they've gone by) were not of this group and traded on their femininity right from the start. They wished to prove at the outset that women could add something new to journalism and add something they did, though its calibre we wouldn't care to defend. These women made the oft repeated mistake of going all out for their sex. In their eagerness to add the woman's touch they fell over backward and wrote the men right out of their type of journalism. Writing strictly for women, they were sort of half divorced from the newspaper world and relegated to the women's page.

So it is in any field when the women enter, chip on shoulder, determined to prove it holds a place for them. Ignoring the male completely they overbalance the thing and end up perhaps a little bit farther on but still tied to a woman's world. It must be remembered that in all the years before women invaded the press the men gave us the whole news, not strictly a one-sided picture of and for the maximum of comic interest. men only. And it is the whole news we still want, whether it be man or woman serving. The wise woman, in newspaper work as in any other, will

Correspondence

More Social Science

March 2, 1944.

The Editor. The Varsity.

Dear Sir:

Your recent editorial in reply to Mr. Dixon's letter of Tuesday raises some issues which I believe deserving of further investigation.

In the first place, you infer that students in the ocial sciences in Canadian universities should be appreciative of the existing considerations granted to them by the authorities. But you attempt to prove your contention by making only one comparison-that between the Canadian situation and the American.

It is dangerous to found any argument on only one example. May I suggest, sir, that you investigate the position of the social sciences in certain other Allied countries before you again present such a rash conclusion.

Secondly, you attempt to soothe the indignation of the students of the social sciences by pointing out piously that the regulations may be amended "from time to time" — presumably in the right direction, though you wisely avoid that statement.

"The non-essential courses aren't being banned, but weeded." But what assurance have we that weeding does not precede banning? The whole trend in the last four years has been in the direction of more stringent regulations to the detriment of the social sciences, not to their benefit. The latest Selective Service decisions conform to that trend.

Apparently, the social sciences are not yet inclusive of " 'such courses as from time to time' may be deemed essential to the national interest."

It is to this point I take particular objection.

The government, it would seem, is already preparing for peace in divers ways-the rationalization of munition plants such as Nobel, for instance, the end of expansion and enlistment in the navy, the retardation of aircrew training, and the disbandment of one or two army division-not to mention the suspension of meatless Tuesday-yet, at the same time, it sees fit to tighten the restrictions on the social sciences, the courses which will train the men who by general consent will be of the very greatest value to society in the immediate post-war

In other words, Mr. Editor, if the regulations are to be amended "from time to time," this is one of times for revision. But most certainly, it is not the time to subject the social sciences to further restriction. Rather, the authorities should amend the regulations in favor of the social sciences, if dummies.' government policy is to be consistent and if we are sincere in our preparation for peace.

Yours very truly,

PAUL FOY IV. Pol. Sci. and Econs.

Dramatics

Eaton Auditorium

A certain amount of dramatic expression is natural and good in singing, but in the performance of Todd Duncan, baritone, at Eaton Auditorium last night, the expression was artificial because it did not seem to have any depth of genuine feeling not seem to have any depth of genuine feeling behind it. His voice was pleasing, although it was limited in range and was not under perfect control.

He was best in the lighter numbers where he could obtain humorous and interesting effects. The

ould obtain humorous and interesting effects. The Evening Prayer, by Moussorgsky, a little Russian boy saying his evening prayer at his nurse's knee, was a charming take-off on all little boys' prayers. Dancer, Come Up! an African Zulu Song by Wendt, concluded the first half of the program in an burst of stirring rhythm and weird harmony. In the last encore, It Ain't Necessarily So, he achieved

The last group consisted of two Spirituals, Here's One, and Walk with Me, and three selections from Gershwin's Porgy and Bess. The Spirituals were woman, in newspaper work as in any otner, will Gersnwin's Forgy and Bess. The Spirituals were first learn all that the men have learned, acquire all the knowledge and skill that men have found wall received. In the Gershwin, Duncan was necessary, and then add to the weight of this whatever there is in her soul that wants expression. Give the whole news, but give in in her own way.

Eaton's College Now A Partner In Federation

Last night, officials from the Senate of the University, the staff of the Superintendent of Buildings' office and shareholders of Eaton's College Street store met in conference in the Senate chambers of the University and drew up plans for the amalgamation Eaton's College Street into the Federa

Gilt-edge O'Reilly, The Varsity's beer-sodden court reporter, disguised himself as an Eaton's vice-president and was able to bring to our readers this ampus-rocking, word-for-word report

of the proceedings: First of all, the ehairman Senate bounces up on his hind legs and brings the meeting to order by sloshing at the table with a big oak mallet. These other characters that are on the Senate and all those 14 vice-presidents from Eaton's get up off their knees while somebody palms the dice into a furlined spitoon.

lined spitoon.

Rather pedantically the Superintendent of Buildings jumps up on the table and points a finger at a couple of these Eaton fellows and says, "We want your building in our Federation, see, and we won't take no for an answer."

A bored Board of Governors governor tears himself away from a fast game of three-dimensional oughts and crosses to say, "You get 20 per cent of the gate receipts every September and the right to hold all the campus productions in your auditorium . . . what more could ou ask?"

An Eaton's V.P. whines, "Wull, whadda we gonna teach if we join the federation? Mmm?"

A janitor who didn't really belong in the meeting counters cautiously by ask-ing, "Wull, what facilities ye got over

"We got the auditorium, a lingerie department, congoleum rug displays, a couple of floor walkers who graduated from S.P.S. in '23 and 69 window

The Senate of the University goes into

a huddle.
"Gee, fellows, they haven't much

cquipment, have they?"
"Nar, we can't really instruct in anything over there . . . do you think we could give a Doctorate of Applied Floorwalking to a fellow after going five years to Eaton's College?"
"Awww shaddap an' listen a minute

Shoplifting . . . the only one on the continent."

Obviously this met with everybody's

approval. The S.A.C. representative from Eaton's College was appointed and he set three important dates aside for the social functions of the under-graduates of the youngest Federation

"Next November 21st we'll hold a big "Next November 21st we'll hold a big risque girlies show at the College of Dentistry's big auditorium and call it Dentantics. Then in December we'll put on a big Follies production in the West Hall of U.C. It'll be crowded...

maybe they wont need the Hart House Theatre."

Theatre."

A famous Hart House towel-dispenser leaped up and screamed, "Now I can grow mushrooms down there after all...

U.C. Skates Into Finals As Army Defeated 9-0

Royal College Will Meet the Winners of Jr. School-Meds I Game in Hockey Finals Next

NEAR - RIOT QUELLED

U.C. wallopped Army 9-0 in yester-day's semi-final hockey game at the Arena to earn themselves the right to meet the winner of the Junior S.P.S.-Meds I game in the finals next week. Play was not as one-sided as the score would indicate, but U.C. outclassed the Soldiers all the way to deserve the win. Army lacked the condition of U.C.,

Solders all the way to deserve the win.

Army lacked the condition of U.C., and the men of the Royal College really showed up in the back-checking department. The last few U.C. goals were the result of Howarth being left sadly unprotected as U.C. broke right in on him on several return rushes, and it was through no fault of the goalie that the score mounted as high as it did.

U.C. put up a tight defence, and the score mounted as high as it did.

U.C. put up a tight defence, and the score mounted as high as it did.

U.C. put up a tight defence, and the score mounted as high as it did.

U.C. put up a tight defence, and the score for a veteran. Army weren't nearly as well organized as U.C., and they were slow to take advantage of the opportunities that came their way.

Skinner really deserved his shutout, which was even more brilliant than usual considering the fact that three 15-minute periods were played with time-outs all the way, instead of the usual two.

A riot, nearly broke out at the each and a should draw, on their quality about the popularity of the tam this year. The spectate bound in door base-ball and should draw, on their quality about the popularity sports question. Surely the last of the preliminaries that cannot be another Athle usual two.

usual two.

A riot nearly broke out at the end of the game as Army supporters (which as usual outnumbered U.C.'s 10 to 1) dashed out on the ice when Wade and

20 Teams Participate In Baseball Playoffs

Baseball playoffs started last Monday with 20 teams playing off from the 19 groups. S.P.S. led the field with ten teams, followed by Meds with four, St. Mike's with two, and U.C. I, Trently, Trinity and M.&P. one each. U.C. I, winners of Group I, runners-up in Group I and Junior School, winners of Group II, are the favored contestants for the Spalding Cup, presented to the intramural champions in indoor baseball, won by Dent A in three of the last four years.

ball and should draw, on their quality alone, a large and enthusiastic turnout from the students of the contesting

as usual outnumbered U.C.'s 10 to 1) dashed out on the ice when Wade and Wyse started roughing it up. Steed left the penalty box to join in the mclee, but quite a few of the players of both teams were smart enough to stay out of it and it soon quieted down. Feeling was a very irate Army Major to get back off the ice, handed out the penalties wisely, and gave an anxious Army supporter a beautiful right to the jaw. Steed got his minor increased to a major for leaving the penalty-box. Bremmer got the worst of the tiff, as Short jumped on him when he was down on the ice and proceeded to administer as many forms of assault as he could think of, and he happened to be one the refs didn't see. Hart got the gate for boarding Howson just afterwards, and that made five of them in the goal at one time.

one time.

Army had a slight edge in the play in the first period but they couldn't seem to capitalize on any of their efforts as Skinner was too good for them. Howson skated Warren off nicely near the end of the period as he was right in. Kuryluk shot a beauty to the bottom corner but Howarth seemed to do the impossible as he are highered. to do the impossible as he got his toe in the way of the shot. Givens got a hold of the puck just before the end of the period and golfed one from inside the blue-line that Howarth caught but couldn't hang on to, and it dribbled through his legs for a goal to make (Continued on page 4)

One more appearance. The Blaes are being held over for one more Saturday game, 8:30 tomorrow night in Hart House. This is definitely your last chance to see the 1944 team in action and your last chance to see many of the players in Varsity uniforms. The Navy team from down Automotive Building way, led by the intrepid Teddy Morris, are coming back in search of revenge, since they lost the first Athletic Night game with Varsity. The Salors boast a greatly improved team, now riding on the crest of a three-game winning streak. As mentioned before, this is not to be another Athletic Night. Rather this game has been scheduled so that those who so desire may see a Varsity game from a somewhat more advantageous point than the fourth row back in the gallery. Admission price will be 25 cents. There will be dancing to canned music following the basketball game.

from a somewhat more advantageous point than the fourth row back in the gallery. Admission price will be 25 cents. There will be dancing to canned music following the basketball game.

With the conclusion of the Blues' successful basketball season, we are wondering again about the university sports question. Surely there has been no doubt about the popularity of the team this year. The spectators outnumbered those of the last two seasons by a great majority. If this is the case, then let us turn our attention to other team sports. We have been criticized oceasionally because we have not shouted very loudly for the return of intercollegiate days. But such drum-beating does little good during the school year. If, flowever, we can make plans now for Varsity teams next fall we would be achieving something. We are not recommending a return to intercollegiate days, but we do think that Varsity could and should enter teams in local city leagues. In fact we are the only class University in Canada who have not done this. And if others can raise teams then surely the largest university can too.

The first thing our critics are going to raise is the public opinion bogey. Such a stand is farcial. If the University is afraid of wartime public opinion then why were two of our basketball games broadeast? The CBC earried the news of Varsity's team into thousands of homes all across Canada and since then we have heard no complaint from either press or public.

Even in the garrison town of Kingston, which frowns upon the continuance of university courses during wartime, Queen's has fielded rugby, hockey and basketball teams which have competed in city leagues which include all the Service teams in the Kingston acknowled to the large season.

Service teams in the Kingston area.

The person who thinks that Varsity would not be able to raise teams of any great quality is also dealing in utter nonsense. The performance of our basketball team has proved that. And if we can turn out a basketball team such as we have, then we can turn out hookey and rugby teams of equal ealibre.

But it seems that such a movement, if it is to be effected, must be introduced by the students. It is up to those students interested in Varsity teams to organize and discuss the possibilities of the 1944-45 season. And those who are allowed votes in the Athletic Directorate elections on March 13 might do well to inquire into the feelings of the various candidates on this subject before going to the polls.

The Sportswoman

BIRDS ON THE WING AGAIN . . .

BIRDS ON THE WING AGAIN...

Came the great news last night... burning up the wires. The fondest liopes of all badminton minded gals are to be fulfilled at the Annual Badminton Tourney about which three has been so much scepticism and mystery. Thanks to the noble efforts of Betty Allen, of Champ fame, and of Joan Snyder, Head of the Club, the birds will be flying about on the Granite Club courts next Monday, from 1:30 to 5:30 p.m. Joan tells us she is expecting, nay, counting on, 36 contestants or more to turn out for the fray. We hope to find all the faculties ably represented ... especially in view of the fact that there has been so much enthusiasm and good sportsmanship in other fields of sport. So all you badminton players ... good, bad or indifferent ... pull yourselves out of those easy chairs, dust off your racquets, and prepare for action, and a lot of fun, on Monday.

easy chairs, dust oft your racquees, and properties of much on Monday.

It is not without much trouble, earnest effort, and the expenditure of much valuable time that the Granite courts have been secured for you . . . and this means YOU. The best way we know for you to show your appreciation is purely and simply in the presence of your own sweet selves on the courts. We would like to hand out at this point compliments and thanks to those who, in the face of countless discouragements and difficulties in obtaining courts and oirds, have shown that with effort all things are possible, even Badminton Tourneys in wartime.

How to go about getting yourself into the tournament? It's not very hard.

How to go about getting yourself into the tournament? It's not very hard. Let your college badminton rep know by Friday night that you would like to be among those playing, so that the details of the match may be arranged. Those who have not as yet had a medical are asked to make their appointments at 44 Hoskin, and undergo the phylicial checkup before Saturday noon, please. This is important since you won't be allowed to play without an O.K. from the doe. If you all do your little bit, there is nothing to prevent this event from going over with a bang. Remember . . . phone your college rep . . medical checkup before Saturday noon . . turn up at the Granite Monday at 1:30 sbarp.

checkup before Saturday noon . . . turn up at the Granite Monday at 1:30 sbarp. FROM OTHER COURTS . . .

The L.M. Gym last Wednesday afternoon at 4:30 p.m. was the scene of the final struggle in Volleyball. The P.H.E. teams, I and II, fought it out between them for the laurels, which after a really hard-fought game, were handed to P.H.E. II. The score of 44-43 just goes to show what a closely matched game it was. Doris Clark and Jeanne Stinson starred for the winning team, while Murtel Finlayson and Mary McConney were the outstanding players of the opposition. Well played, P.H.E.1

Any time's SHOPPING TIME!

SUITS OF COURSE as always are SUITS OF COURSE as always are the most popular Springtime Story and Northways have a grand collection of suits and coats all ready to take you walking out to meet and compete with the first Spring crocus. They're stunningly styled right down to the hidden seams, come in the colours you've been looking for as well as good sound tweeds and checks. If you're debating along about now on the suit or coat question, take a run in to Northway's Junior Miss Department, third floor.

NOW IS THE TIME for all wise girls NOW IS THE TIME for all uses girls to rally around the stylists and agree with 'em that Spring is Here, and never mind the weather. What's weather, see? The Evongeline Shops are very hondy at supplying the sort of items that make a costume talk Spring without losing any of its wormth and comfort, such forwardlooking items as snave new hondogs, gloves to hand out sophistication to your entire ensemble (they we handbags, gloves to hand out sophistica-tion to your entire ensemble (they've been specialists in the better type of gloves since you wore bootees, little girl), they also have a smooth line at slacks and in rayons and flamel, and the up-and-comingest collection of career blowses sur've run into.

NEWS of the Fashion Floor at Simpson's as seen in February's Vogue and echoed at Simpson's. This is a Spring of diversity in color; no one color is 'way out in the lead at this particular time, and in their window displays they are playing up Red, Black and White because so much can be accomplished with this smart color trio. Have a red suit and top it with a black-and-white coat—have a red dress and throw a black chesterfield coat across the shoulders. Red hats are eye catchers and have a happy faculty of going with practically every thing. White accessories are always flatterers, black ones are dressy. So Simpson's give you Red, Black and White; make your own color plan, be original.

NOTHING IS MORE feminine or as sweet looking on any young thing than a crisp white blouse. Wear with or was good, but here especially his acting without your jacket, it will odd a little more to the perfection of an outfit, whatever the type of snit. With a good sweater so hard to get these days a blouse will be the making of you. There are so many different styles to choose from at Fairweathers (some with the neck, some with buttons to the neck, some with buttons to the neck, some with buttons to the neck and still others fastened at known. NOTHING IS MORE feminine or as new low neeks, some wath buttons to the neek, and still others fastened at the back with perhaps a little bow in front). Even with all the ruffles they are styled to be easily laundered, and look always as fresh as new. Fair-weathers have some really ground blonzes, so if you're near there run in and take a look at them.

J. C. Evans, Capt. & Adjutant, 2nd Mn. U. of T. Cont. C.O.T.C.

(Continued from page 3)

Nesbitt shot from centre shortly after the second period got underway and Graham came coasting in to pounce on Grainal taine existing its optimized to clear and shot it along the ice into the bottom corner to make it 2-0 at 1.25. Givens put in his second goal from Warren and Wade at the 4-minute mark from a scramble around the Army net. Warren had a nice chance but he waited too long to shoot. Army tried hard to keep the pressure turned on but U.C., playing a tight zone defence, were breaking it up and getting too many rushes away. Nesbitt hit the post with a shot from close in, and Brenner picked up a penalty for high-sticking with Maize. Nesbitt broke away but Howarth made a beautiful sawe with Graham standing over him waiting for a rebound. Then Givens got his third the rebound as Howarth tried to clear a rebound. Then Givens got his third goal on passes from Bremner and War-ren at 14.05 to make it 4-0 for U.C. as

known.

The piano accompaniment of William Allen was good. He played most of it without music.

**Act of offeting but and the probably go unappreciated by most readers who will be disinterested in its theme.

**Act of offeting but and the probably go unappreciated by most readers who will be disinterested in its theme.

**Act of offeting but and the prob centred to Warren but Warren missed the pass. Then Warren gave Bremner a lovely setup pass and Bremner made no mistake as he sunk it at 9.40. Graham got one at 12.10 from Nesbitt. Steed went off for tripping Graham and while he was off Furry and Hart combined to get it out to Graham who picked the corner for another one. Warren got another for U.C. from Bremner and Givens and then did it again, this time from Wade and Givens to make it 9.0. Then the riot broke out, and when the smoke cleared, time had run out on a battling Army team.

The Varsity Reviews Acta Victoriana

The fourth and February number of Acta Victoriana arrived in The Varsity office last week in a white on black cover which contains a well rounded issue of poetry, fiction and prose.... We think this is Acta's best issue of the vector.

year! In an attempt to defend the present In an attempt to defend the present lack of fiction in undergraduate publications, the editorial presents an explanation which, though well written, leaves loopholes for argument. We question whether radicalism is the essence of University thought in general, and whether writing good fiction is a conservative art.

and whether writing good fiction is a conservative art.

The poetry section of the magazine has a variety which is sometimes lacking in undergraduate publications. However some poems fall into the category of high-school-magazine-calibre, and seem unworthy of a college monthly.

Mosaic on a Straight Line by Fran Zieman has an intriguing quality. The last line lingers: and we keep turning back to it again. There is a depth of feeling and symbolism in the poem which will appeal to those who would interpret modern poetry. Perhaps for some readers the poem may seem too obscure.

The Forest by Margaret Gould reminds us somewhat of a Disney film. The images are fanciful and the them of the poem is skilfully handled. It reflects both originality and a subtle It reflects both originality and a subtle understanding. We admit that good description and colorful images, have their place in poetry, but without an interpretation or an idea, they tend to become were words without meaning. Aubade and Sunset, December, though

Anhade and Sinuset, December, though lyrical lines and soft sounding, seem rather a jumble of words which for the uninitiated might have been punctuated. Nicholas Vaar is on old thought with a new twist. It's well done and has a charm of its own. . . Cryptic and appealing is the familiar scene of John E. Speers' A Man's Reach:
"Blatantly on Bloor Street
Men and women bicker
For stations of pre-eminence
Lining up for liquor."
Uning the familiar is not lacking in this issue of Acto. . An

lacking in this issue of Acto. . . An essay by Paul W. Fox on Canada and the Pan American Union provides interesting reading in a type of article which certainly has its place in an undergraduate magazine. . . . Fautasy in English Prose Fiction, an essay by Delza Lakey and winner of the Lincoln G. Hutton Prize, lends a true literary

Dison by Margaret Gould is a convinc-ing character, and we're certain that most readers will have met her in real life. Marion, in contrast to Miss Dixon, does not seem real. The situation in which she is introduced and through which Miss Dixon's selfish complacency is portrayed might have been handled in a more convincing manner. Margaret Gould writes well, but we do not think this truth. this study measures up to her usually skilfull management of plot and character. . . . It is not because we wish to discourage a contributor's first appearance in Acta, but because we believe that the time used in writing Day Is Done could have been better spent on another theme which might have pro-duced a piece of worth while prose. This plot is hackneyed; it is overdone and overwritten. There are passages of good writing in the story, but they are hidden between paragraphs of

unfortunate melodrama. untortunate melodrama.

The Art, Music and Drama department this month publishes something which is neither art, music or drama.

Chronicles of a Concert-Goer is hardly worthy of Acta or its author. We think diaries are mean things to pull on understanding the contraction. undergraduates!

Four book reviews, well written, fill the last pages of Acta . . . with the exception of unattractive but essential ads. ... Despite eritical comments, we think Acto's staff and contributors are doing a creditable job of publishing six issues of a college monthly in the course of one academic year. . . . We're looking forward to the March issue.

High Scoring by Scott and Gibson Holds Early Varsity Lead Over H. M. C. S. York

FINAL SCORE: 37 - 33

By Phil Shackleton

The Navy basketball team from H.M.C.S. York came back for revenge Saturday night. But they went away without it. In fact they retired from the floor after the Blues had measured out a 37-33 defeat for them. It was a first half win for Varsity as they took a seven-point lead during the first 20 minutes and then settled to hold Navy to a fairly even score in the second half.

The first half was really slow and the very small crowd found little to shout about. MacMakon of Navy opened scoring with a foul shot after two minutes of play, but Joe Ryan sent home a basket a few seconds later to give Varsity a scoring edge which was not lost again. A great many shots from both teams went far wide and the score was kept at a surprisingly low level. Half time score was 16-9. Stu Scott led the Varsity attack during the half, and incidentally also the scoring, while Bertrum held up the Navy's end with some sure-shot flips which marked him as on of the payoff boys of the

But the Navy took over in the last half. From a half time score of 16-9 the score was changed to 29-25 at the ten-minute mark. Garner, Murphy, Bertrum and O'Gradnick turned on a power play during those ten minutes to outscore their opponents by a wide margin. Murphy and Garner, in fact, accounted for all their scoring during that part of the game.

Toward the mid-point of the period Toward the mid-point of the period the power drive petered off as the Varsity defence broke up the Navy attack. Then came a deadlock with no scoring by either team for over five minutes of play. But the Varsity players were the first to break the jinx and Scott and Gibson broke through several times to put Varsity's score in a safe position. Actually the Navy outscored Varsity 22-21 during the second half.

Stu Scott was Varsity's potent man as he went through for 12 points in all. Gibson scored six, all in the second

Gibson scored six, all in the second half, and Booth scored five. Clayton, Tettmar and Ryan each accounted for four while Spooner scored two. For the York team Bertrum was top man (Continued on page 3)

Last Vic Debate Bernard Pares

Alumni Hall, Victoria College.

The topic will be "Kesolved, that the Curzon line should be the eastern boundary of Poland!" The affirmative will be supported by Ken Brown and Muriel Brown, while the negative will be upheld by Dorothy Clark, and Stefan Stykolt, who left Poland in 1939.

Professor Edgar McInnis of the History Department, who has been invited to attend as a special speaker, will contribute to the discussion.

In explaining that the last session of the Vic Parliament would not feature the traditional professorial debate, Prime Minister Glenn Tennant said, "It is indeed disappointing for my executive and I as well as the student body that a professorial debate did not materialize. Due to the pressure of student opinion, I feel I shall have to give a complete explanation of this failure when the House assembles on Tuesday night."

The last session will be followed by refreshments served at Wymilwood to all who speak 16 words or more.

Dr. Acres Outlines Shipshaw Project

The development of one of Canada's largest wartime projects, the Shipshaw hydro electric project was outlined Thursday in an address by Dr. H. G. Acres to a combined meeting of the American Institute of Electrical Engineers and the Engineering Institute of Canada in the Mining Building.

Speaking first of the three different esigns submitted for the construction f the Shipshaw project, Dr. Acres described each, pointing out in the first two, where the design was impractical. After describing the third and accepted design, Dr. Acres noted that a lack of earth moving equipment necessitated large-scale modifications of the plan. This left a design of five concrete dams and a direct rock cut water channel. which was followed to completion.

Dr. Acres mentioned that the pos-sibilities of bombing attack and earth-quake were incorporated in the final design.

In a detailed discussion of the design features of the project, Dr. Acres followed the construction of each unit, from the flow control gates at the head of the channel to the power house on the Saguenay River. Illustrating his the Saguenay River. Illustrating his entire lecture with slides, he pictured and described the building of most of

the units from start to completion.

Dr. Acres stated that the Shipshaw operates with a gross head of from 208 to 210 feet, producing over one million norsepower. It represents one of the greatest efforts of Canadian construction ecomplished to date.

Mulock House Host to Noted Patron: Sir William Entertains Coeds at Tea

By Mary Murdison

"Where are the girls?" was the query by Sir William Mulock as he entered the Common Room of Mulock House, Whitney Hall, Friday afternoon on the cocasion of his traditional annual visit gift of silver-nickel plaques, bearing his to his namesake residence. The question was fully answered during the tea, when so many of them were presented.

After refreshments had been passed. Level was 98 years old, and, as he is put by Sir William Mulock as he entered the first memento of this kind, but two of us."

**He asked one of the girls in Classics on the min Hutton House two years as what she was reading, and stated his drawing them in Hutton House two years as what she was reading, and stated his drawing them in Hutton House two years are.

After refreshments had been passed. It has said. tion was fully answered during the tea, when so many of them were presented and talked to him.

and talked to him.

Despite the heavy snow, he had walked from his car, on Hoskin Ave, into the House, and there, from 4:00 to 5:30 he entertained all the girls of the college residence with his sharp reparter and intimate comments on the various subjects brought forward. The most striking feature about Sir William seems to be his almost unbelievable scope of knowledge, interest, and acquaintances. No student could mendion a "hometown" too small, or a subject too obscure, to escape his ready recognition, and often slyly humorous observation.

After refreshments had been passed, he recited by request the following limerick with a twinkle in his eyes: "A canny Scotch youth from Pitlocherie,
Kissed an up-to-date girl in a rockery,
When he tasted the paint,
He said, 'Lassie, this ain't

A real kiss at all, it's a mockery'."

Of the war, he said that last year he had thought that it might end then, but this year he was not so sure. "Those Germans are hard fighters," he re-marked. He also commented on "the wonderful work of the Red Cross." He

he said.

Every scholar is interested in classics, he said.

So he chatted with each of the girls individually, now and again addressing the whole group, until it was time for his departure. Then came a surprise, for bis chaufteur, determined that Sir William should not have to repeat his first tiring walk, and undanuted by the high fence around the Hall, drove the car boldly around through one of the lanes from St. George Street to the sidewalk by University College, proceeded down the walk, and parked it outside the entrance to the quadrangle. Before he left, Sir William again turned to us all, saying, "These are the happiest years you will ever have, girls Take care of your health, of all things."

Then, after a frantic stampede of girls

wonderful work of the Red Cross." He ject too obscure, to escape his ready recognition, and often slyly humorous chaservation.

Asked what he thought of girls entering law, he retorted, "A nuisance," but added that he didn't mean that women should stay at home, but that their voices weren't suited to a court-room. He observed to this reporter that he has noticed no marked change them year after year, but "likes them in the college girls, as he had visited them year after year, but "likes them all."

Wonderful work of the Red Cross." He wave the girls a thrill of pride in Canada, when, from the summit of his long experience, he observed that she nade not one of the world powers. At a loss for conversation probably the only time during his visit, when talking to one of the girls, he interjected, if and "Goodbye, and thank you, Sir Will-liking to one of the girls, he interjected, if and "Goodbye, and thank you, Sir Will-liking to one of the girls, he interjected, if any of "Goodbye, and thank you, Sir Will-liking to one of the girls, he interjected, if any of "Goodbye, and thank you, Sir Will-liking to one of the girls, he interjected, if any of "Goodbye, and thank you, Sir Will-liking," he walked slowly to his car, vear girls be said, "Now you'll know en in June," referring to their coming of pedestrians on the walk, leaving bespect to the summer with him at his home har Newmarket, he informed us that imirers, now fast friends.

The Social Sciences

The time has come for The Varsity to make itself clear on the subject of the social sciences, much under discussion of late in both the editorial and correspondence columns of the paper. We feel, however, that the necessity for explanation arises more out of perverse misinterpretation by our correspondents than our own sometimes obscure phraseology.

from Rhys Dixon and Paul Fox, both of Fourth mail. That they sometimes do not impress him too Year Political Science and Economics. It is to Fox's letter of March 2 that we would chiefly like to refer now. We are accused of trying to make social science students happier by pointing out the more drastic policies undertaken in the United States when we were actually only speaking of the general subject of students in wartime, following more or less the form set by Dixon in his letter. "First things first" is a sensible rule to follow and the matter of the more general interest has precedence in a newspaper. Much later in the opening editorial we mentioned the social sciences and not without sympathy for their position. We wished to point out, chiefly, that in the broader field liberal humanism had not failed in its task as Dixon suggested.

Our remarks on the provision for amendment of the government list of essential courses were not intended to "soothe the indignation of the students of the social sciences" but were meant to bring to the notice of the indignant the fact that revision is possible. It is not probable that much can be done at the present time, but, judging from previous years, we may expect that there will be further discussion between college heads and government officials in the spring. Fox things that "this is one of the times for revision." Whether National Selective Service can be persuaded of that fact or not this is the time for social science students to start to work toward a revision in favor of the course which they consider so important. Selective Service workers in conjunction with an advisory body of university heads; these heads cannot refuse to give ear to the respectful and well-prepared resolutions of their students. There is a way to approach the supposedly power-mad bureaucracy and there is a precedent for this approach in last year's Staff-Student Conference and others of a similar type carried out on other

The arguments of the supporters of the social sciences seem sound. There is obviously more than an adequate nucleus for their case. If interested students will meet together and prepare their brief The Varsity will do all it can to present it to the larger and less keenly interested body of students until the end of our publishing schedule. There are, however, only five more Varsities after this one and last three will be exceptionally crowded, therefore the social science students must increase the tempo of their action to surpass that indicated by the lapse of nine days between the publication of the letter designating essential courses and the writing of the Dixon letter.

Ottawa Calling

A Canadian University Press Feature By Neil MacDonald

THE CIVIL SERVICE

The Civil Service of Canada is the biggest business of this country. Late figures on its total are un-available, but almost a year ago, it stood at more than 124,000 employees. In peacetime, the Civil Service provides the thread of continuity through changes in ministers, cabinets, and even parties; during a war, the responsibility devolves on it of executing the will of the inner war cabinet, and at times even of moulding the will of that cabinet.

As the Administrative arm of the Canadian government, the Civil Service has absolute power to carry out the will of the Canadian people as reflected in the laws and regulations of its elected repre sentatives. The paid experts who interpret and apply the regulations of parliament are a fine group of individuals, generally intelligent and, practically without exception, hearteningly sincere.

The heirarchy starts off at the top with these experts, Deputy Ministers, their Assistants, and the heads of branches within the departments. Most of these men are earning no more than a third or a quarter of what they might in private industry, and they are forced to put up with criticism and regulations which must be heartbreaking. They carry out

their duties as their contribution to Canadian life.

At the bottom of the scale are the "junior employees," young girls who work as typists, sten-ographers and clerks. Their work is of a duller, more routine nature, of course, but, as many writers and speakers have pointed out, \$60 a month, less deductions is inadequate compensation for anyone ng in wartime Ottawa

The middle of the Civil Service pyramid is made up of the host of intermediate employees, men and women in the \$2,000-3,000 class. These are subdivided, sharply, between the "permanents" and "temporaries," and all the temporaries are not in wartime jobs. These are the people who come in We refer, of course, to the letter we have received contact with the Canadian citizen, personally or by favorably is common knowledge.

Just now, the Civil Service is leavened by an influx of young people who have entered it to take wartime positions. There is a good deal of hard feeling between these wartime employees and the peacetime permanents, who have a reputation of being old, bureaucratic, and very stuffy. That reputation has just enough foundation in fact to make it damning.

Working in the Civil Service permanently, however, is likely to cultivate that bureaucratic mind which refuses to accept any new idea. You have your own little bit of work to do; you wade through its dullness; who will condemn you therefore for your failure to develop mucb enthusiasm about it?

Such indifference is further cultivated by the almost complete compartmentation of one government department from all others. There is an immense duplication of energy-and a goodly waste of paperby two or three departments allowing their work to overlap. Reform is apparently impossible, unless all departments can be thoroughly vacuum cleaned.

A good many cases are on record of Civil Servants who have been employed by their country for upwards of 50 years. After so many years of exposure to the withering blight, it is natural that many of them should be dessicated.

Distinction

Emmanuel Musicale

At their last Musicale of the season, Emmanuelites, in lieu of the promised Eric Tredwell, heard two talented members of the Conservatory faculty in recital. Miss Freda Antrobus, lyric soprano, sang a Handel aria, Art thou troubled? in graceful declamatory style, following it with two bergerettes,
Manan, ditesmoi! and Jeune Fillette of piquant nterpretation. Frederick Sylvester at the piano, provided a subdued and gracious background.

Miss Dorothy Johnson, pianist of the Calvante Trio, made much moment of Bach's Fantasie and Fugue in G Minor, considering the limitations of the instrument; she enunciated the lively fugal pattern

Down in the earthern cavern beneath the Biology Building, among the dust, the wreckage, the twisted steam-pipes, McGeech classes upon his arch-enemy "Q" for the last tilanic duel...

CHAPTER FOURTEEN

CHAPTER FOUNTEN
"Very well, 'Q'," came the crisp, controlled accents of the Terror of the Underworld, "what shall it be?"
"Make it," returned the cringing villain, "make it steam-shovels at 20 paces."
"A final stroke worthy of your devillish ingenuity, arch-fiend," returned McGeech. "But I flatter myself I can manage a steam-shovel as well as the manage a steam-shovel as well as the next man. Steam-shovels let it be—and to the death."

and to the death."

Two monster bulldozers, left behind by the C.O.T.C. sapper section in their precipitate retreat, loomed gaunt and hideous in a corner of the eerie cavern. To their controls the two deullist leaped, and in an instant they had gotten up steam and poised the monster buckets,

waiting for the signal to commence.

McGeech, with the characteristic courtesy of a pillar of the Sanskrit and Window-washing Department, accorded window-wasning Department, accorded his rival the first shot. The arch-fend scooped up a mighty bucketful of earth and showered it upon his adversary. Then McGeech retaliated, and the cab wherein "Q" sat was buried to the windows is a caseade of rubble.

After that the showers came thick and fast. The metal monsters wheezed and chugged, the small stones pattered in showers, earth thundered in enormous showers, earth thundered in enormous loads on either adversary, and soon it became plain to McGeech that his life depended on the roof of his cab. When finally the roof sheltering one of the duellists collapsed beneath the ponderous weight of rubble heaped upon it then out of the duellist.

it, then out of that duellist life would be crushed. Full of these thoughts, Mc-

be crushed. Full of these thoughts, Mc-Geech redoubled his efforts.

And at that instant his machine chocked, chugged and stopped.

Then indeed McGeech knew why "Q" had been so anxous for a duel with steam-shovels; the machine he himself wielded had been doomed from the start—the throughe-pin1
Should he climb out now, and chal-

lenge the arch-fiend to end it with bare

Then he saw something else. The earth that lay between them was ex-hausted. They had reach bed rock. And the stuff that "Q" was heaping on him now came from the wall of the cavern,

now came from the wall of the cavern, which of any moment might collapse. Perhaps it would collapse only on "Q." Perhaps they would both be buried alive. But "Q" would not escape. The chance that McGeech himself would escape was infinitesimal; but at worth the commence of the commence any rate his enemy would not. Then Mc-Geech knew that his most splendid hour had come. He had the master-criminal of the world at bay. What was his

of the world at bay. What was his own life in comparison with such a prize? He resolved to wait for doom. And "Q" dug on, madness in his eyes, heaping tons of rubble upon the now stopped and helpless steam-shovel of McGeech, but at every scoop weakening the shifting wall on which his own life deepneds. ife depended...

In the morning the world rubbed it: (Continued on page 4)

immortal lyric set by an anonymous Elizabethan composer, sung unaccompanied. Another noteworthy item was The Birds, Benjamin Britten's sympathetic setting of one of Hillaire Belloc's wonderful little poems for children. Take me to a Green Isle, by Canadian composer Walter MacNutt, displayed a Johnson gave a sensitive reading of Chopin's C-Sharp Minor Nocture, and with fine bravura did Moszkowski's Waltz in E Major.

Blonde Miss Antrobus returned with a group of English art songs, highlight of which was Have your seen but a Whyte Lilie grow? Ben Jonson's

Tid-bits from the College Papers

We've seen a lot ol publicity stunts on this campus but the payoff comes to-morrow night when a group of athletic directors get down on their knees to puts peanuts across the floor of the big gym in Hart House, and all this just to augment the take of magazines-for-the-troops at the last Athletic Night of the session.

Why aren't the present students taking up ping-pong or other minor sports? Do we hear "No timel too much military training!" Well, if anybody is wholly substituting military training for sports is medded for the purposes of recreation and entertainment just as much in times of war as in McGiff Dath

Meds Edged, 5-4 Cheaking/ By Jr. School

Last-Minute Score Gives Game to School After Fast-Skating Match: McDonough Stars in S.P.S. Goal

MEDS PUT UP STIFF FIGHT

The powerful Med. I hockey aggregation faded from the interfaculty picture Friday as they were shaded by a speedier team from Jr. School. Final score was 5-4 with the winning tally coming when there were only 15 seconds with the transfer. left in the game.

The game was a real thriller all the The game was a real thriller all the way with neither team holding an edge on the play. In the first period play went back and forth at a dizzy pace and territorial rights were equally divided. School seemed to be tired at the start of the second frame and faded badly to let the Medsmen monopolize the play. McDonough in the School nets was the vital factor as he held Meds to two goals to keep his team in the fight. School managed to net one tally on one of their infrequent rushes and the score sheet read 4-4 as the teams entered the

weller netted the first Meds tally on pass from Callaghan; the shot was one of the loveliest drives ever seen at Varsity, a bullet drive from 15 feet out Varsity, a bullet drive from 15 feet out that sailed past McDonough like a shell from a 25-pounder. Grout of Meds got the only penalty of the period at 11.10 for tripping, the only Meds penalty of the game. School was unable to cash in on their advantage and play rushed back and forth until 14.50 when Cole took a pass from Crassweller to make it 3-2. it 3-2.

Crassweller opened the scoring in the second period when he took a pass from Laidlaw at 2:01 to tie the score at 3-3. Sabiston came back for School at 3.35 to dump the puck back of Bryans on a solo rush. Meds pressed for the balance solo rush. Meds pressed for the balance of the period and capitalized on the advantage they gained when Bain went off for charging at 9.05, McIntyre from Group and Crassweller at 9.31 being the scoring play. School put a desperate defence featured by McDonough in goal to hold Meds off the score sheet for the ract of the frame. the rest of the frame.

sheet read 4-4 as the teams entered the third session.

At the start of the third School looked like a beaten team but after the first two minutes they came back in a fine exhibition of determination and guts to outfight the Meds team and hold the balance of power.

School took what appeared to be a commanding lead in the opening stanza as Andison opened the scoring at 8.30 to be followed at 8.53 by Bradford from Wilson and at 9.19 by Wilson from Andison. Meds woke up after this comburst and rallied to the support of their faultring goalie who seemed dazed

Time Marches On--

Have you held your elections for next year's officers?

Ail University, Coilege and Facuity Organizations appearing in the Students' Handhook are requested to submit to the Students' Administrative Council office a list of next year's officers with their telephone numbers, as soon as their elections have taken place.

Students' Handbook 1944=1945

By Bill Sinclair

Once more the time has rolled around for the hockey finals and this afternoon Junior School and U.C. I face off in the first of two games to decide the ownership of the "Mulock Cup of Hockey," better known as the Jennings' Trophy. In comparison to the gridiron liquid container it may appear small in size, but the battle for its possession has been as quiet and peaceful as a Saturday afternoon on the Anzio Leaghhead.

container it may appear small in size, but the battle for its possession has been as quiet and peaceful as a Saturday afternoon on the Anzio beachhead.

Both teams show up as well-balanced aggregations after the season's play and it is very hard to choose between them, but U.C. are given a slight edge by virtue of their heavier line-up and it is certain that the boys from the Royal College will be in there giving everything they've got, for in all the 44 years of competition for the Jennings' Cup U.C. has never managed to win it. S.P.S., Vic and Dents have each held the Trophy 12 times with Trinity winning thrice, St. Mike's and Meds twice and McMaster once (1900-1900 before the college moved to Hamilton).

Junior School looked very impressive on Friday as they edged but a favored Meds team and if they go in the same fashion today may well pull another upset. They have held the Cup for the past three years and don't intend to part from it without a real scrap. Beaten only once during the regular season, they have rolled up an impressive record in goals scored, once netting 14 goals in 30 minutes, and have only been extended to their limit on one oceasion. Featuring a well balanced, speedy front wall, a rugged defence and superlative goal-tending, they will be hard to beat.

U.C. intends to go all out to beat that long standing Jinx and bring the Jennings' Cup to the Royal College for the first time, this year, and, if their season's play is any indication of things to come, they should do it. In A-1 shape after the pounding they gave Army on Thursday, the boys are raring to go and it will take really outstanding team to stop them. The U.C. attack is built on power and punch rather than speed or style and so far this season has crushed many a less durable rival by sheer force.

Both teams are capable of roughing it up or occasion and the games should be real battles all the way with the team possessing the most staying power winning out. If School can outplay the U.C. defence they should win, for their net-mindi

YEA, SCHOOLI

No, I didn't stand on the corner of Bloor and St. George Sts. and whisper the magic formular—but Betsy nabbed me just the same, so here's what I know about women in sports.

A few days ago history was made in women's sports at U. of T. and to date I've heard no brass bands or cheering crowds. This is the stary.

A few days ago history was made in women's sports at U. of T. and to date I've heard no brass bands or cheering crowds. This is the story.

The girls of School have entered the realm of sport and are there to stay. It all starter several months ago at one of the regular weekly noon-time gatherings of those 18 females from S.P.S. At that time, Irene Gold successfully agitated for a girls' swimming team and automatically became the captain and manager of that team. The team was composed of the three splash enthusiasts, Sally MacDonald, Irene Gold and Mary Inrey. Where, and how much they practiced is a team secret, but with neither fanfare nor rooting section, the S.P.S. girls' swimming team entered competition for the first time on Feb. 23 and again on Feb. 26. No, they didn't place or show, but the team spirit was in there fighting. In fact, one girl swam so hard that she fainted from the exertion.

Not content with a swimming team, the girls from School decided to enter a team in the inter-faculty bowling competition. The four girls on that team, Prudie Reed, Marsha Lamont, Joan Robinson and Irene Gold, did some plain and fancy bowling on the afternoon of Feb. 28, earning second place in the team competition and first place for individual high score. That high score, an average of 176, was bowled by Irene Gold, the spark plug of the team.

When interviewed, the girls expressed appreciation of S.P.S. support and made bright prediction for the future. One girl told me, "We only just started this year—next year we'll wow 'em.' And another girl soberly noted, "Next year it's going to be much better—the girls will get into a lot more sports." And they mean it.

There is the story, and the girls deserve praise for their effort and spirit. Maybe they can't demolish 40 beers (or then again maybe they can'), but those girls are engineers and they red oing their best for School.

The only other thing I know about women's sports concerns a

School.

The only other thing I know about women's sports concerns a crap game in one of the women's residences—but I'm told that this story is taboo. Just in passing—they're sharks men—s'fact. And now, pardon me, folks, while I hitch up my barrel and hike for home.

Is R.C.I. Topic

U.A. Party Wins In Wycliffe Lit

Campaigning under the slogan "Ac-tion speaks louder than words," the United Action party rode to victory Friday over the Wycliffe Progressives in the annual Wycliffe Literary Society elections. The election climaxed one of the closest and most hotly-contested

campaigns in recent years.

G.M. Doolan, of Winnipeg, leader of the winning party, is the new prime minister. Other members of the new cabinet arc: minister of justice, J. T. Hooton; minister of education, M. J. Walsh; minister of foreign affairs, Carl Kaufman; secretary of state, H. Bal-four; keeper of the seal, R. F. Stack-house; and minister of internal affairs, H. Donaldson. W. Adams and F. Roberts are the new government whip:

Chicago B.A. Plan Rejected by U.C.

The motion that the University of Toronto should adopt a three-year B.A. eourse on the University of Chicago plan was decisively defeated at last Friday's session of the Nniversity College Parliament. Following the session, the last of the 1943-44 season, the parliament

as prorogued.

Speakers supporting the motion were Prime Minister Ralph Shephred and Hon. Carl Herman. Shepherd main-tained that the plan was aimed at rectifying the basic faults in our educational curriculum, and the course was designed to produce serious-minded students and well-integrated personalities. He also integrated personalities. He also pointed out some of the technical features of the course

Leader of the Opposition Ben Oren-stein took the stand that the interests

1922-6

TOOK FORM

ABOUT 1922 came the dawn of a great new era in communications and entertainment. Suddenly the public awakened to the great new possibilities of radio. In just a few months, radio hecame a part of everyday life.

The Canadian Nickel industry, with its mines and plants still partially idle because of loss of wartime markets in 1918, saw an opportunity to find new markets for Canadian Nickel in the growing radio industry.

Soon Canadian Nickel was playing an unseen but vital part in millions of radio tubes and other parts of broadcasting and receiving sets

throughout the world. Another step had been taken in rebuilding the markets for Canadian Nickel beyond their wartime peaks.

Today Canadian Nickel is again devoted to war purposes and again the industry looks to the future with confidence. Plans are ready to develop and expand old and new peacetime markets, so that the Nickel industry may continue, through its own initiative and enterprise, to make still greater contributions to Canada's welfare.

Floor Show Features Therapists At-Home

The Occupational and Physiotherapy faculties held their annual At-Home at the Club Top Hat on Friday evening and some 300 students and graduates were present. At intermission a floor show was presented by the students. Miss Enid Tompson, O.T., was the vocalist, and a combined chorus of O.T.'s and P.T.'s entertained the audience. The members of the chorus then measured the legs of their escorts to Leader of the Opposition Ben Urenstein took the stand that the interests of the youth of 15 are not those of the University student who is ready for mature study; also that the life experience of the scholar who has completed two years only of secondary show was presented by the students and this is equally as important as education.

The plan is perhaps a good thing in Chrisgo, said Dave Bairstow, speaking for the opposition, but our educational for the opposition, but our educational system here is on a different level, By introducing the course here, we would be merely giving a B.A. degree for what is approximately a secondary-school education.

The plan is perhaps a good thing in many the through the students of the composition, but our educational the winner of the toy lamb was Jack laws the respective of the R.C.A.M.C. who was the measured the legs of their escorts to find the man with the smallest calf and the winner of the toy lamb was Jack laws the respective of the R.C. A.M.C. who was law approximately a secondary-school education.

The plan is perhaps a good thing in an addition to the serving of a dancing in addition to the serving of the response show was presented by the students. There will be games, singing and dancing in addition to the serving of the response and chief, stated that it promises to the the set VC.F. propagand chief, stated that it promises to the the wisting orchestra, Coleman Hawkins. The reception line, composed of Dr. and Mrs. W. J. Dunlop, Dr. and Mrs. W. J. Gardiner, Miss Pollard, Mrs. P. Le. Vesconte, Miss Donlow Miss. Developed the guests.

The plan is perhaps a good thing in the collection of the control of the control of the control of the collection of the surface of the collection of the collection of the surface of the

COLLEGE IN PRISON CAMPS VICTORIA I.S.S. DRIVE AIM

By Betty-June McKensie

By Betty-June McKenzie

Anne Reid was handing out pages of information concerning the International Student Service drive up in Victoria College's main hall yesterday. The people clustered around her were nodding as she talked.

"And you tell them all this, you see.

"We've got to get this Vic College drive across now."

Anne was referring to the material in the three-page pamphlet she was waving around. "What the International Student Service Is, Does, and Needs," it (Continued on page 4)

was Kews Editor in 1938 and later worked on the Toronto Daily Star as Avlation Editor before going on active service with the R.C.A.F. He was relearning, the use verone soundhand and prison and the very service with the R.C.A.F. He was recanadian and British students in these internment camps are supplied with educational facilities by the World Student Relief committee's office in Geneva.

To make sure that the boys are getting the books a system has been arranged around. "What the International Student Service Is, Does, and Needs," it (Continued on page 4)

George M. Elliott (left) and W. Hugh Kenner (right) were appointed yesterday to edit the two major Students' Adminstrative Council Publications for the coming year. Elliott will edit The Varsity, the Undergraduate Daily, and Kenner will be the new editor of the yearbook, Torontomensis,

Editors Appointed

Year Ago Cub Reporter, George Elliott To Edit Varsity; Hugh Kenner Proposes Streamlined Yearbook.

of the times she was named to succeed be practical and undoubtedly will calliott should unforeseen events prevent his taking the post next fall.

This new appointment caps a career on The Varsity which began last year out the Varsity which began last year as a cub reporter. Elliott soon qualified as a night editor and was fully responsible for two issues of the paper as a Freshman. This year he started out as assistant News Editor; but when Harriet Leigh-Mallory retired from the Feature Editorship to devote her full time to her work as Editorship to Feature Editorship to devote her full time to her work as Editor-in-Chief of Torontonensis he was promoted to that position. There he carried on the work of organizing that department begun by Miss Leigh-Mallory under-whose editorship it had been expanded. Elliott is also Undergraduate Editor of The Halveweit of Toronto Manthly The University of Toronto Monthly.

The University of Toronto Monthly.

When asked concerning plans for the coming year Elliott remarked that definite promises could not be made six months before the start of the publication schedule. "We shall strive for as possible," he said. "The Varsity's constitutional function is the reporting of news." He continued to say, "Although we shall keep our responsibility of interpreting the campus accurately and favorably to the outside world, the! favorably to the outside world, the lighter side of college life will not be neglected."

Elliott was born in London, Ont., on Elliott was born in London, Ont., on July 4, 1923 into a journalistic family. His father, T. R. Elliott, started work as a cub reporter on the London Free Press and has held editorial positions on that paper and the London Advertiser. He is now Public Relations Director for General Motors of Canada, Limited. Corons Elliott was preceded on The George Elliott was preceded on The Varsity by his older brother Doug, who was News Editor in 1938 and later

George M. Elliott, 20-year-old Pass
Course Junior, was appointed EditorinChief of The Varsity, The Undergraduate Newspaper, for the 1944-45
Torontonensis at yesterday's regular
academic year at yesterday's regular
meeting of the Students' Administrative
Council. Among the applications for
the position was one from The Varsity's
two years, announced his intention of
present Women's Assistant Sports
Editor, Betsy Mosbaugh, IfI U.C., who
thus became the first woman to apply
for the position. Due to the uncertainty
of the times she was named to succeed be
practical and undoubtedly will re-

printers and tecnateal men."

Kenner was born in Peterborough,
Ont., on Jan. 7, 1923, the son of the
Peterborough Collegiate and Vocational
School principal. He received his
primary education at Queen Mary's
Public School and his secondary at the
Collegiate He was tike behalf schools. Collegiate. He was high school columnist for three years on the Peterborough Review and reached the position of Editor-in-Chief of the school yearbook, The Echoes.

Kenner entered the University of Tor-onto with a Reuben Wells Leonard Scholarship, which he managed to exchange for two others in English, Extra-curricularly he has been well-known as photographer-about-campus (he terms it "a darned nuisance") and has been staff photographer of The Varsty for the past two years. He has also won prizes in Hart House Camera Club

ompetition.
His literary work has found him contributing to several campus publica-tions including The Varsity, where he has been Assistant Feature Editor since last fall, the University College Underlast fail, the University College Under-graduate where he has been twice an Associate Editor and this year Literary Editor, and the University of Tor-onto Monthly. He is also this year's winner of the Rabbi Isserman Prize for an essay of "Education in French Canada."

Underhill to Discuss Europe of Today

Professor F. H. Underhill, of the History Department, will address the International Affairs Society today at 4:30 in the Women's Union for the last meeting of the 1944 session. His topic will be "Europe in the World Today." This will be second address that Prof. Underhill has made before the society.

Sale of Cornell To Lecture Here

Professor W. M. Sale of the Department of English at Cornell University will lecture on two English novels to the English staffs and students of the four arts colleges Thursday and Friday of this week.

These lectures are being given under the auspices of a committee for the ex-change of lecturers in English, of which Cornell, Western Reserve and Michigan Cornell, Western Reserve and Michigan universities are members along with

Toronto.

Prof. Sale's first lecture will be on the novel "Tom Jones." This lecture will be given at 9:30 Thursday morning in West Hall of University College, and English classes for second, third and fourth years will be cancelled so that staff and students may attend.

Pridous "Pridous Toronto Toron

Friday evening at eight o'clock in Room 8, University College, Prof. Sale will discuss Henry James' mystery story
"The Turn of the Screw," with reference to the views of the critic Edmund
Wilson. Honor students of the third and fourth years, graduate students and staff are invited to this lecture. Fol-lowing the lecture, they will adjourn to the Senior Common Room for informal discussion.

This year's exchange lecturer from Toronto was Prof. E. J. Pratt of Vic-toria College who visited Cornell Uni-versity in the fall.

Univ. of Chicago Gets E. K. Brown

Professor E. K. Brown, formerly of the English staff of University College, and for the past three years head of the Department of English at Cornell University, will join the staff of the University of Chicago as professor of English, The Varsity learned yesterday.

English, The Varsity learned yesterday, Prof. Brown graduated in English from University College in 1926. Con-tinuing his studies in France, he received the degree of Doctor of Literature from the Sorbonne and the Diploma d. Es. from the University of Paris.

In 1925 he joined the English staff of University College, leaving in 1935 for a year with the English department of the University of Manitoba. He returned to the staff of U.C. in 1937.

In June 1941 Prof. Brown was appointed head of English at Cornell. He has held that position to the present time, with the exception of six months as secretary to Prime Minister King in 1942.

Aesculapian Society Executive at Kingston Favors Continuance of Present Accelerated Plan for Duration

CANVASS OPINION

By Jack McMillon

Medical Editor, Queen's Journal
Kingston, Ont., Mar. 6— (CUP)—
News that present second year of Medicine might be first to revert to regular curriculum instead of continuing ac-celebrated course struck Queen's over the weekend and left those affected stunned and dismayed.

Although university officials cannot take any statement until approval of the move is received from Ottawa, the the move is received from Ottawa, the situation, as gleaned from other sources, is that Queen's after a meeting of some 20 of the Medical faculty, has suggested to the Government that it would prefer to return to the slower six year_course. Second year is still on accelerated course, pending final decision.

Aesculapian Society executive, representative of the Medical student body, is sending a letter to University and Army officials stating that it favors continuing the accelerated plan in view of the uncertain future. Copies will be sent to other universities in order to get a national viewpoint.

sent to other universities in order to get a national viewpoint.

This means present Medical Sophomores, instead of returning to their third year April 10 after writing finals March 20, will remain out of university until Sept. 25, and will then continue on the prewar system. There is no third year and the present fourth year will continue to be accelerated.

Government reaction to the plan, although still unsettled and with possibility of being unfavorable, will decide the issue. Nevertheless, students are attempting to assure that their opinion is heard.

heard.

A letter has been sent to faculty com-mittee in charge of the situation, ex-pressing students' willingness to continue under the speedup plan rather than re-main idle six months, while other col-leges continue with the accelerated plan.

Second year representatives, in tele-Second year representatives, in telephone conversation with Ottawa Army Medical officials, received both assurance their proposals would receive attention and a statement that Government had never intimated that Medical courses should be slowed.

Reasons for change are that universities are not turning out the best

THE UNDERGRADUATE Probably one of the best integrated, sort of magazine journalism inexplicably if not the most artistic, of all the rare in campus publications. Rasky's college magazines to come under this biographical sketch of U.C.'s principal reviewer's eye is the Winter Issue of is the sort of item which can contribute reviewer's eye is the Winter Issue of the University College Undergraduat.

This especially designated "Winter Issue" is one of two which the editor, Vernon Lang, plans to bring out this year, thus restoring the Undergrad to some semblance of its former position as an active periodical instead of that recently assumed of an annual reminiserent processing on the recent past. recently assumed of an annual reminiscing on the recent past.

Beginning with a crisp explanatory
and introductory editorial, the pages
reveal a body of contributors who express themselves with a minimum of
artiness and preciosity. The two main
informative articles, Wallace: Scholar
and Teacher by Frank Rasky and What

The New Chief

Although The Varsity is by no means through with its duties for this year a new Chief has been appointed in George Elliott, currently serving as Feature Editor of the paper. The dictates of the calendar necessitated appointing next year's Editor at a somewhat earlier date than is customary, but we are neverthless happy to have our successor about and he is too well-mannered to make the departing members of the staff feel like has-beens.

George is possibly one of the best favored of all the young men who have ever occupied this post. His background, mentality and specialized experience make him a valuable asset to the paper and to the campus which it serves. Aside from his purely statistical qualifications he is possessed of a resilient mind, sound judgment, and detailed view of the University as a whole, and a sense of proportion which will serve him well in his new capacity.

We have enjoyed working with George; we regret that we'll probably not be able to observe his work in the coming year from close quaters, but, along with many another nostalgic ex-editor, we'll be watching with great interest, and doubtless with much approbation.

For The S.A.C.

On behalf of the Students' Administrative Council our patient publishers, we should like to bring a few most of them obvious, to the attention of the students of this University. The S.A.C. has been denounced recently in the Correspondence columns of this paper, the most recent letter appearing today, for not sending a representative to the current sessions of the Toronto Youth Council.

The first obvious fact that presents itself is that the present time sees the beginning of the most gruelling part of the academic year. Right now students are becoming, or about to become, serious minded in the most narrow and concentrated sense of the word as they prepare for the more-than-ever-important final examinations. The Engineers are already under the cloud, the more prudent of Arts students are bethinking them of their annual supply of midnight oil and very few students indeed have time for outside discussions of any protracted sort.

In the second place the Council is not constituted as a body representative of official student opinion on this campus. It is difficult to envisage any group of students of moderate size capable of representing adequately the diverse and shaded opinion of such large campus. At any rate it was not found possible by the S.A.C. to conduct even the skimplest sort of referendum in the time remaining between its first regular meeting following receipt of the Youth Council's invitation to the first meeting and the actual date of the meeting. Since the S.A.C. holds sessions only once every two weeks it has been found very difficult to synchronize contact between the two

The S.A.C. is currently attempting to remedy these conditions. None of the current members of the appearance. Goeffrey Hatton in the dual role of S.A.C. has so far felt able to offer any time to the

cause at this juncture of of the all-important final year. It would be heartening if the chief complainers in this matter would offer their services in place of their ill-founded criticism. If any can show cause why they should be considered qualified to present an accurate interpretation of student opinion at the University of Toronto the S.A.C. will undoubtedly be pleased to give them official endorse-

U.S. Deferments

There is no great significance in the recently announced new system of selective service occupa-tional deferments for male students in the United States beyond the fact that it represents a new way to do an old job. It does not constitute any liberalizing of the government's attitude toward college students in general nor reflect any tendency follow Canadian policy in keeping students in

Universities out of uniform as much as possible.

This is suggested by the fact that the new program will take over part of the work covered by the programs of the Army and Navy, but since it involves but 10,000 students in the whole country it obviously will not be of far-reaching effect. Also, although this number will apparently be partly made up of men who would be in uniform under the previous arrangement it is a smaller number than was previously granted. No change has been made in the type of courses in which students will be eligible for deferments and outside of theology the list includes nothing but courses of immediate practical value such as engineering, chemistry, physics, geology, geo-physics and the various branches of medicine

Correspondence

March 3, 1944.

The Editor, The Varsity.

Dear Sir:

In the last week several letters have appeared in The Varsity criticizing the policy of the government regarding their treatment of University students. A difference of opinion has developed about it. All are, however, agreed that some change is necessary. All are also agreed in doing absolutely nothing about it.

For a long time the university student has deplored the fact that the social science graduate has been ignored. However the student, on the whole, refuses to take part in those thing about him in the "out-side world." He apparently feels that one or two He apparently feels that one or two money drives a year cleanse him of his responsibility

The student must not only talk; he must interest himself and become active. It is indeed regrettable that, when the Toronto Youth Council meets to discuss the opportunities and allocation of youth, the Students' Administrative Council does not see fit to send a representative of the students.

The Toronto Youth Council is organized into panels examining respectively citizenship, education, employment, recreation, public health, etc. Certainly hese things are vital to the student, both for his own

good and that of the country as a whole.

In order to allow efficient rebuilding to take place the universities have been purposely made to function during the war. Not to participate in planning s to defeat this purpose entirely. The student must learn that if he feels something is wrong it is his duty to try and change it. The attitude that he can sit back on his fat chair and expect to get things done must change.

Yours very truly,

CARL HERMAN, III U.C.

Gee And Ess

Eaton Operatic Society

Shades of the witches' curse and claustral skeleta were evoked last night at Eaton Auditorium, when the Eaton Operatic Society commenced their 13th season with a gaily mounted production of Gilbert and Sullivan's *Ruddigore*. This is one of the least successful, most dated-in-content of the Savoy operettas, but directed by Alfred Kidney and con-ducted by T. J. Crawford (with full orchestra) was notable for sustained pace and color last night.

PASSION!

You Might as Well Know Now That Even WE Don't Know Who Killed the Engineer

THE BEST GORE OF ALL GOES TO CARNAGE HALL

Miss A. E. M. Sparkes whipped out her pearl handled .38 and let blast at the writhing form on the carpet. Not to be outdone, the door opened and a sleepy-faced Engineer staggered in, looking for something

What he found was a bullet in his What he found was a bullet in his windoipe. He fell, groaming and clutching at his \$12 gold-inlaid sliderule. "Smoky," hiding behind the door, remained silent and suddenly there came a noise. Miss Sparkes whirled at this premonition of discovery, and let loose a blast of expletives in the direction of "Smoky." "Goodness, gracious, sakes a blast of expectives in the direction of "Smoley," "Goodness, gracious, sakes alive, me oh my, look what you did. Seems to me that's not good for the carpet." Smoley's four companions walked casually toward Miss Sparkes and produced a butterfly net.

Again the door burst open, disclosing the vapid countenance of McKenzie— the talking St. Bernard. He strode in brandishing a pair of foils, for he was on his way to his fencing class.

on his way to his fencing class.

Donning a red-plush bed-jacket with lice-disposal attachment, Miss Sparkes flung a disdainful glance at Smoky who was loeked in the affectionate embrace of the bejowled McKenzie. Just then the window burst open. But look! What's this? Miss Sparkes's victim spart flame from his eyes smoke from spat flame from his eyes, smoke from his ears, tobacco-cud from his teeth, and whirling round began to beat Miss Sparkes about the head and ears with

rolled up back issues of Torontonensis.

All at once everyone lay down behind the chesterfield. McKenzie began to the chesterfield. McKenzie began to suspect things. It was easy to see he was perturbed. He laid the old gun on the top of the grand piano. He began to play a muted version of Rachmaninoff's Prelude in Three Flots and a Basement. Then he sank to the depths of despond and old Mordant, the jaulior, joined him in a fast intricate duet. It was Prokoffief's fastest. Finally both of them fell down exhausted and died. Miss Sparkes took the situation in at a glance and began to dance the highland fling, whistling all the time. The payoff came when a second arrow with a second billet-doux came through the window. Smoky snatched it in mid-air and threw it right back.

He lecred softly though not in too

and threw it right back.

He lecred softly though not in too subdued a fashion and lay on the floor and died. Then Miss Sparkes went through a fast two-step routine out onto the balcony. Beardon was waiting for her and he immediately shot an arrow through her heart. But it was on the wrong side. So she lay on the floor writhing in agony. But not too much agony, mind you. She still had enough energy left to powder her nose and compose herself for death. The attendant covered her with an umbrella. Beardon and the attendant went into the bodypose herself for death. The attendant, covered her with an umbrella. Beardon and the attendant went into the bodystrewn room and opened the windows. Rigor mortis had sat in the great chair by the fireplace for many days. Now he was in his glory. Then death came to Beardon and the attendant. Rigor Mortis remained supreme. He glanced down at the floor, at all the carnage that he had wrought, and with a groan that surged from his unflody vitals, gave up a brief prayer of supplication and screamed, "WHO ARE ALL THESE PEOPLE!" But there was nobody in the room, nobody on the stairs, nobody climbing through the transom, in fact nobody. And He died. But not before to folded McKenzie's paws over a calla lily. And not before he clipped his two assistants over the head with an axe.

Tid-bits from the College Papers

Word was received here last night that "Hustling" Herman Colletts, former student of Engineering at McGill University will try out with the New York Ginnts baseball club this spring at Lakewood, N.J. If Colletta makes good it will be the first time in history that a student of McGill has made the grade in professional baseball.

McGill Daily

Transatlantic mail service was suggested as a possible peace-time use of the rocket by Mr. G. Edward Penday in an address to the Royal Canadian Institute, "It would be possible to receive a letter from Paris four hours before it was mailed," he said.

U.C. Leads In Finals, Takes Jr. School 5=2

Sin Bin Dwellers Numerous as six minutes U.C. went in on thre Red and White Carries Tough Match: Givens Proves Stellar

SCHOOL GOALIE GLITTERS

By Mike O'Brien
U.C. went out in front in the Jennings
Cup finals last evening by taking a
gough contest from the Junior Engineers to the tune of 5-2. U.C. were the
better team all the way, carrying the
play for most of the game, and it was
only the exceptionally fine work of
Johnny McDonough in the Bluc and
Gold nets that kept the score from
hitting the high brackets. This lad
fiterally ate rubber all during the contest. The Red and White were tearing
the hair along about the middle of
the game as the pint-sized netminder
kept pulling off one flashy bit of work
after another. The game definitely
showed the Royal Collegians as the
better team and marked them as strong
favorites to collect the marbles for the
first time in the history of the Jennings
Wag.

The first canto opened up with U.C.

Saidon in no mean way. School got
back into the thick of things at the 13minute mark way. School got

back into the thick of things at the 13minute mark on a breakway. School got
back into the thick of things the the 13minute mark way. School got
back into the thick of things at the 13minute mark way. School got
back into the thick of things the talken to a back into the thick of things the altackers flat-footed. Andison took
one from Bradford at the catcher set in to catch the lower left
corner on a beautiful drive. A minute
learn Brownridge gave the Redmen a
chance when he took a trip to the sin-bin
lor a trip. U.C. ganged but time ran
out with the score tied at 1-1.

The second frame got going at high
pressure with the Artsmen still trying
to a trip. U.C. ganged but time ran
out with the score tied at 1-1.

The second frame got going at high
pressure with the Artsmen still trying
to a the I-laway in the period play
but no danage was done during his
breather. Half-wa

Mug.

The first canto opened up with U.C. storming around the Blue and Gold cage from the first whistle. School was a little disorganized by the attack, but managed to stem off the invaders until the six-minute mark, when Warren dimaxed from Givens and Bremmer in a goal-mouth scramble. In the next

separate occasions for clear shots, but each time McDonough rose to the occasion in no mean way. School got back into the thick of things at the 13-

breather. Fash of the arm with U.C.'s line of Furry, Nesbitt and Graham starting to do some work. Sticks and tempers started to rise at the same time with the result that Davis drew a School penalty for activity beyond the call of duty. Holding they called it. Dalt Nesbitt and Jim Graham bore the brunt of the attack and carned viva's for their of the attack and earned viva's for their nice chore. Thus the period ended with the Engineers taking a more active interest in things, but just failing to take advantage of the breaks. The third period started with U.C.

The third period started with U.C. putting on the pressure again, but they were a little too effervescent, as Hart went off for tripping. Junior School took to the attack, with Brownridge going in all alone just to fail on the doorstep, Skinner doing the honors. Then, at the 34-minute mark, U.C. got their shooting togs on and proceeded to wim the puck game. Bremmer opened the splurge with a drive to the upper right corner. Four minutes later he set Warren up for a perfect chance, but the goalie had other ideas. Some wild action took place around the cage with the goalie had other ideas. Some wild action took place around the eage with pressure being relieved when School sank a counter off an innocent looking play, Brownridge from Sabiston and Shaw. However, U.C. weren't to be denied as they keep pressing the attack. With a two-all count on the board and five minutes to play, that line of Givens, Bremmer and Warren put the game on ice with three goals in less than three minutes, an attack that had

THE SHOE ON THE OTHER FOOT ...

THE SHOE ON THE OTHER FOOT...

Last fall we dished out a nasty word or two to the University College rugby team after their sloppy appearance against the Army Course. Now the situation is reversed. The occasion is last week's U.C.-Army hockey game during which a near-riot broke out. Although we should have dealt with this incident earlier we have had to wait while gathering full information. The enthusiastic riot was, to say the least, not indicative of a great deal of sportsmanship. Actually it was touched off by a minor penalty offence by an Army player. The offence grew into a scuffle among several players and then the overenthusiastic Army Course supporters took to the ice. That's when the referees' troubles began.

The game was already lost as far as Army hopes were concerned, but nevertheless on to the ice they came. And not only the ordinary enlisted Army Course men, but also at least one officer, who among all the crowd, should have know better. What is a ref to do in a situation such as that? It seems there's been a great deal of complaining about the refereeing this season; we've been among the complainings. But when we hear of an incident like this we want to know how people expect the referees to award just decisions.

TROPHY STANDINGS...

TROPHY STANDINGS ..

Meds are still clinging to the Reed Trophy race lead. But School has been creeping steadily upward until now only an odd hundred points separate the rivals. Meds have Jacked their points to a total of 5.995, while School stands close behind with 5.860. University College has jumped from fourth to third place, passing Trinity in the process. The U.C. total is 4,235 and the Trinity 4,105. Far behind, and now out of reach, lies Dents with 2,580 and then St. Mike's with 2,500. Emmanuel is running seventh with 2,164. Then comes Forestry, who have also risen one notch in the scale, with 1,995. Knox, who have dropped one, have 1,934 points. Victoria claims 1,687.5 points, Wyeliffe 1,445.5, and Pharmacy, as far removed from the race as their building is from the campus, with 580.

HOW ABOUT SOME ALL-STARS?

The question of an all-star hockey team was raised by an eager player several days ago. Which brings up to the same problem we confronted during the rugby season. The sports staff is in no position to make a fair choice. Thus we are again going to ask all team managers to choose their all-star team and to send the list of players to The Varsity by the end of this week. If the managers will oblige we may be able to publish an all-star team before we close the current volume of the paper.

Hurdlers Hit New High, Two-Milers Show Fleet Leg Meds Swamp

The Undergraduate (Continued from page 1)

the game on ice with three goals in less than three minutes, an attack that had the tiring School defence skated right is the double-column debate on Free from Brenumer and Warren, Givens from Brenumer and Warren, Givens from Givens. Needless to say, Mr. G. was nearly mobbed. makes rich use of the materials of undergraduate life; an engaging and happily unmotivated modern table by Phil Kerwin entitled The Truth Seeker, the Blarney Stone, and the Mug of Beer; and an article by Benson Oren-stein called Recipe for Follies which at first seems to be a mere meno to next year's director, but includes enough sly information inserted in the manner of a subdued Grough Mary to make it. subdued Groucho Marx to make it adequately entertaining.

The only contribution approaching the usual type of short story found in undergraduate magazines is The Clock by Harold Andrews. This is a well-written swetch of an embryo Micawber done with overtones of abnormal psychology. The piece is dated, however. The Avenue Theatre Clock has been stopped at 5:35 for at least a year. The potenty of this issue is at its worst competent and always possessed of a high degree of intelligibility. A bit of light verse of 33 lines by Mary Anne Cochrane possesses a high percentage of implied social comment and the consistent and intriguing title, Don't Look Nave, Darling, but Isn't that a Tumbril? The only contribution approaching

Tumbril?

Dennis Wrong's City is a dark, freeverse nocturne which is distiguished by

slight quatrain by Al Lewis. It has rhymes.

We look forward to the appearance of the second Undergraduate. We hope it will possess the notable clarity and straightforwardness of the Winter Issue and involve fewer technical worries than beset the staff this time.

REX WILSON.

Two paintings, "Pupper" and "Reeds," are contributed by a graduate of the University, M. Bloy Graham, who majored in Fine Art last year. Miss Marion Ferguson, Dean of Women of U.C., when commenting on this exhibition which has recently been shown at the Eaton's Gallery, expressed pleasure at this opportunity to display Canadian art.

The indoor 50-yard hurdle event last night hit a new high in the entry department. Hee Phillips was murmuring something like "damn good" as he looked over the entry list containing 44 names. Burgess and Booth still hold the hurdle crown of the University as they finished one, two and but a tenth of a second apart. Cam turned in a 6.6 turn for Trinity, little short of Larry O'Connor's record of 6.4. Verne Booth was right behind for School with a 6.7 to his credit.

Gord Lorimer and Frank Fordyce,

Gord Lorimer and Frank Fordyce, both from the Schoolhouse, tied for third spot with a 7-1 time, while George Lewis of Meds placed fifth with a 7.2.

The two-mile novice had a small field individually but those who ran really showed a hasty leg. The winner, J. Goering of Trinity, clocked in 10.21.2, was but seven seconds behind the senior track mark turned in behind the senior track mark turned it by Frank Fordyce severals weeks back However, it stands as a new novice record. Hickman, also of Trinity, finished in 10,30.7, which was also well under the old record of 11,39.

Hee Phillips stated last night that the distance men in the University are certainly on the upgrade. "We're looking forward to a great cross country season next fall," he said.

'I Paint as | Please" Art at Women's Union

The walls of the Women's Union are ablaze with color this week as the art exhibit—"I Paint as I Please"—is being featured there. This is a collection of paintings by 10 young Canadian paintings by 10 young Canadian artists, all under 40 years of age. Two paintings, "Puppet" and "Reeds,"

THE TALE OF THE SUBTLE SHUTTLE

We picked up numerous tales of the subtle shuttle yesterday at the padminton tourney, where Doris Clarke of PHE handled the s.s. in such away as to carry off the laurels.

such away as to carry out the laurers.

But by the far best tale was th' one concerning the feminine Jack Purcell, who was viewing the match from the depths of her chair and hollered to one and all, "Say, look at the girl on the end! She's good." Then as an afterthought added, "Don't know what kind of a player she is, but she's certainly good looking."

Aside from such remarks, the games were run off in fine style. Twenty-six contestants entered the field, and by continuous playing the opposition was narrowed down to two PHE'ers, Doris Clarke and Molly Murray. Clarke, considering that she played seven games straight, was in excellent condition. And this steadiness coupled with fast thinking earned her her superiority over the others. She took the final games 4-11, 11-2 and 11-3.

hinal games 4-11, 11-2 and 11-3.

All matches except the semi-finals and finals consisted of one game.

Helen Shepperd and Jan Hughes were notable for their style, and were hindered by their lack of condition. Molly Murray waltzed through to the finals without much difficulty and even copped a love game.

Trinity, U.C. and PHE contributed the majority of players, while with the double blue??? Whattsa matter

Everybody was in a happy old frame of mind once they caught the shuttle fever, and agreed that even birds were hard to get and that if tourneys were hard to arrange it was a dandy spree. The general hope is that next year there will be more of these get to-gethers... the courts at the Granite are undoubtedly the best we've played on.

INCIDENTALLY ...

If you are feeling athletic tomorrow night, try working your energy at the sports provided by the Joint Lit of U.C. $\,$ Anytime from 8 to past the witching hour.

Wednesday.

Two men handled all the scoring duties in yesterday's tussle. Rosen proved to Meds' Mr. Big as he plopped in all three tallies, and J. Martin sent home both School goals.

Prof. Alford to Review Hart House Art Exhibit

For the first time in several years a joint exhibition of painting by undergraduates, graduates and faculty members will be held in Hart House art gallery today at 1 p.m., when Professor E. J. G. Alford of the Department of Fine Art will review each exhibit individuals.

The display includes more than 40 watercolors, oils and penell sketches,
Hart House officials revealed yesterday. Prof. Alford has three paintings
of his own hanging at the gallery.
Of interest to undergraduate members
who may wish to attend the review will
be samples of work contrived by fellow
undergraduate, members. These insuled

be samples of work contrived by fellow undergraduate members. These include J. R. Blais, fil Forestry, W. R. Beny, HII Trinity and F. Meyer, I U.C. Others whose paintings are included in the display: Prof. Barker Fairley of the German Department; Prof. Robert Finch of the French Department; Prof. C. R. Young of the Faculty of Applied Science and Engineering, and Dr. Harvey Agnew, a graduate member of the University, now a member of the Hart House Art Committee. Hart House Art Committee

Officials pointed out yesterday that art exhibitions have been a feature of Hart House since 1921, and that the custom had been established not as a device to provide sales of paintings, but to encourage members of Hart House to acquire the hobby of painting.

Working her way through College?

It is rumored that two Engineers were It is rumored that two Engineers were the proud escorts of one of Skule's fairer sex (not Miss O'Toole incidentally) to a TEA party in Greenwich Village. . . . Truth is, indeed, stranger than fietion. . . . Skule men certainly ain't what they...

It is general knowledge that C.O.T.C. is one of the joy's of College; however, such is not the opinion voiced by one disgruntled Sergeant as he tried, in vain, to get his platoon to march. Came "Come on, you lugs (or a reasonable facsimile of same). Are you going to march in three's, two's or single file??? I'm not particular, but let's do it the same way for a change, ehh???

Whyntcha try lock step?

Another morsel, from the Army Course this time, was a conversation between two handsome Casanovas a la campus. . . Said the first, "Say, Bill, what's up? You're not yourself . . something troubling you?" Came the emphatic reply, "Yes!! Women again. . . Believe me, I don't care for this Leap Year idea." Come now . . that's not the way we heard it, boys. Why, just a few days ago we overheard one gal remark, "Finally I'm old enough to take advantage of Leap Year and what happens??? NO MEN. . . Now I ask you"

you." . . . Et tu . . .?

Communism Out Declares Pares

Sir Bernard Pares last night warned that after the war the Germans will try to get back into Russia to run the show and since Russia can't do without a partner, it will be our own fault if we leave the gain to the Germans. Sir Bernard gave a public lecture in Convocation Hall, his final public appearance during his present visit to Toronto. Discussing what Russia will wasta

ance during his present visit to Toronto. Discussing what Russia will want after the war, Sir Bernard said that first of all she will want all Russian population and especially that part of the Russian population which passed by fluke to Poland when Russia was "flat on her back?" after the last war. He hastened to point out, however, that Stalin will not demand Poland as he doesn't want a sword on his frontier nor a focus for German intrivers in War-a focus for German intrivers in War-a focus for German intrivers in War-a focus for German intrivers in Wara focus for German intrigues in War-saw. Also he will never touch Czecho-

slovakia.

He added that if we insist on making the Baltic states independent we shall only be bottling up Russia and taking away her "window on Europe" and undoing the work of Peter the Great.

To the question "Will Stalin be interparted in beaning nease in the world?"

ested in keeping peace in the world?" Sir Bernard answered emphatically: "Obviously. It is perfectly clear from everything he has done." The Russians, who have already lost some six million in the lines will want to put their own house in order and set up what has been broken down.

"Communist rule in Russia might be said to have ended in 1929. No one in Russia, either the government or an ordinary individual, would say that they are ruled by Communism. They have state capitalism but have abandoned all the rest because it wouldn't work, and it is blatantly true that Stalin is the mnn who did it," he said.

Stalin, coming into power in 1928, realized Hitler's designs on Europe and asked himself the question: "Can I, before this blow falls, create a Russian

of the parcel and signed by the prisoner.

These universities, the pamphlet says, are so well organized that the work given and done is of a high academic grade. Oxford, Cambridge, and the University of London are sending out examinations to the British camps in Germany, although degrees cannot be awarded while the men are in prison. One detail mentioned in the data was

One detail mentioned in the data was that if each student were to give at least one dollar there would be at least \$20,000 from the whole of Canada.

"When you come to think of it," Anne said, "there really isn't very much sacrifice in giving a dollar when you know what it will do for others who haven't amy of the priviliges or comforts we have."

"That dollar bill," she said, "would supply notebooks and paper required.

and dollar Dill, she said, would supply notebooks and paper required by a prisoner of war for six months. It could provide soy bean milk for a month for Chinese students threatened with tuberculosis. It could buy a phonograph record which will bring prisoners. It would help provide medical supplies, clothing, food, books and tech-

supplies, clothing, food, books and technical equipment. And it would help give courage to these prisoners and refugees. It would be partially responsible for giving these students an opportunity to plan for a new world."

Anne and her cohorts are going to try to make every Vic student more aware of this. She has representatives for every course in every year who are to canvas the students and bring the to canvas the students and bring the

drive to a climax on Friday.

Posters are being prepared to be displayed in Victoria College for tomorrow when the drive starts. A bulletin board will be arranged where the name of all contributors will be written.

S.P.S. yesterday afternoon when a team of two first year Schoolmen, up-holding the affirmative side of the resolu-tion "Resolved that Canadian engineers" can find better opportunities in other countries than in Canada," defeated the fourth year students who spoke for the negative. The debate was the third and

negative. The debate was the third and last of the series of Segsworth debates. The first speaker for the affirmative, Cyril Fry, defined the issues involved and proceeded to cite examples of engineers migrating to other countries because of thirthey are sentitled. f limited opportunities in Canada.

Ken R. Coulter, speaking for the negative, emphasized that more opportunities in proportion to Canada's population are open in this country than in the United States.

The second speaker for the affirmative team, J. Bruce Adams, pointed out that unlimited fields for development are open to Canadian engineers throughout the world, especially in undeveloped countries as, for example, some in South America.

The concluding speaker of the debate, John L. More, introduced statistics to John L. More, introducto statistics to prove that American engineers, during the depression, suffered more from unemployment and low wages than did Canadian engineers in the same period. He also spoke of the possibilities for expansion of industry to Canada's North-

Professors E. A. Allcut and W. J. T. Wright confined their comments to comparisons of the speaking techniques of the various debaters. At the con-clusion of the debate the club executive, the speakers and the judges attended the dinner in the Great Hall to mark the conclusion of another year of S.P.S.

European Problem Is Underhill Topic

"Europe and the World Today" was the topic with which Professor Under-hill closed the 1944 season of the Inter-

national Offairs Society.

The speaker opened his talk with the statement that this generation will not see the solution to the "European Problem." Europe has been the centre of trouble ever sines she began to extend her powers enteresses. trouble ever since she began to extend, her powers overseas; whenever any outlibursts of any kind began there, the effects were felt all over the world. The best solution to the ever-present problem is to centralize the power elsewhere than in Europe. The present trend toward more a powerful America and Asiatic Russia suggests a hope that the solution might be attained at some date in the future, Prof. Underhill stated, but not immediately.

not immediately. not immediately.

People worry too much, Prof. Underwood staid, about the possibility that word staid, about the possibility that seaming necessary for professional leadership.

First Soviet Secretary School Freshmen Upset Tradition By Winning Debate Selective Service Regulations Will Speak Monday By Winning Debate Selective Service Regulations Meeting Organized by Fourth Year Artsmet. Call Mass Meeting Of Students

Among Student Leaders and Staff Members

FAVOR STUDENT ACTION

A survey conducted yesterday by The Varsity revealed varying shades of opinion on the issue of the essentiality of the liberal arts courses and the mass meeting which has been called by interested students to discuss the new Selective Service regulations in regard to course in the social sciences and the humanities

Ron Scott, Graduate Studies, S.P.S., and president of the Students' Administrative Council, said, "There is a sense in which the liberal arts can be termed as essential, but the question is really one of degree only."

Dave Bairstow, IV Sociology, U.C., stated, "Social science courses have definite contributions to make; past and present students will prove this in the long run. Academic ranking, however, can give only partial indication of future

W. H. Greason, IV Chemistry, S.P.S. believes, "There ought to be more complete understanding between artsmen and engineers. For the past hundred years physical and applied sciences have made rapid progress while the liberal arts have done nothing."

The president of the Victoria College

Union, Ted Thomson, IV Commerce and Finance, expressed approval of the ealling of the mass meeting. "A move-ment of this kind is highly commendable and shows that students are not completely apathetic," said Thomson.

Opinion among various staff and faculty members seemed in favor of the students' reaction. Professor C. W. Leslie, lecturer in Ethics at Victoria, stated, "In the post-war world various cultural groups now widely dispersed can only be brought together through the understanding to be gained from the understanding to be gained from humanitarian studies."

P.H.E. Sponsor Course in Camping

The University School of Physical and Health Education will sponsor a practical course in camping during the first three weeks in September at Camp Tanamakoon in Algonquin Park. The course is, designed to teach girls interested in becoming camp counselors the fundamental understanding of or

Dorothy R. N. Jackson, director of the camp and Associate Professor of Physical Education at the University, told The Varsity, "We would like wo-men students to know that the course which is a professional one is open to

undergraduates of all colleges.

"It, at the end of the course," she continued, "we think a girl is capable, we grant a certificate on the basis of qualities of leadership, knowledge of organized camping and skill in the major activities: camperaft, canoeing, sailing, swimming and tennis. This enables her to work as a senior counselor in either the private camps or those run by clubs

such as the Y.M.C.A.
"Of course," said Miss Jackson, "it
would not be possible in three weeks to

Vic's Last Debate **Centres on Poland**

In Alumni Hall last evening the Government of the Victoria College Debating Parliament was defeated on its resolution that the Curzon line should constitute the Eastern boundary of Poland.

Ken Brown, first speaker for the af-firmative, stressed the fact that a peaceful solution of the whole Balkan question will be absolutely necessary to the as-surance of future world peace. "The seeds for other wars lie in the Balkans," seeds for other wars lie in the Balleans," he said, and Russian leadership would be the only possible unifying force. He continued with a brief outline of the history of the line, which showed, he pointed out, that both Polish and Russian elaims on historic bases were equally bad. In conclusion he stated that we are aiming at the future peace of the world, and all else must be sacrificed to this goal.

The second speaker of the affirmative, Muriel Brown, discussed the minority problem in Poland. The introduction of new racial minorities which would accompany the extension of the line eastward, would, she said, do Poland more harm than good; she could never afford to have the dissensions within her borders that these new groups would bring. The demands of the Russians

her borders that these new assessions bring. The demands of the Russians show that are interested in justice, said Miss Brown, and "the friendliness Russia shows should be encouraged."

The first speaker for the negative, Stefan Stykoli, from Poland, said that the second Curron Line, which gives the Polish city of Lemburg to Russia, was the one which should in reality be was the one which should in reality be under discussion and not the first line as outlined by Brown. He rejected the second line on the grounds that it was satisfactory neither to the Poles, who asked for the eastern sector, or to the White Russians, who had no desire to have joined to them a section of Poland. The adoption of the Curzon Line would be, he stated, a return to the principles of the old Versailles treaty and would run contrary to the spirit of inter-nationalism.

Dorothy Clark, last speaker for the

negative, maintained that the boundary must be either an artificial or an ethno-graphical one. If it is to be artificial, she said, the old boundary of 1920, which had proved satisfactory for 19 years, Soviet march toward Rumania and would be the logical one to assume; and if it were to be ethnographical, an Washington Say German posistences entirely new line should be drawn which would give to Poland Lemberg and other important industrial cities.

Halifax to be Honored At Boston University

Boston-(CUP) - Viscount Halifax, would not be possible in three weeks to give girls with no previous camping experience all the skills necessary. However, the degree of success depends entirely on the degree of success depends entirely on the degree of supflication."

When asked if the course would be Founders' Day Convocation on March development bank with \$100 million. British ambassador to the United States, is to receive an honorary degree from

Meeting Organized by Three Fourth Year Artsmen For This Afternoon at 3:30 in Economics Building

HUMANITIES INCLUDED

The mass meeting of students of the social sciences and the humanities to discuss the new Selective Service regulations is to be held tomorrow afternoon at 3:30 p.m. in the Great Hall of the Economics in the Great Hall of the Economics Building, The Varsity was informed last night by the committee calling the meeting. This committee is com-posed of Rhys Dixon, Paul Fox and George Thomas. The three are organ-izing the meeting for reasons of principle only, since they themselves are leaving the University at the end of the year on lovaduation. graduation.

graduation. The meeting, originally planned for this afternoon, is the result of much discussion which bas arisen on the campus from the announcement of the new Selective Service regulations in regard to students in the social sciences

and the humanities.

Open controversy began with a letter written to The Varsity by Rhys Dixon, IV Political Science and Economics, in which Dixon scored the new regulations and the apathy of students toward them.

A regive Dixons between the descriptions of the control of th A reply to Dixon's letter by the editor of The Varsity provoked a reply from Paul W. Fox, also of IV Political Science and Economics. In his letter, Fox pointed out that the social sciences as courses contributing to society are becoming more significant as the world Proceedings of the Power Service of progresses toward peace.

An editorial published in reply to Fox's letter offered the issistance of The Fox's letter offered the issistance of The Varsity if interested students acted quickly. The result of this offer was the calling of the mass meeting, first for Wednesday, and now for Thursday. A letter by Carl Herman, III Pass, appearing in yesterday's Varsity, supported the attempt of the social seience students to express their opinions upon the issue.

It is hoped by the organizers of the mass meeting that the discussion to-morrow will lead to a resolution deploring the stigma attached to the humanities and the social sciences by the new regulations. The meeting will be very informal and students with any type of opinions to express will be welcome," said Dixon,

committee. "It is expected that Rhys Dixon, Carl Herman and George Thomas will lead off the discussion with a few a propos remarks," said Fox, who is to act as chairman of the meeting.

Time For Action

With characteristic delay in starting, the students of this large and heterogenenous institution have finally taken definite action to compile and formulate the case of the social sciences against Selective Service. Reception of the latest government regulations regarding the status of university students was varied upon the campus but opposition to the importance (or lack of it) attributed to courses in social studies and the humanities has gradually gained momentum. Beginning with heated private discussions, expanding to the correspondence columns of The Varsity, and now finding actual expression in George Thomas, having expressed their objection to the regulations in The Varsity have followed up their words with swift and controlled action, and should prove capable leaders for tomorrow afternoon's discussion. The fact that these three men are all in their graduating year and will therefore receive no personal gain through their efforts adds weight to their actions. Acting upon principle, they deserve the earnest co-operation of all students who

Correspondence

The Editor. The Varsity.

Dear Sir:

From the beginning of the industrial revolution the practical sciences have made tremendous de-velopments reflected in all aspects of our lives. Previous to the outbreak of the current war standards of living had been raised to nearly ideal heights for a great proportion of the world's population. But while living standards and practical sciences rocketed, social studies were neglected to the detriment of the social structure. The natural outcome is the carnage and social degeneration of the present era.

But now we have a war to win. Practical sciences supply technically trained men to further our cause; medical schools provide doctors to alleviate suffering. The duties of junior officers, humanitarian problem of effectively controlling and directing men.

A large number of economists, political theorists, and teachers are being required to clear the way for economic and social recovery which must pre-cede further advances. A. M. G. (Allied Military Government) in Italy and Sicily has been greatly hampered by very widespread black-market and smuggling organizations. Such social nihilism shows the type of educational and economic problem presented to our forces; it is a problem expressly for able-minded leaders and teachers particularly trained in the humanitarian arts. U.N.R.R.A. and similar organizations in the next twelve months will need great numbers of such personnel for the task of reconstruction (not entirely a post-war job) which will be actually more important to a true victory than production and application of destructive matériel. In view of this who can deny the present crying need for students of the humanities?

Actually there can be no question of "essential courses," just as there ought to be no question of a divorce between liberal arts and practical sciences. At present, with the exception of limited fields, there is no attempt to effect a synthesis of these two aspects of learning. This is a task our universities need to look into promptly.

But let us return for a minute to the military and reconstruction personnel demanded of our arts colleges. These people will require social science training; i.e. in sociology, psychology, and political ethical and economic theory; and a deep under-standing of cultural backgrounds, particularly linguistic and historical. Students with these qualifications are definitely on the essential list, National Selective Service notwithstanding.

A question considerably more urgent, then, than "essential courses" is the ability of our universities to produce students adequately trained in these to produce students adequately trained in these studies. Are our courses in political and ethical theory sufficietly broad and up-to-the-minute; have our modern history students a knowledge of the conditions leading up to the present situation in all the countries affected; are our modern language departments equipping students to carry out rehabilitation work in Germany, Russia, Italy, China, Japan, and India? These questions, in the light of recent one knows that they can't march when and India? These questions, in the light of recent attempts here to enliven various modern language a student meeting, the debate against the govern-departments with a view to current needs, may well ment has come to a head. The three organizers of be examined. If our staffs and administrators insist the mass meeting, Paul Fox, Rhys Dixon and in their attitude that liberal arts have a right to

the wise consideration of our government in making such an education possible. The mass meeting to-morrow in the Economics Building should indicate very accurately how aware the student body is of its position and to what extent it is trying to fulfill its trust. If we avail ourselves of this opportunity to show our appreciation of government consideration in the past, and our reasonable resentment of the newly imposed unwise limitations of the humanities courses, we will have asserted our rights and responsibilities as mature individuals capable of intelligent leadership. If we fail in this we will have deserved further curtailment.

> GEORGE A. THOMAS, IV Philosophy.

Toronto Symphony Orchestra

What is wrong with the Toronto Symphony Orchestra? Many people have been heard asking however, are not generally of a highly technical this question recently, and accordingly a glance at nature, but more often are concerned with the the present position of the Orchestra, with

B.S.M. Sandrows Sobs "I Am Too Old to Learn" as He Hands in Resignation

MISS SPARKES EXULTANT!

It was announced at the C.O.T.C. Orderly Room, Hart House, today that Mr. Sandrows, Battalion Sergeant-Major of the C.O.T.C., had retired. Capt. Sixes N. Sevens, Adjutant, wept as he told the reporter the sorrowful news. Tears were again shed when the reporter and Mr. Sandrows met. Both

"It's like this," sobbed Sandrows. "For years I've drilled the boys—my boys," he sniffled. "I've taught them the drill manual, just as it's there, see." He pulled out a well-thumbed text.
"Then comes the C.R.C.C. see—they
don't use the drill manual all the time, see. So I drills 'em, and they looks good. Finally I hands 'em over to Miss Sparkes and they is drilled at the Armories. Miss Sparkes calls them on one knows that they can't march when they're at ease. It says so!" A convulsive shudder shook his frame. "That's fine, I says. I'll be resigned.

departments with a view to current needs, may well be examined. If our staffs and administrators insist in their attitude that liberal arts have a right to stagnate into stereotype lectures and the pursuit of limited examinations of insignificant details, the true basis of university work is being neglected and university students will be hampered from fulfilling the task before them.

Of equal importance is the student responsibility in this matter. If we fail to make the liberal arts a worthy supplement to advanced technical training we fail to deserve the efforts of our universities and the wise consideration of our government in making

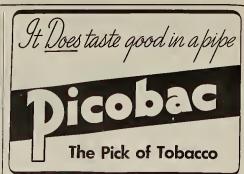

that, and after I've worked so hard. What's more they want baggy grey uniforms, with a dip at the back, and slips so they can show, and hats with blue flashes. It's Hell!"

Leaving Sandrows The Varsity went to see Miss Sparkes. "It's all too true," she said joyously. "Youth must have its fling, you know. We all know the manual is out dated. WE use a S.A.C. Handbook. Then we're sure. So far we bave cut out one uneasential operation; we are cutting out the salute now, and mark my words — there will be more! Ha, Ha, Ha! Just wait till we start on the Militia Act. There's meat in it! Ha, Ha, Ha! Just wait till we start on the Militia Act. There's meat in it! Ha, Ha, Ha! Miss Sparkes' mirthless laughter carried down the halfs mirthless laughter carried down the halls of Hart House as the reported scurried

particular reference to similar orchestras lsewhere, is in order.

Hockey game -- School's first team vs. Old Boys'. Also featuring a miniature skating carnival with skaters from Granite Club. Same night as supper -- March 13th, 8 o'clock, Varsity Arena. Proceeds to Oversea Fund which sends comforts to our boys on Active Service. Tickets 25c. Everyone invited.

Tickets available for both events at U.T.S. school office or at School door before dinner, and at Varsity Arena before game.

By Mike O'Brien

By Mike O'Brien

Just in case you hadn't heard or didn't give a darn, The Varsity will soon be going into penal quiescence on the orders of the Moot Court, and so, just to give you a last-minute summary og the more-or-less official view of interfaculty activities as carried out during the last season we made the rounds of the various athletic coaches up at the House in an attempt to corral said more-or-less official view, and this is what we rounded up:

Mac MCCUTCHENS: Everything considered, Mac expressed himseld as well satisfied with the season's sport, especially in regard to the co-operation shown by the various faculty organizations, the managers and the players. This has been a rather difficult season to administer, with several hot controversies arising, but the referce committee have handled matters very well, according to John. Biggest thrill for the year as far as the boss was concerned was the cage team's great showing against Assumption; on that night the players rose to great heights. The rugby and hockey have been well up to standard, a fact easily verified by a little jaunt up to the rink come this afternoon, when the Jennings Mug will go on the block, Junior School and U.C. bidding.

Mike Grifffirms: Griff allowed as how it was a good season, with emphasis on the program of development being carried out now as a wartime measure. Although he would like to see more time spent on gym work, Mike expressed satisfaction at the progress being made, with special reference to the part played by the Volunteer Instructors. Howover, he is still looking for the individual who made some remark about 25 push-ups et al; as we left his office, he was quoting some figures that ran to an average of six of the same in two week of training, six thousand draftees being tested. All very mysterious.

CHESTY MARTIN: The boss of the muscle moulding corps cor-

The boss of the muscle moulding corps cor-CHESTY MARTIN: The boss of the muscle moulding corps cor-

two week of training, six thousand draftees being tested. All very mysterious.

CHESTY MARTIN: The boss of the muscle moulding corps corroborated his colleague's remarks about the season. O.K. on the whole, with the boxing and wrestling up to pre-war par, and in many cases above it. Mons. Martin got the biggest kick out of that boxing bout in the interfaculty competition when Burns and Roberts slugged it out for a tie.

CHARLIE ZWYGARD: Although Charlie has been out of action with a severed Achilles tendon since November last, he has been keeping a close eye on his daring young men. Charles broke down and admitted that the quality had suffered during the season for obvious reasons, but at least there has been no drop in the interest angle; on the contrary, and this is especially true of the beginners, the urge to get out and do something has been noticeable to a very marked degree.

HEC PHILLIPS: The track mentor showed considerable pleasure at the numbers turning out to the linoleum oval; not just for number's sake, but for the fact that the numbers were learning something. Hee gave a large slice of the credit for the success of the season to four faculties in particular: Meds, School, Trinity and U.C. The standards have been well up, with many new names appearing on the board on the east wall over the track. As for the outstanding event of the season, the Junior Interfaculty Mile and Wesson's 100 dash against O.A.C. last fall were brought up. The answer to the track popularity is the healthy rivalry engendered by the Reed Trophy.

CHARLIE WINTERBURN: When we got hold of the amiable Mr. Winterburn, he was still suffering over the effects of the Meds-School polo final; Charlies avowed he never saw such "phenomenal" goal tending as that displayed by both Bell-Irving of the Red and Black and Campbell of the defeated Blue and Gold. Galleries ought to be filled for the next game, quoth he, with School showing the fight and Meds the experience, to provide a very grim battle. As for pool activities the story was as b

The Sportswoman

By Besty Mosbaugh

BY COURTESY OF TIME . . .

It's too late in the year now to come forth with any nasty remarks about the bowling tourney. Only three more issues to go before we fold up for the year . . . so we'll refrain from our usaul beef. Suffice it to say that the results of the bowling were to be given us when it was completed. Having prolonged our essayitis by hours of phoning only to find that everybody was out or didn't know whether the games had been run off yet, we took an optimistic view of the situation and figured that now there'll be something to write about in tomorrow's issue.

issue. We are also wondering what happened to those enthusiastic plans that Whitney Hall had for an inter-house match. We are appalled by the inefficiency shown by some of the heads of sports this year . . . badminton, U.C. bowling . . . lack of enthusiasm shown by the girls who had opportunity to practice swimming. But laurels go to Peg Graeb, Shirley Pearse and Jean Barnhart for their executive ability, It does our hearts good to see some of that once in a while.

We hope that the various athletic heads of next year will try to combine efficiency with good playing. We also hope that they will realize the necessity of giving publicity to their sports and contact the sports editor editor of their own free will. We would like to see more integration of the sports column with the athletic heads. And next year's sportswoman can take note of this.

McCutcheon Commends Work of Varsity Basketeers

John E, McCutcheon is proud of his Blue team. He was summing up the past season yesterday. "That team has to be commended for its efficiency and hard work because the games were just exhibitions after all. You can understand it when there is a championship at the end, but that's sportsmanship when a team pitches in and fights like they did," Mac said.

According to Mac, the reason they According to Alac, the reason they are so good is that there are so many regulars on the team this year who played in other years under Warren Steven's coaching. "I'm not taking the credit for myself," he said, running his hand over the smooth part of his head.

"Stevense "lide acettle good lice with hand over the smooth part of his head.
"Stevens did a pretty good job with
the boys. Four of the 12 are old-timers."
Don Gibson is one, and Stu Scott, and
Tettmar, and Clayton. So, you can see
why Mac spoke so glowingly of Stevens'
coaching. Pringle is a newer star. Then
there's Ryan.
"Ryan's a pretty polished player," the
coach said. "He played with the U.B.C.
Thunderbirds who were the Canadian
champions last year. He averaged about
40 migntes in every game.

40 minutes in every game.
"Doug Spry is a good man," he went
on. "He covered himself with glory in the Assumption game. He even drew a statement from Sovran that he was the best check he'd had all year, or something to that effect." Sovran, in

something to that effect." Sovran, in case you don't remember, was the captain of the Assumption team.
"It's really not fair to pick out the outstanding scorers," MacCutcheon remarked. "There are the fellows that keep the other teams from scoring, too. They are the ones that do the general

THE UNIVERSITY OF TORONTO, FRIDAY, MARCH 10, 1944

S.A.C. To Issue Permits For Summer Employment

The Students' Administrative Council has undertaken to carry out the following regulations laid down by National Selective Service in regard to students desiring summer employment:

- (1) ALL TORONTO students who were NOT registered with Selective Service in Toronto last year must fill out Forms 701, male, or 703, female, as well as the S.A.C. Employment card, in the S.A.C. office, Hart House.
- (2) All TORONTO students who WERE registered with Selective Service last year must sign list in S.A.C. office indicating desire for employment this year.
- (3) OUT-OF-TOWN students who desire employment in their home towns may apply through their local Selective Service. Those who desire employment in Toronto will follow the procedure outlined in (1) or in (2) above.
- (4) No "open permits" to seek employment will be issued either to men or women as long as Selective Service has unfilled orders from employers in essential industry. All permits will refer the student to a specific employer.
- (5) No permit to take employment will be issued prior to SEVEN days before the student is ready to take the position, but application may be made in the S.A.C. office at any time after April 1st.

More Rigid Restrictions On Permits For Students

National Selective Service Regulations this year are more rigid than those Buck Advocates

ployers had had orders in for help, they couldn't hire the students because there was a long time lapse between the issuing of the permit and the time the student applied for the job.

National Selective Service has undertaken to assist students in every way

and to see that no undue financial hardship is imposed by this restrictive ruling.

A student will not be required to take

a job which might financially handicap

him for the coming academic year.

Application forms will not be available before April 1.

U. N. T. D.

All U.N.T.D. ratings will report to Ship's Office forthwith.

National Selective Service Regulations this year are more rigid than those of last year, Last year, the Students Service authorities. The S.A.C. handled permits for employment and facilitated the handling of paper work for students working for the summer.

Last year, a student could get a permit to work anywhere. This year Toronto students in the University will be given permits for work outside the city only in exceptional circumstances.

Those students from out-of-town who wish to work in Toronto will follow the procedure of a Toronto student.

No open permits will be referred to specific employers as long as National Selective Service has unfilled orders from employers in essential industries. It was found last year that there were many cases where an employer took a student with an open permit when another student had been assigned to that particular job with a specific permit.

Specific permits will not be issued prior to seven days before the student is ready to take the position. Last year it was found that students wasted time going to employers. Although these employers had had orders in for help, they couldn't hire the students because there was a long time lapse between the issuing of the permit and the time the student applied for the job.

At the end of this war we will be death with the alternative of a crisis or prosperity. "Tim Buck, national secretary of the Labor-Progressive partly of the Labor-Progressive partly of the Labor-Progressive partly." The Canadian Political Scene." Mr. Buck said that prosperity could be mained only through the policy of continued co-operation. When peace comes there will be two great problems confronting Canadians, he said the to increased population must be met. For example, in the farming areas of the audient was found that students wasted time farming areas of the secondly sharteed Europe must be production that such that particular job with a specific permit.

Specific permits will not be issued prior to seven days before the student is ready to take the positi today's level, but directed toward peace

time commodities, he explained.

At the end of the evening \$7.36 was collected for the current Red Cross

Victoria Elections Enter Second Day

Annual elections are in progress at Victoria College today. In their second day of elections the students will elect officers for '44 and '45 and for minor executive posts in the various college organizations, the Athletic Union, the Women's Lit and A.S.G.A.. If special interest this year is the election for the newly constituted Wymilwood House Committee. Numerous posters adorn

newly constituted Wymilwood House Committee. Numerous posters adorn the halls of the college as candidates solicit support in the campaign. Charles Brown, chief returning of-ficer, annonuced that the polls will be open from 9-40 a.m. until 1:40 p.m., and urged that all students exercise their franchise.

Student Meeting Issues Statement On Definition Of Essential Courses

Members of Committee Give Explanation of Statement of Policy and Promise Further Investigation

ELABORATION

The statement of policy approved by the mass meeting of liberal arts students yesterday afternoon was explained to The Varsity last night in further detail by members of the committee ap-pointed to supervise publication of the

statement.

Rhys Dixon, a member of the committee, emphasized the constructive nature of the statement. "We hope that the statement will be of value to the authorities in revising the regulations and in making better use of students in the liberal arts."

"While the statement recognizes our appreciation of the favorable policy fol-lowed by the government towards the liberal arts up to the announcement of the recent regulations, it protests the new regulation's limitation of certain liberal arts courses," stated Paul Fox, chairman and chief organizer of the meeting. He continued, "It is felt that the real problem is one of essential students, rather than essential courses, and therefore it would be more satisfactory if Selective Service took students from the loiwer grades of all courses rather that if it took a larger percentage of students from the liberal arts courses alone." iberal arts up to the announcement of rts courses alone."

arts courses alone."

Carl Herman explained that the final recommendation in the statement was included in the hope that it would result in the authorities utilizing to greater advantage, in both war and peace, the trained personnel produced by the libera

arts courses.

George Thomas, the third member of George Thomas, the third member of the committee, stated that two members of the audience, Roy Locke and Bert Moriartey, had suggested that the authorities might make considerably more use of social science under-graduates, for example, curtailing juwenile delinquency by work in youth training organizations, and assisting in

Soviet Minister To Tour Campus

Sergei Koudriavtzev, first secretary o the Soviet Legation, will visit this campus on Monday to get a first hand me Soviet Legation, will visit this ampoint and addinage of a Canadiau University at work. Schedheld to speak at the U.C. Lit banquet, Mr. Koudraivtzev will arrive from Ottawa and will lunch at Hart House. During the afternoon he will make a tour of the campus and will make a tour of the campus and will make a tour of the campus and will meet President Cody and University officials for tea at University College before going to the banquet at 6 pm. Mr. Koudraivtzev will speak on "The Life of the Peoples of the U.S.S.R." and intends to deal particularly with education in Soviet universities.

The Soviet representative was born and educated in Moscow, specializing in philology and modern languages before entering the diplomatic service. His career took him to Germany and Turkey before his appointment to Canada in 1942.

Women's Health Service 44 Hoskin Ave.

Will all women students in the upper years who have not been examined please make their appointments as soon as possible.

Liberal Arts Petition

A Constructive Statement of Policy Regarding the Essential Position of the Liberal Arts in the Prosecution of the War and in the National Interest, as Expressed By Students in the University of Toronto

AS STUDENTS OF THE UNIVERSITY OF TORONTO, WE WISH:

- TO ACKNOWLEDGE and to express appreciation of the government's realization of the value of the liberal arts, as indicated by its policy up to the announcement of the most recent Selective Service regulations;
- TO PROTEST the stigma attached to certain courses in the liberal arts by this latest pronouncement, which is not consistent with former govern-ment policy and is inequitable;
- TO PROPOSE that the latest regulations, which involve drawing the number of students asked for by Selective Service from specific courses in the liberal arts, be revised so that the number required be drawn from students in the lower grades of all courses.

4. TO RECOMMEND STRONGLY that government and university authorities together make a more determined effort to utilize the capacities of graduates in the liberal arts courses, for immediate advantage in the prosecution of the war and for future advantage in the period of peace.

Interested students are requested to sign this form and hand it in at either the Secretary's Office in the Economics Building, the Lit Office at U.C., the V.C.U. Office at Vic, or the Porter's Desk, Hart House, as soon as possible.

Dr. Wallace To Sum Up Canadian Trends Series

Gibson Outlines Financial Policy

Commerce Club, neid in the Great Hall of Hart House Thursday night, Colonel the Hon, Colin Gibson, Minister of National Revenue, outlined the measures taken by the Canadian government to stabilize the financial structure of the Dominion and prevent inflation.

In his remarks he emphasized that the government has constantly pursued a "pay as you go" program with regard to financing the war and has secured well over 50 per cent of the war expenditures out of current revenue.

U.C. 'Undergraduate'

"Canada in the Post-War World" will be the subject of Dr. Malcom Wallace, Principal of University College, who will speak today at 4:30 pm. in the Botany Building Lecture Room. This lecture will conclude the series "Trends in Canadian Life" which commenced on January 14, sponsored by the Committee Representing the Teaching Staff of the University.

Dr. Wallace will deal first with man's predominate conservative and isolationist predominate conservative and isolationsis tendencies which have only recently, during this present war, been recognized as extremely dangerous factors. "The supreme problem facing men today," he says, "Is low to establish the reign of law in international relations, how to guarantee its functioning by the services of nower of which the interexercise of power of which the inter-national community has an unquestion-able monoply."

Dr. Wallace goes on to state that unless, and until, the problem is satis-factorily solved we can only hope for an uneasy armistice between wars. Dis-cussing then the existing world condi-tions which will make such demands Distions which will make such demands upon the succeeding generations, Dr. Wallace will emphasize the necessity of the reconstruction not only of an international form of law, but also of the separate national governments, such as exist here in Canada, where the power of parliament is constantly being superseded by orders-in-council and the numerous boards whose power is almost absolute.

But hefere Canada can take a numer.

Is Being Distributed

Copies of the Undergraduate, Winter Issue, are being distributed in the Rotunda of University College from 10:30 to 12:45 this morning.

Arrangements are also being made to have the new Undergrad distributed through all the U.C. residences.

Committee Appointed to Continue Investigation of Liberal Arts Position in Present and Post-War Pariod

200 ATTEND

"A Constructive Statement of Policy in Regards to the Liberal Arts" was approved by the mass meeting of students in the social sciences and the humanities held in the Economics Building yesterday afternoon

day atternoon. The meeting also appointed a committee composed of Rhys Dixon, Paul Fox, George Thomas, Carl Herman and Muni Frumhartz to supervise publication of the statement and to continue investigation into the position of the liberal arts in the prosection of the war and in the post-war period.

Approximately 200 students, including nearly 20 engineering students, attended the meeting which was under the chair-manship of Paul Fox, IV Political

Science and Economics.

Speaking first, Rhys Dixon, also of IV Political Science and Economics, explained that the committee organizing the meeting, composed of himself, Paul Fox and George Thomas, believed that the purpose of the meeting was to discuss the new Selective Service regula-tions in regard to the liberal arts courses and to make constructive suggestions in regard to them. He pointed out that all members of the organizing committee were in their graduating year and were acting on principle rather than for per

Carl Herman, III Pass, emphasized that the training received by students in the liberal arts should be utilized to full advantage in both war and peace. He suggested that a committee be established to look into these problems and to discover what is being thought and done on other campuses across Canada in regard to such matters.

"These rebuilt he see interchange of "There should be an interchange of

ideas between the campuses," Herman added.

Jean Norman, II Political Science and Economics, suggested that the social science courses be speeded up to facili-tate the training of personnel in these

Endorsing Miss Norman's views, Roy Locke, IV Sociology, also pointed out that undergraduate students in the social sciences might be made better use of by having them take part in the solution of certain local social problems, such as

juvenile deliquency.

George Thomas, IV Philosophy, English or History, believed that a need exists for some co-ordination between the liberal arts and the social sciences, and felt that some arts courses might be revised to better meet present

Dixon then read a statement of policy (Continued on page 4)

Robins to Address 'Varsity' Banquet

Final Varsity party of the year, the annual banquet and formal dance, will be held Monday evening at 6:15 in Hart House. Dr. J. D. Robins of Victoria College will be guest speaker for the banquet. George Elliott, newly appointed editor for next year, will assume the first responsibilities of his position in replying to S.A.C. Publications Committee Chairman Art Gorman's toast to The Varsity. Toasting will cease and dancing begin at approximately 9:00 p.m.

will cease and dancing begin at approxi-mately 9:00 p.m.

Draw lists have been posted for signa-tures in The Varsity News Room and results will be out on Saturday morning. Draw dates will be confirmed by tele-phone Saturday night.

FRIDAY, MARCH 10, 1944

Alumni To Be

Another class is about to move on out of this University into a world of turmoil and uncertainty. This is a class which, along with the one preceding it and several to follow, has been told throughout its college career of the importance placed upon it by the government that has permitted it to continue studying in the midst of the most resounding struggle for human rights that the world has known. Undoubtedly this class will now be told the cognate truth that it must now justify its privileges by applying itself to the rigorous physical and mental tasks of winning the struggle both in that stage called war and the one called peace. The conduct of the individuals of this class can confirm or disprove the ill-conceived public notion that a man who delays his entry into an all-out struggle for three or four years while enhancing his education is a slacker. The alacrity with which past war graduates have applied themselves to the task at hand in and out of uniform strengthens our faith that this year's class will not fail.

The extent and intensity of their devotion to the Scallions to Ur main cause will be the measure of their enhancement of the reputation of the institution which has sheltered and nurtured them in their intellectual development. Yet this is only the most immediate way the relationship between graduates and University will be shown and the debt of spirit repaid. Those who have really entered into the life of their University to the full will return to it, at least in thought, frequently and with rich recollections. There will be some, of course, who will take their University as simply a ladder to be discarded after it has helped them to a higher material level in life. These are the cases in which the University has failed, from this comparatively small group she merits no further return.

But from those who recognize in recollection the contribution made to their lives by the University something more tangible, according to their means, should be forthcoming. They will find that after they leave college their footsteps will be dogged by that traditional, but most amiable of Shylocks, C. E. Higginbottom, Bursar of the University. Mr. Higginbottom, far from being a Moloch whose sole purpose is the fanton devouring of students' summer earnings, is in reality a prominent authority on the among college and university business officers on this continent. His communications following graduation merit, as those preceding graduation demanded, the full attention of all graduates. Although large benefactions will not be forthcoming from many soon after graduation a lively interest in the material needs behind the spiritual and intellectual work of the University is a prime to the development of the development of the funny bone. You might better concentrate on wisdom teeth.

Let's grow up—and keep "Gilhooley stuff" off the world, however, like to point out that while the writer of the above letter has a perfect right to comment on The Variative on the partment for the development of the funny bone.

requisite of a complete and intelligent regard for the Alma Mater.

The University of Toronto Alumni Federation is another element of graduate life which offers more immediate activity to this year's graduates. Its University of Toronto Monthly, sent to all who pay the Federation fee, contains articles of University interest and close-packed pages of records of graduates who have a tendency to make this institu-tion's work felt all over the globe. The Federation is not olny a source of information, but an exceedingly active organization in other fields supplying an employment agency for graduates, funds for scholar-ships and an agency for large projects on behalf of the University. Two results of this agency's work are the memorial cloisters and the Soldiers' Tower connected to Hart House, and Convocation Hall.

Unfortunately for men students only and chiefly of interest only to those in Toronto or nearby is graduate membership in Hart House which offers the full facilities of Hart House to graduate men, including the use of guest rooms by out of town members, meals in the Graduate Dining Room, and special programs of sports and intellectual pursuits.

Although the conditions of the times may necessitate temporarily relinquishing contact with the University rather more thoroughly than in peace-time there are ample reasons why young graduates of this Univerityy should come to realize that graduation does not mean the end of college life but entry into full membership in the University.

One A Week

At just about this time every year The Varsity brings its publication schedule to a close with the ast of 100 issues. Last summer, when we were considering the placing of a few odd issues displaced from the usual series by the peculiarities of this year's academic calendar, we decided to extend the period of The Varsity's usefulness to almost the end of March by concluding with three Friday issues of which this is the first.

It is not until that time that the campus becomes quite still and hushed in awe of approaching examinations although extra time for increased attention to academic details does become very useful during this month, especially to the decimated and hard-working Varsity staff. We feel, therefore, that by instituting these Friday issues The Varsity can usefully serve the campus in the time between the usual close of the publishing schedule and the time when the Examination Time Table becomes the chief organ of campus news.

Correspondence

Jr. S.P.S. Knots Ice Finals By Defeating U.C. 9-5

Brownridge and Furry Star With Four Goals Each; S.P.S. Defence Good; Teams Tie for Jennings Cup

TORRID TILT

By Bill Sinclair

The Junior School hockey sextet came back after their setback Monday to recover their best form on Wednesday and stay in the hunt for the Jennings Cup by toppling U.C. I 9-S. The score was indicative of the play, Junior School holding a wide margin in the first period, faded badly in the second frame to let the College boys force the pace, and then came back in the third to hold a slight edge.

The pace was torrid throughout and

hold a slight edge.

The pace was torrid throughout and every play was keenly and vigorously contested—so vigorously that on several occasions the game threatened to get out of hand and only by handing out 13 penalties were referee Murray and linesman Doyle able to keep control. School were, the before with the control of the penaltic were the penaltic were now the control of the penaltic were the penalti were the badmen with seven penalties to six for U.C., although both teams could have drawn far more time in the box had not the referees had just a slight

had not the referees had just a slight tendency to leniency.

School got away to an early lead in the first as Al Brownridge took a pass from Bob Morrish at 2.04 to open the scoring. U.C. came back with their first tally at 3.11 when Furry finished

scoring. U.C. came back with their first tally at 3.11 when Eurry finished off a neat combination play with Graham and Nesbitt to tie the score. Andison netted the second School marker at 5.35 on a solo rush and from theer in School were never headed. School scored two more without reply before the end of the period, Andison from Wilson and Shaw at 10.37 and Brownridge at 12.45 on a solo effort, to pile up a 4-1 lead. For U.C. Furry drew a penalty at 7.00 for cross-checking, while Young of School got the gate at 11.20 for falling on the puck.

Play started off at a torrid elip in the second with Morrish sailing in on Skinner at 0.55 to climas a three-way passing play with Sabiston and Brownridge and make it 5-1. Then came a rapid-fire chain of penalties with Brownridge getting the gate at 1.29 for tripping, to be fallowed by Bain at 3.27 for falling on the puck, and Furry at 3.44 for holding. Brownridge went off again at 447 when School changed players on the ice. These three penalties to School for one to U.C. seemed to tire the Schoolmen and U.C. started to carry the play. Graham netted the second Arts goal at 5.10 when he took a pass from Kurylick to beat McDonough with a fast drive. Wade of U.C. went off at 8.05 for boarding and School recovered a little of their first period form. Play roared back and forth until 14.34 when Brownridge took a pass from Bain to make it 6-2 for School as the period ended.

The Sportswoman

By Peg Graeb

SWAN SONG . . .

This, Moshaugh assures me, is absolutely the last demand she will ever make on me, so help her! . . . And almost I believe her, with graduation and that sort of thing so close at hand. Oh! Oh! That was the wrong thing to say—reminds you of a number of little things that intervene between now and then. . . Anyway, here it is, the Sump Sorg. the Swan Song-

What Mosbaugh's been sweating nights to get—the elusive Bowling Results. And, believe it or not, here is something—U.C. has won! With a total of 591 it topped S.P.S.'s 588 and Trinity's 583. Laurels go to Ruth Parkinson, U.C. with a score of 171, to Irene Gold, S.P.S. with 176 points and to Nesta Chappel, Trinity with 166. And, true to form, P.H.E. walked off with the honors for the highest individual score—Doris Clark (remember badminton?) came up with 189 points. Physio's sent in their regrets—they had timetable and work trouble and the results was no time to play. And to bring this paragraph to a close we include a message from the Head of Bowling herselt; Isobel Gemmil wants to thank all team managers for their valiant efforts on behalf of the sport.

The Varsity Reviews The Trinity Review

This edition of the Review would seem This edition of the Review would seem to be slimmer than usual not only in quantity but in quality. However it has been enlivened to some extent by a journalistic uprising among an unde-termined group of subscribers who claim termined group of subscribers who claim that they don't understand the poetry appearing in the Review and what's more they don't think anyone else can either. This situation is responsible for an adequate piece of satire by Barbara Rowe called "How to Use Dots and Influence People."

The familiar initials of Bill Somer-ville on the articel "First Things First"

ocept the return of clothing, and equipment by members who are leaving the University of Commanders.

All Other Ranks who are going to All Other Ranks who are going to Camp.

BEQUIPMENT Camp.

Gay All articles of army clothing and equipment will be returned to Q.M. Stores at the carliest possible date after completion of present training period, by the following members:

(i) Other Ranks who are in the graduating year and who will NOT be attending camp in June 1944. All the University for the session 1944. So University for the session is the carliest possible date after completion of present training period, by the following members:

(ii) Other Ranks who are in the graduating year and who will NOT be attending camp in June 1944. The University for the session is the graduating year and who will the University for the session of the School of the School of the University for the session in the graduating year and who will store that the service of the School of the University for the session is a point to an extremely able at review entangles of the Cont. H.Q., through their Company as a welcome change from this obscurity.

And Influence People. The familiar initials of Bill Somer-ville on the article will be autered in the article filter do un eyes. However, the subscitcution is clighted our eyes. However, the subscitcution and commander in possible date after general completion of persent training period, so that they will be attending camp in June 1944. The second of this article is obscured to some extent by the sale of successful prose, in our fifth universal date after the sessence of successful prose, in our fifth universal date after to make a who can the days of the standard prosent and the subscription of the School of This Universal Madness by Graham Otter is laboring a point to an extremely able at review entitled Towards an Understanding of American date of the School of the Scho

The clitical fetter to the editor makes the point that college poetry seems to be written by a select few for the same select few. However, the piece submitted by A. Davenport Brown (who was one of the two writers of the critical letter), supposedly an example of another type of poetry to prove the weakest contribution of the lot. Kcy-hole for Idealists by Lynn How-

ard is clever enough in its key-form. But without a single verb to its credit, the series of nous and adjectives strung together really appears an infantile ef-

together really appears an infantile ef-fort at poetry.

The two poems, Reverie and Reflec-tions, by A. G. McKay are definitely of the impressionistic rather than the ex-pressionistic school . . . which perhaps meaningless statement yet possesses far

meaningless statement yet possesses far more than these selections. Peggy Balfour's Color Schemes is a witty little ditty which presents the strange paradox that the shades which blend so readily in nature are not to be imitated in man-made clothing. Trite, but true.

but true.

The compartive best is Legend told by Patricia Langstaff. Though perhaps a hackneyed theme, the poem makes up for it with lovely phrases such as "netted shadows" and "amaranthe of grieft".

One might conclude that, despite its provocativeness, the Review is of fair calibre throughout. Possibly the approach of exams had the effect of lowering its standard this time.

COMMUNITY NEEDS AND RESOURCES

The two concluding lectures in this course will be given on Tuesday and Thursday afternoons, March 21 and 23. Tuesday, the work of the Women's Voluntary Services will be described; on Thursday there will be a presentation of the work of the Toronto Welfare Council, the planning body for welfare activities in the community.

Buchannan States Post-War Problems

Economic and material reconstruction of the whole world, the most obvious of post-war problems, will involve the raising of living standards in such countries as China, mainly by better distribution of food, and by international investment on a large scale, stated Professor Norman R. Buchanan in a lecture at the Economics Building yesterday afternoon. Prof. Norman, who is Professor of Economics at Columbia University, was speaking on "Fost-war Economic Rehabilitation."

If the explained that post-war explained in the wind of the explained that post-war explained in the problem of the ward in the problem is in reality a succession of related problems whose practical solution will be found only after several false starts are made.

Reading as Hobby Van Wyck Topic

"Adventures in Letters" was the topic with which Dr. Van Wyck, Asistant Professor of Obstreties and Gynae-cology, dealt at a neeting of the Medical Arts and Letters Club on Tuesday night in Wymilwood.

The modern physician, said Dr. Van Wyck, should have on his shelves or in Social Sciences

"Adventures in Letters" was the topic with which Dr. Van Wyek, Assistant Professor of Obstreties and Gynaccology, dealt at a meeting of the Medies Arts and Letters Club on Tuesday night of The Medies of the Countries but did not apply in Country.

The missing the medies of the Medi

bit heart the greatest pages of English literature has selected at a matural world of literature. The essential difference is that science fabre data, and ideals on subjective data. English literature has special value as a hobby, he said,

Since life restricted to the study of science alone is confined to two dimensions, a hobby is needed especially as a physician's leisure is often to hampered by the discussion to be discovered by the size of the statement with explanatory letters of studies, the need of science alone is confined to two dimensions, a hobby is needed especially as a physician's leisure is often too hampered with the social sciences. Will the social sciences alone in confined the statement with explanatory letters of the statement, recommending in course of studies, the need of the statement with explanatory letters of the statement with exp

WOULD STOP SR. YR. DRILL

Saskatoon, March 16— (CUP)
—The formation of a National Student Union has been advocated by Bob Ellis, newly elected president of the Students' Representative Council at the University of Saskatchewan.

Students are a large group in Canada and they could make their influence felt, explained Ellis in his platform. As a united body they could present their problems in a maner befitting the future leaders of the country. University problems differ little in the west from those in the east and and all-Canada union should be possible. Ellis contends that CO.T.C. training for senior students should be stopped and that it might be abolished through united student effort.

University conferences are not enough. There is a need for close co-operation between students of all Canadian universities and Student Councils in the dominion should be made into a united body. Through them student problems could be made known to the proper authorities.

FOR VICTOTIA

A bill to change the nature and titles of administrative and honorary heads of victoria University and its colleges did maccordance with province. The visions of the Victoria College chancellor as well and is also Principal of Victoria College chancellor as well and all-Canada union should be possible.

Ellis contends that CO.T.C. training for senior students of all Canadian universities and Student Councils in the dominion should be made into a united body. Through them student problems could be made known to the proper authorities.

Forfeits Degree

Winnipeg — (CUP) — The Manitoba University Board of Governors met last Thursday to discuss the poem Alroatitics written by Albert Hamilton, a fith year student of the University. The Board decided that Mr. Hamilton's mark and degree would be withheld until he receives honorable discharge from the Armed Forces at the end of the war or is medically discharged during the war. He is at present a member of the University Naval Training Division.

The poem appeared in the Manitoban Literary Supplement and was brought to the attention of the Royal Canadian Mounted Police by the District Intelligence Officer, Military District No. 10, after an editorial article printed in the Winnipeg Fress Press implied it was seditious.

S.A.C. To Issue Permits For Summer Employment

The President of the University has received from the Director of the Wartime Bureau of Technical Personnel lists of the names of men graduating from the University this spring as technical personnel who have been tentatively accepted by the Army and by the Navy for training as potential technical officers. There is also an additional list of the names of men who are still under consideration by the Navy who are to be asked to appear at once before a naval heard.

board.

At the request of the Director, letters will be sent at once by the University to all students named in these lists. Each of them will, of course, receive official notification and instruction from the Service concerned in accordance with the usual procedure in such matters.

Attendants graduating as technical personnel this spring whose names

with the usual procedure in such matters.

All students graduating as technical personnel this spring whose names do not appear in these lists are now free to seek employment, but only with employers whose names are to be found on the list of accredited employers. Copies of this list may be seen on and after Monday, March 20th, in the University Registrar's Office, Simose Hall, and in the Secretary's Office, Facusty of Applied Science and Engineering.

A. B. FENNELL, University Registrar.

The Students' Administrative Council has undertaken to carry out the following regulations laid down by National Selective Service in regard to students desiring summer employment:

- (1) ALL TORONTO students who were NOT registered with Selective Service in Toronto last year must fill out Forms 701, male, or 703, female, as well as the S.A.C. Employment card, in the S.A.C. office, Hart House.
- (2) All TORONTO students who WERE registered with Selective Service last year must sign list in S.A.C. office indicating desire for employment this year.
- (3) OUT-OF-TOWN students who desire employment in their home towns may apply through their local Selective Service. Those who desire employment in Toronto will follow the procedure outlined in (1) or in (2)
- (4) No "open permits" to seek employment will be issued either to men or women as long as Selective Service has unfilled orders from employers in essential industry. All permits will refer the student to a specific employer.
- (5) No permit to take employment will be issued prior to SEVEN days before the student is ready to take the position, but application may be made in the S.A.C. office at any time after April 1st.

Technical Personnel

Students in the Faculty of Applied Science and Engineering are registered through the Wartime Bureau of Technical Personnel.

Students registered in the following courses are eligible to receive Form 149 permitting them to seek employment anywhere in Canada under the regulations governing Technical Personnel:

1. Forestry.

2. Arts—Honour Courses, Groups C or D.

Pass or General Courses, taking at least three subjects

Pass or General Courses, taking at least three subjects from the Mathematics and Science options.

A permit for each student registered in the above courses who has r

already obtained same, will be available after March 20 at the STUDENTS' ADMINISTRATIVE COUNCIL Office, Hart House.

A supplementary list (list no. 2) containing particulars of additional summer jobs available, has been received from the Wartime Bureau of

Copies of this list may be seen in the Registrar's Office, Simcoe Hall; the Faculty Office, Mining Building; The Eugineering Society Office, Engineering Building; and the I, II and III Year Drafting Rooms.

Response to Liberal Arts Petitions Gratifies Members of Committee

Many of the liberal arts petitions which appeared in The Varsity last Friday have been signed and turned in, and the response has been gratifying, members of the committee appointed by the mass meeting of interested students to supervise publication of the petition told The Varsity last night. "Additional copies of the statement have been printed and will be available today at the Secretary's Office in the Economics Building, the V.C.U. Office at Vie and the Lit Office at U.C." said Rhys Dison, IV Political Science and Economics, a member of the committee.

All Torontonensis copy must be in by Thursday, March 24.

Harriet Leigh-Mallory, Mi 5840, Mi 6221.

Few Applications Made For Alumni Scholarships

and Economics, a member of the committee.

The committee plans to forward the petitions to University authorities and to send explanatory letters to the Prime Minister and the Director of National Schective Service.

"It is lioped that the concrete suggestions offered in the statement with be of some value to the authorities in revising the regulations." Said Paul Pox, who acted as chairman of the mass meeting a week ago Thursday.

Carl Herman, III Pass, explained that the committee is allos sending copies of the statement with explanatory letters to student-government bodies in all Canadian universities.

Need New Ideas Says Wallace

Traditional modes of thought will be inadequate in facing coming post-war problems, Dr. M. W. Wallace, Principal of University College, stated in his lecture last Friday, concluding the series, "Trends in Canadian Life."

Ideas become old and outmoded as the years pass—the toleration of slavery not so very long ago served to illustrate this. "We must abandon our old ideas before we attempt to tackle the many inevitable obstacles to peaceful living." Dr. Wallace continued, saying that another outmoded idea we must cast aside is the idea that one country can settle his own problems without taking those of other countries into consideration—nations must learn that they are their brother's keeper. Minch co-operation will be needed, especially in trade—where another antiousted idea is isolationism. Co-operation and countries into and Co-operation and countries.

another antiouated idea is isolationism. Co-operation and compromise should be the major principles of the post-war government, Dr. Wallace stated. Although there are two distinct races in Canada, differences, he said, were not insurmountable. The war, however, had sharpened and brought to light the differences mainly in language, could be overcome with a bit of effort and gradually and inevitably the French would be absorbed into the great body of Canadians.

Millard to Speak To C.C.F. Club

Mr. C. H. Millard, M.P.P., co-chairman of the caucus conunities on welfare and dire of the caucus conunities on welfare and direction of Canada, will speak on "A Student's Political Ontook," to the last spring meeting of the University C.C.P. Club at 8:00 p.m. tonight in Wymilwood. Mr. Millard is a member of the executive board of the Canadian Congress of Labor. He was director of the Auto Workers' Union during the Oshawa strike in April, 1937.

M. Millard is a member of the executive board of the Canadian Congress of Labor. He was director of the Anto Workers' Union during the Oshawa strike in April, 1937.

All the graduating students in St. Michael's College will meet at St. Joseph's College will meet at St. Joseph's College this afternoon at 4:00 to elect their candidate for the Moss Scholarship and the permanent executive for the Class of 4T4. Tea will be served.

Chancellor's 100th Birthday Is Given Top Place on List of Most Important News Events on Campus

NO BIG NEWS BREAKS

By E. Jean Southworth
The time has now come when it is customary to sum up the Ten Biggest Stories of the year as gleaned from the files of The Varsity. Looking back one is struck by the paucity of important news in Volume LXIII as compared with its predecessor which was marked by one big news break after another. However it is not every year that train-loads of students go out West to harvest crops and keep the wires buzzing with accounts of their wires buzzing with accounts of their doings, nor is it frequent that such its such as the "alien controversy" of last year. As for the merits of Volume LXIII however, few universities have the operation of the property of the propert

Graduating students will vote also for thefirst running for each office, so that voters will be helped by recognizing the person they wish to vote for. When the voting starts, these posters, along with the men's, will be taken to the voting starts, these posters, along with the men's, will be taken to the form and the worms and worms and the worms and the worms and the worms and the worms and worms and the worms and worms and the wo

Campus Drives
In view of the urgent need for blood serum at the warfronts the Students' Administrative Council sponsored a campus-wide blood donor drive on behalf of the Canadian Red Cross. As a result nearly 1,1000 new blood donors signed up in addition to 300 or more who had already given their blood. Donations were made at the blood donors' clinic opened this year at 99 St. George Street, a building formerly used as a residence for the College of Physical Education.

Pundit's Swan Song

The back cover of Volume LXIII of The Varsity is about to close upon the efforts of this year's masthead, and while a newspaper is for the most part concerned with the recent past, the present, and sometimes the future, we feel that at a time like this we are justified in turning our eyes backward over the past academic year.

Essential Students

This year's development of the perennial wartime problem of the relationship of the university student to the general war effort has seen some new developments in the matter of defining "essential" students. The problem was the first one to greet The Varsity's editors in the fall and is still devoloping. National Selective Service, following consultation with university heads, announced its interpretation of the term "essential." This interpretation is now being challenged by a group of disinterested and hardthinking students of the social sciences who hope that the results of their present efforts, reported in today's Varsity, will be of effective assistance to the government in perfecting its interpretation.

Military Training

Further developments have been seen in the first full year of training by all three services and signs have appeared of pressure for revision of service training regulations with a view to making fuller and more efficient use of the students' time and energies in fitting him for his place in the current struggle. This is actually a part of the previously mentioned problem, but a part which has been approached with less tolerance and considerable confusion and inaccuracy on the part of critics, Alleviation of the pressure of military training has not been widespread, but it has been extremely liberal where it could be applied. This seems to be a sign that the military are willing to adapt their plans to the changes which experience may indicate are

Hart House Theatre

Demands have been made for the reopening of Hart House Theatre, and the scattering of campus drama and stage productions to inconvenient and ill-adapted stages off the campus has indicated the necessity of some local auditorium for student use. Following a suggestion in a Varsity editorial interested campus groups under Students' Administrative Council leadership are now at work on the problem.

Although the year has presented its minor prob-lems and opportunities for comment have been numerous enough to keep life in the sanctum from

We must not forget the numerous correspondents

with last year's turbulent Harvest Excursion. This year's wheat crop was quietly handled by western farmers with a little outside held and an international request for student help for the Maine potato crop was turned down by McGill University and Bishop's College.

Although the Hart House Debates Room is now used for almost all sorts of purposes but debating the University has seen a great intensity of interest in the forensic arts this year accompanied by the formation of an Iintercollegiate Debating Union.

We have commended and wish to continue to com-

mend this perserverence in one of the most bene ficial of democratic exercises in spite of the war and the bogey raised five years ago by the then new Defence of Canada Regulation. Such discussion groups as the International Affairs Club and the Arts and Letters Club must be included here as well.

Women's War Work

Some 900 women registered last September for the University's second year of compulsory war work. Choice of courses this year was widened from eight to 15 with the minimum contribution remaining at 60 hours per woman. With one year's experience behind them the deans of women revised the curriculum to provide the majority of war workers with a practical application of previous training or academic courses. One of the more popular and constructive courses offered was training and practical experience in Civic Day Nurseries. This was only one of several courses inspiring women to go on to post-graduate work and a new career.

Education for Servicemen

The installment-plan gift of University education for troops in training was discussed and advocated in our editorial columns in conjunction with news stories on experimental courses offered for servicemen both in Canada and Great Britain. A suggestion that Varsity institute a "leave course" for men stationed in the Toronto area was picked up by the Canadian Legion Educational Services and plans for such a course were taken into consideration. Nothing of definite nature has developed to date but the summer months may provide a more peaceful atmosphere for discussion and planning. The issue should not be allowed to die for Toronto could justifiably add the gift of life and peace, a slice of culture and the humanities, to its present extensive contribution in the arts of war.

Hart House Elections

Hart House Elections

Hart House Elections (showing sings of decay, certuson hopefully. But the aardvaarks received more editorial space than any other single leadless pencils to old ladies on Bloor cause this year. The results were considerably st. who didn't know the difference.—Hox. Wu. gratifying to those who like to think of The Varsity in some measure partaking of the power of the press. It is our sincere hope that the committees elected will give the campus some tangible signs to show that the increased effort at the polls was vorthwhile.

Western Chat

The four western universities met in conference in Edmonton last February to discuss "The University and the Post-War World." At the time we complimented their enterprise but reserved judgment on the discussion until such time as we might peruse the 23 recommendations drawn up by the conferring students. The list of recommendations has not reached us yet but new food for thought arose yesterday in a communication from Saskatoon outlining their new student president's plea for a national student union. Declaring that the Western conference is not enough he advocates closer co-operation between students of all Canadian Universities in the discussion of problems and in making them known to the proper authorities. This suggestion brings to mind a question of the advisability of the suspension for the duration of the National Federation of Canadian University Students. Whatever the difficulties of wartime communication such a union is apparently still desired by students, perhaps now more than in the less hectic days of peace,

becoming dull, there has been nothing to compare who have from time to time vented ideas of varied

雌焦公三宫離飲

"Wheeeeeeeeeeee!" exclaimed Etaoin Strdiu, Varsity linotypist, at a late hour last night, surveying the wreckage of the University Pressroom following the migratory flight of a swarm of aardwarks that came in the south window and out the north . . . turning the place into a shambles or ruote. "No page tonight uh? Now I can go home, huh?" Calmly, Hexx Nillson, retiring but forward editor-in-chief of Di Versity, mixed a half of a pepsi with some bootlegged 32 per cent cream and drunk it. He didn't care. The paper was his baby no longer. The rapidly-aging but not yet senile younger staffers took a different view of the situatiou. They proceeded methodically to tidy the wreckage. Just when nothing remained to be done but locate the "q" key for the linotype machine, however, disaster struck once more. With a schooloogood the leardwarks.

locate the "q" key for the linotype machine, however, disaster struck once more.
With a whooooooods the aardwaarks streamed through again, shattering the patched panes, overturning the typecases, and sending reams of valuable stories fluttering to the four winds.
Sadly the night staff gritted its tech and set the place to rights again. ... "Whoooos!!!!!!" Once more the press-room was strewn with wreckage. This would never do. A telephone S.O.S. to Dr. Hustlin Goslin of the Department of Applied Canary-feeding brought the cryptic response: "Talk to them in Chinese." A quick poll disclosed that fact that the only Varsity staffer Schinese was out to lunch. Old Blood and Thunder O'Reilly, broken down Hart House launderer, was dragged to the scene at about four in the morning. "Erin go bragh, ya spalpeens," her protested. "This is St. Patrick's Day and this is no time to be askin' me to croom Chinese to a buncha irresponsible of the protested. "This is St. Patrick's Day and this is no time to be askin' me to croom Chinese to a buncha irresponsible arakes." Bribed with a snort of the protested of the staff of the protested of the proteste

欲勝眾利大敏呢

With a final "Whooooooooh" and a flutter of feathers the murder-birds swerved due west and were last seen streaming over the St. George St. chimney pots in a direct line for Miss Marryin' Bee Gerfuson's bedroom window.

—Hon, Wu.

worth, but always of lively interest in
the Correspondence column, valued adjunct of the supposedly more formal
editorials. We have several times expressed our opinions strongly on the
value of this column and hope that it
will always remain open and always be
used by students of this University.
Of late our mails have contained
chiding letters about our brief frivolity
with large type. We remain unrepentant,
even though the latest of these letters
is from one who has served with us on
the paper in past years and whose
wisdom we revere. It is more than
hinted that we have let the University
down by typographical horseplay. Such
we do not feel is the case, and maintain that any interpretation of the Uni(Continued on page 4)

Reed Trophy Taken By Medicos

Meds Athletes Set Record with the Highest Point Total Ever Amassed; Runner - Up Positions May Change

TRINITY NOW SECOND

Although some standings may yet change Meds have definitely won the geed Trophy for 1943-44. And in so doing they have set a new record in points accumulated with close to 7,000, finals results will be published next week.

week.

Right now Trinity is in second place
with 6,400 and S.P.S. third with 6,170.
U.C. is fourth with 4,372. The last
mentioned, however, has more points
coming from baseball, basketball and
fencing.

Meds cinched the trophy with the
water polo title and a close second in
track.

WOMEN'S FENCING-

Elected Monday

The five student members elected last Monday to the Athletic Directorate of the University are as follows: A. C. Burgess (Trin.), W. M. Doyle (St. Mike's), D. M. Gibson (S.P.S.), G. A. Lewis (Meds), and P. S. Shackleton (U.C.).

Oberlin College Prof. Saturday R.C.I. Lecturer

G.C. is fourth with 4,372. The last mentioned, however, has more points coning from baseball, basketball and lends cinched the trophy with the water polo title and a close second in track.

New Directors Hockey, Baseball Titles Won By University College

The Davidson coached U.C. hockey crew gave the Jennings Trophy a royal reception last week-end, after their 3-2 win over Junior School on Friday aftermoon to take the final series, two games to one. After being outplayed and pretty well trounced in Wednesday's 9-5 game, the Artsmen went on the ice with a contract of the present of the Artsmen went on the ice with a serie of the property will trounced in Wednesday's 9-5 game, the Artsmen went on the ice with a large of the Artsmen went on the ice with a large of the Artsmen went on the ice with a large of the Artsmen with a goal of the Medical and the title.

The first game of the series, played on Tuesday was a 9-0 stutout for U.C. and their first game and the title. The first game of the series, played on the series of the period was scoreles, both teams having their chances, but U.C. taking the best of the play.

The scoond period saw S.P.S. go alread in the game, for the first time, with a goal by centreman Brownridge from fine-mates Sabiston and Marrish, midway through the session. The best of the play.

The scoond period saw S.P.S. go alread in the game, for the first time, with a goal by centreman Brownridge from fine-mates Sabiston and Marrish, midway through the session. The best of the play.

The scoond period saw S.P.S. go alread in the game and two still strong U.C. lines supported by a dignt defense, to barrage McDonough with shots from towery angle, and to sink the School lines, backed by a disorganized defense, to barrage McDonough with shots from every angle, and to sink the School lines, backed by a disorganized defense, to barrage McDonough with shots from every angle, and to sink the School lines, backed by a disorganized defense, to barrage McDonough with shots from every angle, and to sink the School lines, backed by a disorganized defense, to barrage McDonough with shots from every angle, and to sink the School lines, backed by a disorganized defense, to barrage McDonough with shots from every angle, and to sink the School lines, backed by

"Undoubtly the most successful indoor track season the University has
ever had," is the verdiet issued youndy
by Mac McGutheon and Hee Phillips
at the conclusion of the current season.
And undoubtedly the closest decision
ever to emerge from the Hart House
oval was the victory which went to
S.P.S. School won out by a sixth of
a point. Their score was 59 with Meds
barking at their heels one-sixth of a
point behind. The fractional scores can
be attributed to the many ties in the 20
events. And the many ties in the 20
events. And the many ties can be attributed to the huge entries.
Two records were set in the final two
events. Lewis of Meds set a new mark
of 54.2 in the senior 440 and Kerr of
54.3 in the standing broad jump.
Fielding of Meds and Wesson of Trinity
placed second and third in the quarter
and Wright of Vic and Orr of School
placed similarly in the jump event.
The team picture of the University
Track Club will be taken at 12:30 om

The team picture of the University Track Club will be taken at 12:30 p.m. on Saturday, March 25. The following plus any others who have been neglected are asked to put in an appearance:

Year's Ten Best Stories Selected by News Ed (Continued from page 1)

other campaigns held on campus, the War Services Drive, sponsored by the Students' Administrative Council and the International Student Service Drive for relief of students in wartorn countries. The former, which featured a parade of floats, a typical co-ed contests and a cinderella dance, netted over \$1,000 for the Red Cross and the Salvation Army. The I.S.S. campaign on January 28 brought in \$1,500 and efforts are still in progress to reach the \$7,000 objective.

objective. The only recipient of an honorary degree from the Senate of the University during the term was Crown Prince Old of Norway. The degree was conferred on the Crown Prince, who was accompanied by his consort Princess Martha, not only as an honor to him but as a tribute to the Norwegian people.

Changes in Student Status

Changes in Student Status

The principal change in student status came with the regulations issued last mouth by National Selective Service stating that any male student of the age of 18½ years or more subject to call under the NS.S. Mobilization Regulation not in one of the crumerated "essential courses" and who is not "in the upper half of all the students in the same academic year of his course as determined by the final examinations for the session" will be reported to the mobilization authorities. This year also, Service Selection Boards and representatives of the Wartime Bureau of Technical Personnel interviewed all plays and who are candidates for appointments as technical officers in the Services.

intments as technical officers in the rivices.

It was announced that "Holwood" hitch was the home of the late Sirseph Flavelle and which is now serveg as a barracks for the W.R.C.N.S., ould be converted into a University ollege Men's Residence after the war. A number of stories might lay claim to tenth position in this resume. We ave chosen the one concerning the Hart louse Glee Club. First it was found ecessary to cancel the annual Christians broadcast and it was later decided of disband the Club indefinitely.

COLLEGE BOOKS

LOOKING FORWARD

In this, the last issue of Volume LXIII of The Varsity, we look forward without the aid of occult powers or mystic paraphernalia to the University of Toronto as it may be expected to develop in various aspects and in its different departments in the new era which will follow this war. This is the latest contribution to the series of special issues of The Varsity which have become customary since Volume LX was brought to a close with the huge 48-page Jubilee Issue. We do not, of course, seek comparison with that giant of undergraduate journalistic enterprise, nor can we produce anything as startling as the Invasion Issue which was its counterpart in Volume LXI, nor can we supply the remarkable documentation of last year's "War Babies" Issue in which was reviewed the academic progress of the class which came to college for the first time in the opening phases of the present war.

Prophecy Limited

Prophecy Limited

We have not aimed to reproduce the hilarity of the febrile old Jazz Issues, but we realize that the stories of planning and prophecy may take on such an air by the time the yellowed pages of this volume are turned over by research-minded cub reporters not many years hence. If this should happen it will mean that the University has suffered tragic neglect, for, realizing the hazards of prophecy, we have leaned toward the side of caution throughout this issue in sketching the shape of things to come. Thus the vision of the future University you may find here is one of minimum requirements and conservative planning. The present students, the 40,000 living graduates of this University and the community which it serves and hopes to serve better must help it to an overflowing realization of its future goals or waste inexcusably one of the community's greatest resources.

Limited Panorama

Limited Panorama

Limited Panorama

The besetting problem which engages our attention most closely is that of space. The University, once out in the country, is now hemmed in on all sides by the city. In the zoning proposals of the Toronto City Planning Board the area between the present campus and Spadina Avenue has been allotted for the expansion of the University. That plan is as yet unadopted officially and there has been, as far as we know, no official consultation between the board and the University on the subject. The tract set aside was simply chosen as obviously the best direction for the expansion of the institution since it was the only way open that did not entail crossing a major traffic artery.

Already building plans are feeling the pinch of the lack of ground. There is no indication that any definite spot has been envisaged for even so popular a building as a Women's Union. Where will the new University College Men's Residence go? Where the new heating plant? Even without the master plan for the city the University has started to spread across St. George Street. Now, even before the necessary money for expansion is subscribed, and hence before it can be spent wastefully, there should be closer collaboration between the planners of the University's expansion and the City Planning Board. There should be a definite University Expansion Planning Board to plot the needs of the University organically instead of unit by unit, as well as to collaborate with the larger planning board so that if or when the master plan for the city is adopted the University will possess a secure place in it.

In the lectual Prospect

Intellectual Prospect

Intellectual Prospect

In the field of the intellect as distinct from the practical departments of expansion and finance and administration the prospect is clear and hopeful, as far as we can judge. Members of the staff of this University seem open to new ideas, although they are not quick to try wildeat eademic schemes. The courses of the University are changing all the time as experience suggests new ways of study and new approaches to elements of the curriculum. There are few new courses in immediate prospect and the favorite of recent Varsity editors, some form of a course in journalism, seems still far from any direct consideration by the faculty although about 30 members of this years Freshman class were interested in some such course.

Slavonic studies seem to be the newest matter to engage the

Slavonic studies seem to be the newest matter to engage the formulators of arts curricula as our appreciation of world culture has become sharpened by the events of the current conflict. Chinese studies are also due for further development. In Medicine Chinese studies are also due for further development. In Medicine there is seen a definite tendency toward reorganization of the course, while the liberalization of studies in Applied Science and Engineering goes on apace with pressure on the part of undergraduate Engineers a definite contributing factor, an exceedingly interesting sign of the sound health of the engineering mind which warped custom would consider hopelessly over-developed on the practical side.

The Old Order

The Old Order

As Dr. Malcolm Wallace, retiring Principal of University College, remarked in an interview with The Varsity, older men must retire to make way for new blood. Both he and Prof. R. W. Angus of the Department of Mechanical Engineering who retire at the end of this year, are gentlemen who bring to those who look to the future of the University encouragement through their example in its past. The campus regrets to see them go; they will be missed, that is certain, but reflection on their careers and the growth they have seen here and contributed to in their lifetime is a good omen for the future. May their remote successors, the young men who are starting now where they did 40 and more years ago, see proportionate development before their retirement.

JARSITY The Undergraduate Newspaper

VOL. LXIII

THE UNIVERSITY OF TORONTO, FRIDAY, MARCH 24, 1944

University's Building Expansion Medicine Will Return To '39 Term Includes Eleven Separate Projects Estimated At Over \$7,000,000

to the pre-war schedule of study for the Medical courses, said Dr. Ryerson, Assistant Dcan of the Faculty of Medi-cine, in an interview with The Varsity

fall, he said, will pursue the normal rate although students in the other years will complete their courses on the accelerated schedule. Medical schools have been turning out doctors as fast as they can. said Dr. Ryerson, and a large one like that of this University has been able to manage adequately; smaller schools. however, have been proceeding unde

handicaps.

He also referred to a scheme under consideration to complete the five-year course in four years, by having a session of nine months instead of seven and a half as at present.

Therapy Courses Needed in Peace

"With the wider recognition of th "With the wider recognition of the value of occupational and physical therapeutic treatment by the medical profession, there will be a much broader field of activity open for the graduates of both courses," Miss D. Milmer of the Department of University Exten-sion told The Varsity. At present the army is clamoring for graduates from both courses but their immediate future will be determined by the length of the war and the number of casualties.

war and the number of casualties.

At the beginning of the was the army was the first branch of the armed services to enlist Physiotherapists in the Army Medical Corps, but since then both the Navy and Airforce have fol-lowed suite. Some graduates of Physiotherapy have already served in North Africa and Sicily and many others are

in overseas service.

The big field for Occupational Therapists in the past, Miss Milner continued, has been in mental hospitals, and this will continue to be a very important part of their work, but with the Workmen's Compensation Board taking wider action because of munitions casualities, and the Army and Navy as well as the Department of Pensions and National Health enlisting their ser-

vices, greater opportunities are offered for theropists in the future. Physiotherapy offers the possibility of private practice which in the past has privace practice which in the past has been almost completely disregarded be-cause of lack of funds and recognition. This now opens up a large field of work for the future particularly since physiotherapists now function as an integral part of the medical profession

The ruling which permits a maxi The ruling which permits a maxi-mum registration of 25 for cach of the two courses because of limited accom-modation, has been waved for the dura-tion because of the great need for graduates in the services and the re-sultant drain on the staffs of civilian

WOMEN'S UNION BUILDING TO BE A FUTURE REALITY

The feminine counterpart to Hart House, a women's building in which the Colleges are able to eat and relax in accordes of all faculties and colleges can enjoy a common lounge, pool, gym, and other such facilities—this is to be a future reality. Of no less importance is Medicine, S.P.S., Dentistry, Social Scities are abilities of a Ining for both men ence. and the Therapies have at the

enjoy a common lounge, pool, gym, and other such facilities—this is to be a future reality. Of no less importance is the possibility of a Union for both men and women which may be constructed on the campus of this University.

The idea of a "Hind House" has for many years been in the air, according to Miss A. E. M. Parkes, Secretary of ithe Students' Administrative Council, and at least a dozen plans have actually been drawn up for its construction. and at least a dozen plans bave actually been drawn up for its construction.

"The one most advanced prior to the acquisition of the Flavelle property was to be on the site of 44 Hoskin Ave., present medical centre," stated Miss Parkes, when interviewed on the matter. "But," she added, "it was finally felt that there was too little come for each "But," she added, "It was smally retthat there was too little room for expansion on that site. After all, the building is intended to include, almost primarily, a large pool and gymuasium

pinmarily, a large pool and gymnasium in the badly needed athletic wing."

Then the acquisition of the Flavelle property by the University with the indication in Sir Joseph's will that his house should be used for such a purpose, seemed to be an admirable solution. Further plans were made for "Flavelle House" which provided a large athletic building connected with Holwood and

The other edifice of this type, ardently hoped for by the students of the University, is a structure similar to those found in most universities of this size and many smaller ones—namely a Union which both men and women could use. In it would be located the main offices of the Students' Council, The Varsity, and of all other University organiza-tions. In it also would be rooms with adequate accommodation for meetings such as those of the Arts and Letters Club, and of debating societies, and all necessary facilities for mixed social activities.

When asked what he thought about this possibility, Mr. T. A. Reed, Treas-urer of the Athletic Association and one of the unofficial historians of the University, said he didn't know of any extending out behind it. It is now definite move being made in its direction known, however, that this property is but he gave bis opinion that a Union probably to be used as a U.C. men's for both men and women is in a corresidence after the war.

Immediate Post · War Construction of Million Dollar **Buildings and Heating Plant**

\$1,000,000 CHEMISTY BLDG.

Material core of the University's immediate expansion is a building program which will cost an estimated \$7,000,000. Of this a mini-mum of \$5,000,000 must yet be Medicine, S.P.S., Dentistry, Social Science, and the Therapies have at the most a common room. The athletic facilities of all the University women consist now of a small gym, and smaller swimming pool tucked away in an annex to the Lillian Massey Household Science Building on Bloor Street.

amount. A booklet on the program is now in the process of preparation.

The immediate program covers the period from 1944 to 1954 and plans are now in preparation so that work can start on the most urgent units as soon as priorities are removed and prices stabilized. Of the 11 separate projects listed three are to cost an estimated \$1,000,000 arch per \$200,000 arch period prices stabilized. \$1,000,000 each, one \$950,000 and three others \$500,000 each

Million Dollar Buildings

Most urgent unit is a new central beating plant, one of the million dollar buildings. The present plant is over 30 years old and is not able to supply heat for all the present buildings. It cannot

years out and is not able to supply heat for all the present buildings. It cannot be enlarged because of its location. A new Chemical Engineering building to be located along College Street south and west of the present Chemistry Building falls into the million bracket. This building is one of the few for which plans now exist on paper. It would con-nect with the present Chemistry Building through a \$500,000 addition planned for the latter, to form a complete Chemistry

unit for the University.

The third million dollar item includes equipment for general scientific research in Industry, Mining and Forestry, especially in the fields of Geophysics and light metals research.

Library Addition

Additional "laboratory space" is planned for students in the humanities as well as in a \$950,000 addition to the The 100th graduating class in Arts from Victoria College will be entertained tonight by the Faculty of the College at the traditional senior dinner in Burwash Hall.

Chancellor C. P. Gilmour of Me-Master University will address the graduating class. The toast to the class will be proposed by Professor H. N. Frye. Ted Tafel, president of the class of 4T4, and Helen Bricker, associate president, will reply to the toast.

There are 178 members in the graduating class exclusive of those now on active service.

Medical and dental teaching and re-search are expected to benefit from ad-ditions to the Banting Institute and the Dental Building. \$450,000 is estimated adequate for the first which would pro-vide further facilities for medical research and would house the growing Institute of Physiology. The addition to the Dental Building would cost about \$400,000.

Women's Hart House

A Building for Women, the long-hoped for "Women's Hart House," to noped for "Women's Hart House," to cost an estimated \$500,000, is provided for in the expansion program. There is some money already on hand for this building but as yet there has been no announcement of its location. Linked with the Women's Union in

Trinity to Expand recent campus discussion was the men's residence for University College. Re-Housing some 79 male students in the cently-announced plans for converting most modern rooms on the campus, Sir Joseph Flavelle's residence, Hol-

New Residences For Men, Women Present Many Problems For Planners

With the growing training the control of the contro share of the attention of Varsity's post-

share of the attention of Varsity's post-war planners.

Statistics released in 1941 before the military influx complicated the situa-tion still further, showed that in that year residence accommodation for 84 per cent more men was a crying neces-sity. Of approximately 1,480 out-of-town male students, about 640 lived in residences, 300 in fraternities, and over 540 in scattered boarding-houses, de-prived of traditions, comradeship and cornorate spirit.

prived of traditions, commands and corporate spirit.
With only 32 men at present accommodated, University College heads the list of post-war residence planners; but Trinity and St. Michael's colleges at least are also contemplating additions to their present facilities.

U.C. Overflowing

With the growing realization that a 100th Vic Class Guests of Faculty

The 100th graduating class in Arts

nouncement early this year that the Queen's Park mansion built by Sir Joseph Flavelle had been handed over to the college for conversion to a men'

residence as soon as conditions allow.

With ample accommodation for their own men as well as for some of the overflow from other college, Victoria and Knox Colleges plan no immediate expansion. "About all we'll have to do is repair the debris left behind by the army," chuckled one official.

Trinity to Expand

most modern rooms on the campus, stop-gap in 1921, has never been replaced, and its 32 dwellers continue to roomstitute U.C.'s sole nucleus in residence.

For many years money to erect a residence adequate to the needs of the largest arts college was quietly collected, but the outbreak of war in 1939 halted all plans for the duration.

The original purpose, to construct a fine building down St. George Street on the site of the present "73" and neighboring properties, was jolted by the an-

successors, the young men who are starting now where they did 40 and more years ago, see proportionate development before their retirement. Changes Foreseen In Medical Faculty Based On English Socialised Plan New and improved approaches to all approaches to all approaches to medicine will mark the future of medical instruction and research in approaches to medicine will mark the future will be required to effect them, radical approaches to medicine will be required to effect them, radical passed beyond the discussion stage. Dilemma With Antlers

The question of the control of education by religious bodies seems to be ignored by most stu-dents nowadays. Bygone bickering about just what institutions of higher learning were to receive and futile controversy having nothing to do with one's sentiments towards one's Alma Mater.

But nevertheless relics of the issue still smoulder in those higher quarters which are responsible for the administration of this university and its federated Arts Colleges which we would like to consider integral parts of the larger University. half a century the original system of federated col-leges for teaching liberal arts subjects has been getting steadily less suited to the educational needs of this province. More accurately, the needs have changed, the subjects taugh have changed, while the system has remained the same. In the last century federation was brought about in order to

century federation was brought about in order to provide two things: a unified standard of examinations and degrees, and a way of providing all students, no matter what their religion, with instruction in more subjects than could be taught economically in several separate institutions.

The fathers of this university's federation tried to take care of the province's educational standards in a visibly expanding curriculum. But that curriculum has not only expanded, it has changed. Students have wanted more and more to study subjects taught by the University and not by the separate colleges. At the same time more and more students have been paying fees to the separate colleges while the government's grant has had to stretch over most of the newer subjects taught.

As Through A Glass

Another press year draws to a close, and overworker reviewers of this department retract their religion, with instruction in more subjects than could be taught teconomically in several separate institutions.

The fathers of this university's federation tried to take care of the province's educational standards in a wishly expanding curriculum. But that curriculum has not only expanded, it has changed. Students have wanted more and more to study subjects taught by the University and not by the separate colleges. At the same time more and more students have been paying fees to the separate colleges while the government's grant has had to stretch over most of the newer subjects taught.

As a larger unit the University has been able to build up its own teaching departments with the close down because of the lack of interest shown by the men of the university. Why could there not be a university choral society, for both men and women, and over the form under the afghaa work or creative, "Yours not to reason why, yours but to do or die!" She palloped around and over the same time facts at and to a lesser extent, drama, love the subjects taught that curriculum has not only expanding our cart and to a lesser extent, drama, love the subjects

to build up its own teaching departments with the a university choral society, for both men and women, Gerfoosen best available personnel It is not possible for The (Continued on page 5)

Varsity to make a comprehensive assessment of the personnel of the different colleges, but the longterm decline in student interest in the liberal arts can obviously be arrested only if an effort is made to provide scholarship and teaching of the highest available calibre to ALL students of the University. That means that integrated departments in liberal arts subjects must be built up. How can the University of Toronto maintain standards in these subjects when examinations have to be watered down to suit the individual tastes of four separate and different teaching staffs?

It is true that the staff shortage brought on by the war have forced some of the separate college language departments to co-operate, to have some of their lectures given by one college to all students in one or more other colleges taking that particular course. Further developments along this line might alleviate the situation in the future, but feelings of prestige are almost certain to check such a move ment, and financial readjustment must come anyway

Even financial readjustment will have to cope with the vested interests involved in the present outdated arrangement. And students go on their carefree way, taking some few of their courses (in many cases only one hour per week) in the colleges to which they pay their fees, many feeling that their attachment to the college is a merely nominal matter, relic of a past of religious strife that this country has outgrown. But the older generation, those who administer the colleges, have in many cases a sense of duty to maintain these institutions which seem so artificial and inconvenient to many of the students of duty to maintain these institutions which seem so artificial and inconvenient to many of the students and staff working in University departments and faculties.

Chancellor's office at Sincoe Hall. McKenzie's cousin was playing the prime quietly in the background. "Ahhhhi," breatled McKenzie, "this is

The situation is indeed complicated, and it is at Varsity present being rather strained by an unsatisfactory from the Sports Editor . . no not division of financial resources. Every proposed new confusion from the Editor-in-Chief course brings on a controversy as to who should no more libel suits . . no more p course brings on a controversy as to who should have the prestige or the money involved in the teaching of it. That is no way for the higher education of the province to be developed. The various conflicting interest must be reconciled sooner or later. The reconciliation, difficult as it would seem in the light of the factors already mentioned, is further complicated by the necessity of protecting and preserving the real but intangible values of college life derived from the smaller college unit. These considerations plus numerous important but allows one cigar ash into the multerry rug with her hoof. "It's been a quiet year actually, Nellic," he said. "No aliens to admit and or crops to harvest out west and and organizers of the immediate future with antless." "And Selective Service has been and organizers of the immediate future with antless." subsidiary ones present the University authorities and organizers of the immediate future with antlers where the proverbial dilemma has simple horns.

In the past the people of Ontario through their overnment have dealt with their University's and settled down to read the racing government have dealt with their University's major problems by appointing a Royal Commission to hear and weigh all the evidence. If the people his ir then want to have in the University of Toronto a assistance from the state seems to be rather remote and futile controversy having nothing to do with proud of all sections including those concerned with liberal arts, now is the time for such a commission, so that the situation can be ready for reorganization when the expected flood of discharged service men and women comes back to our halls of learning.

the Engineers to take some of their lec-tures in the "Arts" Building. This led

PROF. R. W. ANGUS

Winnipeg - (CUP) - The charges made before the Special Committee on Education of the Manitoba Legislature that students were rejected from the medical faculty of the University of Manitoba on racial grounds have been denied by Justice Dysart, chairman of the Board of Governors, Dr. Mathers, Dean of Medicine, and President Smith.

The charges were presented by Mr.

Sokolov, a lawyer, in a brief on behalf

University officers denied the charge and outlined the general policy of selec-tion and rejection of studeuts. They were unable to give sastifactory answers

still place this vocation as the least important in prestige.

Such that eacher must remember, concluded Dr. Wallace, that in the execution of his duties there must be a combination of factual and creative knowledge.

Angus devoted more of his time to signed and vicious and bigoted by hydraulics. It is therefore in the hydraulic field grounds had been practised in the Unitative by the last 12 years. The brief though he is a consulting engineer also on problems involving heat engines and be abolished.

(Continued on page 4)

By Dick Mansell and Mike O'Brien

Professor Robert W. Angus, Head of to considerable rivalry, a special bome the Department of Mechanical Enginof contention being the bicycle rack outeering, told The Varsity early this week side. With a touch of pride. Daddy that he will relinquish his post at the
close of this term, after a 47-year connection with the University of Toronto. Except for six years after his graduation, he has been here since 1891 when he first came as a student.

Born in St. Thomas, Prof. Angus was
brought up in London, Ontario. After
working for some years with Standard
Oil, he entered the School of Practical
Science in the combined department of
Mechanical and Electrical Engineering.
University Collegs, then called the
Arts Building, was just being rebuilt
There was no Engineering Society

University College, then called the Arts Building, was just being rebuilt after the fire of 1890; this was the first then, but Schoolmen voted in the annual of a long line of buildings he saw go up on the campus. The Engineering Building, erected in 1877, consisted only of of The Varsity to survive on the dues the other half was added in Prof. Angus first year.

It was the custom of those times for the Engineers to take some of their lectures in the "Arts" Building. This led

In 1894 Prof. Angus received his diploma; his class picture hangs beside the door of the Engineering Society Office. There were 23 in his graduating class, 11 of them in the combined De-partment Three. He went to work in Cleveland and Pittsburg and spent some time on what was still a novelty, the gasolene engine.

He returned as a lecturer in 1900 and

eight years later became Professor of Department Three, then installed in the south-west corner of the School Building. Three laboratories were crowded into one and the motive power came from the famous Brown Engine, a byword for two generations of Schoolmen. The arrangement was trying; and after a visit one hot afternoon, a committee from the Senate agreed on a Mechanical

Building.

The new building went up in 1909, built according to the designs of Prof. Angus. The proof of their layout lies in the fact that they have required no alteration in 30 years of service. Fred Hickey, Stationary Engineer of the Labs, who is almost a part of the de-partment, remembers vividly the time when the Heat Engine Lab consisted of four walls and a roof. The Big Brown Engine was first installed with others added one by one unit load with others Engine was instanced with others added one by one, until now this and the Hydraulics Lab are unsurpassed on the continent for teaching purposes. Of the retting head, Mr. Hickey said: "He has grown up with the School and his outstanding qualities will be hard to replace."

Back in those early days Prof. Angus was shouldering all of the mechanical lectures, giving 14 or I5 a week; after a few years, "fellows" (now called "demies") were added to the staff. In 1913 the mechanical and electrical de-partments were separated, with Prof. Angus remaining as head of the former. Angus remaining as head of the former. The School expanded with the times and after the last war, when several new professors joined the staff, Prof. Angus devoted more of his time to hydraulics.

NEGLECT OF GOD WILL DOOM POST-WAR PLANS--O'LEARY

be gathered first. He stressed the lact that the social scientist must know where he is going himself in order to do effective work.

Professor C. W. M. Hart of the Department of Sociology said that the function of science is to increase the function of science is to increase the body of knowledge about the world we live in. Research for research's sake alone is ineffectual. The social sciences to the main algraduation banquet at Neval and Club Tuckday night.

Mr. O'Leary, who has been a member at the the parliamentary press gallery in clutions work should be understandable to the main the street.

Dr. M. L. Northway of the Department of Psychology said that psychology was the child of philosophy until it rebelled and became scientific.

New Extension Courses Likely To Be Permanent

By Elizabeth Serson

By Elizabeth Serson

In the past four and a half years the labsolutely necessary." A nucleus for University has inercasingly ministered to new needs and interests brought about by the war. In doing so the lime-light has been turned upon fields of study which most of us had never heard or thought about before—but which now promise to become permanent on fixtures on the University calendar.

The School hopes to participate in the exchange of Chinese and Canadian students now being negotiated. Bishop White sees in this an opportunity for lime on the great participate in the exchange of Chinese and Canadian students now being negotiated. Bishop White sees in this an opportunity for lime — not forgetting of course, deprimary one of research in Chinese harding of course, decivilization—the School operates as a general service department on question—the School operates as a general service department on question—the School operates as a general service department on question—the School operates as a general service department on question—the School operates as a general service department on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service department on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question—the School operates as a general service durinent on question of the Walters Art dallery, Baltimore, at the Household scie

tems will be with us in times of peace," he said.

While some heads of departments that have given special technical training expect that these courses will pass out of existence as soon as the war is over, others anticipate a stimulus to future development. Dr. C. H. Best, Director of the Banting-Best Medical Research Department which has given numerous post-graduate and refresher courses in aviation and naval physiology, says that these courses will no longer be required after the war because enough men will have been trained

of the greatest part of the industry in operation and production.

The possible development of a department of meteorology in the University was suggested by Dr. J. Patterson, Controller of the Meteorological Service has been giving intensive training to university graduates to fit them to be instructors in meteorology and forceasters. Those who complete the course are granted a Masters degree by the University, which has no lecturers or facilities for teaching meteorology.

In the case of those subjects, such ascience and languages, in which precincts may be set up at the University meteorology and forceasters. Those who complete the course are granted a Masters degree by the University, which has no lecturers or facilities for teaching meteorology.

Instead of the present intensive course for graduates, Dr. Patterson said he would like to see a four-year course for graduates, Dr. Patterson said he would like to see a four-year course for

ployment problem, that of getting a start, will be solved."

undergraduates, in which background instruction in other sciences and prac-tical work during the summer vacation could be given. In discussing the possibility of such a course, Dr. Patterson emphasized the growing realization of the benefit of the meteorologist's knowldge to other fields, such as agriculture, forestry, aviation, engineering and ship ping.

Meanwhile, an important decision for future policiy is being sounded with the present consideration by the various longer be required after the war because enough men will have been trained to fill the normal need, although he added, "One hopes there will still be opportunities to keep medical people in the services up-to-date."

On the other hand, T. R. Loudon, professor of Civil Engineering and Aeronautics, hopes that the course in aeronautical engineering inaugurated this year will provide a steady supply of men to go into post-war aeroplane industry. Prof. Loudon explained, however, that the need for these men would be for some time entirely in the field of design, due to the present absorption of the greatest part of the industry in operation and production.

The possible development of a de-manded for senior matriculation fault requirements demanded for senior matriculation. The consible development of a de-manded for senior matriculation many subjects without the full requirements demanded for senior matriculation many subjects without the full requirements demanded for senior matriculation matriculation and production.

to absorb some of the vocal talent which undoubtedly abounds in these environs?

It would be good to see the revival It would be good to see the revival of the Drama Committee, as it functioned a couple of years ago, especially if it were possible to use the Hart House Theatre for the productions. There should be some patronage for Condition allowed by a language of the productions. Canadian playwrights-in-embryo, who work in forced obscurity in our very midst. The University Symphony has carried on in the vital spirit of the past, and we expect to see it do even greater things, but surely it could be integrated a little more closely into the actual musical life of the University. There is a definite need for centralization, some authoritative bureau for the pooling of talents from the different faculties, so that we all may share the achievements

The Hart House Sketch Club ha. been doing good things, and will shortly hold its annual exhibition, worthy of visit by the art-minded gentry. One the strongest shows of the year is that by the Ontario Society of Artists now at the Art Gallery; an increasing sociological note, which is encouraging.

A Rare Bit

Thomas L. Thomas, baritone from the Met, sang a popular — a terrifically popular—program at Eaton Auditorium last night. He was in good voice, too, last night. He was in good voice, too, and gave quite an exhibition of tonal wariety in the Italian group, best of were best received which was Pergolessi's classic Nina.

This he followed with Rossini's Lo time he had of it. Donza, a tour-de-force of subtle mimicry and lightning diction. For Lieder he gave Brahms, Schubert and Mozart.

Brock Brace.

Expected Next Term

In the past years the University of The past years the University of Toronto has had many students from other countries on the campus, and a great many are expected to arrive here next fall to study.

At the School of Nursing there have always been a great many foreign students, as Fellowship winners from all never the world are sent and the students.

all over the world are sent to the Uni-versity of Toronto for courses in nurs-ing. There are none enrolled as yet ing. There are none enrolled as yet for next year but the usual war-time number is expected. After the war the School plans to have even more girls from outside the North American continent.

A special course in surveying will be given at S.P.S. in 1944-45 for five British West Indies engineering students.

Highlight of his French group was the aria Devant lo Maison from Berlioz' "Damnation of Faust," done with mocking humor and plenty of bravura in the head-tones.

Mr. Thomas was at his mellow best in the Welsh group, sung in the minstrel's own tongue of potent emotion. The lovely Ar Hyd y Nos could receive no finer interpretation than was given it last night, while David of the White last night, while David of the White Rack had an authentic shade of pathos. The Silent Noon of Vaughn Williams was the artistic climax of the program; nothing which came after could approach it in interpretative excellence. Of the many humorous encores, Four-natTwenty Blackbirds and Shadrach were best received. Jacob Hanneman was the gallant accompanist, and a busy time he had of it.

New Residences For Men, Women Present Many Problems For Planners

bition to be a large college." Room at St. Michael's

Hoom at St. Michael's With Fisher and More Houses in the new building and three detached houses used for residence purposes besides, 5t. Michael's College has adequate accom-modation for the men of the college with

modation for the men of the college with room besides for some engineers and medical students, according to Father Ruth, Dean in Residence. A residence for the Faculty of Applied Science would seem a definite post-war need; but since more accommodation for U.C. men would leave room for School-men in the Devonshire building, when the Air Facra leaves residents. the Air Force leaves, pressure is not likely to become acute for years to come, and once again no definite plans are preparing.

Women's Residences

With an increased registration of women students in the colleges and faculties of the University since the beginning of the war, the number of co-eds desiring residence accommodation as also increased. Added to this is the has also increased. Added to this is the fact that a number of students whose homes are in the suburbs or outskirts of the city have found it more convenient to "live in" because of war-time trans-

to "live in" because of war-time transportation problems.

As a result it has been difficult for the existing residences for women to find space for those desiring accommodation. Extra houses have been opened by some of the colleges to look after this overflow, graduate houses have been turned the compus. Because of the war, an over to undergraduates, and in some leases, sincle rooms have been made at the present firm. This is temporaries to the state of t

College Bursar. "Trinity has no am- ney Hall. ney Hall. As soon as possible after the war, U.C. intends to extend its res-idence accommodation by adding a fourth house to complete the quadrangle of Whitney, whose three existing resi-dences were opened in 1931. According to Miss Marion B. Ferguson, Dean of to Miss Marion B. Ferguson, Dean or Women in University College, one more house would not, however, cnable all the women to be accommodated under one roof, and this would necessitate the continued use of an annex.

A vision of the future for Victoria College includes the building of a modern women's residence, incorporating all the latest innovations, constructed on the house system but having the houses house system but having the houses connected, and sharing a common dining hall, Miss L. M. Manning, Warden of Victoria College Women's Residences, told The Varsity. At the present time, Vic women in residence are accommodated in six houses, the newest of which, Anmesley Hall and Wywilmood (at one time a graduate residence) were built about forty years ago. The four Bloor Street houses are somewhat older, the oldest, Oaklawn, nearing its centenary.

It is thought that the new building may be in the form of a quadrangle ex-tending east from the present Annesley Hall into what is now the Vic playing

For wartime campus athletes are at last to have the opportunity of winning their Varsity colours. Not the time-house of the colour at least. The award is to appear as a blue V imposed on the traditional maple leaf and coat of rams. To fromton in peacetime, V for Varsity in wartime.

Of course the colours cannot be awarded on the same basis as in pre-war days. Then a student had to compete in intercollegiate sport before he so much as dreamed of hopping for the prize. At the present time a certain number of colours have been alotted to each sport. Then

Mr. M. G. Griffiths expects firstly a tonal Health," Griff stated, "has allarge increase in the attendance in the Physical and Health Education course following the war. "The machinery," he nadians after the war. And organization expected."

soid yesterday, "is now being set up to accommodate the larger registration expected."

"At the present time the course is being revised to include more health instruction than it now does. This," he instruction than it now does. This," he instruction than it now does. This, "he instruction than it now does. This," he instruction than it now does. This," he instruction than it now does. This, "he instruction than it now does. This," he instruction than it now does. This," he instruction than it now does. This, "he instruction than it now does. This," he instruction than it now does. This," he instruction than it now does. This, "he instruction than it now does regulations are temporary and the standards set at present which has final say on the awarding of the colours to any man. Of any have to be changed.

Our last chance this to beat the Varsity team drum. We realize that sportswriters in this department have been doing their best to stir up some action in this field ever since the suspension of intercollegiates.

Near Perfect Record Set by Varsity Teams

The Varsity Blues' 37-33 basketball tory over H.M.C.S. York on March 4 brought all-Varsity team sport to a close for the current season, with a near perfect record to the University's credit. The three teams of all-star Varsity ath-ictes which have been active in the past year are the track team with one win, the basketball team with nine wins and one loss, and the swimming team with three wins and one loss.

three wins and one loss.

In the fall session, a three-way track meet with O.A.C. and Jarvis Airmen was held. Led by Cam Burgess with three firsts, he Varsity tracksters came through with 88 points, against O,A.C. with 46 and the airmen with 16. Although Burgess was the top man, Wesson's 100-yard dash was the outstanding event of the meet event of the meet.

vent of the meet.

son's 100-yard dash was the outstanding event of the meet.

The basketball team, featuring such stars as Ryan, Gibson, Tettmar and Clayton, started the season off early in following: The junior interfaculty swin meet also won by School. The senior interfaculty swin meet also won by School. The senior interfaculty swin meet also won by School. The senior interfaculty swin meet also won by School. The senior interfaculty swin meet also won by School. Three Varsity-Scrvice team meets won a must be read to strain the Blues put on their best game of the season, after which Varsity polished off Hagersville, O.A.C. and H.M.C.S. York, was the only set-back of the season, after which Varsity polished off Hagersville, O.A.C. and H.M.C.S., York, to end their nearly perfect season, went on to the intermediate novies will be absic crawl.

The swimming team, captained by Johnny Northwood, in three ordinary swimming meets defeated Navy, Army and Air Force teams. The most interesting event of the year was a "Telequatic Meet" with McGill — our only taste of inter-collegiate sport. Toronto lost, 33-24, in spite of an even split for firsts in the six events. Johnny Northwood, Norm Lea, Pete Aykroyf in the 300-yard free style were the winning Warsity swimmers. Although co-operation was lacking from McGill in the telegraphing of their swimmers' names, the meet twas as successful as it was original, and the Toronto tean finished their season's activity fighting.

Seen After War A. Reed Foresees Restoration of Intercollegiate Sports and

Possibly International College Hockey, But Little Increase Over Former Peacetime Scale; Stadium to Be Enlarged and Other Equipment Increased and Expanded

PROGRAM INTERRUPTED BY WAR

Mr. T. A. Reed, Financial Secretary of the Athletic Association, believes the most important thing which university officials in eastern Canada must organize towards the end of the war is a get-together of the Canadian Intercollegiate Athletic Union.

He maintains that these officials must decide before the cessation of hostilities what program they are to follow when the opportunity does arise. "We hope also to resume competition in the International Intercollegiate Hockey League," also to resume competition in the international Intercollegiate Hockey League,"
Mr. Reed continued, "but this depends on our American cousins."
One definite move he revealed the Athletic Association is planning is the expansion and modernizing of the stadium bleachers. "This would have been

Varied Pool Program

Mac McCutcheon is looking forward to a great intercollegiate sports revival which will draw its material from the intramural program he is so proud oi. "Look at this year," he exclaimed Wednesday. "Nine hundred men competed in indoor track alone. And many of them broke records. The quality of our swimming team too is away up."
"Warren Stevens," he said, "should have a good nucleus for himself and his corns of coaches to werk with after.

his corps of coaches to work with after the war" But Mac said he has really no clear idea of what the future holds for Varsity sports. He believes that there will be little increase in com-petition but that the quality of play will be result increase.

will be greatly improved.

"The trend," Mac said, "will be toward more instruction in intramural sports." If this plan were carried out each potential player in every sport would receive instruction on a similar scale to that which is now given in boxing, wrestling, fencing, and track 'Intramural sport," he said, "is now at

Have a Coca-Cola=Eto zdorovo ... or how to make foreign flyers your friends To our Russian and American allies it's good news to see our fighting planes pouring out of our plants. And it's good to see our flying friends respond to the everyday Canadian invitation Have a "Coke." It says We're with you. Coca-Cola is as welcome to those from Moscow or Manhattan as it is in Edmonton. And in your home, nothing is more welcome than Coca-Cola from your own refrigerator. Coca-Cola stands for the pause that refreshes—a global high-sign of friendliness.

Graham Polls Top Vote For Hockey All-Stars

Here at last is the All-Star team honors have gone where they are best picked from among the best the Intra-mural Hockey League had to offer this year. The judge and jury for the event deserved.

But now that the two teams have been

consisted of seven team managers who themselves? Someone suggested that were interested enough to exert themselves? Someone suggested that elves (sometimes with a little prompting) and shuffic over to the other states of themselves. of Intramural refs, and a very illiterate and blind sports writer who repeatedly could put a pretty fair team on the ice misspells peoples' names and makes a too. There's Maclean, O'Neil, Dunmess of details, data, and what have you. Hap, Doyle, Murray, Ball and quite a two points were awarded for every choice for the first team and one for each second team selection.

Registers.

each second team selection.

The first team is as follows: Goal—
Bryans, Sr. Meds (12); Right Defence—
Wade, U.C. (13); Left Defence—
Howson, Army (11); Centre—Brownrioge, Jr. S.P.S. (14); Right Wing—
Graham, U.C. (17); Left Wing—Lawsen, Forestry (13).

The second team shows: Goal—Mc-Donough, Jr. S.P.S. (10); Right De-Fence—Callahan, Sr. Meds (6); Left defence—Eain, Jr. S.P.S. (10); Centre —Cooper, Vie (5); Right Wing— Crassweller, Sr. Meds (10); Left Wing— Nesbitt, U.C. (11).

Others that received mention were Skinner, U.C. with a first and second team selection to his credit, and Hurley, St. Mike's on one first team, for goal: MacMillan, Sr. Meds (4), Shand, Sr. S.P.S. (3), Hart, U.C. (3), Midghall, St. Mike's (2), Clare, Sr. S.P.S. (1), Kurylnk, U.C. (1), for defence; Short of Army with two second team choices, and Bremner of U.C. with one, for centre; Andison, Jr. S.P.S. on two second teams and Givens, U.C., Upper, Sr. S.P.S., and Castaldi, Dents, each one for right wing; and Cole of Sr. Meds the only other choice for left wing with three second team berths. So there it is. If a few more of the team managers had put themselves out a bit and sent in their selections it might have turned out a little differently since a couple of the positions were really close. But on the whole the Others that received mention were

selves (sometimes with a little prompt-ling) and shuffle over to the office to up of the fellows who are going to the hand them in, one of the better class Unversity but are playing for pro and of Intramural refs, and a very illiterate commercial teams. These "pro" players

Registrar Announces Openings in Agriculture

The Dominion Department of Agriculture has openings for agricultural assistants, Mr A. B. Fennell, Registrar of the University, announced yesterday.

The positions are open to University undergraduates who have been declared available by the Wartime Bureau of Technical Personnel, and to graduates.

Applicants should have specialized in

Applicants should have specialized in the respective branch of science, agricultural economics, commerce, eco-aomics, agronomy, field husbandry, mousehold science, or related subjects.

The majority of these positions are for continuous employment, paying from \$1,140-\$1,800 plus bonus, but a few are for short term summer employment of probably not more than six months duration.

Applications and questionnaires may

Dancing to the latest "Hit" tunes, arranged in the distinctive style of Horace Lapp and his Orchestra, will give you a "lift" and help to relieve the tension and cares of the day.

Any time's SHOPPING TIME!

THEY'RE PRETTY, they're smart and they tell the story of Spring, 1944. Those suits at Northways' third floor Junior Miss Department are arriving in soft colours, bright and pretty as a May day, to show you just how charming you can look if you set your mind to it. Softly tailored or in classic plain lines, they are above any with a northway reaches with a precluder way. and they tell the story of Spring, 1944.
Those suits at Northways third floor
Junior Miss Department are arriving in
soft colours, bright and pretty as a May
day, to show you just how charming you
can look if you set your mind to it.
Softly tailored or in classic plain lines,
they are chosen with a particular eye to
the requirements of the Colleg girl,
now and later. In these days when a
good suit is practically an all-year-round
proposition you can get plenty of the
right sort of wear from a well chosen
two-piecer, and, while the choice is at
its best now is the time to shop for it

CHARMING IS THE WAY you'll
look, confident you'll have every reason
to feel, in one of those veree veree cor-

CHARMING IS THE WAY you'll look, confident you'll have every reason to feel, in one of those verce veree correct Fairweather coats for spring. Semi-dressmaker styles, in beauty-flattering wool crepes, they range in sizes from 10 for the petite figure up to 20 if you've a shape to be reckoned with. You'll fall for the new belted officer's coat, defily combining softness of line with a mili comoning softness of tine twith a mili-tary swagger, comes in soft flees in camel beige, green, cocoa or red. These and a good variety of other top news on the coat mart, are a popular collection on Fairweather's Main Floor.

WHAT WITH SPRING IN THE WHAT WITH SPRING IN THE air and one thing and another, it's wise to make your reservation for the King Eddy's The Dansont as early in the week as possible. Two hours of the best afternoon's dancing in this or any other town, with Norm Harris and the boys saying it the smooth way is bound to attract a bigger and bigger crowd these Saturday P.M.'s. Couvert charge is only one dollar, with the price of tea extra.

NOT AS PRETTY as an artist con paint you, but prettier, that should be the oim of a wise girl. There's some-thing very lovely about a fresh some-thing very lovely about a fresh some-skin, something that even an artist can't reproduce. First in the category of good grooming comes a clean smooth com-plexion. Du Barry Cleansing Cream is a good freshener ond cleaner, digs out the dirt and keeps the skin soft. Grand for rough hands too.

IF YOU CAN'T AFFORD a lot of spending to keep up with the glamour magazines why not do it the subtle way? Why not go into a huddle with one of the Evangeline salesgirls and let her advise you how to build up a basic suit to the glamour brackets. They've a raft of little tricks for vitamizing a costume ranging from frilly neck pieces to the smartest in handbags and accessories. Slacks for study are also an Evangeline item just now, and they've plenty of the best ideas in tailored shirtwaists and blouses. Flower pretties too, to garnish your lapel. English fabric gloves 1.25 to 1.50, doeskin, white or natural 1.99, pigtex, the long wearing, 1.99 and 2.50.

FOR THAT TWEEDY LOOK, as Scotch as Highland Glens, look at Simpson's Glen Har Tweeds, those fine ADVERTISERS quality wool tweeds which ore soft, light in weight, wonderfully rugged when it comes to wear and come to you direct from Scotland. They're admirably direct from Scotland. They're admirably coats, from Corlisle, an the Borders. while to these oll-year occasion suits, to come in small checks and Glen checks mous Lintons lives on in coat classies which easily match with accessories. It had hove a timeless, tireless smarness which easily match with accessories for the women who wears her cluthes saits is worthy of their long-lived Suits and coats on the Third Floor, fobric. Sizes 12 to 20, and the price Simpsan's.

Survey of English Books Made For Grad. School

A survey of the University Library's needs in the field of English literature which has been harassing members of that department is a preliminary to a more general survey in the departments more general survey in the departments of all the humanities, Dr. H. J. Cody, President of the University, has informed The Varsity. The purpose of the surveys is to prepare for the post-war development of the University's School of Graduate Studies. A recent survey of Canadian libraries showed that only those of MeGill Line.

showed that only those of McGill Uni-versity and the University of Toronto were adequate for graduate work. Dr. were adequate for graduate.

Cody says that help is needed to extend the library equipment on the side of the humanities. The survey will provide a basis for purchases once that help is obtained.

49.50. Look at the Linton Tweeds in

hither and yon

Sporting an alleged misprint (though we diagnose a diabolical typesetter), the U. of Sask Sheaf comes out with a courtesy card reading, "The friends of (deleted by censor) will be glad to hear

And down at Boston U. there's a crucial situation simmering because the co-eds have been forbidden to wear slacks, dungarees, or riding togs on the campus except when riding. Giddyap, horsey, gotto get to that lecture.

Tother day when a staffer of ours went shopping in uniform the girl be-bind the counter seemed to be paying too much attention for a dime pur-chase. Finally she asked, puzzled-like, "Do you mind if I ask you what U.A.T.C. stands for?"

When he enlightened her, her brow darkened. "Oh," she breathed, disap-pointed, "I thought you were one of our allies."

off copies of The Varsity?

off copies of The Varsity?

Now it can be told. The other week we found a torn half of your favorite morning paper lying in the library, and scribbled in blue ink along the margin twould be nice to treat them to a brandnew film — containing the lyrics of patriotic songs, no less—so the boys could join in a sing-song.

off copies of The Varsity?

Now it as be told. The other week we found a torn half of your favorite morning paper lying in the library, and scribbled in blue ink along the margin was the revealing soul-picture:

"Mind—finesse, geometry.

"Truth—heart leads to intuition, and reason leads to maths.

"She loves me."

NOW YOU KNOW.

SHADES OF LEAP YEAR DEPT. So the screen lit up with the words uring the recent cooler days a strolling to "White Cliffs of Dover," divided into

think."

With emphasis the other corrected, "Don't be silly, they're from St. Mike's.

The Wycliffe men don't wear anything."

* * *

A certain don at a houseparty, while making the rounds about one ayem or so to see that all the young gallants had left, found one tardy soul still enhad left, found one tardy soul still enjoying the hospitality of the house, and gently intimated he should leaves. He eyed her stonily. "Young man, I'm the don," she ejaculated.

And sitting down imperturbably he replied, "P'm the sunset."

What do students do with their cast-off copies of The Varsity?

S.A.C. To Issue Permits For Summer Employment

The Students' Administrative Council has undertaken to carry out the following regulations laid down by National Selective Service in regard to students desiring summer employment:

- (1) ALL TORONTO students who were NOT registered with Selective Service in Toronto last year must fill out Forms 701, male, or 703, female, as well as the S.A.C. Employment card, in the S.A.C. office,
- (2) All TORONTO students who WERE registered with Selective Service last year must sign list in S.A.C. office indicating desire for employment
- (3) OUT-OF-TOWN students who desire employment in their home towns may apply through their local Selective Service. Those who desire employment in Toronto will follow the procedure outlined in (1) or in (2)
- (4) No "open permits" to seek employment will be issued either to women as long as Selective Service has unfilled orders from employers in essential industry. All permits will refer the student to a specific employer.
- (5) No permit to take employment will be issued prior to SEVEN days before the student is ready to take the position, but application may be made in the S.A.C. office at any time after April 1st.

Technical Personnel

Students in the Faculty of Applied Science and Engineering are registered through the Wartime Bureau of Technical Personnel.

Students registered in the following courses are eligible to receive Form 140 permitting them to seek employment anywhere in Canada under the regulations governing Technical Personnel:

1. Forestry.

2. Arts—Honour Courses, Groups C or D.

Pass or General Courses, taking at least three subjects from the Mathematics and Science options.

A permit for each student registered in the above courses who has not already obtained same, will be available after March 20 at the STUDENTS' ADMINISTRATIVE COUNCIL Office, Hart House.

A supplementary list (list no. 2) containing particulars of additional summer jobs available, has been received from the Wartime Bureau of Technical Personnel.

Copies of this list may be seen in the Registrar's Office, Simone Hall; the Copies of this list may be seen in the Registrar's Office, Simone Hall; the Copies of this list may be seen in the Registrar's Office, Simone Hall; the Copies of this list may be seen in the Registrar's Office, Simone Hall; the Copies of the Registrary Society Office, Registering Society Office,

Faculty Office, Mining Building; The Engineering Society Office, Engine Building; and the I, II and III Year Drafting Rooms.
